P R E F A C E.

THE power by which we recall past scenes, the rapidity with which they are brought in review before us, the faculty by which we can "range o'er creation," and dwell upon the past and future, demonstrates that man was indeed formed in the image of his Creator, and destined for immortality. By the contemplation of the past, we feel our span of existence extended: we enter into the thoughts, hopes, and aspirations of generations before us, and in such moments hold communion with the departed spirits of antiquity.

Every thing relating to the history of the "Pilgrim Fathers," is worthy of preservation. "The Puritans," says a writer in no wise partial to them, "were the most remarkable body of men, perhaps, which the world has ever produced.....They were men whose minds had derived a peculiar character from the daily contemplation of superior beings and eternal interests. Not content with acknowledging in general terms an over ruling providence, they habitually ascribed every event to the will of the Great Being, for whose power nothing was too vast, for whose inspection nothing was too minute. To know him, to serve him, to enjoy him, was with them the great end of existence. They rejected with contempt, the ceremonious homage which other sects substituted for the homage of the soul.....On the rich and the eloquent, on nobles and priests, they looked down with contempt: for they esteemed themselves rich in a more precious treasure, and eloquent in a more sublime language; nobles by the right of an earlier creation, and priests by the imposition of a mightier hand!" These were the men to whom the world owes the preservation of civil and religious liberty, their enemies being judges; and it was men of this stamp that were the fathers of Connecticut.

Though small in territorial extent and population, Connecticut is second to none of her sister states in the virtue, genius and enterprise of her sons. Considering the amount of her population, she has furnished a large proportion of distinguished men in almost every department of life, and some of the most powerful states in this Union are largely indebted to her for the elements of their greatness and prosperity.

The early history of Connecticut, in its various parts, has been ably written by Dr. Trumbull, the venerable historian of his native state. To this work the author is deeply indebted, as he is also to the "Gazetteer of Connecticut and Rhode Island," by John C. Pease and John M. Niles, Esqs., a work of much labor and merit. For the account of the towns in Middlesex County, "Field's Statistical Account" has furnished much valuable information. The extracts from the most ancient newspapers were taken from files of the New Haven journals, the earliest and only copies, it is believed, that are now in existence. These journals are in the valuable library left by the late Col. William Lyon, a distinguished antiquarian, and are now in possession of his son, William Lyon, Esq. a gentleman to whom the compiler feels himself under lasting obligations. To the various gentlemen in different parts of his native state, who have furnished information for this work, the author would here return his grateful acknowledgments.

It may be thought, perhaps, by some, that an apology ought to be made for inserting many things contained in this book: some things may be thought too trivial, others too marvelous, to be recorded. With regard to the first, it ought to be borne in mind, that many things which at the first sight may appear to us to be of little moment, may hereafter be deemed of much importance. With regard to the latter objection, it may

be observed, that the history of any people may be considered as defective, which does not give an account of their religious belief and opinions, &c. however erroneous. Although in this age most of us may smile at what we consider the superstitions and weaknesses of our forefathers, yet it may be well to reflect that Sir Matthew Hale, Dr. Johnson, and others, men of the greatest intellect the world ever produced, lie under the same imputations. Compared with these men, many of those who affect to smile at their opinions are but mere children in understanding.

The numerous engravings interspersed through this work, were (with five or six exceptions) executed from drawings taken on the spot, by the author of this work. Before deciding upon the correctness of these representations, he wishes his readers to consider that the appearance of any place will vary considerably as it is viewed from different points: thus, a *north* view will appear quite different from one taken at the *south*. A person not being used to see a place from the point from which the drawing is taken, it may not at first sight be readily recognized. Before any view is condemned as being incorrect, it will be necessary, in order to form a correct judgment, to stand on the place from whence the drawing was made.

In giving the notices of distinguished individuals, a limited number only could be inserted. In some instances, perhaps, the information obtained respecting some towns may have been defective. The history of some important towns may apparently not have received that attention to which they are entitled: the failure of obtaining the desired information, after the attempt was made, must be the apology.

New Haven, 1837.

J. W. B.

AMID such a variety of facts, names and dates, it is not to be expected but that some mistakes and omissions may occur. The following is a list of all which have as yet been discovered.

Glastenbury, page 93, for Hanahbuke read *Kanahbuke*, sometimes spelt Kanawbuck: Houksett should be *Konkssett*, sometimes spelt Conksett.

Derby, page 200, for 20 or 30 rods below the bridge, read *about one mile*, &c.

Groton, page 309. *Samuel Scabury*, the first bishop of the Protestant Episcopal Church in the United States, was born in Pequonnuc, a small village in this town, about three or four miles eastward of New London. He graduated at Yale College in 1751. He studied theology in Scotland and in 1753 obtained orders in London. He was consecrated a bishop in Scotland, by three non-juring bishops in or about 1784; and returned to New London, where he discharged the duties of his office till his death. (See page 282.)

Groton, page 309, for brother of, read *uncle to*.

Waterford, for Gardiner, read *Gardiners*.

CONNECTICUT

Scale of Miles.

CONNECTICUT.

OUTLINE HISTORY.

THE precise time when the country now comprising Connecticut* was first visited by Europeans, cannot now be ascertained. It is probable, however, it was first visited by the Dutch, soon after they began their settlement at New Amsterdam, now New York, in 1615. Whether the Dutch at New Netherlands, or the people at New Plymouth, first discovered the river Connecticut, it is not now known. Both the Dutch and English claimed to be the first discoverers, and both purchased and made a settlement of the lands upon it nearly at the same time. In 1633, William Holmes and others of the Plymouth colonists, having prepared the frame and other materials for erecting a house, put them on board a vessel and sailed for Connecticut. When he came into the river, he found that the Dutch had got in before him, proceeded up the river, made a light fort, and planted two pieces of cannon on Dutch Point in Hartford. Although the Dutch threatened to fire upon him, Holmes proceeded up the river, landed on the west side of the Connecticut, near the mouth of the little river in Windsor. Here he erected his house, and fortified it, being it is said the first house erected in Connecticut.

In 1635, a number of people from Massachusetts came into Connecticut, and made preparations for settlements at Windsor, Hartford, and Wethersfield. In October of the same year, about sixty men, women and children, came through the wilderness from Massachusetts to Connecticut river, and arrived at the places of their destination on the 9th of November,† after a journey of fourteen days. In November, Mr. John Winthrop, who had a commission from Lord Say and Seal, Lord Brook and others, sent a party of twenty men, in a small vessel of about 30 tons, from Massachusetts, took possession of the mouth of the Connecticut, and thus prevented the Dutch from ascending the river.

The first court in Connecticut was holden at Hartford, April 26th, 1636. It consisted of Roger Ludlow, Esq., Mr. John Steel, Mr. Wm. Swain, Mr. Wm. Phelps, Mr. Wm. Westwood, and Mr. Andrew Ward. Mr. Ludlow had, in 1631, been chosen lieutenant governor of Massa-

* Connecticut derives its name from the river by which it is intersected, called by the natives *Quonektacut*; (Hoyt's Indian Wars, &c. p. 37.) This word, according to some, signifies *the long river*; it has, however, been stated by others, that the meaning of the word is, *River of Pines*, in allusion to the forests of pines that formerly stood on its banks.

† Dr. Hawes' Centennial Address, 1835.

chusetts colony. The Connecticut planters at first settled under the general government of Massachusetts, but they held courts of their own, which consisted of two principal men from each town. On great occasions, these were joined with committees, (as they were called,) consisting of three men from each town. These courts had the power of transacting the common affairs of the colony; they also had the power of making war and peace, and forming alliances with the natives within the colony.*

There were three courts held in 1636; the principal business done in them related principally to their military affairs, as "their circumstances were such, that it was judged necessary for every man to be a soldier." The first court was held in Hartford, as has been related; the second was holden at Windsor, June 7th; the third at Wethersfield, on the 1st of September.

In the month of June, 1636, Messrs. Hooker and Stone, with their company, came through the wilderness to Hartford. There were, at the close of this year, says Dr. Trumbull, about two hundred and fifty men in the three towns on the river, and there were twenty men in the garrison at the entrance of it, under the command of Lieut. Gardiner. The whole consisted, probably, of about 800 persons, or of one hundred and sixty or seventy families.

The year 1637 is memorable in the history of Connecticut, on account of the Pequot war and the destruction of that warlike tribe. In the year 1634 a number of Indians, in confederacy with the Pequots, murdered Capt. Stone and Capt. Norton, with the whole of their crew, consisting of eight men, and plundered and sunk the vessel. Captain Stone was from the West Indies, and came into Connecticut river, with a view of trading at the Dutch House. In 1636, Capt. Oldham was killed at Block Island, where he went to trade: several of the murderers fled to the Pequots and were protected by them, and were therefore considered as the abettors of the murder.

The murder of Capt. Oldham induced Massachusetts to send ninety men, under Capt. Endicott, to reduce the Indians on Block Island, and then to demand of the Pequots the murderers of Capt. Stone and his crew, and a thousand fathoms of wampum for damages, and a number of their children as hostages. Capt. Endicott sailed from Boston Aug. 25th, and landed on the island, but the Indians secreted themselves in swamps and other places, where they could not be found. He however destroyed about sixty wigwams, and about 200 acres of corn. The party then sailed to Pequot, now New London harbor, and demanded satisfaction for the murders they had committed. In a few hours, nearly three hundred Pequots collected upon the shore, but after having fully learned the object of the visit they withdrew, and instead of treating with the English, they shot their arrows at them. He landed his men on both sides of the harbor, burnt their wigwams, and killed one or two Indians. This expedition gave great dissatisfaction to the Connecticut settlers, as nothing had been done to subdue, but enough to exasperate, a haughty and warlike enemy.

* Dr. Trumbull.

The Pequot prince Sassacus and his captains were men of haughty and independent spirits; they had conquered and governed the Indian tribes around them without control. They viewed the English as intruders, and they were determined to extirpate, or drive them from the country. For this purpose they endeavored to unite the Indians against them: they spared no pains to make peace with the Narragansetts, and to engage them against the English. The governor of Massachusetts, to prevent a union between these tribes, sent for Miantonimoh, their chief sachem, with some other chief men of the nation, who came to Boston, and made a treaty of peace with the English.

The Pequots continued hostile during the year 1636, and killed a number of persons in various places, and during a greater part of the winter following kept the fort at Saybrook in a state of siege. When the spring came on, they became still more troublesome. They waylaid the roads and fields, and kept the whole colony in a state of alarm. The settlers could neither hunt, fish or cultivate their fields, but at the peril of their lives, and their prospects were dark and gloomy in the extreme. In this important crisis, a court was summoned at Hartford, on Monday the 1st of May. As they were to deliberate on matters which concerned the very existence of the colony, the towns for the first time sent committees. The magistrates were Roger Ludlow, Esq. Messrs. Wells, Swain, Steel, Phelps, and Ward. The committees were Messrs. Whiting, Webster, Williams, Hull, Chaplin, Talcott, Geffords, Mitchell, and Sherman. The court, considering that the Pequots had killed nearly thirty of the English, determined that offensive war should be immediately carried on against them. For this purpose they voted that 90 men should be raised forthwith; 42 from Hartford, 30 from Windsor, and 18 from Wethersfield.

The report of the murders committed by the Pequots, roused the other colonies to spirited exertions against the common enemy. Massachusetts determined to send 200, and Plymouth 40 men, to aid Connecticut in prosecuting the war. Capt. Patrick, with 40 men, was sent forward before the other troops from Massachusetts and Plymouth could be ready to march, in order to make a junction with the soldiers from Connecticut.

On Wednesday the 10th of May, 1637, the troops of Connecticut fell down the river to Saybrook, on board a pink, a pinnace, and a shallop. Their force consisted of 90 Englishmen, commanded by Capt. John Mason, and accompanied by the Rev. Mr. Stone as chaplain. They were also accompanied by Uncas, sachem of the Mohegans with about 70 friendly Indians. The troops arrived at Saybrook fort on Monday the 15th. As there was some delay in passing down the river, the Indians desired to be set on shore, promising to join the English at Saybrook. On their way they fell in with about 40 of the enemy, near the fort, killed seven and took one prisoner, whom they put to death in the most barbarous manner. On the 19th of May, Capt. Mason sailed for the Narragansett country, where he arrived the next day. Being joined by 200 Narragansetts, he proceeded to the Pequot country, and on the 26th of May attacked the Pequot fort by surprise. This fort

was situated in the present town of Groton. The reader is referred to the history of that town, for an account of the destruction of the fort and the events which followed.

The following address to the soldiers who were engaged in the expedition against the Pequots, is generally ascribed to the Rev. Mr. Hooker. Be this as it may, it is a valuable specimen of the eloquence of the times, and worthy of preservation. It is found in the "Wonder-working Providence of Zion's Saviour in New England," printed in London, in 1658: the following is copied from that work, the orthography being retained. The narrator says—"the souldiers arriving in safety at the towne of Hartford, were encouraged by the reverend ministers there with some such speech as followes."

"Fellow-souldiers, Country-men, and Companions in this wilderness worke, who are gathered together this day by the inevitable providence of the great Jehovah, not in a tumultuous manner, hurried on by the floating fancy of every high hot-headed braine, whose actions prove abortive, or if any fruit brought forth, it hath bene rape, theft, and murder, things inconsistent with nature's light, then much lesse with a Souldier's valour; but you, my deare hearts, purposely pickt out by the godly grave Fathers of this government, that your prowess may carry on the work, where there justice in her righteous course is obstructed, you need not question your authority to execute those whom God, the righteous judge of all the world, hath condemned for blaspheming his sacred Majesty, and murdering his Servants: every common Souldier among you is now installed a Magistrate; then shew yourselves men of courage: I would not draw low the height of your enemies' hatred against you, and so debase your valour. This you may expect, their swelling pride hath laid the foundation of large conceptions against you and all the people of Christ in this wilderness, even as wide as Babel's bottome. But, my brave Souldiers, it hath mounted already to the clouds, and therefore it is ripe for confusion; also their crueltie is famously knowne, yet all true bred Souldiers reserve this as a common maxime, cruelty and cowardice are unseparable companions; and in brieve, there is nothing wanting on your enemies' part, that may deprive you of a compleat victory, onely their nimbleness of foot, and the unaccessible swamps and nut tree woods, forth of which your small numbers may intice, and industry compell them. And now to you I put the question, who would not fight in such a cause with an agile spirit, and undaunted boldnesse? Yet if you look for further encouragement, I have it for you; riches and honor are the next to a good cause eyed by every Souldier, to maintain your owne, and spoile your enemies of theirs; although gold and silver be wanting to either of you, yet have you that to maintaine which is farre more precious, the lives, libertyes, and new purchased freedomes, priviledges, and immunities of the indereared servants of our Lord Christ Jesus, and of your second selves, even your affectionated bosome mates, together with the chiefe pledges of your love, the comforting contents of harmlesse prating and smiling babes; and in a word, all the riches of that goodnesse and mercy that attends the people of God in the enjoyment of Christ, in his ordinances, even in this life; and as for honour, David was not to be blamed for enquiring after it, as a due recompence of that true valour the Lord had bestowed on him: and now the Lord hath prepared this honour for you, oh you couragious Souldiers of his, to execute vengeance upon the heathen, and correction among the people, to binde their Kings in chaines and Nobles in fetters of Iron, that they may execute upon them the judgments that are written! this honour shall be to all his Saints, but some of you may suppose death's stroke may cut you short of this: let every faithful Souldier of Christ Jesus know, that the cause why some of his endeared Servants are taken away by death in a just warre (as this assuredly is) it is not because they should fall short of the honours accompanying such noble designes, but rather because earth's honours are two scant for them, and therefore the everlasting Crown must be set upon their heads forthwith, then march on with a cheerfull Christian courage in the strength of the Lord, and the power of his might, who will forthwith inclose your enemies in your hands, make their multitude fall under your warlike weapons, and your feet shall soon be set on their proud necks."

The Pequot war, though so signally successful, was severely felt by the inhabitants; the consequence was a scarcity and debt, which it was

extremely difficult to pay. The Court were obliged to impose a tax of £550, to be immediately collected, to defray the expenses of the war. This appears to have been the first public tax in Connecticut. As the inhabitants were much distressed by the want of corn, a committee was sent to an Indian settlement called Potomcock, since Deerfield, where they purchased such quantities, that the Indians came down to Windsor and Hartford with fifty canoes at one time.* This was considered as a great deliverance by pious people at that period.

The pursuit of the Pequots to the westward led to an acquaintance with the lands on the sea-coast, from Saybrook to Fairfield. It was reported to be a very fine country. This favorable report induced Mr. Eaton, Mr. Hopkins, the Rev. Mr. Davenport, and others, who emigrated from London to Massachusetts, in 1637, to think of this part of the country as the place of their settlement. Their friends in Massachusetts, extremely unwilling to part with a company of such respectability, endeavored to dissuade them from their purpose. Influenced, however, by the inviting prospects which the country promised, and flattering themselves that they should be out of the jurisdiction of the other colonies, and that they should be able to form such a government as would be most agreeable to them, they determined to proceed. Accordingly, on the 30th of March, 1638, they sailed from Boston for Quinipiac, now New Haven, and laid the foundation of a flourishing colony.

The inhabitants of Hartford, Windsor and Wethersfield, finding themselves without the limits of the Massachusetts patent, formed themselves into a distinct commonwealth. On the 14th of January, 1639, all the free planters convened at Hartford, and adopted a constitution of civil government. The following is the preamble and constitution adopted at this time.

“Forasmuch as it hath pleased the Almighty God, by the wise disposition of his divine providence, so to order and dispose of things, that we the Inhabitants and residents of Windsor, Hartford and Weathersfeild, are now cohabiting, and dwelling in and upon the river of Conneticut, and the lands thereto adjoining, and well knowing when a people are gathered together, the word of God requires, that to meinteine the peace and union of such a people, there should bee an orderly and decent governe-ment established according to God, to order and dispose of the affaires of the people at all seasons as oecassion shall require; doe therefore associate and conjoine ourselves to bee as one publique STATE or COMMONWEALTH; and doe for ourselves and our successors, and such as shall bee adjoined to us at any time hereafter enter into combination and confederation together, to meinteine and preserve the libberty and purity of the Gospell of our Lord Jesus, which we now profess, as also the discipline of the churches, which, according to the truth of the said Gospell, is now practised amongst us; as also in our civill affaires to be guided and governed according to such lawes, rules, orders, and decrees, as shall bee made, ordered, and decreed, as followeth:

“1. *It is ordered, sentenced, and decreed,* That there shall bee yearly two Generall Assembly's or Courts, the one the second Thursday in Aprill, the other the second Thursday in September following: The first shall be called the Courte of Election, wherein shall bee yearly chosen, from time to time, so many magistrates and other publique officers, as shall bee found requisite, whereof one to be ehosen Governor for the year ensuing, and until another bee chosen, and no other magistrate to bee chosen for more then one yeare; provided always, there bee six chosen besides the Governor, which being chosen and sworne, according to an oath recorded for that purpose, shall have power to administer justice according to the lawes here established,

* Mason's History.

and for want thereof, according to the rule of the word of God; which choyce shall bee made by all that are admitted Freemen, and have taken the oath of fidelity, and do cohabit within this jurissdiction, having beene admitted inhabitants by the major parte of the town where they live or the major parte of such as shall bee then present.

"2. *It is ordered, sentenced, and decreed,* That the Election of the aforesaid magistrate shall bee on this manner; every person present and qualified for choyce, shall bring in (to the persons deputed to receive them) one single paper, with the name of him written in it whom he desires to have Governor, and hee that hath the greatest number of papers shall bee Governor for that yeare: And the rest of the Magistrates or publique officers, to be chosen in this manner; the Secretary for the time being, shall first read the names of all that are to bee put to choyce, and then shall severally nominate them distinctly, and every one that would have the person nominated to bee chosen, shall bring in one single paper written uppon, and hee that would not have him chosen, shall bring in a blanke, and every one that hath more written papers than blanks, shall bee a magistrate for that yeare, which papers shall bee received and told by one or more that shall bee then chosen, by the Courte, and sworn to bee faithfull therein; but in case there should not bee six persons as aforesaid, besides the Governor, out of those which are nominated, then hee or they which have the most written papers, shall bee a Magistrate or Magistrates for the ensuing yeare, to make up the aforesaid number.

"3. *It is ordered, sentenced, and decreed,* That the Secretary shall not nominate any person, nor shall any person bee chosen newly into the Magistracy, which was not propounded in some General Courte before, to bee nominated the next election: And to that end, it shall be lawfull for each of the Townes aforesaid, by their Deputyes, to nominate any two whoe they conceive fit to be put to election, and the Courte may add so many more as they judge requisite.

"4. *It is ordered, sentenced, and decreed,* That no person bee chosen Governor above once in two yeares, and that the Governor bee always a member of some approved congregation, and formerly of the magistracy, within this Jurissdiction, and all the Magistrates, ffreemen of this Commonwealth; and that no Magistrate or other publique Officer, shall execute any parte of his or their office before they are severally sworne, which shall bee done in the face of the Courte, if they bee present, and in case of absence by some deputed for that purpose.

"5. *It is ordered, sentenced, and decreed,* That to the aforesaid Courte of Election, the severall Townes shall send their Deputyes, and when the Elections are ended they may proceed in any publique service, as at other Courtes; also, the other General Courte in September, shall bee for making of lawes and any other publique occasion, which concerns the good of the Commonwealth.

"6. *It is ordered, sentenced, and decreed,* That the Governor shall, either by himselfe or by the Secretary, send out summons to the Constables of every Towne, for the calling of these two standing Courts, one month at least before their severall times: And also, if the Governor and the greatest parte of the magistrates see cause, uppon any specciall occasion, to call a General Courte, they may give order to the Secretary so to doe, within fourteene dayes warning, and if urgent necessity so require, uppon a shorter notice, giving sufficient grounds for it, to the Deputyes, when they meete, or else, bee questioned for the same; and if the Governor and major parte of the Magistrates, shall either neglect or refuse, to call the two General standing Courts, or either of them; as also, at other times, when the occasions of the Commonwealth require; the Freemen thereof, or the major parte of them, shall petition to them so to doe, if then it bee either denied or neglected, the said Freemen or the major parte of them, shall have power to give order to the Constables of the severall Towns to doe the same, and so many meete together and choose to themselves a moderator, and may proceed to doe any act of power which any other General Courte may.

"7. *It is ordered, sentenced, and decreed,* That after there are warrants given out for any of the said General Courts, the Constable or Constables of each Towne shall forthwith give notice distinctly to the inhabitants of the same, in some publique Assembly, or by going or sending from howse to howse, that at a place and time, by him or them limited and sett, they meete and assemble themselves together, to elect and choose certaine Deputyes, to bee at the general Courte then following, to agitate the affaires of the Commonwealth; which said Deputyes, shall bee chosen by all that are admitted inhabitants in the severall Towns and have taken the oath of fidelity; provided, that none bee chosen a Deputye for any General Courte which is not a Freeman of this Commonwealth: The aforesaid Deputyes shall bee chosen in manner following: Every person that is present and qualified as before expressed, shall bring the names of such written in severall papers, as they desire to have chosen, for that employment; and these three or foure, more or less, being the number agreed on to bee chosen, for that time, that have greatest number of papers written for them, shall be Deputyes

for that Courte; whose names shall be indorsed on the backside of the warrant and returned into the Courte, with the Constable or Constables hand unto the same.

"8. *It is ordered, sentenced, and decreed,* That Wyndsor, Hartford and Weathersfeild, shall have power, each Towne, to send foure of their Freemen as their Deputyes, to every Generall Courte, and whatsoever other Townes shall bee hereafter added to this Jurisdiction, they shall send so many Deputyes, as the Courte shall judge meete: a reasonable proportion to the number of Freemen, that are in the said Towns, being to bee attended therein; which Deputyes shall have the power of the whole Towne, to give their voates and allowance to all such lawes and orders, as may bee for the publique good, and unto which the said Towns are to bee bound: And it is also ordered, that if any Deputyes shall bee absent upon such occasions, as the Governor for the time being, shall approve of, or by the Providence of God, shall decease this life within the adjournment of any Courte, that it shall bee at the libbertye of the Governor to send forth a warrant, in such case, for supply thereof upon reasonable warning.

"9. *It is ordered, sentenced, and decreed,* That the Deputyes thus chosen, shall have power and libberty, to appoint a time and place of meeting together, before any Generall Courte, to advise and consulte of all such thinges as may concerne the good of the publique; as also to examine their owne Elections, whether according to the order; and if they or the greatest parte of them, finde any election to be illegall, they may seclude such for present, from their meetinge, and returne the same and their reasons to the Courte; and if it proove true, the Courte may fyne the party or partyes so intruding, and the Towne if they see cause, and give out a warrant to goe to a new election in a legall way, either in parte or in whole. Also the said Deputyes shall have power to fyne any that shall bee disorderly at their meeting, or for not coming in due time or place, according to appointment, and they may returne the said fyne into the Courte, if it bee refused to bee paid, and the Treasurer to take notice of it, and to estreite or levye as hee doth other fynes.

"10. *It is ordered, sentenced, and decreed,* That every generall Courte, (except such as through neglect of the Governor and the greatest parte of Magistrates, the Freemen themselves doe call,) shall consist of the Governor or some one chosen to moderate the Courte, and foure other Magistrates at least, with the major parte of the Deputyes of the severall Towns legally chosen, and in case the Freemen or the major parte of them, through neglect or refusall of the Governor and major parte of the Magistrates, shall call a Courte, it shall consist of the major parte of Freemen, that are present, or their Deputyes, with a moderator chosen by them, in which said Generall Courts, shall consist the Supreme power of the Commonwealth, and they onely shall have power to make lawes and repeale them, to graunt levyes, to admitt of Freemen, dispose of lands undisposed of, to severall Towns or persons; and also, shall have power to call either Courte or Magistrate, or any other person whatsoever into question, for any misdemeanor, and may for such cause, displace, or deale otherwise, according to the nature of the offence; and also may deale in any other matter that concerns the good of this Commonwealth, except election of Magistrates, which shall bee done by the whole body of Freemen; in which Courts the Governor or Moderator shall have the power to order the Courte, to give libbertye of Speech, and silence unreasonable and disorderly speaking, to put all things to voate, and in case the voate bee equall, to have the casting voice: But none of these Courts shall bee adjourned or dissolved without the consent of the major parte of the Courte. Provided, notwithstanding, that the Governor or Deputy Governor, with two Magistrates, shall have power to keepe a Particular Courte according to the lawes established: And in case the Governor or Deputy Governor bee absent, or some way or other incapable either to sitt or to bee present; if three Magistrates meete and chuse one of themselves to bee a Moderator, they may keepe a Particular Courte, which to all ends and purposes shall bee deemed as legall as though the Governor or Deputy did sitt in Courte.

"11. *It is ordered, sentenced, and decreed,* That when any Generall Courte, upon the occasions of the Commonwealth, have agreed upon any summ or summs of monye, to be levied upon the severall Townes within this Jurisdiction, that a Committee bee chosen, to sett out and appoint, what shall bee the proportion of every Towne to pay of the said levye; Provided the Committee bee made up of an equall number out of each Towne.*

* The eleven preceding sections were "voated" or enacted at a General Court, held Jan. 14th, 1638; and the provision following was added at the revision in 1650. This Constitution was copied from the original records in the Secretary of State's office: the ancient orthography is retained. For this, the author is indebted to a compilation of the earliest laws, &c. in Connecticut, published by Mr. Andrus of Hartford in 1830.

“Forasmuch as the free fruition of such liberties, immunities, priviledges, as humanity, civility and Christianity call for, as due to every man in his place and proportion, without impeachment and infringement, hath ever beene and ever will be the tranquillity and stability of Churches and Commonwealths; and the denyall or deprivall thereof, the disturbance, if not ruine of both:

“12. *It is therefore ordered by this Courte, and authority thereof,* That no man's life shall be taken away; no man's honor or good name shall be stained; no man's person shall be arrested, restrained, bannished, dismembred, nor any way punished; no man shall be deprived of his wife or children; no man's goods or estates shall be taken away from him nor any ways indammaged, under colour of law, or countenance of authority; unless it be by the vertue or equity of some express law of the Country warranting the same, established by a Generall Courte and sufficiently published, or in case of the defect of a law, in any perticular case, by the word of God.”

Agreeable to the Constitution, the freemen convened at Hartford on the second Thursday in April, 1639, and elected their officers for the year ensuing. JOHN HAYNES, Esq. was chosen Governor; Roger Ludlow, George Wyllys, Edward Hopkins, Thomas Welles, John Webster, and William Phelps, Esquires, were chosen Magistrates. Mr. Ludlow, the first of the six magistrates, was Deputy Governor. Mr. Hopkins was chosen Secretary, and Mr. Welles, Treasurer. The names of the deputies sent to this first general assembly, were Mr. John Steele, Mr. Spencer, Mr. John Pratt, Mr. Edward Stebbins, Mr. Gaylord, Mr. Henry Wolcott, Mr. Stoughton, Mr. Ford, Mr. Thurston Rayner, Mr. James Boosy, Mr. George Hubbard, and Mr. Richard Crab.

This year, an adjourned General Assembly incorporated the several towns in the colony, and vested them with power to transact their own affairs. It was enacted, that they should choose, from among themselves, three, five, or seven men, to be a court for each town. This court was appointed to sit once in two months, and determine all matters of trespass or debt not exceeding forty shillings. It was also ordained that every town should keep a public ledger, in which deeds, mortgages, &c. should be put on record. This was the origin of town privileges in Connecticut. Besides the courts in each town, there was a court of magistrates which held its session once in three months. This court appeared to possess all the authority and did all the business, which is now performed by the County and Superior Courts.

In 1642, the capital laws of Connecticut were nearly completed and put on record. The several passages on which they were founded, were particularly noticed in the statute. They were twelve in number; two more were added at a subsequent period. The following is a copy of these laws, excepting four which relate to unchastity.

“CAPITALL LAWS.

“1. If any man after legall conviction, shall have or worship any other God but the Lord God, hee shall be put to death. Deut. 13. 6.—17. 2.—Exodus 22. 20.

“2. If any man or woman be a Witch, that is, hath or consulteth with a familiar spirritt, they shall be put to death. Exodus 22. 18.—Levit. 20. 27.—Deut. 18. 10, 11.

“3. If any person shall blaspheme the name of God the ffather, Sonne or holy Ghost, with direct, express, presumptuous or highbanded blasphemery, or shall curse in the like manner, hee shall be put to death. Lev. 24. 15, 16.

“4. If any person shall commit any willfull murther, which is manslaughter committed upon malice, hatred or cruelty, not in a man's necessary and just defence, nor by mere casuality against his will, hee shall be put to death. Exodus 21. 12, 13, 14.—Numb. 35. 30, 31.

“5. If any person shall slay another through guile, either by poisonings or other such Devellish practice, hee shall be put to death. Exo. 21. 14.”

"10. If any man stealeth a man or mankinde, hee shall bee put to death. Exodu, 21. 16.

"11. If any man rise up by false wittness, wittingly and of purpose to take away any man's life, hee shall bee put to death. Deut. 19. 16, 18, 19.

"12. If any man shall conspire or attempt any invasion, insurrection or rebellion against the Commonwealth, hee shall bee put to death.

"13. If any Childe or Children above sixteene years old and of sufficient understanding, shall Curse or smite their naturall father or mother, hee or they shall bee put to death; unless it can bee sufficiently testified that the parents have beene very unchristianly negligent in the education of such children, or so provoke them by extreme and cruell correction that they have been forced thereunto to preserve themselves from death, maiming. Exo. 21. 17.—Levit. 20.—Ex. 21. 15.

"14. If any man have a stubborne and rebellious sonne of sufficient yeares and understanding, viz. Sixteene yeares of age, which will not obey the voice of his father or the voice of his mother, and that when they have chastened him will not hearken unto them; then may his ffather and mother, being his naturall parents, lay hold on him and bring him to the Magistrates assembled in Courte, and testifie unto them, that their sonne is stubborne and rebellious and will not obey their voice and Chastisement, but lives in sundry notorious Crimes, such a sonne shall bee put to death. Dent. 21. 20, 21."

In 1643, the colonies of Massachusetts, Plymouth, Connecticut, and New Haven, united into a confederacy, for their own mutual safety and welfare, and called themselves the "*United Colonies of New England*." Each colony was authorized to send two commissioners, to meet annually in September, first at Boston, then at Hartford, New Haven, and Plymouth. The commissioners were vested with plenary powers for making war and peace, and rules of general concern; especially, to regulate the conduct of the inhabitants towards the Indians, for the general defense of the country, and for the support and encouragement of religion. This union was of much importance to the New England colonies. It made them formidable to the Dutch and Indians, and it was one of the principal means of their preservation during the unsettled state and civil wars of the mother country.

At the General Court in April, 1644, a committee was appointed, consisting of the governor, deputy governor, and several others, to treat with George Fenwick, Esq. relative to the purchase of Saybrook fort, and all the buildings and lands in the colony which he, and the lords and gentlemen interested in the patent of Connecticut, might claim. The negotiation was successful, and the colony, in the whole, paid Mr. Fenwick £1,600 sterling, merely for the jurisdiction right, or for the old patent of Connecticut.

About this period, *tobacco* was coming into use in the colony; the following curious law was made for its regulation or suppression.

"TOBACCO.

"Fforasmuch as it is observed, that many abuses are crept in, and committed, by frequent taking of tobacco:

"*It is ordered by the authority of this Counte*, That no person under the age of twenty one years, nor any other, that hath not already accustomed himselfe to the use thereof, shall take any tobacco, untill hee hath brought a certificate under the hands of some who are approved for knowledge and skill in phisick, that it is usefull for him, and also, that he hath received a lycense from the courte, for the same.—And for the regulating of those, who either by their former taking it, have to their own apprehensions, made it necessary to them, or upon due advice, are persuaded to the use thereof:

"*It is ordered*, That no man within this colonye, after the publication hereof, shall take any tobacco, publiquely, in the street, highwayes, or any barne yards, or uppon training dayes, in any open places, under the penalty of six-pence for each offence

against this order, in any the particulars thereof, to bee paid without gainesaying, upon conviction, by the testimony of one witness, that is without just exception, before any one magistrate. And the constables in the severall townes, are required to make presentment to each particular counte, of such as they doe understand, and can evict to bee transgressors of this order."

Until the year 1648, the governors and magistrates appear to have served the people for the honor of it, and the public good. The general court granted the governor £30 annually. The same sum was granted to the deputy governor, who had presided the preceding year. These appear to have been the first salaries given to any civil officers in the colony, and to have been a compensation for the expense of the office, rather than for compensation for the service performed.

Mr. Ludlow had been desired, by the General Court, for several years successively, to make a collection of laws which had been enacted, and to revise and prepare a body of laws for the colony. In the year 1649, he finished the work, and a code was established at the session of the Assembly. Until this period, punishments, being left at the discretion of the courts, in many instances had been uncertain and arbitrary. In 1646, one Bartlett, for defamation, was sentenced to stand in the pillory during the public lecture, then to be whipped, pay £5, and suffer six months imprisonment. In the same year, one Turner, for the same crime, was sentenced to be whipped, and then imprisoned a month; at the month's end to go to the post again, and then to be bound for his good behavior. For violation of the Sabbath, there is an instance of imprisonment during the pleasure of the court. Unchastity between single persons was sometimes punished by setting the delinquent in the pillory, and by whipping him from one town to another.

In 1653, such were the injuries which had been sustained from the Dutch at New Netherlands, and their plotting and inciting the Indians against the English, that it was a year of great distress and alarm. The colonies of Connecticut and New Haven provided a frigate of ten or twelve guns, with forty men, to defend the coast against the Dutch, and to prevent Ninigrate and his Indians from crossing the Sound, in prosecution of his hostile designs against the Indians in alliance with the colonies. In the following year, 1654, the colony having received an order from Parliament to treat the Dutch as declared enemies, the Dutch house and lands at Hartford were seized for the benefit of the commonwealth.

In 1655, Governor Eaton finished the compilation of a code of laws for the New Haven colony. For his assistance, he was requested, by the General Court, to consult the Rev. Mr. Cotton's discourse on civil government in a new plantation, and the laws of Massachusetts. The laws having been examined and approved by the elders of the jurisdiction, they were presented to the General Court. They ordered that five hundred copies should be printed. The copy was sent to England to be printed, under the inspection of Gov. Hopkins. "He procured the printing of the laws at his own expense, and sent the number proposed, with some other valuable books, as a present. The laws were distributed to the several towns in the jurisdiction."

In 1661, Governor Winthrop of Connecticut was appointed agent of the colony, to go to England and present a petition to King Charles II. for the purpose of obtaining a patent. The governor was a man of address, and he arrived in England at a happy time for Connecticut. Lord Say and Seal, the great friend of the colony, had been particularly instrumental in restoring Charles to the throne of his father, and was now in high favor at court. The earl of Manchester, another friend of the puritans, was chamberlain of his majesty's household. Mr. Winthrop had an extraordinary ring, which had been given his grandfather by King Charles I. which he presented to the king. This, it is said, exceedingly pleased his majesty, as it had been once the property of a father most dear to him. Under all these favorable circumstances, the petition of Connecticut was presented, and was received with uncommon grace and favor. Upon the 20th of April, 1662, his majesty granted the colony his letters patent, conveying the most ample privileges, under the great seal of England.

The colony of New Haven was by the charter included within the limits of Connecticut. This gave great dissatisfaction to most of the inhabitants of New Haven colony. Their ministers and churches were universally against being united with Connecticut. Mr. Davenport and others of the colony were strong in the opinion, that all government should be in the church. No person in this colony could be a freeman unless he was a member of the church in full communion. But in Connecticut, all orderly persons, possessing a freehold to a certain amount, might be free of the corporation. The New Haven people were undoubtedly fearful that an union with Connecticut would mar the purity and order of their churches, and have a bad effect on the civil administrations. It was also a painful reflection, that after they had been at so much pains and expense to form a distinct commonwealth, that their existence as a separate people should cease, and their name be obliterated. After considerable trouble and difficulty, the two colonies of Connecticut and New Haven, at the general election, May 11th, 1655, united in one, and John Winthrop, Esq. was chosen governor.

On March 12th, 1664, King Charles II. gave a patent to his brother, the Duke of York and Albany, of several extensive tracts of land in North America, in which the lands on the *west side* of Connecticut river were included. After granting the patent, an armament was sent from England, under Colonel Richard Nichols, for the reduction of the Dutch possessions in America. Col. Nichols had a commission, not only for this purpose, but also for hearing and determining all matters of complaint and controversy between the New England colonies. After Col. Nichols had subdued New Netherlands, and given it its present name, *New York*, he, with his associates, appointed by the Crown, met with the agents appointed by Connecticut, and on the 30th of November, 1664, determined that the western boundary of Connecticut should be a line beginning on the east side of Momoronock creek or river, at the place where the salt water meets the fresh, at high water, and thence north northwest to the line of Massachusetts. The commissioners also determined the southern bounds of the colony of Con-

necticut to be the sea. By this decision, Connecticut lost all her possessions on Long Island. The granting of such extraordinary powers to Col. Nichols and his associates, awakened in the colonies a serious apprehension for their liberties.

Upon the pacification of the Dutch, the Duke of York took out a new patent from the king, dated June 29th, 1674, granting the same territory described in a former patent. Immediately after, he commissioned Major, afterwards Sir Edmund Andross, to be governor of New York and all his territories in these parts. Andross was a mere tool of the Duke, and a tyrant of the people. By virtue of the patent to the Duke of York, he laid claim to the lands on the *west side* of Connecticut river, notwithstanding the priority of the patent of Connecticut, and in violation of the agreement of 1664. To enforce his claims, he attempted in 1675 to take the fort at Saybrook; he was however defeated in this attempt, by the firmness and resolution of Capt. Bull.

In 1675, Philip, sachem of the Wampanogas, began the most destructive war ever waged by the Indians upon the infant colonies. Lest he should increase his power by an alliance with the Narragansetts, the English made a friendly treaty with them in July, 1675. But notwithstanding this, in December of the same year, it was discovered that they were secretly aiding Phhilip's party. This determined the English to undertake a winter expedition against them. For this object the colony of Massachusetts furnished five hundred and twenty seven men, Plymouth one hundred and fifty nine, and Connecticut three hundred; to all these were attached one hundred and fifty Mohegan Indians. After electing Josiah Winslow, governor of Plymouth colony, to be their commander, the whole party met at Pettyquamsquot. About sixteen miles from this place, it was found that the Narragansetts had built a strong fort in the midst of a large swamp, upon a piece of dry land of about five or six acres. The fort was a circle of pallsadoes, surrounded by a fence of trees, which was about one rod thick.

On the 19th of December, 1675, at dawn of day, the English took up their march through a deep snow, and at 4 o'clock in the afternoon attacked the Indians in their fortress. The only entrance which appeared practicable, was over a log or tree, which lay up five or six feet from the ground, and this opening was commanded by a sort of block-house in front. The Massachusetts men, led on by their captains, first rushed into the fort, but the enemy, from the block-house and other places opened so furious a fire upon them, that they were obliged to retreat. Many men were killed in this assault, and among them Captains Johnson and Davenport. The whole army then made a united onset. The conflict was terrible, some of the bravest captains fell, and victory seemed very doubtful. At this crisis, some of the Connecticut men ran to the opposite side of the fort, where there were no pallsadoes; they sprang in, and opened a brisk and well directed fire upon the backs of the enemy. This decided the contest. The Indians were driven from the block-house, and from one covert to another, until they were wholly destroyed or dispersed in the wilderness. As they retreated, the soldiers set fire to their wigwams, (about six hundred in num-

ber,) which were consumed by the flames. In this action it was computed that about seven hundred fighting Indians perished, and among them twenty of their chiefs. Three hundred more died from their wounds—to these numbers may be added many old men, women and children, who had retired to this fort as a place of undoubted security.

“Of the three hundred Englishmen from Connecticut, eighty were killed and wounded, twenty in Captain Seely’s, twenty in Captain Gallop’s seventeen in Captain Watt’s, nine in Captain Mason’s, and fourteen in Captain Marshall’s company. Of these about forty were killed or died of their wounds. About half the loss, in this bloody action fell upon Connecticut. The legislature of the colony, in a representation of the services they had performed in the war, say ‘In that signal service, the fort fight, in Narragansett, as we had our full number, in proportion with the other confederates, so all say they did their full proportion of service. Three noble soldiers, Seely, courageous Marshall, and bold Gallop, died in the bed of honor; and valiant Mason, a fourth captain, had his death’s wound. There died many brave officers and sentinels, whose memory is blessed, and whose death redeemed our lives. The bitter cold, the tarled swamp, the tedious march, the stong fort, the numerous and stubborn enemy they contended with, for their God, king, and country, be their trophies over death. He that commanded our forces then, and now us, made no less than seventeen fair shots at the enemy, and was thereby as oft a fair mark for them. Our mourners, over all the colony, witness for our men, that they were not unfaithful in that day.’ It is the tradition, that Major, afterwards Governor Treat, received a ball through the brim of his hat; that he was the last man who left the fort, in the dusk of the evening, commanding the rear of the army. The burning of the wigwams, the shrieks and cries of the women and children, and the yelling of the warriors, exhibited a most horrible and affecting scene, so that it greatly moved some of the soldiers. They were in much doubt then, and afterwards often seriously enquired, whether burning their enemies alive could be consistent with humanity, and the benevolent principles of the gospel.”*

In 1685, Charles II. died, and was succeeded by the Duke of York, who took the title of James II. The latter part of the reign of Charles had been distinguished by an oppression of his subjects. He lightly regarded the charters which he had at different times granted, and trifled with the rights, property and liberty of his subjects. The oppression of Charles was increased rather than diminished by James, who was a tyrant and a bigoted Catholic. It was the object of those in power at that time, to procure a surrender of all the patents of the colonies, and form the whole northern part of America into twelve provinces, with a governor general over the whole.

In July, 1685, a *quo warranto* was issued against the governor and company of Connecticut, requiring their appearance before him, within eight days of St. Martin’s, to show by what warrant they exercised certain powers and privileges. In July, 1686, the Assembly of the colony

* Trumbull’s History of Connecticut.

agreed upon an address to his majesty, in which they in the most suppliant terms besought him to recall the writ against them, entreated his pardon for any faults in their government, and humbly requested the continuance of their charter. On the 21st of the same month, two writs of *quo warranto* were delivered to Governor Treat. They were brought over by Edward Randolph, a noted enemy of the colonies. The time of appearance before his majesty was past before the writs arrived. On the 23th of December, another writ of *quo warranto* was served on the governor and company, bearing date Oct. 23d, requiring their appearance before his majesty, within eight days of the Purification of the Blessed Virgin. Though these writs gave no proper time for the appearance of the colony, yet they declared all its chartered rights vacated, upon its not appearing at time and place.

When the writs of *quo warranto* arrived in 1686, the governor convoked a special Assembly, on the 23th of July. Mr. Whiting was appointed the agent of Connecticut, to present their petition and use every effort for the preservation of their chartered rights. Mr. Whiting, however, found his utmost efforts to be in vain; the king and council had determined to vacate all the charters, and unite all the colonies to the crown, under a governor of royal appointment. Sir Edmund Andross was appointed the first governor general over New England, and arrived at Boston, Dec. 19th, 1686. He immediately wrote to the governor and company of Connecticut, to resign their charter, but without success. In October, 1687, Andross with a company of soldiers arrived at Hartford, while the Assembly was in session, and demanded a surrender of their charter. The charter was produced, and while the officers of the government were debating with Andross on the subject, the lights were suddenly extinguished, and the charter was seized and secreted in a hollow oak. Andross, however, proceeded to take formal possession of the government, annexed it to Massachusetts and appointed officers, civil and military.

Andross began his government with the most flattering professions of regard to the happiness and welfare of the people. But he soon threw off the mask, and exercised arbitrary and despotic power, in the most unlimited manner. As all the charter governments were either vacated or suspended, it was declared that the title of the colonists to their lands was of no value. Andross declared that Indian deeds were no better than "*the scratch of a bear's paw.*" The proprietors of lands, after fifty and sixty years' improvement of the soil, were obliged in many instances to take out new patents for their estates, for which a heavy fee was demanded. This, with numerous other proceedings, equally arbitrary, made the people indeed to feel the weight of oppression. Happily the reign of the "tyrant of New England," was of short duration. King James, his royal master, had rendered himself so odious in England, that he was obliged to flee from the kingdom. William, Prince of Orange, landed in England, Nov. 5th, 1688, and delivered the nation. Upon the news of the revolution, on the 18th of April, 1689, the inhabitants of Boston and its vicinity rose in arms, made themselves masters of the Castle, arrested Sir Edmund Andross and his council,

and persuaded the old governor and council to resume the government. Connecticut obtained, from the most able lawyers in England, an opinion that the colony, not having surrendered the charter under seal, and no judgment being entered on record, the charter was not invalidated; the former government was, therefore, re-established.

About this period, great complaints were made in England, against the colonies, for harboring pirates; and that no laws had been made against them. A letter had been written to the governor and company by Lyonel Jenkins, Esq. complaining of this neglect, and demanding in his majesty's name that a law should forthwith be made against piracy. A special Assembly was consequently called, on the 5th of July, 1684, and a law enacted against it, and a copy of it immediately forwarded to his majesty's secretary of state.*

In August, 1692, Col. Benjamin Fletcher, governor of New York, arrived at the seat of his appointment, having a commission authorizing him to take command of the militia of Connecticut and the neighboring colonies. As this power was expressly given to the colony of Con-

* The memory of that noted pirate, Capt. Kidd, is still held in remembrance in all parts of Connecticut, from the belief by some that he buried large sums of money on the coast or near the banks of rivers. The following circumstantial account of Kidd's visit to Gardiner's Island was recently communicated to the author of this work, by John G. Gardiner, Esq. of Gardiner's Island.

"We have," says Mr. Gardiner, "a small piece, a sample of *cloth of gold*, which my father received from Mrs. Wetmore, mother of the wife of Capt. Mather, (commander of the Revenue Cutter,) New London. I send you an extract from her letter, giving an account of Capt. Kidd's living on this island."

"I remember when very young, hearing my mother say that her grandmother was wife to Lord Gardiner when the pirate (Kidd) came to Gardiner's Island. The Captain wanted Mrs. Gardiner to roast him a pig; she being afraid to refuse him, cooked it very nice, and he was much pleased with it; he then made her a present of this silk, which she gave to her two daughters. Where the other went or whether it is in being I know not—but this was handed down to me; it has been kept very nice, and I believe is now as good as when first given, which must be upwards of a hundred years," &c. &c. The following is an extract from an account we have of property belonging to Kidd.

Boston, New England, July 25, 1699.

"A true account of all such gold, silver, jewels and merchandize, late in the possession of Capt. William Kidd, which have been seized and secured by us, under written pursuant to an order from his excellency, Richard Earl of Bellmont, Captain General and Governor in Chief, in and over her majesty's province of the Massachusetts Bay, &c. bearing date July 7, 1699.

"Then follows a list of valuables found in possession of Captain Kidd at the time of his capture, and others with whom he had probably deposited goods as with Mr. Gardiner.

Received the 17th instant, of Mr. John Gardiner, viz:		Ounces.
No. 1.	One bag dust gold, - - - - -	60 $\frac{3}{4}$
" 2.	One bag coined gold, - - - - -	11
	And in silver, - - - - -	12 $\frac{1}{2}$
" 3.	One bag dust gold, - - - - -	24 $\frac{3}{4}$
" 4.	One bag silver rings and sundry precious stones, - - - - -	4 $\frac{7}{8}$
" 5.	One bag unpolished stones, - - - - -	12 $\frac{1}{2}$
" 6.	One piece crystal, Cornelian rings, two small agats, two amethysts, all in the same bag.	
" 7.	One bag silver buttons and lamps.	
" 8.	One bag broken silver, - - - - -	173 $\frac{1}{2}$
" 9.	One bag gold bars, - - - - -	353 $\frac{1}{2}$

" 11.	One bag dust gold, - - - - -	59 $\frac{1}{2}$
" 12.	One bag silver bars, - - - - -	309

necticut by their charter, the Legislature would not submit to his requisition, and at a special session in September, 1693, the Court appointed a petition to be drafted, and Major General Fitz John Winthrop was appointed to present it to his majesty King William, and use his best endeavors for the preservation of their chartered rights. The colony also sent William Pitkin, Esq. to New York, to endeavor to make terms with Governor Fletcher respecting the militia, until his majesty's pleasure should be further known. No terms, however, could be made, short of an entire submission of the militia to his command.

"On the 26th of October, he came to Hartford, while the Assembly were sitting, and, in his majesty's name demanded their submission of the militia to his command, as they would answer it to his majesty; and that they would give him a speedy answer in two words, yes, or no. He subscribed himself his majesty's lieutenant and commander in chief of the militia, and of all the forces by sea or land, and of all the forts and places of strength in the colony of Connecticut.* He ordered the militia of Hartford under arms, that he might beat up for volunteers. It was judged expedient to call the train bands in Hartford together; but the Assembly insisted, that the command of the militia was expressly vested, by charter, in the governor and company; and that they could by no means, consistently with their just rights and the common safety, resign it into any other hands. They insinuated, that his demands were an invasion of their essential privileges, and subversive of their constitution.

"Upon this, Colonel Bayard, by his excellency's command, sent a letter into the Assembly, declaring, that his excellency had no design upon the civil rights of the colony; but would leave them, in all respects as he found them. In the name of his excellency, he tendered a commission to Governor Treat, empowering him to command the militia of the colony. He declared, that his excellency insisted, that they should acknowledge it an essential right inherent in his majesty to command the militia; and that he was determined not to set his foot out of the colony until he had seen his majesty's commission obeyed: That he would issue his proclamation, showing the means he had taken to

"Capt. *William* (not *Robert*, as the song goes) Kidd, was commander of the sloop *Antonio*; received a commission to cruise as a privateer, turned pirate, was guilty of murder—was taken, and carried into Boston; was tried, condemned, and executed—not as a *pirate*—but as a murderer. He was here with his accomplices a short time before he was taken; how long he remained on this island I know not. While here, he told Mr. Gardiner where he had deposited the iron chests which contained the treasure above described, and left it in his care, with the injunction, "*that he must answer for it with his head.*" The chests were buried in a swamp, the west side of this island.

"After Kidd's capture, the governor of Massachusetts sent and claimed the property of Mr. Gardiner, who was very unwilling to part with it—informed the Governor's messengers upon what conditions it was intrusted to his care; and if Kidd should ever call for it his *life* must be the forfeiture. They however assured him that there was no danger from that source, as Kidd was secured, and he delivered it *all* up to them.

"There has been much digging here upon this island for Kidd's money, even within half a dozen years, all along the coast. But I think it doubtful whether there was ever any buried except that which was buried here."

* Governor Fletcher's letter on file.

give ease and satisfaction to his majesty's subjects of Connecticut, and that he would distinguish the disloyal from the rest.*

"The Assembly, nevertheless, would not give up the command of the militia; nor would Governor Treat receive a commission from Colonel Fletcher.

"The train bands of Hartford assembled, and as the tradition is, while Captain Wadsworth, the senior officer, was walking in front of the companies, and exercising the soldiers, Colonel Fletcher ordered his commission and instructions to be read. Captain Wadsworth instantly commanded, "Beat the drums;" and there was such a roaring of them that nothing else could be heard. Colonel Fletcher commanded silence. But no sooner had Bayard made an attempt to read again, than Wadsworth commands, "Drum, drum, I say." The drummers understood their business, and instantly beat up with all the art and life of which they were masters. "Silence, silence," says the Colonel. No sooner was there a pause, than Wadsworth speaks with great earnestness, "Drum, drum, I say;" and turning to his excellency, said, "If I am interrupted again I will make the sun shine through you in a moment." He spoke with such energy in his voice and meaning in his countenance, that no further attempts were made to read or enlist men. Such numbers of people collected together, and their spirits appeared so high, that the governor and his suite judged it expedient, soon to leave the town and return to New York."†

Gen. Winthrop having arrived in England, presented the petition to his majesty. "His majesty's attorney and solicitor-general gave their opinion in favor of Connecticut's commanding the militia; and on the 19th of April, 1694, his majesty in council determined according to the report they had made." As it was a time of war with the French, the quota of Connecticut was fixed at one hundred and twenty men, to be at the command of Gov. Fletcher during the war; the rest of the militia, as usual, under the Governor of Connecticut.

Until the session in October, 1698, the General Assembly consisted of but one house, and the magistrates and deputies appear to have acted together. But at this time it was enacted that the Assembly should consist of two houses. The governor, or in his absence, the deputy governor, and magistrates, composed the upper house. The lower house consisted of deputies, now usually called representatives, from the several towns in the colony. This house was authorized to choose a speaker to preside. From this time no public act could be passed into a law, but by the consent of both houses. In 1701, it was enacted that the October session of the Assembly should be annually held in New Haven. Previous to this time, and ever since the union of the colonies, the Assembly had convened, both in May and October, at Hartford.

About this time, for the maintenance of good morals, and the suppression of vicious and disorderly practices, the Assembly "ordered, that a sober and religious man be appointed, by the county court in

* Colonel Bayard's letter on file.

† Trumbull's History of Connecticut.

each of the counties, to be an attorney for her majesty to prosecute all criminal offenders." At this period the colony was in a critical situation. It was in danger and put to a great expense on account of the war with France; it was also continually harassed by the demands of Dudley, Governor of Massachusetts, and of Lord Cornbury, Governor of New York and the Jerseys, for men and money, as they pretended, for the defense of their respective governments. Dudley, it appears, wished to unite all New England under his own government. If this could be effected, it seems Cornbury expected to have the government of the southern colonies. These men, having a powerful party at court, would have probably succeeded in their plans had it not been for the efforts of Sir Henry Ashurst, who was an agent for Connecticut, and a firm friend to the rights of the colonies.

The expedition for the reduction of the French in Canada, in 1709, was the occasion of the first emission of paper money in Connecticut. In this expedition Connecticut was obliged to raise 350 men, who were placed under the command of Col. Whiting, of which ninety perished in this disastrous campaign.

On the 8th of June, 1709, at a special Assembly, it was enacted, "That to assist in the expedition, for want of money otherwise to carry it on, there be forthwith imprinted a certain number of bills of credit, on the colony, in suitable sums, from two shillings to five pounds, which, in the whole, shall amount to the sum of 8,000 pounds, and no more." It was enacted that the bills should be issued from the treasury as money, but should be received in payments at one shilling on the pound better than money. One half only was to be signed and issued at first, and the other was to remain unsigned until it should be found necessary to put it into circulation. Taxes were imposed for the calling in of one half of it within the term of one year, and the other at the expiration of two years.

The number of inhabitants in Connecticut in the year 1713, was about 17,000. There were four counties, (Hartford, New London, New Haven and Fairfield,) and thirty eight taxable towns, who sent forty delegates to the Assembly. The militia consisted of a regiment to each county, and amounted to nearly 4,000 effective men. At this time the shipping in the colony consisted of two small brigs and twenty sloops; the number of seamen did not exceed one hundred and twenty. There was but a single clothier in the colony, "and the most he could do was to full the cloth which was made; most of the cloth manufactured was worn without shearing or pressing." The trade was very limited. The only articles directly exported to Great Britain were turpentine, pitch, tar, and fur. The principal trade was with Boston, New York, and the West Indies. To the two former places they traded in the produce of the colony: wheat, rye, barley, Indian corn, peas, pork, beef, and fat cattle. To the West Indies the merchants exported horses, staves, hoops, pork, beef and cattle. In return they received rum, sugar, molasses, cotton wool, bills of exchange, and sometimes small sums of money.

The General Assembly met twice in a year, but their sessions did not generally exceed ten days. The annual expense of the two sessions was about 1,600 dollars. The salary of the governor was about 800, and that of the deputy governor 200 dollars. The whole expense of government did not probably exceed 3,500 dollars. This amount was usually below the salary annually allowed to a royal governor in the colonies.

Although the colony had been able to maintain their charter privileges against the intrigues of Dudley, Cornbury, and other enemies, yet they were under many apprehensions that their chartered privileges would be taken from them. There were strong parties in England, and some in the colonies, who were unfriendly to the charter governments—deeming them too independent of the crown and government of Great Britain. In addition to these circumstances, a decision in England in regard to one of the laws of the colony respecting intestate estates, created much alarm. John Winthrop, Esq. son of the last Governor Winthrop, became disaffected towards the government; he conceived that his family had been injured, and that his ancestors had not been rewarded according to the public services which they had rendered to the colony. He had been engaged in a long controversy with Thomas Lynchmere, Esq. The court of probate, as he imagined, had made an unjust and illegal settlement of his paternal estate in favor of his sister, Mrs. Lynchmere; he therefore, after going through the courts of the colony, in which he was unable to obtain redress, appealed to his majesty. Upon hearing the case in England, the law of Connecticut was adjudged repugnant to English law, as not securing the lands to male heirs and admitting daughters to a share in the paternal estate, which the English laws did not warrant. In July, 1728, the colony received a letter from their agent, Jeremiah Dummer, Esq. declaring that their law respecting the settlement of intestate estates was “null and void.”

The Legislature, deeming that the consequences of annulling this law would be disastrous to the internal peace of the colony, determined to spare no pains or expense in order to prevent it. They employed another agent, Jonathan Belcher, Esq. afterwards Governor of Massachusetts, to assist agent Dummer in his defense of the colony, and in pleading for the continuance of the law respecting intestate estates. These agents conducted the affairs of the colony with such wisdom and success that the charter was preserved and the law retained.

In the expedition of the New England colonies against Louisburg, in 1745, Connecticut furnished upwards of 1000 men. For the encouragement of the men to enlist, the Assembly voted a bounty of ten pounds to each soldier who should furnish himself with arms, knapsack and blanket; and three pounds to every soldier who should not be able to arm himself. Five hundred men were divided into eight companies, and Roger Wolcott, Esq. lieutenant governor, was appointed the commander. At the time of the siege, 200 men were sent on in addition, by Connecticut, and after the reduction of Louisburg, the colony provided 350 men to keep garrison during the winter. A sloop was also furnished, manned with 100 men.

While the war continued against the French in Canada, Connecticut made great exertions, and did more most of the time than double her proportion, compared with the rest of the colonies. In the year 1759, she had more than six thousand men in actual service. At this period the militia were more numerous than at present, according to the population, as all from the age of sixteen to sixty, were obliged to bear arms. In the year 1762, the New England colonies rendered very important services in the reduction of Havanna and Martinique. It was, however, a fatal enterprise to most of the New England troops; of nearly 1000 men, who were engaged in the expedition, not 100 returned. Such as were not killed in the service, were swept away by the bilious plague.

After the definitive treaty of peace, signed at Paris, Feb. 10th, 1763, which ended the *French wars*, the extension of settlements, commerce, wealth and population in Connecticut, were extremely rapid. "After the peace, an almost boundless scope of commerce and enterprise was given to the colonists. In these favorable circumstances, with the return of thousands of her brave and industrious inhabitants to the cultivation of their fields, and the various arts and labors of peace, the colony was soon able to exonerate itself from the debt contracted by the war." These prosperous circumstances continued till the beginning of the Revolution.

Connecticut, by her charter, granted in 1662, extended from Narragansett river on the east to the South Sea on the west, excepting such lands as were then occupied by prior settlers. Nearly nineteen years afterwards, William Penn obtained a grant of lands on the west side of the Delaware river, extending northward to the 43d degree of latitude; this covered part of the territory embraced in the Connecticut charter. For nearly a century after the charter was obtained, Connecticut neglected to claim these lands, which lay westward of the colony of New York. But after she had granted all her lands eastward of that colony, a company was formed with the design of planting the lands within her charter, on the Susquehannah. This company was formed in 1753, and the next year a purchase was made from the sachems of the Six Nations of a large tract, at Wyoming. In 1774, the settlement was formed into a town, called Westmoreland, which sent representatives to the Assembly of Connecticut.

The treaty of the Connecticut men with the Indians, and their purchase of the lands, excited the jealousy of the proprietaries of Pennsylvania. They proceeded to take a deed of the same lands from some of the chiefs, who declined signing the deed to the Connecticut purchasers. Grants of land were made by Pennsylvania, and settlements begun, which excited warm disputes, and an attempt was made to drive the Connecticut settlers from the lands by force of arms. In 1770, the Legislature of Connecticut sent certain questions to England to be proposed to the most able lawyers there, respecting her title to the lands in question. The answers were favorable to her claims, and she determined to support them. But the Revolutionary war suspended the controversy, until 1781, when both states agreed to appoint commis-

sioners to settle the dispute. An act of Congress was passed, constituting these commissioners a court to hear and determine the controversy. In November, 1782, the commissioners met at Trenton, N. J. This court decided that Connecticut had no right to the lands in question, and that the territory comprised in the chartered limits of Pennsylvania belonged of right to her. Although Connecticut acquiesced in the decision at Trenton, yet she maintained her claim to all the territory within the range of the north and south boundaries of the state, as expressed in the charter, lying west of Pennsylvania, and extending to the Mississippi. With a view to obtain the implied sanction of their charter claims, Connecticut in 1786, by their delegates in Congress, ceded to the United States all the lands within the charter limits, west of Pennsylvania, excepting a tract 120 miles in length, adjoining that state on the west. This cession was accepted. A part of the reserved lands, amounting to half a million of acres, was granted by the state to the inhabitants of New London, Fairfield and Norwalk, whose property had been destroyed by the enemy during the Revolutionary war. The remainder was sold in 1795, and the money arising from the sale constitutes the *School Fund*, for the support of schools throughout the state. The title of Connecticut to the reserved lands, was confirmed by Congress in 1800. This territory, now forming part of the state of Ohio, is still called the *Connecticut* or *Western Reserve*.

During the great struggle of the Revolution, Connecticut was one of the foremost in the confederacy in resisting the tyranny of Britain, and was lavish of her blood and treasure in sustaining the conflict against her oppressions. Her soldiers were applauded by the commander in chief of the American armies for their bravery and fidelity. In the last war with Great Britain, in the first conflict on the ocean, the first flag was struck to a native of Connecticut: on the land, the first flag which was taken, was also surrendered to one of her sons.

The founders of Connecticut were men of intelligence, virtue and piety, and understood the great principles of civil and religious liberty; hence they laid the foundations of those institutions which distinguish her among her sister states of the Union. Ever republican in her form of government, she has in effect, ever been a free and independent commonwealth; and whilst the other colonies were suffering under the domination of *Royal Governors*, she has from the beginning, been governed by rulers of her own choice.

After the declaration of independence, Connecticut did not follow the example of most of the other states, and adopt a written constitution, but continued the government according to the ancient form; a statute being enacted, the session following the declaration of American independence, July 4th, 1776, which provided that the government should continue to be organized and administered according to the provisions of the charter. This form of government continued without any very essential alteration till 1818. In this year, a convention of delegates from the several towns, elected by the people, convened in Hartford, and after a session of about three weeks, framed a constitution of civil government for the state. This being submitted to the electors

on the 5th of October, 1818, was ratified by them by a majority of fifteen hundred and fifty four votes.

Although small in her territorial limits, Connecticut can boast of distinguished men in almost every department in life. For patriotism and love of country, she can point to a Sherman, her Trumbulls, and her martyrs Hale, Ledyard and Wooster. For bravery, bold and daring enterprises, she can point to an Allen, Eaton, Arnold and Ledyard. "In theology," (says the Edinburgh Review,) "Jonathan Edwards is the very Euclid of divines; and the Americans would do well, in claiming due honor for their geniuses, to put him at the head of the list, for the country never produced a greater." In holy zeal and devotion to the sacred cause of Christianity, as a missionary, David Brainerd stands confessedly the first in modern times. For men of genius in the various departments of science, the mechanic and other arts, Connecticut is second to none of her sister states. Trumbull, Barlow, Dwight, and others, are among the first of American poets; and Trumbull, in every thing that constitutes a great historical painter, is the first among his countrymen.

HARTFORD COUNTY.

HARTFORD COUNTY was constituted such in 1666. Its original limits comprised an extensive district of country on both sides of Connecticut river, the entire county of Tolland, most of the counties of Middlesex and Windham, and a part of the counties of Litchfield and New London. The present extent of the county is about 30 miles from north to south, and averages 25 miles in breadth from east to west. It is bounded n. by Hampden County in Massachusetts, e. by Tolland County, w. by Litchfield, and s. by the counties of Middlesex and New Haven. This county as a whole, in resources, wealth and population, will rank before any other in the state; and in many respects, before any in New England. The valley of the Connecticut is justly celebrated for the extent and richness of its meadows; and there is no section throughout its whole course, where they are more enlarged or fertile than in this county. The soil generally is rich, various and fertile, and is for the most part highly cultivated; well adapted to a grain culture, particularly that of rye and Indian corn, of which large quantities are annually raised. The county is intersected nearly in the center by Connecticut river; in its western part by a range of greenstone mountains, called in some parts the Talcott Mountains. It is watered by several streams, among which are the Farmington, Hockanum, Scantic and Podunk rivers, all of which discharge their waters into the Connecticut.

A great variety of manufactures is carried on in the county, many of which are extensive, and employ a considerable amount of capital. They will be noticed in the account of the several towns. The following is a list of the several towns in the county, with the population according to the census of 1830.

Hartford, - -	9,789	East Hartford,	2,237	Manchester, -	1,576
Avon, - -	1,025	East Windsor,	3,537	Marlborough,	704

Burlington, -	1,301	Granby, - -	2,722	Wethersfield,	3,853
Canton, - -	1,437	Hartland, - -	1,221	Windsor, -	3,220

HARTFORD.

THE first English settlement in Hartford was commenced in 1635, by Mr. John Steel and his associates from Newtown, (now Cambridge,) in Massachusetts. The main body of the first settlers, with Mr. Hooker at their head, did not arrive till the following year.

“About the beginning of June, (says Dr. Trumbull,) Mr. Hooker, Mr. Stone, and about one hundred men, women and children, took their departure from Cambridge, and traveled more than a hundred miles, through a hideous and trackless wilderness, to Hartford. They had no guide but their compass, and made their way over mountains, through swamps, thickets and rivers, which were not passable but with great difficulty. They had no cover but the heavens, nor any lodgings but those that simple nature afforded them. They drove with them a hundred and sixty head of cattle, and by the way subsisted on the milk of their cows. Mrs. Hooker was borne through the wilderness upon a litter. The people carried their packs, arms, and some utensils. They were nearly a fortnight on their journey.” “This adventure was the more remarkable, as many of this company were persons of figure, who had lived in England, in honor, affluence and delicacy, and were entire strangers to fatigue and danger.”*

The Indian name of Hartford was *Suckiag*. A deed appears to have been given by *Sunckquasson*, the sachem of the place, about 1636, to Samuel Stone and William Goodwin, who appear to have acted in behalf of the first settlers.

The town of Hartford is bounded n. by Windsor and Bloomfield, e. by Connecticut river, s. by Wethersfield, and w. by Farmington and Avon. It is about six miles in length from north to south, and averages about five in breadth. The western part of the town has a soil of

* At that period, it is believed that the forests were much more passable than at present. Dr. Hildreth, of Ohio, in describing the new lands at the west, says: “While the red men possessed the country, and every autumn set fire to the fallen leaves, the forests presented a most noble and enchanting appearance. The annual firings prevented the growth of shrubs and underbrush, and destroying the lower branches of the trees, the eye roved with delight, from ridge to ridge and from hill to hill; which, like the divisions of an immense temple, were crowded with innumerable pillars, the branches of whose shafts interlocking, formed the arch work of support to that leafy roof which covered and crowned the whole. But since the white man took possession, the annual fires have been checked, and the woodlands are now filled with shrubs and young trees, obstructing the vision on every side, and converting these once beautiful forests into a rude and tasteless wilderness.”

red gravelly earth, very rich and productive. That part near the river is covered with a strong clay, or a rich black mold. The latter is principally in the valuable tract of meadow adjacent to Connecticut river.

HARTFORD CITY was incorporated in 1784; it is over a mile in length upon the river, and about three fourths of a mile in breadth. The alluvial flat upon the river is narrow, being from 40 to 100 rods, and is connected with the upland by a very gradual elevation. It is situated on the west side of Connecticut river, 50 miles from its mouth, in Lat. $41^{\circ} 45'$ and Long. $4^{\circ} 15'$ E. from Washington. It is 123 miles N. E. New York, 34 N. N. E. New Haven, 15 N. Middletown, 44 N. W. New London, 74 W. Providence, 100 W. S. W. Boston, and 97 S. E. Albany. The legislature of the state assembles alternately at Hartford and New Haven, the odd years at Hartford. The city is rather irregularly laid out, and is divided at the south part by Mill or Little river.

East view of the Stone Bridge in Hartford.

Across this stream a fine bridge of free stone has been thrown, which connects the two parts of the city. This structure is 100 feet wide, supported by a single arch, 7 feet in thickness at the base, and 3 feet 3 inches at the center, the chord or span of which is 104 feet; elevation from the bed of the river to the top of the arch, 30 feet 9 inches. Another bridge, across Connecticut river, 1,000 feet long, and which cost over \$100,000, unites the city with East Hartford. Hartford is very advantageously situated for business, is surrounded by an extensive and wealthy district, and communicates with the towns and villages on the Connecticut above, by small steamboats, (now 8 in number) two of which, for passengers, ply daily between Hartford and Springfield. The remainder are employed in towing flat bottomed boats of 15 to 30 tons burthen, as far as Wells' river, 220 miles above the city. The coasting trade is very considerable, and there is some foreign trade, not extensive, carried on. Three steam-

boats form a daily line between here and New York. The manufactures of this city, by a late return made to the secretary of the treasury, exceed \$900,000 per annum; among these are various manufactures of tin, copper, and sheet iron; block tin and pewter ware; printing presses and ink; a manufactory of iron machinery; iron founderies, saddlery, carriages, joiners' tools, paper-hangings, looking-glasses, umbrellas, stone ware, a brewery, a web manufactory, cabinet furniture, boots and shoes, hats, clothing for exportation, soap and candles, 2 manufactories of machine and other wire cards, operated by dogs, &c. &c. More than twice as many books are published here, annually, as are manufactured in any other place of equal population in the United States. There are 15 periodicals; 12 weekly newspapers, (5 sectarian,) 2 semi-monthly and 1 monthly.* The city is well built, and contains many elegant public and private edifices. The state house, in which are the public offices of the state, is surmounted by a cupola, and is a very handsome and spacious building. The city hall, built for city purposes, is also spacious and elegant; it has two fronts, with porticoes, supported each by six massy columns. In the city are 12 places of public worship—5 for Congregationalists, 1 Episcopal, 2 Baptist, 1 Methodist, 1 Universalist, 1 Roman Catholic, and 1 African; several of these are very handsome, and the Episcopal, a Gothic edifice, is much admired for its elegance. There are 5 banks, a bank for savings; 3 fire and marine insurance offices, an arsenal, museum, 2 markets, &c. The American Asylum for the deaf and dumb, the Retreat for the insane, and Washington College, are all beautifully located, in the immediate vicinity of the city. The population within the city limits in September, 1835, was nine thousand and eight hundred.

“The American Asylum for the education and instruction of deaf and dumb persons, was founded by an association of gentlemen in Hartford, Conn. in 1815. Their attention was called to this important charity by a case of deafness in the family of one of their number. An interesting child of the late Dr. Cogswell, who had lost her hearing at the age of two years, and her speech soon after, was, under Providence, the cause of its establishment. Her father, ever ready to sympathize with the afflicted, and prompt to relieve human suffering, embraced in his plans for the education of his own daughter, all who might be similarly unfortunate. The co-operation of the benevolent was easily secured, and measures were taken to obtain from Europe a knowledge of the difficult art, unknown in this country, of teaching written language through the medium of signs, to the deaf and dumb. For this purpose, the Rev. Thomas H. Gallaudet visited England and Scotland, and applied at the institutions in those countries for instruction in their system; but meeting with unexpected difficulties, he repaired to France, and obtained at the Royal Institution at Paris, those qualifications for an instructor of the deaf and dumb, which a selfish and mistaken policy had refused him in Great Britain. Accompanied by Mr. Laurent Clerc, himself deaf and dumb, and for several years a successful teacher under

* Darby and Dwight's Gazetteer of the United States, 1833.

the Abbe Sicard, Mr. Gallaudet returned to this country in August, 1816. The Asylum had, in May preceding, been incorporated by the state legislature. Some months were spent by Messrs. Gallaudet and Clerc in obtaining funds for the benefit of the institution, and in the spring of 1817, the Asylum was opened for the reception of those for whom it was designed, and the course of instruction commenced with seven pupils.

View of the American Asylum for the Deaf and Dumb.

“As the knowledge of the institution extended, and the facilities for obtaining its advantages were multiplied, the number of pupils increased from seven to one hundred and forty, which for several years past has not been much above the average number; and since its commencement in 1817, instruction has been imparted to four hundred and seventy seven deaf and dumb persons, including its present inmates.

“In 1819, Congress granted the institution a township of land in Alabama, the proceeds of which have been invested as a permanent fund. The principal building, of which the above is a front view, was erected in 1820, and the pupils removed to it in the spring of the following year. It is one hundred and thirty feet long, fifty feet wide, and, including the basement, four stories high. Other buildings have been subsequently erected, as the increasing number of pupils made it necessary; the principal of which is a dining hall and workshops for the male pupils. Attached to the institution are eight or ten acres of land, which afford ample room for exercise and the cultivation of vegetables and fruits for the pupils.

“The system of instruction adopted at this institution is substantially the same as that of the French school at Paris. It has however been materially improved and modified by Mr. Gallaudet and his associates. This system, and indeed every other rational system of teaching the deaf and dumb, is based upon the natural language of signs. By this we mean those gestures which a deaf and dumb person will naturally use to express his ideas, and to make known his wants previous to

instruction. These gestures and signs are rather *pictorial*, that is, an exact outline of the object, delineated by the hands in the air; or *descriptive*, giving an idea of an object by presenting some of its prominent and striking features; or *conventional*, such as may have been agreed upon by a deaf and dumb person and his associates. As there are very few objects which can be expressed with sufficient clearness by the delineation of its outline alone, a descriptive sign is usually connected with it. Thus, in making the sign for a *book*, the outline is first delineated by the fore finger of both hands. To this is added the descriptive signs of opening the book, placing it before the eyes, and moving the lips as in reading. It may therefore simplify the classification of natural signs if the first two divisions be united; and it will be sufficiently accurate to say that all the signs used by the deaf and dumb, are either *descriptive* or *conventional*. By far the greater part of these signs belong to the former class; as it includes the signs for most common objects, actions and emotions. A deaf and dumb child constructs his language upon the same principle as the child who can hear; that of imitation.

“In the school-room, the instructor makes use of *natural signs* to communicate ideas to his pupils, of *systematic signs* to enable them to translate their own into written language; of the *manual alphabet*, or signs of the hand corresponding to the letters of the alphabet; and of *written symbols* to express the grammatical relations of words. A more particular account of the mode of instruction would be inconsistent with the limits assigned to this article. Indeed it can hardly be necessary to enlarge on this topic, as visitors can at all times have access to two of the classes, and on Wednesday afternoon to all the classes, when they are permitted to witness the process of imparting instruction by signs, and to make such inquiries as will enable them to understand the subject.

“The pupils usually remain at the Asylum four or five years, in which time an intelligent child will acquire a knowledge of the common operations of arithmetic, of geography, grammar, history, biography, and of written language, so as to enable him to understand the Scriptures, and books written in a familiar style. He will of course be able to converse with others by writing, and to manage his own affairs as a farmer or mechanic. There are workshops connected with the institution, in which the boys have the opportunity of learning a trade, and many of them, by devoting four hours each day to this object, become skillful workmen, and when they leave the Asylum, find no difficulty in supporting themselves. The annual charge to each pupil is one hundred dollars.

“The department of instruction is under the control of the principal of the institution, who has also a general oversight of the other departments. The pupils are distributed into eight or nine classes, the immediate care of which is committed to the same number of assistant instructors. When out of school, the pupils are under the care of a steward and matron.

“Five or six similar institutions have been established in different parts of the country, all of which have obtained their system of instruction, and some of their teachers, from the American Asylum. Nearly one half of the states afford the means of obtaining an education at some one of these schools, to their own indigent deaf and dumb; and it is greatly to be desired that the legislatures of all the other states should furnish the same assistance to these children of misfortune.”*

Eastern view of the Retreat for the Insane.

“This institution is situated on a commanding eminence, at the distance of a mile and a quarter, in a southwesterly direction, from the State House in Hartford. The elevation overlooks an ample range of fertile country, presenting on every side a most interesting landscape, adorned with every beauty of rural scenery, that can be found in rich and cultivated fields, and meadows of unrivalled verdure; in extensive groves and picturesque groups of forest, fruit and ornamental trees; and above all, in the charming diversity of level, sloping and undulating surfaces, terminating by distant hills, and more distant mountains.

“The city of Hartford is conspicuously seen on the left, and in different directions, five flourishing villages, rendered nearly continuous by numerous intervening farm-houses. On the east, the prospect is enlivened by the perpetual passing and repassing of carriages and travelers, on the two principal thoroughfares of the country, that extend along the front of the building, one at the distance of fifty or sixty rods, the other within three fourths of a mile. Still farther eastward, but within a mile and a half, the prospect is frequently enlivened by the splendid show of passing steamboats, and the white sails of various water craft, plying up and down the Connecticut river, which is distinctly seen in many long windings.

“This site was selected as one pre-eminently calculated to attract and engage the attention, and soothe and appease the morbid fancies and feelings of the patient, whose faculties are not sunk below or raised above the

* American Magazine, Vol. I, 1835.

sphere of relations that originally existed. And if he is not beyond the reach of genial sensations, connected with external objects, he will undoubtedly feel the conscious evidence that this situation most happily unites the tranquilizing influence of seclusion and retirement, with the cheering effect of an animated picture of active life, continually passing in review before his eyes, while himself is remote, and secure from the annoyance of its bustle and noise.

“The edifice for the accommodation of the patients, and those who have the care of them, is constructed of unhewn free stone, covered with a smooth white water-proof cement. Its style of architecture is perfectly plain and simple, and interests only by its symmetrical beauty, and perhaps by the idea it impresses of durability and strength, derived from the massy solidity of its materials—yet notwithstanding these, its general aspect is remarkably airy and cheerful, from the amplitude of its lights, and the brilliant whiteness of its exterior. The whole building is divided into commodious and spacious apartments, adapted to various descriptions of cases, according to their sex, nature and disease, habits of life, and the wishes of their friends. The male and female apartments are entirely separated, and either sex is completely secluded from the view of the other. Rooms are provided in both male and female apartments for the accommodation of the sick, where they are removed from any annoyance, and can continually receive the kind attentions of their immediate relations and friends. Attached to the building are about seventeen acres of excellent land, the principal part of which is laid out in walks, ornamental grounds and extensive gardens. With each wing and block of the building is connected a court-yard, encompassed by high fences, and handsomely laid out, designed to afford the benefit of exercise, pastime and fresh air, to those who cannot safely be allowed to range abroad.

“Connected with the institution, there are horses and carriages, which are appropriated exclusively to the benefit of the patients, and which afford them much pleasant exercise and amusement. The male patients frequently employ themselves in the garden, and amuse themselves at the backgammon board, draughts, and the like. The female patients employ themselves in sewing, knitting, drawing, painting, playing on the piano, and other amusements. The various exercises and amusements are adapted to the age, sex, and former habits of the patients, and in all cases the two sexes are kept entirely separate. There is a library in the Retreat, composed of light and agreeable works, and several periodicals and newspapers are constantly taken, for the perusal of which the inmates manifest much fondness. On the Sabbath, those that are in a proper condition, are taken to church, and unite in religious worship. Every thing connected with the institution, is designed to make it a pleasant and agreeable residence for all the inmates.

“This institution commenced its operations on the 1st of April, 1824, under the immediate charge of the late Eli Todd, M. D. He pursued a course of medical and moral treatment which has been crowned with a success, second to no other similar public institution of which we have any knowledge. The same system of management has been adopted by

his successor, Silas Fuller, M. D. recently of Columbia, and has also been attended with similar success. Dr. Fuller has for many years had the charge of a private establishment for the insane, and has been distinguished for his success in treating this afflictive disease. The general system of moral treatment at this institution is, to allow the patients all the liberty and indulgences consistent with their own safety and that of others; to cherish in them the sentiment of self respect; to excite an ambition for the good will and respect of others; to draw out the latent sparks of natural and social affection; and to occupy their attention with such employments and amusements, as shall exercise their judgment, and withdraw their minds as much as possible from every former scene and every former companion; and give an entire change to the current of their recollections and ideas. By pursuing this course, together with a judicious system of medication, many 'of these once miserable beings, cut off from all the 'linked sweetness' of conjugal, parental, filial, and fraternal enjoyment, are now restored to the blessings of health, to the felicities of affection, and to the capacity of performing the relative duties of domestic and social life.'**

Eastern view of Washington College.

“Washington College was founded in 1826. It has two edifices of free stone; one 148 feet long by 43 wide, and 4 stories high, containing 48 rooms; the other 87 feet by 55, and 3 stories high, containing the chapel, library, mineralogical cabinet, philosophical chamber, laboratory and recitation rooms. There are 5,000 volumes in the college library, and 2,500 in the libraries of the different societies. A complete philosophical apparatus, cabinet of minerals, and botanical garden and green house, belong to the institution. The faculty consists of a president, 6 professors, and 2 tutors. Students, about 60. Commencement first Thursday in August.”†

West Hartford, or, as it was formerly called, *West Division*, is a fine tract of land. The inhabitants are mostly substantial farmers, and the

* American Mag. Vol. I.

† Darby and Dwight's Gazetteer, 1833.

general appearance of the place denotes an unusual share of equalized wealth and prosperity. The venerable Nathan Perkins, D. D. still continues his labors in the ministry in West Hartford. In 1833, his sixtieth anniversary sermon was published in the *National Preacher*. In that sermon he says, "I am now the oldest officiating minister of the gospel in this state, and, as far as I can learn, in the United States. And I cannot learn, from the history of churches in Connecticut, that there has ever before been an instance of one of its ministers preaching for sixty years uninterruptedly to the same congregation; nor during a life of eighty three years, have I ever met with one who had preached the gospel of the grace of God to one and the same people for the same period."

"Titus Hosmer, the father of the late Chief Justice Hosmer, of Middletown, was a native of West Hartford. He was one of the most distinguished scholars, lawyers and statesmen which Connecticut has produced. He was a member of the Council, and of Congress, and Judge of the Maritime Court of Appeals for the United States. He was the patron of Joel Barlow, in encouraging the composition of his *Vision of Columbus*, the title of the poem first published. He died in middle life, and Mr. Barlow wrote an elegant poem as an elegy on his death, and inscribed it to his widow."

Junction of Trap Rock and Sandstone, at Rocky Hill.

The above engraving was made from a large lithographic print in the 17th vol. of Prof. Silliman's *Journal of Science*. The perpendicular strata of rocks which appear in the engraving are termed by geologists *Trap Rocks*, of the variety called greenstone. This ridge is one of a series of isolated peaks and groups that divide the states of Connecticut and Massachusetts almost centrally in two; commencing in the East and West Rocks in New Haven and terminating on the borders of Vermont. The Pallisadoes on the Hudson are composed of trap rocks, and it is known that they cross the state of New Jersey, from the Hudson to the Delaware. The Cave of Fingal, in the island

of Staffa, and the Giant's Causeway in the north of Ireland, are still more singular examples, on account of the regularity and height of the columns, and of their curiously jointed structure. The rocks in the engraving which lie in a horizontal position are sandstone, called by the masons free stone, to obtain which this quarry has been worked for more than a century. This quarry is about three miles nearly s. s. w. from the city of Hartford, the ridge is on the eastern exposure almost covered with soil. "As you come from Hartford on the old Farmington road, you gently rise the acclivity of a hill, for perhaps three or four hundred yards, and as you reach its summit you discover the trap ridge, breaking through the soil on your right and left, and stretching away northeast and southwest like a line of fortification. This allusion appears still more appropriate when you discover, on coming to the edge of the parapet, that the vast rampart is faced with a deep ditch, just such an one as defense would require, were the ridge covered by cannon and bristling with bayonets. This ditch is the excavation which (as its object was peaceful) it has taken a century to make." The portion of the rocky ridge represented in the engraving is about eighty feet, in the horizontal direction; the trap is there twenty eight feet thick, and the sandstone that is cut through is sixteen feet, so that the whole height at this place is about forty feet. The water in the hollow is an accumulation of rain, in the bottom of the quarry.

"Both rocks, as thus cut through for nearly a mile, in this extensive quarry, exhibit a magnificent section; such as a geologist wishing to study the origin of the trap rocks, would be most anxious to see, but would hardly expect to find. To others, the place is worth visiting on account of the beauty of the scenery. In the retrospect towards Hartford, is the grand and rich valley of the Connecticut—before you, the vales of Newington and West Hartford, almost equally beautiful; and the view in both directions, is bounded by hills and mountains, which, to the north and south, appear interminable."

It is now believed by all geologists, that the materials composing the trap rocks were melted in the bowels of the earth, and thrown upward through the incumbent strata by igneous action, and that the peculiar formation of these rocks, presenting solid masses, in which, in general, the appearance of fire is not obvious, was caused by the pressure of water from above, it being unquestionable among geologists, that our globe was once covered with a deep ocean.

The cut on the next page is a representation of the point of land in the limits of the city of Hartford, now called Dutch Point. The entrance of Mill river into the Connecticut is seen in the engraving. In 1633, the Dutch erected a fort and trading house on the *south* side of this stream, which they called the *Hirse of Good Hope*. Thirty or forty years since, some of the remains of the fort were in existence, being washed out of the earth by the river. Since that time, the river has worn away the site of the fort. The large building seen in the engraving is a steam paper mill: ship building is also carried on at this place. The spire seen in the distance is that of the South Congregational Church.

The Dutch maintained a distinct and independent government at the Point for many years, and resisted the laws of the colony. They inveigled an Indian woman, who, being liable to public punishment, fled from her master. Though her master demanded her as his property, and the magistrates as a criminal, on whom the law ought to take its course, yet they would not deliver her up. The Dutch agent, in the height of disorder, resisted the guard. "He drew his rapier upon the soldiers, and broke it upon their arms. He then escaped to the fort, and there defended himself with impunity." Considerable difficulty oftentimes arose between them and the English settlers, till the year 1654, when an order from the Parliament arrived, requiring that the Dutch should in all respects be treated as the declared enemies of the commonwealth of England. In conformity to this order, the General Court convened, and an act was passed sequestering the Dutch house, lands, and property of all kinds at Hartford, for the benefit of the commonwealth.

Dutch Point, in Hartford.

"The Dutch," says Dr. Trumbull, "were always mere intruders. They had no right to any part of this country. The English ever denied their right, and when the Dutch placed a governor at New Netherlands, and the court of England made complaint of it to the States General, they disowned the affair, and said it was only a private undertaking of an Amsterdam West India company. King James the first commissioned Edward Langdon to be governor at New Netherlands, and named the country New Albion. The Dutch submitted to the English government, until the troubles in England, under the administration of King Charles the first and the long parliament."

When William Holmes came up the river in 1633, to establish a trading house at Windsor, he found that the Dutch had got up the river before him, made a light fort, and planted two pieces on Dutch Point. "The Dutch forbid Holmes going up the river, stood by their cannon, and ordered him to strike his colors, or they would fire upon him."

Holmes being a bold and resolute man, informed them that he had a commission from the governor of Plymouth to go up the river, and that he must obey his orders. Disregarding their threats, he proceeded up the river and established the trading house.*

First Meeting House built in Connecticut.

The above is believed to be a correct representation of the first house ever erected in Connecticut for Christian worship. The drawing was obtained from a gentleman now deceased, who devoted considerable time and attention to antiquarian researches in Hartford: the drawing of Mr. Hooker's house was obtained from the same individual. In Dr. Strong's consecration sermon, in 1807, it is stated that the first house for public worship was built in 1638, stood ninety nine years, and was then taken down. There must have been some mistake about this, as it appears by a reference to the early records of the town, that there was a meeting house in 1635, and in 1650, "it was ordered that the *old meeting house* shall be given to Mr. (or Mrs.?) Hooker. Some of the timber of the first house is still in existence, a portion of it being used in the construction of the Center Congregational Church.

* Gov. Bradford of Plymouth gives the following account: "The Dutch, with whom we had formerly converse and familiarity, seeing us seated in a barren quarter, told us of a river called by them *Fresh River*, which they often commended to us for a fine place, both for plantation and trade, and wished us to make use of it; but our hands being full otherwise, we let it pass. But afterwards there coming a company of Indians into these parts, who were driven thence by the Pequents, (Pequots,) who usurped upon them, they often solicited us to go thither, and we should have much trade, especially if we would keep a house there . . . we began to send that way and trade with the natives. But the Dutch begin now to repent; and hearing of our purpose and preparation, endeavor to prevent us, get in a little before us, make a slight fort, and plant two pieces, threatening to stop our passage. But we having a great new bark, and a frame of a house, &c. . . . ready, that we may have a defense against the Indians, who are much offended that we bring home and restore the right sachems of the place called *Natawannut* . . . though challenged by the Dutch, who stood by their ordnance, ready fitted, &c. . . . pass along, and the Dutch threaten us hard, yet they shoot not. And this was our first entrance there: we did the Dutch no wrong: for we took not a foot of any land they bought; but went above them, and bought that tract of land which belonged to the Indians we carried with us, and our friends, with whom the Dutch had nothing to do."—*Holmes' Annals*, Vol. I.

Rev. Thomas Hooker's House.

The above is a front view of the house of the Rev. Thomas Hooker, (the first minister in Connecticut.) The projection in front (A) was called the porch, and was used as his study. This building stood in School street, on the north side of the high and romantic banks of Mill river. The drawing was taken immediately before it was taken down.

Charter Oak, (March, 1836.)

The above is a western view of the Charter Oak, and shows the appearance of the tree, as it is seen from near Main street. It stands on the beautiful elevation which rises above the south meadows, a few rods north of the ancient seat of the Wyllys family. The tree is still in a vigorous state, and may flourish for another century. The engraving inserted above, was executed from a drawing taken in March, 1836, and of course is seen without foliage. In reply to an inquiry respecting this

tree, (says Dr. Holmes,*) a daughter of the present secretary Wylls, of Connecticut, wrote to me from Hartford: "That venerable tree, which concealed the charter of our rights, stands at the foot of Wylls hill. The first inhabitant of that name found it standing in the height of its glory. Age seems to have curtailed its branches, yet it is not exceeded in the height of its coloring, or richness of its foliage. The trunk measures twenty one feet in circumference, and near seven in diameter. The cavity, which was the asylum of our charter, was near the roots, and large enough to admit a child. Within the space of eight years, that cavity has closed, as if it had fulfilled the divine purpose for which it had been reared."

Sir Edmund Andross being appointed the first governor general over New England, arrived in Boston, in December, 1686. From this place he wrote to the colony of Connecticut to resign their charter, but without success. "The Assembly met as usual, in October, and the government continued according to charter, until the last of the month. About this time, Sir Edmund, with his suite and more than sixty regular troops, came to Hartford when the Assembly were sitting, and demanded the charter, and declared the government under it to be dissolved. The Assembly were extremely reluctant and slow with respect to any resolve to surrender the charter, or with respect to any motion to bring it forth. The tradition is, that Governor Treat strongly represented the great expense and hardships of the colonists in planting the country; the blood and treasure which they had expended in defending it, both against the savages and foreigners; to what hardships he himself had been exposed for that purpose; and that it was like giving up his life, now to surrender the patent and privileges so dearly bought and so long enjoyed. The important affair was debated and kept in suspense until the evening, when the charter was brought and laid upon the table where the Assembly were sitting. By this time great numbers of people were assembled, and men sufficiently bold to enterprise whatever might be necessary or expedient. The lights were instantly extinguished, and one Captain Wadsworth, of Hartford, in the most silent and secret manner, carried off the charter,† and secreted it in a large hollow tree, fronting the house of Hon. Samuel Wylls, then one of the magistrates of the colony. The people all appeared peaceable and orderly. The candles were officiously relighted, but the patent was gone, and no discovery could be made of it, or the person who carried it away. Sir Edmund assumed the government, and the records of the colony were closed in the following words:

"At a General Court at Hartford, Oct. 31, 1687, his excellency Sir Edmund Andross, knight, and captain general and governor of his majesty's territories and dominions in New England, by order of his majesty James II. king of England, Scotland, France, and Ireland, the 31st of October, 1687, took into his hands the government of the colony of Connecticut, it being by his majesty annexed to Massachusetts and other colonies under his excellency's government. FINIS."‡

* Holmes' American Annals, published in 1805. † This charter is still in good preservation in the Secretary of State's office, Hartford. ‡ Trumbull's Hist. of Conn.

EXTRACTS FROM THE EARLY RECORDS OF THE TOWN OF HARTFORD.

1635.—It is ordered that there shall be a guard of . . . men to attend with their arms fixed, and two shot of powder and shot, at least . . . every public meeting for religious use, with two sergeants to oversee the same, and to keep out one of them sentinel . . . and the said guard to be freed from warding, and to have seats provided near the meeting house door, and the sergeants to repair to the magistrates for a warrant for the due execution thereof.

It is ordered, that every inhabitant which hath not freedom from the whole to be absent, shall make his personal appearance at every general meeting of the whole town, having sufficient warning; and whosoever fails to appear at the time and place appointed, shall pay six pence for every such default; but if he shall have a lawful excuse, it shall be repaid him again; or whosoever departs away from the meeting before it be ended, without liberty from the whole, shall pay the likewise.

It is ordered, that whosoever borrows the town chain, shall pay two pence a day for every day they keep the same, and pay for mending it if it be broken in their use.

It is ordered, that there shall be a set meeting of all the townsmen together the first Thursday in every month, by nine of the clock in the forenoon, that so if any inhabitant have any business with them, he may repair unto them; and whosoever of them do not meet at the place and time set, to forfeit two shillings and six pence for every default.

At a general Town Meeting in April, 1643.—It was ordered, that Mr. Andrews should teach the children in the school one year next ensuing, from the 25th of March, 1643, and that he shall have for his pains £16; and therefore the townsmen shall go and inquire who will engage themselves to send their children; and all that do so, shall pay for one quarter at the least, and for more if they do send them, after the proportion of twenty shillings the year; and if they go any weeks more than an even quarter, they shall pay six pence a week: and if any would send their children, and are not able to pay for their teaching, they shall give notice of it to the townsmen, and they shall pay it at the town's charge; and Mr. Andrews shall keep the account between the children's schooling and himself, and send notice of the times of payment and demand it; and if his wages doth not so come in, then the townsmen must collect and pay it; or if the engagements come not to sixteen pounds, then they shall pay what is wanting, at the town's charges.

At a general Town Meeting, October 30th, 1643.—It was ordered, that if any boy shall be taken playing or misbehaving himself, in the time of public services, whether in the meeting house or about the walls . . . by two witnesses, for the first time, shall be examined and punished at the present, publicly, before the assembly depart: and if any shall be the second time taken faulty, on witness, shall be accounted . . . Further, it is ordered, if the parents or master shall desire to correct his boy, he shall have liberty, the first time, to do the same.

It was further ordered, in the same general meeting, that there should be a bell rung by the watch every morning an hour before day break, and that they that are appointed by the constables for that purpose, shall begin at the bridge, and so ring the bell all the way forth and back from Master Moody's (Wyllys' hill) to John Pratt's . . . and that they shall be in every house, one up, and . . . some lights within one quarter of an hour after the end of the bell ringing . . . if they can . . . the bell is rung before the time appointed, then to be up with lights as before mentioned, half an hour before day break, and for default herein is to forfeit one shilling and six pence, to be to him that finds him faulty, and six pence to the town.

1650.—It is further ordered, that there shall be a porch built at the meeting house, with stairs through the chamber, to be ordered by Mr. Goodwin and the townsmen; and the Governor, Mr. Wells, Mr. Webster, John Taylor and John Steele, to make a rate for the same, or any other town business, as they shall see meet, and . . .

It is ordered, that the old meeting house shall be given to Mr. (or Mrs.?) Hooker.

The 17th September, 1640.—It is ordered, that . . . Woodward shall spend his time about killing of wolves, and for his encouragement he shall have four shillings and six pence a week for his board, in case he kill not a wolf or a deer in the week; but if he kill a wolf or a deer, he is to pay for his board himself; and if he kill . . . to have it for two pence a pound. This order is made for a month before he begins.

It is further ordered, that if any person hath lost any thing that he desireth should be cried in a publick meeting, he shall pay for crying of it two pence to Thomas Woodford, to be paid before it be cried; and the crier shall have a book of the things that he crieth.

1650.—At the same meeting of the town there is a rate granted to the townsmen for forty pounds, whereof twenty pounds is to be lent to Jeremy Adams for one year, to be repaid back again, in wampum.

1653.—There was a grant to Jonathan Gilbert, that he should set up a warehouse at the common landing place in the little meadow, and upon that land without Mrs. Hooker's lot, which she doth challenge to be her land; provided, the said Jonathan do it by the consent of Mrs. Hooker.

1654.—It was granted by the vote of the town, that old Goodwife Watts shall have that land that formerly she had of the town, which was the Indians, for this year, as she had it before, upon the same terms.

1659.—For the preventing future evils and inconveniences that many times are ready to break in upon us, by many persons ushering in themselves among us, who are strangers to us, through whose poverty, evil manners or opinions, the town is subject to be much prejudiced and endangered: It is therefore ordered, at the same town meeting, that no person or persons in Hartford, shall give entertainment, or receive any family, person or persons that is not an inhabitant, so as to rent any part of his or their house to him or them, whereby he or they become an inmate, without it be first consented to by the orderly vote of the inhabitants, at some town meeting, under the forfeiture of five pounds for every month, to be recovered by the townsmen in being, by a course of law, if other means will not prevail, and this for the use of the town; and also, all such persons as break this order, shall be liable to be called to an account by the town, and bear all just damages that shall accrue to the ——— thereby.

1660.—At the same town meeting, the town by their vote ordered, that whosoever for the future shall dig or carry away earth from the sentinel hill, shall forfeit two shillings a load, and so for every proportion, without they have the consent of ensign Talcott and John Allyn.

1661.—The same day, the Jews, which at present live in John Marsh his house, have liberty to sojourn in the town seven months.

1683.—The town by their vote appointed the present townsmen to provide suitable supplies of wood and provisions, for Goodman Randall and his wife, who are at present lame and ill, and not able to provide for their necessity; and also to get a chirurgeon to cure and dress him; and they are to employ the forfeitures due from those that have refused to serve as constables this year in the service; and the rest that is necessary the town must supply.

1686.—The town by their vote made choice of Major Talcott, ensign Nathaniel Stanley, Mr. Cyprian Nichols and John Bidwell, to consider the best way to make a channel in the river between this town and Wethersfield; and to order the effecting thereof, in the best way and manner they can, that may be as little prejudice as may be, without charge to the town.

1687.—The townsmen of that year, gave an account to the town, of two pounds two shillings and eleven pence, they had received of the selectmen in 1686, expended on the poor.

At a Town Meeting, February 28th, 1689.—The town of Hartford voted, that Mr. Samuel Wyllys' house should be fortified on the south side of the river; and also Mr. James Steele's house for the defense of the town.

The town also voted, that Mr. John Olcott's house should be fortified for the north side of the river; and also Mr. Bartholomew Barnard's house for the said use.

1694.—In compliance with the recommendation of the General Court, May last, sundry of both societies being met together, and the rest being warned to meet, we have considered the motion of our neighbors of the east side, and that in reference to their desire of settling of a minister on the east side of the river, we do declare we prize their good company, and cannot, without their help, well and comfortably carry on or maintain the ministry in the two societies here; yet, upon the earnestness of our neighbors to be distinct, because of the trouble and danger they complain they are exposed to, by coming over to the publick worship here; which difficulty they should not but foresee before they settled where they are, and therefore is of less weight to us; and upon these considerations we cannot be free to part with good neighbors; yet, if the General Court see cause, we must submit. But we desire, if so it must be, that then, those of the good people of the east side, that desire to continue with us of the west side, should so do; that all the land on the east side, that belongs to any of the people on the west side shall pay to the ministry of the west side; and that all the land on the west side shall pay to the minister of the west side, though it belongs to the people of the east side.

Mrs. Wilson is allowed by the town to retail drink to those that have occasion . . . this time twelve months, she attending the law therein.

1697.—Likewise the town have granted to Mr. John Olcott, for the standing of a cider house already erected near his dwelling house, for such time as he shall continue the same for that use, not to alter the property of the land, but the right thereof to belong to the town.

1704.—At the same meeting the town voted, that there shall be four houses fortified on the east side of the great river, at their cost and charge.

At the same meeting, the town made choice of Mr. William Pitkin, Lieutenant Jonathan Hills, Deacon Joseph Olmsted, Daniel Bidwell, Sergeant William Williams, to be a committee to appoint those houses which shall be fortified, and also to proportion each man's share that he is to do of said fortification.

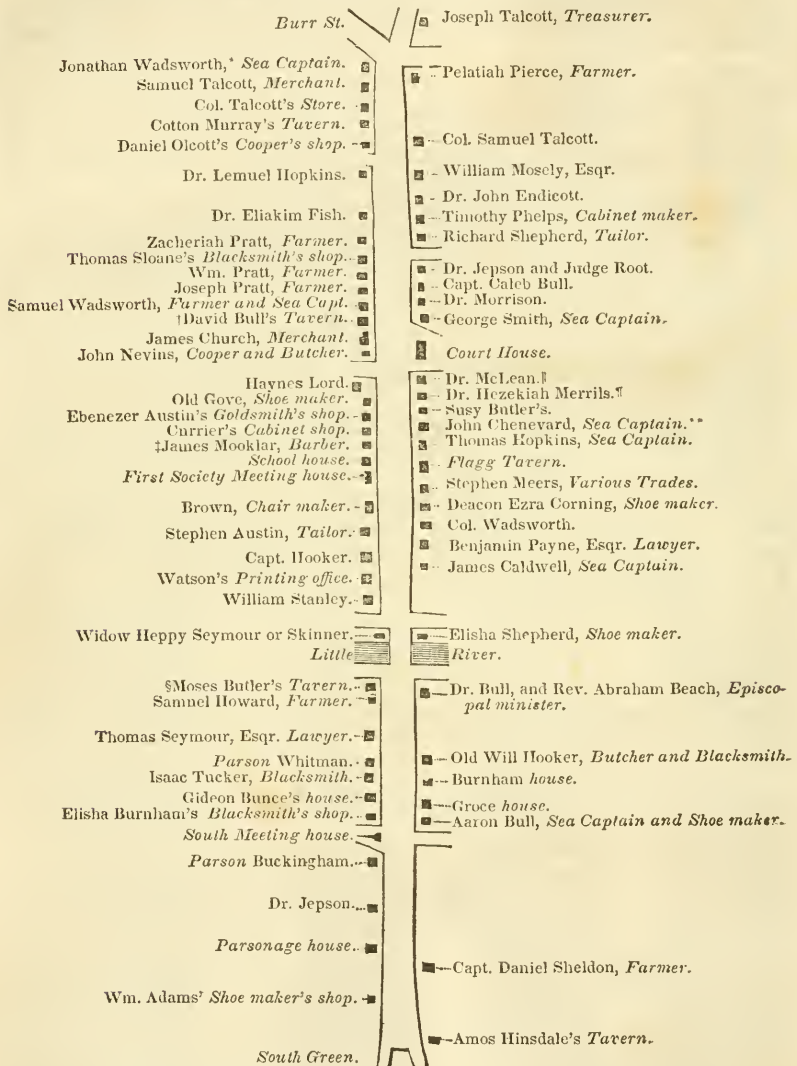

1709.—Voted, that if any person or persons shall box any pine trees within the bounds of the town of Hartford, either on the commons or undivided land, or shall draw any turpentine out of any pine trees that are already boxed within the aforesaid bounds, shall forfeit to the town's use the sum of five shillings for every tree so improved, contrary to this act, excepting only what turpentine may be drawn out of the pine trees that are already boxed for the town's use.

1711.—At the same meeting it was voted, that every rateable person in this town shall be obliged in the months of March, April, May and June, to kill one dozen of blackbirds, or else pay one shilling for the town's use; and any person that shall kill more than their dozen in the said time, shall be allowed one penny per head for as many as they shall kill; and that the selectmen take care that this vote be performed; and this order to remain and be of full force and virtue, until the town shall see cause to alter it.

The following, (copied from Dr. Hawes' Centennial Address,) is a list of the names of all persons holding land in Hartford, in February, 1639. At that time it appears that all the lands of the inhabitants were recorded in a book, and we have every reason to suppose this to be a perfect list. The ancient orthography is retained.

John Hayes (?)	John Biddell	John Baysee	William Blumfield
Edward Hopkins	Robert Day	Jeremy Adams	Gregory Witterton
George Willes	Thomas Birchwood	Thomas Bunce	Joseph Maggott
Thomas Wells	Richard Lord	John Moodie	Nathaniel Ward
John Webster	Thomas Standly	Joseph Eason	Thomas Hooker
William Whytinge	Nicholas Disborow	John Barnard	John Peirce
William Goodwing	William Kelsey	John Willcock	William Gibbins
William Westwood	Matthew Allen	James Ensign	John Skinner
Thomas Root	Nathaniel Ely	John Hopkins	Nathaniel Kellogge
Nicholas Olmstead	Thomas Spenser,	Stephen Post	James Olmstead
John Mainard	Sergt. at Armes.	Thomas Bull	Thomas Judd
Nathaniel Barden	John Purchas	Francis Andrews	William Cornwell
Thomas Upson	Robert Wade	Andrew Bacon	James Wakeley
Ralph Keeler	Ozias Goodwing	William Hide	Richard Church
Richard Webb	Richard Seamor	Arthur Smith	Thomas Stanton
John Crow	William Phillips	George Graves	Seth Grant
Nicholas Clerk	Daniel Garrad	John Olmstead	Robert Bartlett
William Butler	Benjamin Burr	Richard Olmsted	Edward Elmer
Nathaniel Richards	Thomas Barns	Thomas Bliss, sen.	George Stockin
Thomas Lord, sen.	John Morris	Richard Butler	Thomas Gridley
Benjamin Munn	John Gennings	William Holton	William Westley
Andrew Warner	John Warner	William Hills	Richard Watts
Thomas Scott	William Heaton	George Hubbard	John Stone
William Pantry	Thomas Woodford	Richard Risley	Samuel Stone
William Rusco	William Pratt	Giles Smith	William Spencer
John Taylcoatt	William Lewis	Thomas Selden	George Steele
Richard Goodman	John Brunson	Richard Lyman	Edward Lay
Matthew Marvin	William Wadsworth	John White	John' Cullet
Timothy Standly	Stephen Hart	Thomas Bliss, jr.	Samuel Wakeman
Edward Stebbins	Zachariah Field	Thomas Osmer	Widow Richards
John Pratt	James Cole	John Arnold	Mrs. Dorothea Chester
William Parker	John Clerke	Paul Peck	Clement Chapping
			Total, 127.

A PLAN OF MAIN STREET, HARTFORD, SHOWING THE BUILDINGS AND OCCUPANTS
AT THE PERIOD OF THE AMERICAN REVOLUTION.

* Killed at the taking of Burgoyne.

† This was the most noted tavern in Hartford, and was called the "Bunch of Grapes Tavern," from the carving of a bunch of grapes used as a sign.

‡ Mooklar was an Irishman; the first printing office in Hartford, was in a chamber over his shop.

§ The seven copper club met at this tavern, so called, from the amount which each member spent on the evening they met, viz. seven coppers, for half a mug of flip. This club consisted of elderly men, who met to learn the news, &c. Mr. Butler kept a very respectable tavern; he would not suffer any of his customers who resided in town to remain in his house after 9 o'clock at night; if they asked for any more liquor after they had drank their half mug, his reply was, "No, you sha'nt have another drop! go home to your families."

|| A Scotchman.

†† First Cashier of the Hartford Bank.

** A Frenchman.

In forming the foregoing plan of Main street the author had the assistance of Frederick Butler, A. M. of Wethersfield, (formerly a resident of Hartford,) Mr. James Hosmer, (now in the 85th year of his age,) Mr. Asa Francis, and Mr. George Goodwin, the senior editor of the Connecticut Courant, one of the oldest and most respectable journals printed in the State. Mr. Goodwin is now in the eightieth year of his age, and has been engaged in printing the Courant upwards of seventy years. He commenced his apprenticeship with Mr. Green, at the age of eight or nine years, in his office over Mooklar's barber's shop, the first printing office in Hartford. Mr. G. notwithstanding his advanced age, still continues in the active discharge of his duties as printer and publisher of the Courant, and in him is seen the example of a long and useful life, and the beneficial effect of acquiring, when young, correct and industrious habits.

The first new-year's verses printed in Hartford, were composed by John Ledyard, afterwards the celebrated traveler. Mr. Goodwin, then a lad, performed the duties of carrier about town. Two lines only of these verses are recollected, viz. :

"As is man's life, so is the first of January,
Short, fleeting, and completely momentary."

Ledyard is described by Mr. James Hosmer (who was well acquainted with him) as a short, stout man, with a head of an uncommon size, large gray eyes, had a fearless independent way with him, and taken as a whole, was singular in his appearance. The canoe in which he came down from Dartmouth College, was a large log hollowed out, and about sixty feet in length.

"When Hartford was first settled," says Dr. Webster,* "the main street was laid out very wide, and nearly a mile in length. At each end a fort was built: that at the north end was near the house now occupied by the descendants of Col. Talcott; that at the south was on or near the side of the late south school house, at the forks of the road—one leading to Wethersfield, the other to Farmington. The garrison could see from one fort to the other. The land east of Front street was called the *Little Meadow*, and being cleared or more valuable than the upland, it was divided among all the settlers, each having a small part. The principal men had from three to four acres each, and others less.

"The Dutch fort was erected at the mouth of the Little river, on the south side. When I was young, I saw some of the bricks which had been brought from Holland, which were washed out of the banks of the Connecticut. The river has since worn away the banks beyond the site of the fort."

* The venerable Noah Webster, LL. D., now in the 78th year of his age, is a native of West Hartford, and now a resident of New Haven. From his youth his life has been devoted to literary pursuits. His elementary works for the instruction of youth are of the first order. The "American Dictionary of the English Language," is a noble monument of the industry and research of its author, and an honor to his country. Although it may have met, and may still meet with some opposition, yet it is believed the work is destined to survive all the attacks of its enemies, and be received by posterity as a rich legacy.

“The main street was narrowed in this manner: persons petitioned the town for license to erect shops on the highway, and their requests being granted, shops were built, and afterwards other buildings were erected on the same line in front. This street was originally wet or swampy land, and in wet weather the mud was very deep. This continued to be the case down to the year 1790 or '91, when the town voted to cover it with stone, and annually appropriated a tax of four pence on the pound for that purpose for several years.”

After the Revolution, Hartford became the residence of a number of the most celebrated poets of the day. Among the most distinguished was Trumbull, (the author of *Mc Fingal*) Barlow, Hopkins and Dwight. The vein of satire and wit which appeared in many of their productions, derived for them the appellation of “*the Hartford Wits*.”

The *Anarchiad* was published in portions, in the Connecticut Magazine, during the years 1786 and 1787. Dr. Hopkins was the projector of this work, and had considerable share in writing it. “It was a mock critical account of a pretended ancient epic poem, interspersed with a number of extracts from the supposed work. By a fable contrived with some ingenuity, this poem is represented as known to the ancients, and read and imitated by some of the most popular modern poets. By this supposition, the utmost license of parody and imitation is obtained, and by the usual poetical machinery of episodes, visions and prophecies, the scene is shifted backwards and forwards, from one country to another, from earth to heaven, and from ancient to modern times. This plan is filled up with great spirit; the humorous is indeed much better than the serious part, but both have merit, and some of the parodies are extremely happy. The political views of the authors were to support those desigus which were then forming for an efficient federal Constitution.”* This poem had an extensive circulation through the country, and had considerable influence upon the public mind.

The *Echo* was a work which attracted considerable attention at the time. This was a medley of burlesque and satirical pieces, originally designed to hold up to derision a taste for the bombast and the bathos, very prevalent at that period among newspaper writers. This work was begun about the year 1791, by two persons, viz. Richard Alsop, of Middletown, and Theodore Dwight, and with the exception of portions of two or three numbers, was written exclusively by them. Dr. M. F. Cogswell wrote a few lines in one number, and Dr. Lemuel Hopkins and Dr. E. H. Smith wrote parts of one or two others.† The plan of the work was soon extended; and from ridiculing affectations of style, they directed their satire against the political doctrines and measures of their opponents, as party spirit at this period began to wax warm. The *Echo* soon became principally occupied in responding travesties of public speeches, and writings of a political cast. These pieces were, with some others by the same authors, collected into a

* *Analectic Magazine*.

† There has been a number of accounts given respecting the origin and the authors of the *Echo* which are incorrect; the above statement respecting the authors of the work, may be relied upon as correct, as it was obtained from an undoubted source.

volume which was published in 1807, illustrated by several humorous designs by Mr. Tisdal. The following is the Boston editor's account of the thunder storm, which was the occasion of drawing forth the first Echo.

"On Tuesday last, about four o'clock, P. M. came on a smart shower of rain, attended with lightning and thunder, no ways remarkable. The clouds soon dissipated, and the appearance of the azure vault, left trivial hopes of further needful supplies from the *uncorked bottles of heaven*. In a few moments the horizon was again overshadowed, and an almost impenetrable gloom mantled the face of the skies. The wind frequently shifting from one point to another, wafted the clouds in various directions, until at last they united in one common center, and shrouded the visible globe in thick darkness. The attendant lightning, with the accompanying thunder, brought forth from the treasures that embattled elements to awful conflict, were extremely vivid and amazing loud. Those buildings that were defended by electric rods, appeared to be wrapped in sheets of vivid flame, and a flood of the pure fire rolled its burning torrents down them with alarming violence. The majestic roar of dislodging thunders, now bursting with a sudden crash, and now wasting the rumbling Echo of their sounds in other lands, added indescribable grandeur to the sublime scene. The windows of the upper regions appeared as thrown wide open, and the trembling cataract poured impetuous down. More salutary showers, and more needed, have not been experienced this summer. Several previous weeks had exhibited a melancholy sight: the verdure of fields was nearly destroyed; and the patient husbandman almost experienced despair. Two beautiful rainbows, the one existing in its native glories, and the other a splendid reflection of primitive colors, closed the magnificent picture, and presented to the contemplative mind the angel of mercy, clothed with the brilliance of this irradiated arch, and dispensing felicity to assembled worlds. It is not unnatural to expect that the thunder storm would be attended with some damage. We hear a barn belonging to Mr. Wythe, of Cambridge, caught fire from the lightning, which entirely consumed the same, together with several tons of hay, &c."

This is echoed in the following manner:

"ON Tuesday last great Sol, with piercing eye,
Pursued his journey through the vaulted sky,
And in his ear effulgent roll'd his way
Four hours beyond the burning zone of day;
When lo! a cloud, o'ershadowing all the plain,
From countless pores perspired a *liquid* rain,
While from its cracks the lightnings made a peep,
And chit-chat thunders rock'd our fears asleep.
But soon the vapory fog dispersed in air,
And left the azure blue-eyed concave bare:
Even the last drop of hope, which dripping skies
Gave for a moment to our straining eyes,
Like *Boston rum*, from heaven's *junk bottles* broke,
Lost all the corks, and vanish'd into smoke.

"But swift from worlds unknown, a fresh supply
Of vapor dimm'd the great horizon's eye;
The crazy clouds, by shifting zephyrs driven,
Wafted their courses through the high-arch'd heaven,
Till piled aloft in one stupendous heap,
The seen and unseen worlds grew dark, and nature 'gan to weep.
Attendant lightnings stream'd their tails afar,
And social thunders waked ethereal war,
From dark deep pockets brought their treasured store,
Embattled elements increased the roar—
Red crinkling fires expended all their force,
And tumbling rumblings steer'd their headlong course.
Those guarded frames by thunder poles secured,
Though wrapp'd in sheets of flame, those sheets endured;
O'er their broad roofs the fiery torrents roll'd,
And every shingle seem'd of burning gold.
Majestic thunders, with dislodging roar,
And sudden crashing, bounced along the shore,
Till, lost in other lands, the whispering sound
Fled from our ears and fainted on the ground.

Rain's house on high its window sashes oped,
 And out the cataract impetuous hopp'd,
 While the grand scene by far more grand appear'd,
 With lightnings never seen and thunders never heard.

"More salutary showers have not been known,
 To wash dame Nature's dirty homespun gown—
 For several weeks the good old Joan's been seen,
 With filth bespatter'd like a lazy quean.
 The husbandman fast traveling to despair,
 Laid down his hoe and took his rocking chair:
 While his fat wife the well and cistern dried,
 Her mop grown useless, hung it up and cried.

"Two rainbows fair that Iris brought along,
 Pick'd from the choicest of her color'd throng;
 The first born deck'd in pristine hues of light,
 In all its native glories glowing bright,
 The next adorn'd with less refulgent rays,
 But borrowing luster from its brother's blaze;
 Shone a bright reflex of those colors gay
 That deck'd with light creation's primal day,
 When infant Nature lisp'd her earliest notes,
 And *youaker Adam* crept in petticoats:
 And to the people to reflection given,
 'The sons of Boston, the elect of heaven,'
 Presented Mercy's angel smiling fair,
 Irradiate splendors frizzled in his hair,
 Uneorking demi-johns, and pouring down
 Heaven's liquid blessings on the gaping town.

"N. B. At Cambridge town, the self same day,
 A barn was burpt well fill'd with hay.
 Some say the lightning turn'd it red,
 Some say the thunder struck it dead,
 Some say it made the cattle stare,
 And some it kill'd an aged mare;
 But we expect the truth to learn,
 From Mr. Wythe, who own'd the barn."

The following account, describing the transactions of Election day in Hartford, is from Kendall's travels in the northern parts of the United States, in 1807 and 1808; it is in the main a correct description of the Election ceremonies, as they were annually performed from *olden time*. Since the adoption of the present Constitution, Election days have taken place alternately in Hartford and New Haven. From this period the progress of reform has been so far extended, that nearly the whole of the ceremonies here described, have been dispensed with; first, the clergy were not allowed to dine at the public expense; next, the Governor's Guards were restricted in the same manner. The Legislature next dispensed with the Election sermon, and lastly, for two or three years past the members of the Assembly formed no procession.

"I reached Hartford at noon, on Wednesday, the 19th of May, 1807. The city is on the west bank of the Connecticut, forty five miles above its mouth. The governor, whose family residence is on the east side of the river, at some distance from Hartford, was expected to arrive in the evening. This gentleman, whose name is Jonathan Trumbull, is the son of the late Governor Jonathan Trumbull; and though the election is annual, he has himself been three or four years in office, and will almost certainly so continue during the remainder of his life. It was known that the votes were at this time in his favor.

"The governor has volunteer companies of guards, both horse and foot. In the afternoon the horse were drawn up on the banks of the river, to receive him, and escort him to his lodgings. He came before sunset, and the fineness of the evening, the

beauty of the river, the respectable appearance of the governor and of the troop, the dignity of the occasion, and the decorum observed, united to gratify the spectators. The color of the clothes of the troop was blue. The governor, though on horseback, was dressed in black; but he wore a cockade, in a hat which I did not like the less, because it was in its form rather of the old school than of the new.

"In the morning, the foot guards were paraded in front of the State House, where they afterwards remained under arms, while the troop of horse occupied the street which is on the south side of the building. The clothing of the foot was scarlet, with white waistcoats and pantaloons; and their appearance and demeanor were military.

"The day was fine, and the apartments and galleries of the State House afforded an agreeable place of meeting, in which the members of the Assembly and others awaited the coming of the governor. At about eleven o'clock, his excellency entered the State House, and shortly after took his place at the head of a procession, which was made to a meeting house or church, at something less than half a mile distant. The procession was on foot, and was composed of the person of the governor, together with the lieutenant governor, assistants, high sheriffs, members of the lower house of assembly, and unless with accidental exceptions, all the clergy of the State. It was preceded by the foot guards, and followed by the horse; and attended by gazers, that, considering the size and population of the city, may be said to have been numerous. The church, which from its situation is called the South Meeting House, is a small one, and was resorted to on this occasion, only because that more ordinarily used was at the time rebuilding. The edifice is of wood, alike unornamented within and without; and when filled, there was still presented to the eye nothing but what had the plainest appearance. The military remained in the street, with the exception of a few officers, to whom no place of honor or distinction was assigned; neither the governor nor other magistrates were accompanied with any insignia of office; the clergy had no canonical costume, and there were no females in the church, except a few (rather more than twenty in number) who were stationed by themselves in a gallery opposite the pulpit, in quality of singers. A decent order was the highest characteristic that presented itself.

"The pulpit, or, as it is here called, the desk, was filled by three, if not four clergymen; a number which, by its form and dimensions it was able to accommodate. Of these, one opened the service with a prayer, another delivered a sermon, a third made a concluding prayer, and a fourth pronounced a benediction. Several hymns were sung; and among others an occasional one. The total number of singers was between forty and fifty.

"The sermon, as will be supposed, touched upon matters of government. When all was finished, the procession returned to the State House. The clergy who walked were about a hundred in number.

"It was in the two bodies of guards alone, that any suitable approach to magnificence discovers itself. The governor was full dressed, in a suit of black; but the lieutenant governor wore riding boots. All, however, was consistently plain, and in unison with itself, except the dress swords which were worn by high sheriffs, along with their village habiliments: and of which the fashion and the materials were marvelously diversified. Arrived in front of the State House, the military formed on each side of the street; and as the governor passed them, presented arms. The several parts of the procession now separated; each retiring to a dinner prepared for itself at an adjoining inn; the governor, lieutenant governor, and assistants to their table, the clergy to a second, and the representatives to a third. The time of day was about two in the afternoon.

"Only a short time elapsed before business was resumed; or rather, at length commenced. The General Assembly met in the council room, and the written votes being examined and counted, the names of the public officers elected were formally declared. They were in every instance the same as those which had been successful the preceding year, and for several years before.

"This done, the lieutenant governor administered the oath to the governor elect, who being sworn, proceeded to administer their respective oaths to the lieutenant governor and the rest; and here terminated the affairs of the election day. Soon after six o'clock, the military fired three *feux de joie*, and were then dismissed.

"On the evening following that of the election day, there is an annual ball at Hartford, called the election ball; and on the succeeding Monday, a second, which is more select. The election day is a holiday throughout the State; and even the whole remainder of the week is regarded in a similar light. Servants and others are now indemnified for the loss of the festivals of Christmas, Easter, and Whitsuntide, which the principles of their church deny them. Families exchange visits, and treat their guests with slices of election cake; and thus preserve some portion of the luxuries

of the forgotten feast of the Epiphany. The whole day, like the morning, and like the evening which preceded it, was fine. In Hartford, the degree of bustle was sufficient to give an air of importance to the scene; a scene that taken altogether, was not unfitted to leave on the mind a pleasing and respectful impression. The following are the words of the occasional hymn, which as I have said was sung:

"Hail, happy land! hail, happy State!
Whose free-born sons in safety meet,
To bless the Lord Most High!
With one consent now let us raise
The thankful tribute of our praise
To him who rules the sky!

"The mercies He to us hath shown—
The wonders He for us hath done,
His sovereign hand proclaim;
Come, and with grateful hearts adore
The God who saves us by His power,
And bless aloud his name!

"Come, let us kneel before His face,
Devoutly supplicate His grace,
And His high aid implore;
That he, our nation, state, and land,
May save by His Almighty Hand,
Till time shall be no more!"

EXTRACTS FROM NEWSPAPERS.

Hartford, May 8th, 1766.

LAST Monday evening the long expected, joyful news of the total repeal of the Stamp Act arrived in town; upon which happy event, the General Assembly of this colony, now sitting here, appointed the Friday following as a day of general rejoicing. The morning was ushered in by the ringing of bells—the shipping in the river displayed their colors—at 12 o'clock twenty one cannon were discharged, and the greatest preparations making for a general illumination. Joy smiled in every face, and universal gladness diffused itself through all ranks and degrees. But sudden was the transition from the height of joy to extreme sorrow! A number of young gentlemen were preparing fire works for the evening, in the chamber of the large brick school house,* under which a quantity of powder granted by the Assembly for the purposes of the day, was deposited. Two companies of militia had just received a pound a man, by the delivery of which a train was scattered from the powder cask to the distance of three rods from the house, where a number of boys were collected, who undesignedly and unnoticed, set fire to the scattered powder, which was soon communicated to that within doors, and in an instant reduced the building to a heap of rubbish, and buried the following persons in its ruins, viz.

Mr. Levi Jones, John Knowles, (an apprentice to Mr. Thomas Sloan, blacksmith,) and Richard Lord, second son to Mr. John Hans. Lord, died of their wounds soon after they were taken from under the ruins of the building. Mr. William Gardiner, merchant, had both his legs broke. Doct. Nathaniel Ledyard, had one of his thighs broke. Mr. Samuel Talcott, Jun. very much burnt in his face and arms. Mr. James Siley, goldsmith, had one of his shoulders dislocated and some bruises in the other parts of his body. Mr. John Cook, Jun. had his back and neck much hurt. Ephraim Perry, slightly wounded. Thomas Forbes, wounded in his head. Daniel Butler, (the tavern keeper's son,) had one of his ankles put out of joint. Richard Burnham, son to Mr. Elisha Burnham, had his thigh, leg and ankle broke. Eli Wadsworth, (Capt. Samuel's son,) is much wounded and burnt, in his face, hands, and other parts of his body. John Bunce, Jun. (an apprentice to Mr. Church, hatter,) wounded in the head. Norinond Morrison, (a lad that lives with Capt. Siley,) a good deal burnt and bruised. Roderick Lawrence, (Capt. Lawrence's son,) slightly wounded. William Skinner, (Capt. Daniel's son,) had both his thighs broke. Timothy Phelps (son to Mr. Timothy Phelps, shop joiner,) had the calf torn off one of his legs. Valentine Vaughn, (son to Mr. Vaughn, baker,) had his skull terribly broke. Horace Seymour, (Mr. Jonathan Seymour, Jun. son,) two sons of Mr. John Goodwin, a son of Mr. John Watson, and a son of Mr. Kellogg, hatter, were slightly wounded. Two mulatto and two negro boys were also wounded.—*Conn. Gazette, May 31, 1766.*

* This building stood where the Hartford Hotel now stands.

Hartford, September 22d, 1766.

THERE are the greatest number of bears come down among the towns that ever was known; they destroy great quantities of Indian corn, and make great havoc among the sheep and swine. Last Tuesday morning a large he bear was discovered in an enclosure opposite the Treasurer's, and being pursued, he took to the main street, which he kept till he got to the lane that turns eastward by the south meeting house, (notwithstanding his being pelted from every part of the street, with stones, clubs, &c.) and was followed into the south meadow, where he was shot. The number of people that were out of doors, to see so uncommon an animal in the town made it dangerous to fire at him in the street. In the evening he was roasted whole, and a large company supped on him.—*New London Gaz. Oct. 10th, 1776. No. 152.*

Hartford, June 24, 1768.

MR. PRINTER,—I wish you would put this into your newspaper for the complainant. *Sir*,—I was at Hartford a little while ago, and I see folks running about streets after the gentlemen that belonged to the General Assembly; and I asked what it was for, and an old woman told me that they come a great way, wator of forty miles easterly, to find fault with what the Assembly was a going to do. And what I want of you is, to complain of it; for it does not seem clever to have them gentlemen pestered so by cats-paws, when we have got them to do all our business for us by themselves. And you know when folks have folks talking to them all the while, it will pester them. I wonder people will act so; if what I once read in a book is true,
 "Know, villains, when such paltry slaves presume
 To mix in treason; if the plot succeeds,
 They're thrown neglected by."

New London Gaz. June 24th, 1768. No. 241.

Hartford, November 10, 1778.

ON Tuesday last, were executed on Rocky Hill in this town, David Farnsworth and John Blair, who were tried and found guilty at a Division Court Martial, held at Danbury the 18th inst., for being found about the encampment of the armies of the United States, as spies, and having a large sum of counterfeit money about them, which they brought from New York.

Hartford, March 20, 1781.

THE following is an extract of his excellency General Washington's orders of the 17th instant. Alexander Mc Dowall, late lieutenant and adjutant of Colonel Welles' regiment of the state troops of Connecticut, having been, by a general court martial of the line, held at Hartford the 7th day of March, 1781, whereof Colonel Heman Swift was President, found guilty of desertion to the enemy, and by the said court martial sentenced to suffer death for the same, agreeable to the sixth section of the first Article of War; which sentence is ordered to be put in execution on Wednesday, the 21st instant, at Hartford, between the hours of ten in the forenoon and three in the afternoon of the same day.

Hartford, May 29, 1781.

ON Saturday the 19th inst. his excellency General Washington, accompanied by Gen. Knox, Gen. Du Portail, and their respective suites, arrived at Wethersfield; being escorted into town by a number of gentlemen from Hartford and Wethersfield. As he dismounted at his quarters he was saluted by the discharge of thirteen cannon, by the corps of Artillery, under the command of Capt. Frederick Bull. On Monday the 21st instant, his excellency the Count du Rochambeau, commanding the army of his most Christian Majesty at Newport, Gen. Chatteleu, and their suites, arrived at Wethersfield. They were met at Hartford, by his excellency General Washington, the officers of the army, and a number of gentlemen, who accompanied them to Wethersfield, where they were saluted with the discharge of cannon. Every mark of attention and politeness were shewn their excellencies, and the other gentlemen of the allied armies whilst attending the convention.

Hartford, February 25, 1783.

To his excellency the Governor of the State of Connecticut.

Philadelphia, January 10, 1783.

Sir,—His majesty has been informed of the marks of joy, which the State of Connecticut has shewn on the occasion of the birth of the Monseigneur the Dauphin. He views with a great deal of satisfaction the part that the citizens of your state have taken in this happy event. The King orders me to testify his sensibility on this subject,

and at the same time charges me to assure the citizens and inhabitants of the State of Connecticut of his attention, and of the particular interest which he shall always take in their prosperity.

I have the honor to be, with respectful attachment, your excellency's very obedient,
humble servant,

LE CHEVALIER DE LA LUZERNE.

Connecticut Journal, No. 800.

Hartford, January 4, 1785.

At the Supreme Court, now sitting in this city, the following persons have been convicted and sentenced, viz. Moses Parker, for horse stealing, to sit on a wooden horse half an hour, receive fifteen stripes, pay a fine of £10, be confined in gaol and the work-house three months, and every Monday morning for the first month to receive ten stripes and sit on the wooden horse as aforesaid.

Moses Fisk, of Middletown, for counterfeiting Treasurer's certificate, to receive twenty stripes, pay a fine of £20, and be confined six months.

Judah Benjamin, for polygamy, (he having married a wife in Symsbury, when he had another living in Massachusetts,) to receive ten stripes, be branded with the letter A, and wear a halter about his neck during his continuance in this State; and if ever found with it off, to receive thirty stripes.

The Supreme Court at their present session, has tried and convicted several persons of the crimes of forgery, horse stealing and bigamy, and the villains received their respective punishments. One of the rogues was sentenced to ride the *wooden horse*, that wonderful refinement of punishment in our modern statutes. Accordingly on Thursday last, the terrible machine was prepared—consisting of one simple stick of wood, supported by four legs; and by order of the sheriff placed on the State House square. Hither the prisoner was conducted, and being previously well booted and spurred by the officer, was mounted on the oaken stud. Here he continued for half an hour, laughing at his own fate, and making diversion for a numerous body of spectators who honored him with their company. He took several starts for a race with the best horses in the city; and it was difficult to determine who were most pleased with the exhibition, the criminal or the spectators. After this part of the sentence had been legally and faithfully executed, the culprit was dismounted and led to the whipping post, where the duties made him more serious. The whole was performed with great order and regularity.—*Connecticut Courant, No. 1041.*

THE new Theatre in this city was opened on Monday evening last, with a celebrated comedy, entitled, the Dramatist, preceded by a handsome and pertinent address, by Mr. Hodgkinson. From the specimen that has been given of the abilities of the performers, and the assurance of the managers, that they will so conduct the Theatre, that it may be justly styled a school of morality; it is presumed that it will be a great source of instruction and amusement to those who visit it; and we will hazard the assertion, notwithstanding the prejudices that some have entertained against it, that as an amusement, it is the most innocent, and, as a source of instruction, it is the most amusing of any that we have ever yet experienced. While the theatre is well conducted, on chaste principles—when vice is drawn in colors that will disgust, and virtue painted with all its alluring charms. it is hoped it will meet the approbation and encouragement of the citizens, and of the neighboring towns.—*Connecticut Courant, Aug. 10th, 1795.*

*Prologue on the establishment of a new Theatre in Hartford. Written and spoken by
Mr. Hodgkinson.*

Here, while fair peace spreads her protecting wing,
Science and Art, secure from danger spring,
Guarded by freedom—strengthen'd by the laws,
Their progress must command the world's applause.

While through all Europe horrid discord reigns,
And the destructive sword crimson's her plains:
O! be it ours to shelter the opprest,
Here let them find peace, liberty and rest;
Upheld by Washington, at whose dread name
Proud Anarchy* retires with fear and shame.

* The Western insurrection.

Among the liberal arts, behold the Stage,
 Rise, tho' oppos'd by stern fanatic rage!
 Prejudice shrinks, and as the cloud gives way,
 Reason and candor, brighten up the day.
 No immorality now stains our page,
 No vile obscenity—in this blest age,
 Where mild RELIGION takes her heavenly reign,
 The Stage the purest precepts must maintain:
 If from this rule it swerv'd at any time,
 It was the People's, not the Stage's crime.
 Let them spurn aught that's out of virtue's rule,
 The Stage will ever be a *virtuous school*.
 And though 'mong players some there may be found,
 Whose conduct is not altogether sound,
 The Stage is not alone in this to blame,
 Ev'ry profession will have still the same:
 A virtuous sentiment from vice may come!
 The libertine may praise a happy home;
 Your remedy is good with such a teacher;
 Imbibe the precept, but condemn the preacher.

Connecticut Courant, Nov. 19th, 1795.

WHEN the *Editors* of the Connecticut Courant and American Mercury first enlarged their papers, they flattered themselves that they should be able to continue them at the original price of seven shillings per annum, without subjecting themselves to too great a loss. But from the very great rise of every article of family consumption, and the consequent depreciation of money, they find it no longer practicable. In doing it, they are subjecting themselves to a loss of nearly one half the real value of their labor. Allowing their papers to have been as good as they formerly were before their enlargement, they presume that their customers would have justified them for increasing the price of them in proportion to the increase of their size. And since every thing else has risen at least fifty per cent. and some articles more than a hundred, they conceive it but reasonable that they should, after previously notifying their customers, float along with the general tide. Influenced by these motives, they hereby inform their customers, that from the first of January next, the price of the Connecticut Courant and American Mercury will be nine shillings per annum, or two shillings and three pence a quarter, which is only about half the advance of almost every other article. At the same time that they acknowledge with grateful sensations, the liberal encouragement which a generous public have given them, they engage that no exertion on their part shall be wanting to merit a continuance of it; and that they will endeavor to render their papers acceptable to their customers, by embracing every opportunity which may offer for improving them.

HUDSON & GOODWIN,
 ELISHA BABCOCK.

P. S. Those who have paid for their papers in advance, will have them continued agreeable to contract.

Connecticut Courant, Jan. 11, 1796.

To the Towns of Hartford and East Hartford.—You are no strangers to the abuses practiced at your ferry, but you do not reform them. They are become so enormous that to be silent longer, would be a crime. I have only to charge the ferrymen of East Hartford with extortion—they are obliging and attentive: but those of Hartford with drunkenness, inattention, delay and extortion. Within a few days past the ferrymen at Hartford refused to carry over two travelers unless they would wait half an hour, which as they were in haste, they refused, and went to Wethersfield to pass the ferry. I often cross the ferry, and have complained in vain. A gentleman advised me to prosecute the ferrymen—I have neither time nor inclination to do so; but I expect the impartial printers in Hartford will publish this, and I promise them if they do so, and there is not a reformation, I will use my influence to have a petition from a very respectable number of injured citizens to the General Assembly, praying for redress, in which I will enumerate facts to show that I have not told half in this paper. I will prove them all from the inhabitants of the two towns. If the present fare be too low, I have no objection to its being raised by law; but two, three, and four fold, to be collected unlawfully, is too much, without adding delay and insult. A TRAVELER.

Connecticut Courant, June 12th, 1797.

On Saturday the 10th inst. the sentence of death was executed in this town upon Richard Done, a native of Ireland, for the murder of Daniel McIver, on the 4th of July, A.D. 1796. As there had not been an execution in this place for a considerable number of years, a large concourse of people collected from the neighboring towns to witness this melancholy spectacle. It is generally thought there were from six to ten thousand persons present.

At one o'clock, P. M. the people congregated on the east side of the State House in this city, from the portico of which the Rev. Mr. Strong delivered a sermon (by particular desire of the unhappy prisoner) from the following words of the prophet Hosea, chapter vi. verse 6. "For I desired mercy and not sacrifice; and the knowledge of God more than burnt offering." About three o'clock the prisoner, guarded by two companies of militia, attended by several clergymen, the high sheriff of the county of Hartford, and his deputies, proceeded to the place of execution; and at half past four, the scaffold was dropped from under him. As he had from the first, so he to the last moment of his existence, persisted in denying his having been guilty of willful murder. He told the same story uniformly. On this occasion every part of the exercise was performed with the greatest decency and propriety; and we are happy to add, that amid such a number of people, no unfortunate accident took place.

Connecticut Courant, Hartford Dec. 30th, 1799.

In consequence of the afflicting intelligence of the death of General Washington, divine services were performed at the north meeting house in this town on Friday last. The town never exhibited a more solemn and interesting appearance. Notice having been given to the inhabitants of this and the neighboring towns, the concourse of people was greater, than almost ever was known on any former occasion. The stores and shops were shut through the day—all business suspended—the bells were muffled, and tolled at intervals, from nine in the morning until the services commenced. The meeting house was greatly crowded, and still a large proportion of the people could not get in at the doors. The services were appropriate, solemn and impressive. A very eloquent and pathetic sermon was delivered by the Rev. Nathan Strong, to a most attentive, devout, and mourning audience, from Exod. xi. 3. "And the man Moses was very great," &c. The music was solemn and sublime; and the whole scene exhibited in the strongest of all possible colors, the deep affliction of the people at a loss utterly irreparable. The floods of tears, the badges of mourning which were universally worn, the church hung in black, a procession of many hundreds of persons, composed of men of all classes, and the solemn grief pictured on every countenance, made impressions on the minds of the beholders, which many years will not efface. We presume that the sentiments and feelings which inspired the persons present, pervade the country, on the distressing event which called them together. However divided into parties on political subjects, with respect to the character of this great man, we trust there is but one opinion in the United States. As he lived beloved and admired, he has died truly lamented; and his memory will be honored as long as wisdom, virtue and piety shall be esteemed among men. "The beauty of Israel is slain upon the high places; how are the mighty fallen."

The following Hymn* was sung on the melancholy occasion—

What solemn sounds the ear invade!
What wraps the land in sorrow's shade!
From Heaven the awful mandate flies,
The Father of his Country dies.

Let every heart be filled with woe,
Let every eye with tears o'erflow,
Each form oppressed with deepest gloom,
Be clad in vestments of the tomb.

Behold that venerable band!
The rulers of our mourning land,
With grief proclaim from shore to shore,
"Our guide, our WASHINGTON'S NO MORE!"

Where shall our country turn its eye?
What help remains beneath the sky?
Our Friend, Protector, Strength and Trust,
Lies low and mouldering in the dust.

* Written by Theodore Dwight, Esq.

Almighty God, to thee we fly—
 Before thy Throne above the sky,
 In deep prostration humbly bow,
 And pour the penitential vow.

Hear, O Most High! our earnest prayer—
 "Our country take beneath thy care,
 "When dangers press, and foes draw near,
 "May future Washingtons appear."

The following epitaphs and inscriptions are copied from monuments in the ancient burying ground, back of the Center Church.*

HERE LYETH THE BODY OF MR. DAVID GARDINER OF GARDINERS ISLAND DECEASED JULY 10. 1689 IN THE FIFTY FOVRTH YEAR OF HIS AGE. WELL, SICK, DEAD IN ONE HOVRS SPACE

ENGRAVE THE REMEMBRANCE OF DEATH ON THINE HEART
 WHEN AS THOV DOST SEE HOW SWIFTLY HOVRS DEPART

The above inscription is on a plain slab of red sandstone, a little north of the central part of the yard. David Gardiner, whose death it records, was the *first white child* born in Connecticut. He removed, it appears, with his father, Lyon Gardiner, to Gardiner's Island, and coming to Hartford, probably on public business, died suddenly. The stone is placed horizontally over his grave, and (1836) partly imbedded in the earth, and was with some difficulty deciphered. John G. Gardiner, Esq. the gentleman to whom the author is indebted for the account of Capt. Kidd, (p. 23,) mentions that his father erected a monument to the memory of his ancestors on Gardiner's Island, in June, 1806. On this monument it is stated, that Lyon Gardiner died in 1663. "David, his son, born at Saybrook, April 29, 1636, the first white child born in Connecticut, died 16—. Mary, his wife, whom he married at Westminster, England, died 16—." It appears by this that Mr. Gardiner did not know at what time or at what place his ancestor died; it was supposed by the family, (previous to the discovery of the monument at Hartford, by the author of this work, in 1835,) that he was buried somewhere on Gardiner's Island.

"We have," says Mr. Gardiner, "an old Bible in the house, which belonged to Lyon Gardiner, upon a blank leaf of which the following is written.

"In the year of our Lord, 1635, the 10th of July, came I, Lion Gardiner and Mary my wife from Worden, a town in Holland, where my wife was born, being the daughter of one Diricke Willemson deureant; her mother's name was Hachir, and her aunt, sister of her mother, was the wife of Wouter Leanerdson, old burger Muster, dwelling in the hostrade, over against the Bruser in the Unicorn's head; her brother's name was Punce Garretson, also old burger Muster. We came from

* The citizens of Hartford have quite recently raised 1,500-dollars for the purpose of improving the ancient burying ground: all the old monuments have been replaced and repaired; graveled walks have been made, numerous shade and other trees have been set out, and it is expected that during the present year (1837) a handsome obelisk, inscribed with the names of the first settlers of the town, will be erected. This well merited token of respect to the memory and ashes of the venerated dead, is in accordance with the best feelings of our nature, and it is hoped that this honorable example of the citizens of Hartford, will be followed in other places.

Worden to London, and from thence to New England, and dwelt at Saybrook fort four years—it is at the mouth of Connecticut river—of which I was commander, and there was born unto me a son, named David, 1635, the 29th of April, the first born in that place, and 1638 a daughter was born, named Mary, 30th of August, and then I went to an island of my own, which I had bought and purchased of the Indians, called by them Monchonack, by us Isle of Wight, and there was born another daughter, named Elizabeth, the 14th September, 1641, she being the first child of English parents that was born there.”

R
AN EPITAPH ON M SAMUEL STONE, DECEASED YE 61
YEARE OF HIS AGE IVLY 20 1663.

NEWENGLAND'S GLORY & HER RADIANT CROWNE,
WAS HE WHO NOW ON SOFTEST BED OF DOWNE,
TIL GLORIOUS RESURRECTION MORNE APPEARE,
DOTH SAFELY, SWEETLY SLEEPE IN JESUS HERE,
IN NATURE'S SOLID ART, & REASONING WELL,
TIS KNOWNE, BEYOND COMPARE, HE DID EXCELL:
ERRORS CORRUPT, BY SINNEWOUS DISPUTE,
HE DID OPVVGNE, & CLEARLY THEM CONFUTE:
ABOVE ALL THINGS HE CHRIST HIS LORD PREFERRD,
HARTFORD, THY RICHEST JEWEL'S HERE INTERD.

The above inscription is on a plain slab of red sandstone or freestone, about five inches in thickness, raised on blocks of the same, a short distance from the ground. Another slab of the same material is by its side, on which is an inscription in memory of Mr. Hooker, styled by the author of the *Magnalia* “the light of the western churches.” This inscription has been put upon the stone in the course of a few years past; the engraving is in imitation of the ancient method of making letters.

In memory of the Rev. Thomas Hooker, who, in 1636, with his assistant Mr. Stone, removed to Hartford with about 100 persons, where he planted ye first church in Connecticut, an eloquent, able and faithful Minister of Christ. He died July 7th, *Æt.* LXI.

The following lines respecting Mr. Stone, are from “The Wonder-working Providence,” &c. said to have been written by Capt. Edward Johnson, the first settler, and for many years representative in the General Court, for Woburn, Mass. Capt. Johnson was from Kent in England; he died in 1672.

“Thou well smooth'd *Stone* Christs work-manship to be;
In's Church new laid his weake ones to support,
With's word of might his foes are foil'd by thee;
Thou daily dost to godliness exhort.
The Lordly Prelates people do deny
Christs Kingly power *Hozanna* to proclaime,
Mens mouths are stopt, but *Stone* poor dust doth try,
Throughout his Churches none but Christ doth raigne.
Mourne not Oh Man, thy youth and learning's spent;
In desart Land, my Muse is bold to say,
For glorious workes Christ his hath hither sent;
Like that great worke of Ressurrection day.”

The following is on a plain upright marble slab, in the western part of the yard.

The General Convention of the Universal Churches, in memory of their dear departed Brother, the Rev. Elhanan Winchester, erected this monumental stone. He died April 18th, 1797, aged 46 years.

'Twas thine to preach with animated zeal
 The glories of the Restitution morn,
 When Sin, Death, Hell, the power of Christ shall feel,
 And Light, Life, Immortality, be born.

The following are copied from monuments in the new burying ground, north of the city, on the Windsor road.

Dr. Strong's Monument.

Beneath this monument are deposited the remains of the REV. NATHAN STRONG, D.D. Pastor of the Church in the First Ecclesiastical Society in Hartford. Endowed with rare talents, and eminent for learning and eloquence, he zealously devoted himself to the cause of Religion: and, after many years of faithful services, approved and blessed by the Holy Spirit, he fell asleep in Jesus, deeply lamented by his friends, the people of his charge, and the church of Christ. "Blessed are the dead who die in the Lord, for they rest from their labors."

On the opposite side.

This monument is erected by the First Ecclesiastical Society in Hartford, in memory of the Rev. Nathan Strong, D. D. born 16th October, 1748, ordained 5th January, 1774, died 25th December, 1816.

In memory of Mary Ann Dodd, who departed this life March 26, 1813, aged 27 years, wife of Elisha Dodd.

"Pleasant be thy rest, O lovely beam, soon hast thou set on our hills."

On the same monument are recorded the deaths of three young children of Mr. Dodd. This is accompanied with another beautiful and expressive quotation from Ossian, viz.

"They fell like three young Oaks which stood alone on the hill. The traveler saw the lovely trees, and wondered how they grew so lonely. The blast of the desert came by night, and laid their green heads low. Next day he returned, but they were withered, and the heath was bare."

This monument, erected as a tribute of filial affection, is sacred to the memory of the Rev. James Cogswell, D. D.* He was born Jan. 6, 1720, and died Jan. 2, 1807. Sixty years a faithful laborer in the vineyard of his Lord: eminently distinguished by those

* An affecting anecdote, showing the "ruling passion strong in death," is related respecting Dr. Cogswell. During his last illness, he forgot his dearest friends, and even his own name. When asked if he remembered his son, Mason? (a son with whom he lived, and to whom he was much attached;) he replied, "I do not recollect that ever I had a son;" but when asked whether he remembered the Lord Jesus Christ, he revived at once, exclaiming, "O yes, I do remember him: he is my God and REDEEMER."

mild and humble virtues which adorn the Christian character, as he lived, so he died, a shining example of faith. When his dearest friends were forgotten, CHRIST still lived in his remembrance. He expired triumphantly, exclaiming "I do remember him: he is my God and my redeemer."

United in death, here rest the remains of Mason F. Cogswell, M. D. who died Dec. 17th, 1830, aged 69 years—and of Alice Cogswell, who died Dec. 30, 1830, aged 25 years—the Father, distinguished for his private virtues and public spirit, and his professional worth: and the daughter, (though deprived of hearing and speech,) for her intellectual attainments and loveliness of character. The American Asylum for the Deaf and Dumb, which under Providence, owes its origin to the father's tenderness towards his child, and his sympathy for her fellow sufferers, will stand an enduring monument to their memory, when this shall have perished.

AVON.

THIS town was originally a parish in the north part of Farmington, by the name of Northington. It was incorporated as a distinct town in 1830. It is bounded n. by Canton and Simsbury, e. by Hartford and Bloomfield, w. by Burlington, and s. by Farmington. It is about 6 miles in length, and upwards of $5\frac{1}{2}$ in breadth. This township is for the most part a level and fertile tract of land, in the valley of the Farmington river, between two mountainous ridges, on the east and west. The population of the town in 1830, was 1,025.

Eastern view of Avon.

The above is a representation of the central part of Avon, as it appears to the observer while descending Talcott mountain to the westward. This place is 9 miles from Hartford, and 6 north of Farmington. Farmington river runs nearly at the base of this mountain at this place. Its course is seen in the engraving, by the tops of the trees and bushes in the fore ground, immediately before the person who is looking to the westward: immediately above the head of the person represented, is seen the Baptist church, without a spire, having eight windows on the

east side. The Congregational church is seen beyond. The New Haven and Northampton Canal passes between these churches. The ancient Northington meeting house stood a few rods from the Farmington river, about $1\frac{1}{2}$ miles s. e. of the Congregational church seen in the engraving: it was burnt down nearly twenty years since.* The meeting houses now standing in the town, three in number, 2 Congregational and 1 Baptist, were built immediately after the old one was destroyed.

View of Monte Video or Wadsworth's Tower.

In the north eastern corner of this town, about two miles north from the main road which passes over Talcott mountain, is "Wadsworth's Tower," so called from Daniel Wadsworth, Esq. of Hartford, who erected it, and also a summer-house and other buildings in the immediate vicin-

* "I once attended public worship there," says Prof. Silliman, "on a pleasant but warm summer sabbath. The house was almost embowered in ancient forest trees: it was smaller than many private dwelling houses—was much dilapidated by time, which had furrowed the gray unpainted shingles and clapboards, with many water-worn channels, and it seemed as if it would soon fall. It was an interesting remnant of primeval New England manners. The people, evidently agricultural, had scarcely departed from the simplicity of our early rural habits; the men were not parading in foreign broadcloth, nor the women flaunting in foreign silks and muslins; but they appeared in domestic fabrics, and both men and women were dressed with simplicity. I do not mean that there were no exceptions, but this was the general aspect of the congregation, and, from the smallness of the house, although there were pews, it seemed rather a domestic than a public religious meeting. The minister corresponded admirably with the appearance of the house and congregation, as far as antiquity and primeval simplicity were concerned, but he was highly respectable for understanding, and sustained even in these humble circumstances, the dignity of his station. He was an old man, with hoary locks, and a venerable aspect, *a man of God, of other times*—a patriarchal teacher—not caring for much balanced nicety of phrase, but giving his flock wholesome food, in sound doctrine and plain speech. His prayers had that detail of petition—that specific application, both to public and private concerns, and that directness of allusion, to the momentous political events of the day, and their apparent bearing upon this people, which was common among our ancestors, and especially among the first ministers, who brought with them the fervor of the times when they emigrated from England."

ity. This place is also called *Monte Video*, and is remarkable for its beauty in natural scenery : it is a place of resort for parties of pleasure from Hartford and other places in the vicinity. Having ascended the summit of Talcott mountain, those who wish to visit this spot must follow an obscure road which turns directly to the north. "The road is rough, and the view bounded on the east by the ridge, which in many places rises in perpendicular cliffs, to more than one hundred feet above the general surface of the mountain. At the end of a mile and a half, the road terminates at a tenant's house, built in the Gothic style, and at this place the scene is immediately changed. At the right, the ridge, which has seemed an impassable barrier, suddenly breaks off and disappears, but rises again at the distance of half a mile, in bold gray masses, to the height of one hundred and twenty feet, crowned by forest trees, above which appears a tower of the same color of the rocks. The space or hollow caused by the absence of the ridge, is occupied by a deep lake of the purest of water, nearly half a mile in length, and somewhat less than half that in width. Directly before you to the north, and extending about half a mile, is a scene of cultivation, interspersed with trees, in the center of which stands a summer-house. The ground is gently undulating, bounded on the west by a precipice which overlooks Farmington valley, and inclining gently to the east, where it is terminated by the margin of the trees that skirt the lake."

The tower is situated on the summit of the ridge, standing within a few rods of the edge of the precipice. "The tower is a hexagon, of 16 feet diameter, and fifty five feet high ; the ascent of about eighty steps, on the inside, is easy, and from the top, which is nine hundred and sixty feet above the level of Connecticut river, you have at one view, all those objects which have been seen separately from the different stations below. The diameter of the view in two directions, is more than ninety miles, extending into the neighboring states of Massachusetts and New York. . . . The little spot of cultivation surrounding the house and the lake at your feet, with its picturesque appendages of boat, winding paths, and Gothic buildings, shut in by rocks and forests, compose the fore ground of this grand panorama. On the western side, the Farmington valley appears in still greater beauty than even from the lower brow, and is seen to a greater extent, presenting many objects which were not visible from any other quarter. On the east is spread before you, the great plain through which the Connecticut river winds its course, and upon the borders of which the towns and villages are traced for more than forty miles. The most considerable place in sight is Hartford, where, although at the distance of eight miles in a direct line, you see, with the aid of a glass, the carriages passing at the intersection of the streets, and distinctly trace the motion and position of the vessels, as they appear, and vanish, upon the river, whose broad sweeps are seen, like a succession of lakes, extending through the valley. The whole of this magnificent picture, including within its vast extent cultivated plains and rugged mountains, rivers, towns and villages, is encircled by a distant outline of blue mountains, rising in shapes of endless variety."

BERLIN.

BERLIN was incorporated as a town in 1785. It was previously the second society of Farmington, by the name of Kensington;—a section of the towns of Wethersfield and Middletown were joined to it at its incorporation. Kensington was probably set off from Farmington as a society about the year 1712, as the first minister, the Rev. Mr. Burnham, was ordained in that year. At this time there were but 14 families in the place, and the church consisted of 10 members, seven males and three females. Previous to the settlement of Mr. Burnham, these families attended meeting at Farmington, and the women walked from 10 to 12 miles and carried their infants in their arms. Kensington was divided about the year 1753, by the incorporation of the society of New Britain; and Dr. Smalley, the first clergyman in this society, was ordained in 1758. In 1772, the society of Kensington was again divided, by the formation of the society of Worthington; its name being derived from one of the committee who located the society.*

Northern view of Worthington, in Berlin.

The township of Berlin is bounded north by Farmington, east by Middletown and Wethersfield, west by Southington, and south by Meriden. It has an average length of about 8 miles, and about 5 in breadth. The population of the town in 1830 was 3,047.

The above shows the general appearance and situation of the village of Worthington in Berlin. The southern termination of Mount Lanencation is seen on the left in the distance. This place was incorporated as a borough in 1834; its limits extend two miles from north to south, and about one mile from east to west, containing about 80 dwelling houses, 4 or 5 mercantile stores, 3 churches; 1 Congregational, 1 Methodist, and 1 Universalist, and an Academy. The making of tin ware is the

* Pease and Niles's Gazetteer.

most important manufacturing business done in the place. It is 11 miles from Hartford, 23 from New Haven, and 8 from Wethersfield.

The manufacturing of tin ware on this side of the Atlantic, probably first commenced in this place. About the year 1740, William or Edward Patterson, a native of Ireland, came to this country and settled in this place. His trade was that of a tinner; and soon after his arrival, he commenced manufacturing tin ware, and continued in the business till the Revolution. He was then under the necessity of suspending it, as the raw material could not be obtained. After the war, this manufacture was carried on in this place, by those young men who had learned the art from Mr. Patterson;* and from these persons the art has been extended over a number of the neighboring towns. For a considerable time Mr. Patterson carried on the business alone, and peddled his own ware in a basket; but the value of the article becoming known, others engaged in the business, and the ware was soon scattered over the country. At first others as well as Patterson peddled in baskets, carried by hand or on horses; afterwards two wheeled carts were introduced, but those being found inadequate for long journeys, were succeeded by one horse wagons, and these in some measure by very large carriages, with two and four horses. The wares manufactured of tin were vended at first in New England and New York, and then gradually in the southern and western states.

The first families who settled in New Britain, located themselves about half a mile east of the present village. The first meeting house in this parish was about half a mile northeast of the present Congregational church. The eastern part of New Britain was first settled by 3 families of the name of Judd, 3 of the name of Smith, and one by the name of Patterson: the Lewises settled in the south part; the western part was settled by 3 families of Andrews and 2 by the name of Hart: the northeast part by the Stanleys, Hart, and Smith. The first settlers in the village were of the names of Lee, Judd, Booth and Mather.

The cut on page 67 shows the central part of the flourishing village of New Britain. The Methodist church, a plain building with 4 windows on the west end, is seen nearly in the central part of the engraving, eastward of which is seen the brass factory of Messrs. North & Stanley, 4 stories in height. The farthest mountains seen in the distance are eastward of Connecticut river, being the eastern boundary of the great valley of the Connecticut. The village, which has been built up within about a dozen years past, is situated around the border of what was formerly a kind of swamp, which by draining &c. is now become quite valuable. New Britain contains about 1,500 inhabitants. The village contains 3 houses of worship; 1 Congregational, 1 Methodist and 1 Baptist. There are 45 factories in the society, principally brass factories; upwards of 700 hands are employed, and about 650,000 dollars capital invested. The latitude of the village, as ascertained by E. H. Burritt, Esq. is $41^{\circ} 40'$; longitude, $72^{\circ} 53' W$. Distance from Hartford 10 miles s. w. and 28 from New Haven.

* Dr. Dwight.

N. W. view of New Britain, (central part.)

“Major *Jonathan Hart* was a native of this town. He was a gallant and distinguished officer, and one of the victims of the unfortunate defeat of Gen. St. Clair, Nov. 4th, 1791. His life and those of his command, were literally offered a sacrifice for the safety of the rest of the army. When all were in confusion and dismay, Major Hart was ordered to charge the enemy with the bayonet, with a view to facilitate a retreat, or rather a flight, to the shattered remains of the army. This charge was made with gallantry and spirit, under circumstances which language is too feeble to describe; the desolation of the place; the confusion of the scene; the whoops and yells of a savage foe, flushed with victory, and thirsting for blood; the general consternation which prevailed, and the groans of the dying in every direction. But the intrepid Major, and almost every man of his party, were killed in the desperate enterprise, and their bones were left to bleach upon the borders of the waters of the Wabash, the dreary abode of wild beasts and ‘savage men more wild than they.’”

The following are copied from monuments in the burying ground, N. E. from the village of New Britain.

In memory of the Rev. JOHN SMALLEY, D. D. first pastor of the church in this Society. Born in Lebanon, Conn. June 4th, 1734, ordained April 19th, 1758. Died June 1st, 1820, *Æ*. 86. Possessed of a strong and penetrating mind, improved by laborious study; he zealously devoted himself to the cause of religion, after many years of faithful services, he fell asleep in Jesus. To his talents and Piety, his writings have erected a monument more durable than marble.

Simeon Lincoln, by profession a Printer, died Oct. 5th, 1823, Aged 33.

Why then their loss deplore that are not lost?
 Why wanders wretched thought their tombs around in infidel distress?
 What though short his date?
 Virtue, not rolling Suns, the mind matures,
 That life is long that answers life's great end,
 The man of wisdom is the man of years.

BLOOMFIELD.

BLOOMFIELD was incorporated as a town in 1835. It was formerly the parish of Wintonbury in Windsor, and derived its name it is said, from the circumstance of the parish being formed from three towns, viz. Windsor, Farmington, and Simsbury; the name Win-ton-bury being derived from a part of the name of each of these three towns. At the period of the first settlements on Connecticut river, the Windsor people sent out a number of men to explore the tract, since Wintonbury. These men returned, and reported that there was good land sufficient for the maintenance of three families. Bloomfield is bounded n. by Windsor, w. by Simsbury, s. by Hartford, and e. by Windsor. On the eastern bounds of the town there is a forest extending the whole length of the township; it is about $1\frac{1}{2}$ miles in width from east to west. The town averages about 4 miles in length and breadth, and contains about 1,400 inhabitants. The face of the township is gently undulating; the soil is good, and produces large crops of grass. This place is celebrated for the excellence of its fruit, a considerable quantity of which is annually raised. The inhabitants are generally agriculturists, and remarkably free from the evils of litigation.

South view of the Congregational Church in Bloomfield.

The above is a representation of the Congregational church, and some other buildings in the immediate vicinity. This place, which is considered the central part of the town, is about 6 miles from Hartford, and about $4\frac{1}{2}$ miles in a direct line from Connecticut river. There are three houses of worship in the town: 1 Congregational, 1 Baptist and 1 Methodist. The Baptist church is situated about 40 or 50 rods eastward, and the Methodist church perhaps twice this distance westward of the Congregational church seen in the engraving. The Congregational church was built about the year 1800, the steeple or tower is, however, of modern construction: this building, which is the second house, stands on the site of the first meeting house. The burying ground is a few rods north. The first person buried in the yard was a young woman, the daughter of Isaac Skinner, one of the first settlers.

BRISTOL.

BRISTOL was formerly a parish in the town of Farmington, by the name of New Cambridge. It was incorporated as an independent society in 1747, and as a town in 1785. It is bounded N. by Burlington, E. by Farmington, W. by Plymouth, and S. by Wolcott and Southington. It is $5\frac{1}{2}$ miles in length from north to south, and 5 in breadth. The surface of the town is uneven and hilly, and the soil is a gravelly loam, and considerably fertile, producing all kinds of grain, grass, and fruit common to this region. Iron and copper ore have been discovered in some places in the limits of the township. This is a manufacturing town, and the inhabitants are distinguished for their enterprise and industry. There are at present sixteen clock factories, in which nearly 100,000 brass and wooden clocks have been manufactured in a single year. The manufacture of buttons is also carried on in this place.

Western view of Bristol.

The principal part of the village is built at the base of a circular hill, the buildings being mostly on a road which passes round the hill, in somewhat the shape of a semicircle. The most conspicuous building seen in the engraving, with a small square tower, is the Methodist church, erected in 1335. To the right of this in the distance, and on the summit of the hill, is seen the Congregational church. The Episcopal church is situated on the northern descent of the hill: it is seen on the left, near the forest. The Baptist church is on the road passing by the Methodist church, a little distance to the south. This place is $16\frac{1}{2}$ miles from Hartford, 28 from New Haven, 17 from Litchfield, and 5 to the nearest point on the New Haven and Northampton Canal. The number of inhabitants in the town in 1810, was 1,423; the number at present is estimated to be 2,500.

The Rev. Samuel Newell appears to have been the first minister settled in this place. The following is the inscription on his monument.

“Here lyeth interred the body of ye Rev. SAMUEL NEWELL, A. M. late pastor of the Church of Christ in New Cambridge. A Gentleman of good Genius, solid judgment, sound in the Faith, A fervent and experimental Preacher, of unaffected Piety, kindest of Husbands, tenderest of Fathers, the best of Friends, and an ornament of the Ministry. And having served his generation faithfully, by the will of God, with serenity and calmness he fell on sleep Feb. ye 10, 1789, in the 75th year of his age, and the 42d of his ministry.

“Death! Great Proprietor of all! 'tis thine
To tread out Empires, and to quench ye Stars.”

BURLINGTON.

BURLINGTON originally belonged to Farmington, and was formerly known by the name of West Britain; it was at the first called *West Woods*. Previous to its incorporation as a town in 1806, it was within the limits of Bristol. It is 17 miles west from Hartford, and about 36 from New Haven, bounded N. by New Hartford and Canton, E. by Farmington and Avon, W. by Harwinton, and S. by Bristol. It is about six miles in length from north to south, and five in breadth. The township is diversified with hills and valleys; the soil is a gravelly loam, on granite rocks, yielding grain, particularly rye and oats. The inhabitants are principally engaged in agriculture. The population of the town in 1830 was 1,401. The Farmington river passes through the northeastern part of the town. There are 2 houses for public worship, 1 for Congregationalists and 1 for Methodists.

The eastern part of the town was first settled by a family of the name of Strong, who were from Farmington; the northern part by a family of Pettibones from Simsbury; the western part by persons by the name of Yale, Lewis and Wiard; the south part by families by the name of Bunel and Smith from Cheshire. The first minister in the place was the Rev. Jonathan Miller from Torrington; he preached in this place about forty years; he died three or four years since. About thirty years since there was a society of Seventh day Baptists in this place; at that period they consisted of about twenty five families, who were mostly from Rhode Island or the eastern part of Connecticut; they had a Mr. Davis for their first minister, and Mr. Stillman for their last. They erected a house of worship, which is still standing. The society is nearly extinct, there being it is believed but one member now living: this person is an aged woman. The Methodists built their meeting house about twenty five years since. It formerly stood about $2\frac{1}{2}$ miles S. W. of its present location; it was removed to where it now stands in 1835.

CANTON.

CANTON was first settled in 1740, and was incorporated as a town in 1806. The town was formed from the west section of Simsbury and the eastern part of New Hartford. It is bounded N. by Granby, S. by Avon and Burlington, W. by New Hartford and Barkhamsted, and E. by

Simsbury. It is about eight miles in length from north to south, and nearly four miles in breadth. The population in 1830, including Collinsville, was 1,437. The township is hilly and mountainous, and the prevailing character of the soil is a coarse gravel, which is hard, dry and stony.

The first settlement was made at the east village. This place was formerly called *Suffrage*, from the circumstance, it is said, of one of the first settlers experiencing an unusual share of suffering at the commencement of the settlement.

Western view of Collinsville, in Canton.

The above is a view taken on the western side of the Farmington river, and shows as much of the village as could be conveniently given in one view. The houses of the workmen are principally on the west side of the stream, a part of which are seen on the left of the engraving. These buildings, which are built precisely of the same form, are compactly set together on the side of a hill rising with considerable abruptness from the water. These houses are painted white, and when contrasted with the deep green foliage in the immediate vicinity, present a novel and beautiful appearance. Collinsville is 16 miles from Hartford and 16 from Litchfield, and contains upwards of 500 inhabitants, who are principally engaged in the manufacture of axes, of which they make from 700 to 800 daily, and of a superior kind. This village was established by Messrs. Collins & Co. in 1826, who at that period set up an edge tool manufactory at this place, and at one time 300 men were employed in the business.

The following inscription is copied from a monument in the old burying ground in Canton.

IN MEMORY OF DEACON THOMAS BIDWELL, who departed this life Dec. 3d, 1802, in the 64th year of his age. Unshaken in the great truths of the Gospel, in this he was as an iron pillar, and steadfast as a wall of brass. He lived and died in the confidence of his brethren. But though dead, he yet speaketh to the Church, to his family and to all who knew him.

Thou tomb shall safe retain thy sacred trust,
Till life divine reanimate his dust.

EAST HARTFORD.

THIS town is pleasantly situated on the east side of Connecticut river, bounded N. by East Windsor, E. by Manchester, S. by Glastenbury, and W. by Connecticut river, separating it from Hartford. It is nearly 6 miles in length from north to south, and about 4 miles in breadth. Most of the inhabitants in this town live on one street, about three fourths of a mile from and parallel with the river. This street is thickly settled from Glastenbury to East Windsor.

N. E. view of the Congregational Church, East Hartford.

The above is a northeastern view of the Congregational Church in East Hartford street, erected in 1835. It is beautifully situated at the entrance of the principal avenue to Hartford city. The most striking feature in the appearance of East Hartford street, is the long row of large spreading elms situated in the center of the street; these, with the shade and other trees on both sides, afford in summer a delightful prospect to the eye, which is rarely equalled.

The meadows in this town, adjoining the Connecticut, contain an extensive range of some of the best land in the State. In the spring season these meadows are usually overflowed by the freshets of the river, which render them very productive. The causeway connected with the bridge over the Connecticut, extends about a mile in a straight line, across the meadows, to the main street in East Hartford, and forms a fine and prospective avenue to the city. Leaving these meadows, you rise rather a steep acclivity of fifteen or twenty feet, into a level plain country, extending across the entire length of the township, and nearly three miles to the eastward. The soil is fertile, and a large proportion of it is fitted for almost every kind of cultivation and product. An excellent mill-stream, called the Hockanum river, enters this town from the northeast, and winds its way through nearly the center of the town, and unites with the Connecticut about a mile below Hart-

ford bridge. On this stream are many valuable mill seats, that give facilities to manufacturing operations, which are here carried on to a very considerable extent. East Hartford was for many years distinguished beyond any other town in the State, for the variety and amount of its manufactures. In 1775, a gunpowder mill was built here, under the especial patronage of the colony. It is believed to have been the first mill of the kind erected in the country. Iron works, consisting of an anchor shop, a forge and slitting mill, were built in this town in 1782. Anchors, mill screws, nail rods, gunpowder, paper, snuff, glass, &c. were among the manufactures carried on here in 1784, with spirit and success. The making of paper, at present, is the principal manufacturing business carried on within the limits of the town. There are five large paper mills, which are situated in a village called Scotland, about $2\frac{1}{2}$ miles eastward of the Congregational church, at a place formerly known by the name of "Pitkin's falls." From one establishment in this village, the U. S. Congress is furnished with paper by contract.

This town was formerly included in the limits of Hartford. It was incorporated as a distinct town in 1784. The fertility of the soil, affording an easy cultivation of Indian corn, and the multitude of fish with which the rivers in this vicinity were stored, rendered this place a favorite residence of the native Indians.

At a meeting of the inhabitants of Hartford, Jan. 11th, 1640, it was ordained, "that all the upland on the east side of the great river, from Podunk river to Pewterpot river, shall be divided to the three miles' end; that is to say, half a mile of it to be measured and staked, and each man's proportion to run up the country to the three miles' end." And on the same day a committee was appointed to order the highway in the meadow, on the east side of the great river. The original settlers generally located themselves on the rising ground back from the meadow, where several of their cellars are still visible. In 1677, a more rapid and extensive settlement of this town appears to have taken place. Several new highways were laid out in the course of that year. In 1694, an ecclesiastical society was constituted, and early in 1703, the Rev. Samuel Woodbridge, their first settled clergyman, was ordained. The church and people here were united during the life and ministry of Mr. Woodbridge, who labored with them forty three years. He died June 9th, 1746, aged 63. The Rev. Eliphalet Williams, D.D. his successor, was ordained March 30th, 1748. For more than fifty years he was a settled minister in this town.

The Podunk tribe, which dwelt in this and the adjoining town of East Windsor, were a ferocious and warlike people. Tontonimo, their first sachem with whom the English had any acquaintance, commanded two hundred bowmen.

When the council of ministers assembled in Hartford, in 1657, the famous Mr. Elliot, hearing of the Podunk Indians, desired that the tribe might be assembled, that he might have an opportunity of offering Christ to them for their Saviour. By the influence of some of the principal gentlemen, they were persuaded to come together at Hartford, and Mr. Elliot preached to them in their own language, and labored to

instruct them concerning their Creator and Redeemer. When he had finished his sermon, and explained the matter to them, he desired an answer from them whether they would accept of Jesus Christ for their Saviour, as he had been offered to them? But their chief men, with great scorn and resentment, utterly refused. They said the English had taken away their lands, and were now attempting to make them servants.*

“ In the year 1656, a Podunk Indian, named Weaseapano, murdered a sachem, who lived near Mattabeseck, now Middletown. Seaquassin, the existing sachem of the tribe, complained of the outrage to the magistracy of Connecticut; and said that the Podunk Indians entertained the murderer, and protected him from the merited punishment. Seaquassin at the same time engaged Uncas in his cause; who also complained, that Tontonimo enticed away many of his men; and protected an Indian who had murdered a Moheagan. Upon these complaints the magistrates summoned the parties before them. Seaquassin and Uncas, after observing that the murderer was a mean fellow, and that the man murdered was a great sachem, insisted that ten men, friends of Weaseapano, should be delivered up, to be put to death, as a satisfaction for the crime. Tontonimo insisted that the satisfaction demanded was excessive; particularly as the murdered sachem had killed Weaseapano's uncle. The Governor endeavored to convince the complainants that the demand was excessive; observing, that the English in cases of murder, punished only the principal, and such as were accessory to the crime.

“ Tontonimo then proposed to make satisfaction by the payment of wampum; but it was refused. They fell however in their demands to six men, instead of ten. This proposition was rejected by Tontonimo. The magistrates then urged him to deliver up the murderer. This he promised to do. But, while the subject was in agitation, he privately withdrew from the court, with the rest of the Podunk sachems; and retired to the fortress belonging to his nation. Both the magistrates and the complainants, were offended by this behavior of Tontonimo. However, the magistrates appointed a committee, to persuade the Indians to continue at peace with each other. At their solicitation Uncas at length consented to accept the murderer, and promised to be satisfied, if he should be delivered up; but the Podunk Indians told the English that they could not comply with this condition, because the friends of Weaseapano were numerous and powerful, and would not agree to the proposal. The Governor then addressed them in form; urging them to continue in peace, and endeavoring to persuade the complainants to accept of wampum. This they again refused, and withdrew; after it had been agreed on all hands, that the English should not take any part in the controversy; and after the Indians had promised, that they would not injure either the persons or possessions of the English, on either side of the river.

“ Soon after, Uncas assembled an army for the purpose of avenging his wrongs. But being met near Hoccanum river, by an equal number

* Trumbull's History of Connecticut.

of the Podunks, and considering the issue of a battle as doubtful, he prudently retired, after having sent a message to Tontonino, in which he declared, that if the Podunk sachem persisted in withholding the murderer from justice, he would send to the Mohawks, to come and destroy both him and his people.

“Not long after, the crafty Moheagan accomplished his purpose in the following manner. He sent a trusty warrior, furnished with some Mohawk weapons, to Podunk; directing him to set fire in the night to a house near the fort, and then to leave the weapons on the ground in the vicinity, and immediately return. The warrior executed his commission. When the Podunks came in the morning to examine the ruins, they found the weapons; and, knowing them to belong to the Mohawks, were so alarmed with the apprehension that Uncas was about to execute his threat, that they delivered up the murderer, and sued for peace.”*

The Hon. *William Pitkin*, the ancestor of the Pitkin family of this town, emigrated from the county of Middlesex, Eng. and settled here in 1659. He was by profession a lawyer, and also one of the principal planters of the town. In 1664, he received the appointment of king's attorney for the colony. He died in 1694, after having filled various and important offices, distinguished for his virtues and abilities. He had a sister who emigrated soon after him to this country, who it is said possessed uncommon vigor of mind and many fine accomplishments. She married Simon, the youngest son of Henry Wolcott, was mother of the first Governor Wolcott, and grandmother of Oliver Wolcott and Roger Griswold, governors of Connecticut, and also great grandmother of the late Hon. Oliver Wolcott, of Litchfield. There have been a number of distinguished individuals of the name of *William Pitkin* in this town, one of whom was governor of the State, who was distinguished for his vigorous understanding and integrity; he died in 1769, while holding the office of governor. His son, the Hon. *William Pitkin*, was in 1758 appointed major of the Connecticut forces, raised for the expedition against Canada. He served through the campaign under General Abercrombie, and acquired the reputation of a faithful and gallant officer. He was a member of the Council during the Revolutionary war, and for the greater part of the war he served as a member of the Council of Safety. He died in 1789.

Connecticut Courant, Sept. 10th, 1777, No. 518.

On the 17th ult. at *East Hartford*, sallied from the *Lyon Tavern* and its dependencies, a corps of female infantry, of twenty rank and file, with a flank guard of three chosen spirits of the male line; and marching westward about one mile in martial array and excellent order, saving stride and gabble. These attacked and carried without opposition from powder, law or conscience, Mr. Pitkin's store, in which was lodged a quantity of sugar designed for the army, of which they plundered and bore away in triumph 218 lbs. A traveling gentleman falling in with their rear, who they mistook for the owner of the spoils, was attacked and drove with great fury; but being well mounted, made his escape. The whole was completed in two hours, and without loss of blood, except from a few accidental scratches of side arms underslung without scabbards.

That so unexampled a spirit of heroism may not want due notice and encouragement, it is proposed that this corps be augmented by voluntary enlistment to a battalion, for the ranging service in the northern department, to be in the uniform of rifle frocks, and the snug Scotch kilt, and allowed, besides perquisites and plunder, a generous bounty on scalps, and a fine new standard with an elegant device of a lady inverted, and to be commanded by the celebrated *Maddame de la Mell Hobb Greg Scratch.*

EAST WINDSOR.

EAST WINDSOR was originally included within the ancient boundaries of Windsor. Fear of the Indians appears to have prevented any settlement in this town on the east side of the Connecticut till 1680.* By this time the Indian power in New England was effectually broken, by the death of King Philip in 1676. Although the Windsor and River Indians professed themselves neuter in Philip's war, yet numbers of their young men stole away and never returned. In 1695, the settlers of East Windsor formed themselves into an ecclesiastical society, and Mr. Timothy Edwards, the father of the celebrated divine, was ordained their minister. Previous to this, the inhabitants for fifteen years passed the river in boats, in order to attend worship on the west side. In 1768, East Windsor was incorporated as a town, and contained at that period four parishes, viz. 1st Society or East Windsor, 2d Society or Scantic, Ellington and Wapping.

East Windsor is bounded n. by Enfield, e. by Ellington and Vernon, s. by East Hartford and Manchester, and w. by Connecticut river. It is about 10 miles in length, and averages upwards of 5 in breadth. The face of the town is generally level. In the western part of the town there are extensive tracts of sandy loam, which are light, warm, and fertile; in the eastern part a rich gravelly loam generally prevails. Upon the borders of Connecticut river there are natural meadows, which comprise more than 2,000 acres of the finest of land, uncommonly beautiful and fertile, producing grass, Indian corn, potatoes, &c. in great abundance. The eastern and northern parts of the town are best adapted for rye, of which it has been computed that 70,000 bushels have been raised in one season. Of late years considerable quantities of tobacco have been raised and manufactured in the western part of the town. The principal street runs parallel with Connecticut river, on the border of the first elevation of ground above the meadows, generally about a mile back from the river, and on this street, through the whole length of the town, is built an almost continuous village. The Second or North Society was made a parish in 1752; the Rev. Thomas Potwine was ordained their first pastor in 1754. Scantic river, a mill stream, passes through this part of the town, and gives this section the name of Scantic. The village of Wapping in the southeast part of the town, was allowed the privileges of a winter parish in 1761. *Warehouse Point* is a considerable village on the Connecticut river, near the northern boundary of the town, at the head of sloop navigation. Formerly the manufacture of rye gin was an important branch of business

* Dr. McClure's account of Windsor, Vol. 5, Mass. Hist. Coll.

in this place; of late years, considerable attention has been paid to the cultivation of tobacco. The place derived its name from a warehouse being built here by Mr. Pyncheon, of Springfield, about the time of the first settlement of that place. It is 13 miles from Hartford. There are now in the town 7 churches; 3 Congregational, 2 Methodist, 1 Episcopalian and 1 Baptist.

Theological Institute at East Windsor.

The above is a southeastern view of the "Theological Institute of Connecticut," established in 1834. This building, constructed of brick, contains a chapel, reading room, recitation room, room for the library, and other rooms sufficient for the accommodation of fifty two students; they are furnished with stoves and all necessary articles of furniture, except bed clothing. The library contains rising of 3,000 volumes, and is receiving accessions continually. There is a farm belonging to the Institution of about sixty acres, and a workshop furnished with tools, affording facilities for manual labor to such students as choose to avail themselves of the privilege. "No charge is made to the students for tuition, room rent, or the use of the library."

"Candidates for admission to this seminary must produce satisfactory testimonials that they possess competent talents, and are members of some Christian church in good standing, and that they have graduated at some college, or have otherwise made literary acquisitions, which, as preparatory to theological studies, are substantially equivalent to a liberal education; and they shall be examined with reference to their personal piety, and their object in pursuing theological study.

"The course of study occupies three years, and it is expected that in all ordinary cases, students will enter with the intention of completing a full course. The different branches of study will be pursued simultaneously, so far as practicable; but Biblical Interpretation will be the most prominent branch for the first year; Systematic Theology, for the second; and Sacred Rhetoric and Pastoral Theology, for the third.

Church History will occupy about an equal proportion of each year. There are two vacations in the year, of five weeks duration; the first commencing on the first Thursday in September, the second on the second Thursday in April."

The institution is eight miles from Hartford, and about two miles north of the first Congregational church; a step-stone belonging to the house of the Rev. Timothy Edwards, the father of Jonathan Edwards, is inserted in the northeast corner of the building.

The Podunk tribe of Indians resided at or near the mouth of Podunk river or brook, a small stream entering the Connecticut river at the southwest corner of the town. A part of the same tribe, or some tribe that were in alliance with them, appear to have resided near the mouth of Scantic river. The following traditions respecting the Indians, in this town are preserved. A party of Mohawks visited the tribe who resided at the mouth of Scantic river: as one of the Mohawk women was crossing the river on a log she was pushed off into the stream and drowned; the Mohawks upon this withdrew, determined upon revenge. In the meanwhile the Scantic Indians sent a runner to the Podunk Indians for assistance; after collecting their forces, a battle took place, in which the Mohawks were defeated and fled; they remained in the vicinity, and whenever they found a straggler from either tribe, they inflicted summary vengeance. As one of the settlers by the name of Bissell was at work at hay in the meadow, a Scantic Indian came running towards him and implored his protection; he directed him to lie down, Mr. Bissell then rolled a cock of hay upon him, and he was in this manner effectually concealed. This was no sooner done than two Mohawks came running furiously in pursuit; they wished to know of Mr. Bissell if he had seen the object of their pursuit; he pointed out a particular direction in which he gave them to understand he had seen him run, which they eagerly followed, and by this means the Scantic Indian finally escaped.

The Podunks, who were a small tribe,* had two places of residence, one at the mouth of the Podunk river, during the summer; the other, where they resided during the winter, was a mile or a mile and a half east from this, over the high land; the path between these two places still retains the name of "King's path;" their burying ground, lately discovered, was about half way between. A young Indian and squaw of this tribe having been to gather whortleberries, it was so late before they had gathered a sufficient quantity, that they were afraid to cross the meadows after dark, on account of the Mohawks, and accordingly stayed at the house of Mr. Williams. In the morning early, the young Indian woman set out upon her return; soon after, a report of a gun was heard by the inhabitants in the vicinity, who immediately turned out to see the cause. They found the young woman weltering in her blood, having been shot by two Mohawks. The Podunks were aroused; they mustered sixteen or eighteen warriors, and went in pursuit. After being out several days, they came to a corn field and began plucking

* The Podunk tribe, in King Philip's war, contained between two and three hundred men, who went off in that war and never returned.—*Mass. Hist. Coll. Vol. 10.*

the ears. A party of Mohawks, who it seems were lying in ambuscade, rose upon them, and killed the whole party, with the exception of two who made their escape. This severe blow had the effect of breaking up the Podunks as a distinct tribe; they separated into two parties, one of which joined the Pequots towards New London.

In the south part of the town, where Podunk river crosses the road to Hartford, was an Indian burying ground. A few years since, a number of skeletons were discovered, by digging from one to four feet. These skeletons were found lying on one side, knees drawn up to the breast, arms folded, *with their heads to the south*. A covering of bark seems to have been laid over them, with some few remains of blankets; in one instance a small brass kettle and hatchet were found in good preservation; the remains of a gun barrel and lock, a number of glass bottles, one of which was found nearly half filled with some sort of liquid. These articles were probably obtained from the Dutch, either by present or by trade. There were also found a pair of shears, a pistol, leap pipes, strings of wampum, small brass rings, glass beads; a female skeleton with a brass comb: the hair was in a state of preservation wherever it came in contact with the comb. After the Podunks had removed from these parts, in one instance they were known to have brought a dead child from towards Norwich and interred it in this burying place.

At Bissell's ferry, near the mouth of Scantic river, is a well which is supposed to have been made before any English settlements were attempted in Connecticut. The lower part of the well is walled by stones hewn in a circular manner, and the manner in which they are laid together is believed to be entirely different from that in which any Englishmen would lay them—there remains no traditions respecting the time, or the persons by whom this well was constructed.

In the expedition against Louisburg, in the island of Cape Breton, in 1745, Major General Roger Wolcott, of this town, (afterwards governor,) commanded the Connecticut troops on that occasion. After the capture of that place, many of the soldiers from this town, and other places on the river, removed with their families and settled in the towns of Windsor and Annapolis, in Nova Scotia.

In the Revolutionary war, after the capture of Burgoyne, a considerable number of his men, British and Hessians, were quartered in this town. The Hessians were a fine looking body of men: many of them became so much attached to the country and its inhabitants, that their officers found it difficult to collect their men when they went off, and in fact some secreted themselves so closely that they could not be found. Gov. Franklin, the royal governor of New Jersey, and Gen. Prescott, who was surprised and taken by Col. Barton, of Rhode Island, were both quartered, while prisoners, at the house of Capt. Ebenezer Grant, which is now standing, a few rods south of the Theological Seminary.

The following relation relative to the art of "fortune telling, (as it is generally termed,) was given to the compiler of this work some years since, by Mr. E—— R——, an aged, respectable, and conscientious inhabitant of this town, a short time before his death. In giving relations of this kind, the author merely states what was related to him by persons who would receive full credit on every other subject.

It ought to be mentioned, that Mr. R. was a person of sound sense, and not at all superstitious. Mr. R. stated, that when a young man, he was very fond of company and jollity. He became acquainted with a man who it was believed possessed the art of fortune telling. This man agreed to initiate Mr. R. into the mystery of the art; this was done by a particular method of handling a pack of playing cards. Mr. R. however, had but little faith in the efficacy of the process, but for the sake of amusing himself and his friends, set himself up as a kind of conjuror. After practicing a short time, he became so celebrated that persons came from a considerable distance "to have their fortunes told." Mr. R. said he could describe a person that he never saw, as completely as he could if the person stood before him, as to the size, color of the hair or eyes, or any thing about the person, with a minuteness and accuracy which astonished those that heard him. When asked how he attained such knowledge, he replied that while he was shuffling over his cards, it would be suggested to his mind what to say, or as he expressed it, "the words came to him," and he spoke them. He said, however, he did not know that he described things accurately, till he was so informed by those who applied to him. Mr. R. at length became so well satisfied in his own mind that he was assisted by some power superior to his own in these transactions, that he broke off, and refused to make any further attempts of this nature.

Jonathan Edwards, who is considered the greatest of modern divines, was a native of this town. He was born Oct. 5th, 1703, about one mile north of the first Congregational church, and a few rods north of a small stream crossing the road, called Stoughton's brook. His father's house (the Rev. Timothy Edwards) stood on the east side of the road, and resembled very much the appearance of Mr. Hooker's, (page 43.)

"He was educated at Yale College, and took the degree of bachelor of arts in 1720, before he was seventeen years of age. His uncommon genius discovered itself early, and while he was yet a boy he read Locke on the human understanding with a keen relish. Though he took much pleasure in examining the kingdom of nature, yet moral and theological researches yielded him the highest satisfaction. He lived at college near two years after taking his first degree, preparing himself for the office of a minister of the gospel. In 1722 he went to New York, at the request of a small society of English Presbyterians, and preached a number of months. In 1724 he was appointed a tutor in Yale College, and he continued in that office, till he was invited in 1726 to preach in Northampton, Massachusetts. Here he was ordained as colleague with his grandfather, the Rev. Mr. Stoddard, February 15, 1727. In 1735 his benevolent labors were attended with uncommon success; a general impression was made upon the minds of his people by the truths which he proclaimed; and the church was much enlarged. He continued in this place more than twenty three years, till he was dismissed in 1750."

"In August, 1751, he succeeded the Rev. Mr. Sergeant as missionary to the Housatonic Indians at Stockbridge, in Berkshire county, Massachusetts. Here he continued six years, preaching to the Indians and the white people; and as he found much leisure, he prosecuted his theological and metaphysical studies, and produced works

which rendered his name famous throughout Europe. In January, 1758, he reluctantly accepted the office of president of the college in New Jersey, as successor of his son-in-law, the Rev. Mr. Burr; but he had not entered fully upon the duties of this station, before the prevalence of the small pox induced him to be inoculated, and this disease was the cause of his death, March 22, 1758, in the fifty fifth year of his age.*

"The following is a catalogue of his publications: a sermon preached at Boston on 1 Cor. i. 29, 30, 1731; a sermon preached at Northampton on Matt. xvi. 17, 1734; a narrative of the work of God in the conversion of many hundreds of souls in Northampton, 1736; five discourses on justification by faith alone, pressing into the kingdom of God, Ruth's resolution, the justice of God in the damnation of sinners, and the excellency of Jesus Christ, 1738; sinners in the hands of an angry God, a sermon preached at Enfield, 1741; a sermon on the distinguishing marks of a work of the Spirit of God, 1711; thoughts on the revival of religion, 1742; a sermon at the ordination of the reverend Robert Abercrombie, 1744; at the instalment of the reverend Samuel Buell, 1746; a treatise on religious affections, 1746; an attempt to promote agreement in prayer for the revival of religion, 1746; life of the reverend David Brainerd, 1749; an inquiry into the qualifications for full communion in the church, 1749; a reply to the reverend Solomon Williams' answer to the inquiry, 1752; a sermon preached at Newark, 1752; an inquiry into the modern prevailing notions of that freedom of will which is supposed to be essential to moral agency, &c., 1754; the great doctrine of original sin defended, 1758. Since his death the following works have been published from his manuscripts; eighteen sermons, with his life, written by the reverend Dr. Hopkins, 1765; the history of redemption, 1774; on the nature of true virtue, 1788; God's last end in the creation; thirty three sermons; twenty sermons, 1789; miscellaneous observations, 1793; miscellaneous remarks, 1796."

Fitch's Steamboat.

John Fitch was a native of this town. To this individual belongs the honor of having constructed the first steamboat in this country. Although this honor has so generally been ascribed to Robert Fulton, yet it is a well known fact, that *twenty years* before the great experiment of Fulton and Livingston on the Hudson, a steamboat was constructed and put in operation in Philadelphia, under the sole direction of a then obscure and still almost unknown individual. This person was John Fitch. He was born in the south part of East Windsor, near the East Hartford line, on what is now called the *old road*. He was apprenticed as a watch and clock maker, to Mr. Cheney, who carried on the business in the eastern part of East Hartford, now Manchester. He married in early life and had two children; such however was the temper and unhappy disposition of his wife, that he left her, and went to New Brunswick, (N. J.) where he set up the business of clock making, engraving, and repairing muskets, before the

* Allen's Biographical Dictionary.

Revolution. When New Jersey was overrun by the British troops, Mr. Fitch removed into the interior of Pennsylvania, where he employed himself in repairing arms for the Continental army.

In the year 1785, Mr. Fitch conceived the project of propelling a vessel by the force of condensed vapor. "When the idea occurred to him, as he himself tells us, he did not know there was such a thing as a steam engine in existence." In 1788 he obtained a patent for the application of steam to navigation. By unwearied exertion he succeeded in interesting about twenty persons in his plan, and inducing them to take shares of 50 dollars each. A boat was built in 1787. A mile was measured off in Front or Water street, and the boat was found to go at the rate of eight miles an hour. It afterwards went eighty miles in a day. The Governor and Council of Pennsylvania were so much gratified with the experiment, that they presented them with a superb silk flag. About this time the company sent Mr. Fitch to France, at the request of Mr. Vail, our Consul at L'Orient, who was one of the company, and wished to introduce the invention into France. Being in the midst of revolutions in that country, and as no men could be obtained for the purpose of building boats, Mr. Fitch returned. "Mr. Vail afterwards *subjected to the examination of Mr. Fulton*, when in France, the papers and designs of the steamboat appertaining to the company." In 1790, he made an alteration in his boat and she performed tolerably well, but still it required further alterations. Mr. Fitch however was not able to obtain the necessary means in order to perfect his invention.

The conviction of Fitch respecting the power of steam continued firm. In June, 1792, he addressed a letter to Mr. Rittenhouse, one of the share-holders; speaking of steam power, he said: "This, sir, will be the *mode of crossing the Atlantic in time*, whether I shall bring it to perfection or not. . . . He complains of his poverty, and to raise funds, he urges Mr. Rittenhouse to buy his land in Kentucky, that he might have the honor of enabling him to complete the great undertaking." Upon one occasion he called upon a smith who had worked upon his boat, and after dwelling for some time upon his favorite topic, concluded with these words: "Well gentlemen, although I shall not live to see the time, you will, when steamboats will be preferred to all other means of conveyance, and especially for passengers, and they will be particularly useful in the navigation of the river Mississippi." He retired, when a person present observed, in a tone of deep sympathy, "*Poor fellow, what a pity it is he is crazy.*" "The distress of mind and mortification he suffered from the failure of his protracted exertions and his poverty were too much for him, and to drown his reflections, he had recourse to the common but deceptive remedy, strong drink, in which he indulged to excess, and retiring to Pittsburg, he ended his days by plunging into the Alleghany."* He had filled several small MS. books with personal and general narrative, more or less connected with his great scheme, and which he bequeathed to the Philadelphia Library, with the proviso that they were to remain closed for

* American Ed. Edinburgh Encyclopedia.

thirty years. The books were opened in due time, and were found to contain a minute account of his perplexities and disappointments. "Of the boldness of his conceptions," (says a writer in the *Mechanics' Magazine* Jan. 1836,) "and the perseverance with which he followed it up, there can be but one opinion; and had fortune attended his efforts, and his means been equal to the accomplishment of his designs, there can be no doubt that he would now hold undisputed the honor of having given to the country this most noble and useful invention." The accompanying engraving conveys a correct idea of Mr. Fitch's boat as originally planned; but in the one actually constructed, he so far modified this plan as to place the paddles of the boat astern.

Oliver Wolcott, a signer of the Declaration of Independence, was the son of Gov. Roger Wolcott, who resided in this town. He was born Nov. 26, 1726, and died at Litchfield in 1797. (See account of Litchfield.)

Erastus Wolcott, brother of the preceding, was born about the year 1723. Although a plain, laboring farmer, with inconsiderable advantages as to education, he by the force of his native talents, acquired great influence in public affairs. He was appointed a brigadier general in 1777, and went on an expedition to Peekskill. He was a member of Congress and Judge of the Supreme Court. He died in 1793.

The following inscription is from a monument in the ancient burying ground, upwards of a mile north of the present Congregational church; the first meeting house erected in East Windsor, was on the north side of this yard.

In memory of the Revd. Mr. TIMOTHY EDWARDS, Pastor of the 2d Society of Windsor, (whose singular Gifts and Piety rendered him an excellent, and in the judgment of Charity, a successful minister of the Gospel) who died January ye 27, A. D. 1758, in the 89th year of his age, and 64th of his ministry—And his remains buried under this stone.

AN EPITAPH.

The man of God, who nobly pled,
His master's cause alas! is dead
His voice no more!—but awful urn,
Still speak to men their great concern,
His praise on souls will long outlast:
When Grace completes the work began,
Bright saints will shine his living crown.

ENFIELD.

THIS town was settled by emigrants from Salem, Mass. in 1681, being at that time a part of the town of Springfield, in that state. For about seventy years after the settlement of the town, it was subject to the jurisdiction of the colony of Massachusetts, not being annexed to Connecticut until 1752. The town is bounded n. by Longmeadow in Massachusetts, e. by Somers, s. by East Windsor, and w. by Connecticut river, which separates it from Suffield. It is about six miles in length from north to south, and five and a half in breadth. The township is generally of a level surface, and the soil mostly of a light sandy loam, and generally fertile. The first bridge ever built across the Connecticut in this state, was erected in 1808, connecting this

town with Suffield. It was supported by six stone piers, resting upon the rocky bed of the river ; being 1000 feet in length and 30 in width. The whole expense of its construction did not exceed \$26,000. In 1832 a new bridge was built here, 70 feet in breadth, upon Mr. Town's plan, at an expense of about \$15,000. A large proportion of the dwelling houses in this town are situated upon one street, passing through the town, and running parallel with the river. The plough-making business is prosecuted to a considerable extent in this place.

Thompsonville, in Enfield.

This village in Enfield, on the bank of Connecticut river, was commenced about seven years since, for the purpose of manufacturing carpeting. It is 18 miles north of Hartford, 8 miles south of Springfield, Mass. and upwards of a mile from Enfield bridge. The village contains about 800 inhabitants, of whom about 300 grown persons are employed in the factories. One hundred and twenty looms are employed, and eight hundred yards of carpeting manufactured daily. The engraving shows the greater part of the principal street in the village, as you come up from the river and pass to the east.

The engraving on the next page shows a south view of the Shaker house of worship, on the right of the print ; the other buildings represented are those connected with the central, or as they are generally called, "The Church family." This family, consisting of about one hundred persons, occupy the central part of the Shaker settlement. The whole number of Shakers in this place is upwards of two hundred, who are divided into six families. The village is about five miles N.E. of the Congregational church in Enfield. The religious tenets of the Shakers must of course necessarily affect the order of their societies, by producing an entire separation of the men from the women, and in this particular exhibit the only species of *Protestant monkery* in this country. Their buildings are remarkably neat and convenient, and

every thing appears a model of neatness and economy. They are simple and plain in their manners; sober and industrious. The society in this place was established in 1780. There are perhaps about fifty buildings in the settlement, consisting of dwelling houses, workshops, storehouses, &c. They possess upwards of one thousand acres of a fine tract of land, in the northeast section of the town, which is under the highest degree of cultivation. Their improvements and attention to horticulture and gardening have rendered them the subjects of much commendation, and their "garden seeds" are justly celebrated. They also carry on various kinds of mechanical business, and their wares are much esteemed, being good and free from deception. They are, for their number, a wealthy and flourishing community.

Shaker houses, Enfield.

"About the year 1706, a few of those persons who were known by the appellation of French prophets, went over to England and preached with such zeal and effect, that in a short time they became numerous. They however formed no regular societies, nor established any churches, consequently they were not known as a distinct and visible sect."

In the year 1747, a number of persons endowed with the same spirit united themselves into a small society, in the neighborhood of Manchester, England, under the ministry of James and Jane Wardley. This society practiced no forms of worship, and adopted no creeds as rules of faith, but gave themselves to be guided, as they believed, entirely by the Spirit of God. "Sometimes, after sitting awhile in silent meditation, they were seized with a mighty trembling, with violent agitations of the body, running and walking on the floor, with singing, shouting, and leaping for joy. From these exercises of the body they received the appellation of Shakers, which has been their common name of distinction ever since. Although this name was originally given by their enemies in derision, yet they consider it as descriptive of their doctrine and practice, and also in conformity with several passages of the scriptures, which speak of a *shaking* of the 'heavens and the earth.'

“This small society continued to increase in number till about the year 1770, when by a special manifestation of divine light, the present testimony of salvation and eternal life was fully revealed to *Ann Lee*, and by her to the society.”

“According to the account given by her biographer, she passed through great trial and distress of mind for the space of nine years, during which period the most astonishing visions and divine manifestations were presented to her view, in so clear and striking a manner that the whole spiritual world seemed displayed before her,—she had a full and clear view of the mystery of iniquity, of the root and foundation of human depravity, and of the very first act of transgression committed by the first man and woman in the garden of Eden. Here she saw whence and wherein all mankind were lost from God, and clearly realized the only possible way of recovery. This revelation she received in the summer of 1770, while in prison, where she was confined on account of her religious principles, under the pretence that she had profaned the Sabbath. From this time, the light and power of God, revealed in *Ann*, and through her administered to those who received her testimony, had such sensible effect in giving them power over all sin, and filling them with visions and revelations and other gifts of God, that she was readily acknowledged as their spiritual mother in Christ, from which she received the title of *Mother Ann*.”

This woman, with a few of her followers, emigrated to this country in 1774. In September, 1776, they took up their residence in the woods of Watervliet, where they made a settlement, near Nissequena, about seven miles northwest from Albany. She died at this place in 1784. The following is from a book entitled “*Christ’s Second Appearing* ;” it is extracted from a poem, called “*A memorial to mother Ann*,” and will serve to show in what light she is viewed by her followers.

Let names, and sects and parties, no longer be rever’d,
Since in the name of mother, salvation hath appeared:
Appointed by kind Heaven the Saviour to reveal,
Her doctrine is confirmed with an eternal seal.

At Manchester in England, this burning truth began,
When Christ made his appearance in blessed Mother Ann;
A few at first received it and did their lust forsake,
And soon their testimony brought on a mighty shake.

For Mother’s safe protection, good angels flew before,
Towards the land of promise, Columbia’s happy shore;
Hail thou victorious Gospel, and that auspicious day,
When Mother safely landed in North America.

About four years she labored with the attentive throng,
While all their sins they open’d and righted ev’ry wrong.
At length she closed her labors and vanish’d out of sight,
And left her faithful children increasing in the light.

How much they are mistaken who think that Mother’s dead,
When through her ministrations so many souls are fed!
In union with the Father, she is the second Eve,
Dispensing full salvation to all who do believe.

The leading characteristic in the worship of this people, is their dancing. This they describe as the involuntary result of the exhilarating

and overpowering delight received through the outpouring of divine grace upon their hearts. The evolutions and changes in the dance, by constant practice, become as precisely correct as the maneuvers of a regiment of experienced soldiers; it becomes in fact a mechanical movement. No one ever makes a mistake, or throws the rank in disorder from inattention or inexperience; but every thing is conducted in the most exact order, as if every step and movement of the body was directed by a gage and rule. Dances are sometimes held in private houses, when variations are frequently introduced. On some occasions it is said their movements are so rapid, that the eye can scarce follow or keep pace with their swift motions.

Shakers dancing.

“The principal doctrines of the Shakers are,—a belief in the *second appearance of Christ*, in the person of the holy mother. They admit of but two persons in the Godhead, God the Father, and God the Mother, which they say is according to the order of nature, being male and female. To redeem the depraved race of man, they believe that it became necessary for God to take upon him the real character of human nature as it is, male and female, and that his first appearance was in the person of man, and the second in the person of woman, whereby the work of redemption was finished and completed. The confusion and wickedness that prevailed in the Catholic Church, during the long period which preceded and followed the reformation, they ascribe to the work of redemption not being completed in Christ’s first appearance, it being the necessary period that must intervene between the making and fulfillment of the promise of Christ, that he would establish his law of righteousness on earth. They believe in perfect holiness, and insist that salvation from *sin* here is necessary to salvation from misery hereafter. They regard the Bible as a testimony of Christ’s first appearance, but deny that it contains the word of God, or of life, as they consider a be-

lief in the second appearance of Christ, or in the spiritual character and mission of the holy mother, as indispensable to salvation.”

The following inscriptions are from monuments in the burying ground, a little north of the Congregational church.

In memory of that pious, excellent and amiable man, the Rev. Mr. PETER RAYNOLDS, who, after serving Christ in the work of the gospel ministry with great fidelity in this town more than forty two years, fell asleep in May 11th, 1768, Anno. Æ. 68.

RAYNOLDS, thy name, thy memory shall survive,
The fading honors marble statues give,
When this frail stone's decay'd, forgot this verse,
Posterity thy virtues shall rehearse;
Thy conjugal, paternal, social love,
Religious zeal with charity immove,
Shall speak the generous, gentle temper'd, kind,
Blest with much science in an humble mind.
Thy purity of morals, sacred fear
Of God, and fervent love of man declare;
Tell from thine hallow'd tongue how wisdom flow'd,
How with inspir'd discourse, each bosom glow'd,
How thy sweet converse gladden'd every heart,
And sentiment instructive did impart.
Bless God that here thy bright example's giv'n
A Guide to lead mankind to thee in Heav'n.

Sacred to the memory of Dea. JOSEPH KINGSBURY, who died June 8th, 1806, aged 85 and 2 months.

Here lies a man, no one priz'd Religion more,
The same our Fathers brought from Europe's shore,
A strict supporter of the good old ways
Of Puritans, in their most early days.

FARMINGTON.

THE first settlers of Farmington were from Hartford, being emigrants from Boston, Newtown and Roxbury, in Massachusetts. They began the settlement in 1640, being probably attracted at this early period by the fine natural meadows upon the Tunxis or Farmington river. The town was incorporated in 1645. The land was purchased of the Tunxis tribe of Indians, which was a numerous and warlike tribe, by eighty four proprietors, and divided by them and their heirs according to their respective interests. The township at the time of its incorporation was about fifteen miles square.* Since this period five new towns have been formed from it, viz. Southington, Berlin, Bristol, Burlington and Avon. The present length of Farmington is $7\frac{1}{2}$ miles from north to south, and averages upwards of four in breadth. The town is situated principally between two mountainous ridges which stretch from N. N. E. to S. S. W. indented by vallies; the mean distance between the mountains is about four miles. The east mountain, on the base of which the village is built, presents a mural front to the west, and has two convenient passes through it; the road to Hartford passing through the north, and the road to Middletown through the south pass, distant from each other about four miles. The Farmington river, about 45 yards

* Pease and Niles's Gazetteer.

wide, enters through the west mountain from the northwest, and runs southeast to the central part of the town, where meeting the east mountain, it turns an acute angle and runs northward through the town, parallel with the mountain. On the east side of the east mountain, opposite a peak called Rattlesnake hill, rises the Quinnipiac or North Haven river. The great flat or natural meadow, from the river westward, from $1\frac{1}{2}$ to 2 miles broad, is alluvial, a rich loam and sand, and is one of the most fertile tracts in the State.

N. W. view of Farmington, from Round Hill.

The above is a view of the central part of the village, showing the Congregational and Methodist churches. The main street, on which they are built, extends about two miles from north to south, on an elevated plain from 50 to 75 feet above the level of the river, the course of which is seen by the row of trees standing below the level of the houses. The New Haven and Northampton canal passes between the river and the houses, its course being elevated above the level of the river. There are about one hundred handsome dwelling houses within the limits of something more than a mile, some of which are elegant edifices. The Academy in the village, and the Methodist church, (recently erected,) both stand near the Congregational church.—The above view was taken from *Round Hill*, a singular elevation in the meadows, about half a mile distant from the main street. This hill is a natural curiosity; it covers about 12 acres; it rises abruptly to the height of about 60 feet, and is nearly circular in its form. It was once probably an island in the center of a lake, which covered the whole of the present meadow.* At the first settlement of the town, Round Hill was fixed

* These meadows are now occasionally overflowed. During the freshet, Feb. 14th, 1807, a cry of distress was heard by some persons on the bank of the river. Pomeroy Strong and George Treadwell, went about five o'clock P. M. in a canoe to relieve the sufferers. They proceeded to Round Hill, where they heard the cries of a man named Bebe, to the northwest, where they found a span of horses and part of a wagon, and a

on as a central point of departure in all measurements in laying out the divisions of land.

The town is bounded n. by Avon, e. by Hartford and Berlin, w. by Bristol and Burlington, and s. by Southington. The central part is 10 miles west from Hartford. "The number of inhabitants is 2000, and has not varied much within the last thirty years."

The first minister in this place was Roger Newton, settled in 1647-8, who officiated nine years, and then removed to Milford. The second was Samuel Hooker, who was ordained in 1658, and died in 1697. Samuel Whitman was ordained the next minister, in 1706. He officiated 45 years, and died in 1751. The next year Timothy Pitkin, from East Hartford, was ordained; he officiated till 1785, and was then dismissed at his own request. He was succeeded by Allen Olcott, in 1787, who in 1795 was succeeded by Joseph Washburn.

This town has at present a school fund, besides what is received from the State, amounting to nearly \$10,000, the annual interest of which is applied to the payment of teachers. In 1695-6 the town voted a certain sum for the support of a teacher for half the year, and in the directions to the committee for procuring one, a clause was added, "that he should be so gifted as to be able occasionally to step into the pulpit."

"The native Indians must have been very numerous, in and about the town, when the first settlers arrived. The hunting grounds and fishing places, were peculiarly attractive. Their burying grounds were on two sandy hills, one on the west side of the great meadow, and one on the east, and near the center of the present village. In excavating the canal, many of their bones were discovered, and some domestic articles, as cups, &c. In 1691 a committee was chosen by the town to designate houses to be fortified against them. It appears that seven such houses were used for that purpose. The doors were made of double plank, united by nails driven closely together, so as to prevent their being cut through with hatchets. In 1763 the number of Indians was about 100, a considerable number having previously removed in a body to Stockbridge, Mass., and another division of them have since removed to the same place."

man by the name of Atwater, in a bunch of willows, in the middle of a current, about two rods from the shore; with a good deal of difficulty they got Atwater into the canoe. As they were passing a tree, Atwater in a fright seized one of the branches; in doing this he overset the boat. He succeeded in climbing the tree, while the others swam to the hill, where they called for help. About 9 o'clock, Dr. Eli Todd, William Hill and Joel Warner manned a canoe, and alternately drawing and navigating it, reached the hill. After a number of attempts to relieve Atwater, a bridge of ice was formed from the tree to the shore, on which he was enabled to pass. Todd, Hill and Warner sailed in the course of the road northwest, in search of Bebe; they found the currents so rapid that they were obliged to return without effecting their object, though they came within speaking distance, and exhorted him to be silent through the night, except when they should call to him; his cries before had been distinctly heard through the town for nearly three miles in length: he remained on a cake of ice about two rods in length, through the night.

At the first dawn of day the people assembled; a flat bottomed boat was procured, and manned by Erastus Gay, Timothy Root, jr. Timothy Cowles, Sidney Wadsworth and Henry Woodruff, who relieved Bebe from his perilous situation, and brought the others on shore.

GLASTENBURY.

GLASTENBURY was incorporated as a town in 1690; it was previously included within the limits of Wethersfield. It is bounded *n.* by East Hartford and Manchester, *e.* by Hebron and Bolton, *s.* by Chatham and Marlborough, and *w.* by Connecticut river and Wethersfield.* Its length from east to west averages about nine miles, being about six in breadth. There are some fine meadows upon the borders of the Connecticut, back of which, upon the rise of land, the soil is a sandy loam, generally fertile and productive. In *Eastbury*, the east society in the town, the lands to a considerable extent are rough and stony. There are five houses of worship, 2 Congregational, 2 Methodist and 1 Episcopal. The population in 1810 was 2,776; in 1830, it was 2,980.

Glastenbury was originally purchased by the proprietors from the Indians. The deed from the chief, granted a certain number of rods in width north and south, "butting on the Great River, and running three miles into the wilderness." These lots have many of them presented the same general features to this day, although subdivided among descendants and purchasers, until some of them are only eight rods wide, though three miles long. The principal proprietors and first settlers were of the names of Welles, Wyllis, Hale, Kimberly, Hollister, Smith and Talcott. Thaddeus Welles, Esq. now resides upon the land which his ancestor, Thomas Welles, purchased of *Sowheag*, the great sachem at Middletown. These lands have descended from father to son, and have never been out of the possession of the family for almost two hundred years. Samuel Welles, the celebrated banker of Paris, and the late Gen. Arnold Welles, son-in-law of Gen. Warren, who fell on Bunker Hill, were of the same family, and very recently owned another tract purchased by the same ancestor.

About the year 1690, the Legislature gave permission to all the inhabitants of that part of Wethersfield, lying east of Connecticut river, to associate together and be invested with town privileges, "so soon as they could procure and settle a good orthodox minister." The Rev. Timothy Stephens was ordained their first minister in October, 1693. Mr. Stephens appears to have died in 1725, at the age of 60.—An old house is now standing in the town, upwards of half a mile north of the Congregational church, called the "Talcott house," and is believed to be one of the oldest in the State. It was formerly stockaded, and it is said to have been once attacked by the Indians—marks of the assault are stated to be still seen. This house belongs to Col. Talcott, of the U. S. Army, superintendent of the U. S. Arsenal at Watervliet, N. Y., and has been in possession of the family about one hundred and fifty years.

* A small tract within the bounds of Glastenbury lies on the *west side* of Connecticut river; the cause of this will be explained in the account of Wethersfield.

Cotton Factory village, Glastenbury.

The above is a western view of the village connected with the Hartford Manufacturing Co. This site is admirably situated for manufacturing purposes. Roaring Brook here passes through a very narrow defile: the first dam above the factories has a fall of 50 feet, and the lower dam 24 feet; taken together these are believed to be the highest falls in New England used for manufacturing purposes. This establishment has 5,200 spindles and 135 looms in operation; 130 girls and 40 men and boys are employed. The village is situated about half a mile eastward of the main road to Chatham, $8\frac{1}{2}$ miles from Hartford, about $1\frac{1}{2}$ miles from Connecticut river, and 8 miles from Chatham quarry. There was formerly a powder mill in this place, one of the first ever built in this country: this was blown up in 1777 and five persons killed. The first appearance of this village strikes the traveler with an agreeable surprise: considering the general face of the land in this section of the town, he is not prepared to find in such a short distance from the main road, such a romantic and beautiful specimen of interesting scenery.—From some of the eastern hills in this town, are some of the most delightful prospects to be seen in the State. The view embraces the whole valley of the Connecticut—from where it enters the highlands in South Glastenbury to Mount Tom in Massachusetts, including Hartford and all the intervening towns.

“In the eastern part of the town, there is a pond of about a mile in circumference, called ‘Diamond pond,’ from the circumstance of there being small pebbles or stones around its margin, having a peculiar brilliancy. Near the center of the town, there is a mineral spring, which though it has acquired no celebrity abroad, has been thought by men of science who have examined it, to possess valuable medicinal qualities; and for more than one hundred years has been known by the name of the ‘Pool at Neipseic.’”

There were several seats of the Indians in Glastenbury, and this tract was considered fine hunting and fishing ground. They were all tributary to Sowheag, who was tributary to the Pequots, or in alliance with them, and they mustered their warriors in aid of the quarrels of that powerful tribe. The north part of Glastenbury was called the plains of *Hanahbuke*; the south part, *Naog*; and on the line of Chatham and Glastenbury were the meadows and hills of *Wongung*; in the southeastern part is the valley of *Wasuc*. Near the center of the town are the high hills and the celebrated pool at *Neipseic*; still farther east and to the northeast are the higher peaks of *Houksett* and *Minachaug*.

The following inscriptions are from monuments in the ancient burying ground.

Here lieth interred the body of Thomas Kimberly, Esq. one of his Majesties Justices of the Peace, and Quorum Speaker in the House of Representatives, &c. in all which trusts his eminent abilities distinguished him. He was the son of Eleazer Kimberly, Esq. Aged 48 years, and 4 months. Born Sept. 1681, and expired Jan. 29, Æ. 1729,—30.

Here lyes the Body of ye Rev. Mr. Chiliab Brainerd, a zealous and faithful minister of Christ, and first Pastor of ye Church in Eastbury, who deed. Jan. 1, 1739, in ye 31st year of his age, and in ye 3d year of his ministry.

Reader! one moment stand, and this stone will remind you that Wm. Welles, Esq. on the 12th of April, Æ. 1778, in ye 54th year of his age, exchanged this world for another; after being honored for many years as an acceptable servant of the public, with many important offices of trust and confidence.

Here lies the mortal parts of Mr. David Hale, who paid to nature its last demand June 17th, 1800, in the 44th year of his age, when his immortal part passed to receive a more sublime degree under the Great Arch above.—When in Life he was respected, So in death he was lamented.

GRANBY.

GRANBY is an extensive irregular township, situated in the northern section of Hartford County. It was incorporated as a town in 1786, previous to which it was a part of Simsbury. It is bounded n. by the Massachusetts line, e. by Suffield and Windsor, s. by Simsbury and Canton, and w. by Barkhamsted and Hartland. The average length of the township from east to west is $9\frac{1}{2}$ miles: the breadth from north to south averages more than 6 miles. There are two societies in this town, *Turkey Hills* and *Salmon Brook*. Turkey Hills is said to have derived its name from the numerous flocks of wild turkeys which formerly used to range this part of the town. Salmon Brook (the western part of the town) derived its name from a brook of that name, passing through this section, in which salmon formerly used to be taken. There are 5 houses of worship in this town; 2 Congregational, 1 Episcopal, 1 Methodist, and 1 Universalist. Salmon Brook, which is 14 miles from Hartford and 3 from the old prison buildings, is perhaps the largest village. In this place is the Episcopal church, and about twenty or thirty dwelling houses in the vicinity.

Different appearances of minerals have been discovered in the greenstone mountains and hills of this town. The cavern, which was once occupied by the State as a prison, is now opened and worked as a mine by the "Phœnix Mining Company," incorporated by the Legislature of Connecticut in 1830.

South view of Newgate Prison Buildings.

This place, formerly the State Prison of Connecticut, is sixteen miles from Hartford: the spires of the churches in the city can be easily seen from the prison buildings. It is two and a half miles east of the New Haven and Northampton Canal, and four or five miles westward of Connecticut river. The buildings are situated on the western declivity of a range of mountains which extend southerly to New Haven, terminating at the East Rock near that place. A range of lofty, precipitous and craggy rocks rises immediately east of the Prison; on the west extensive valleys are seen, with mountains presenting irregular outlines in the distance.

The appearance of this place forcibly reminds the observer of the walls, castles and towers erected for the security of some haughty lordling of the feudal ages; while the gloomy dungeons within its walls call to remembrance a Bastile, the prisons of the Inquisition, and other engines of oppression and tyranny.

The lands upon which this prison stands, and in the vicinity, were claimed by the original proprietors of the town, in which they were once situated; but on account of their supposed value from the copper ore which had been found, and as gold was supposed to abound in the mine, it caused a contention about the title, which was long continued. To quiet this, the General Assembly in 1753, appointed a committee to investigate the subject, and confirmed the right and title of the original proprietors, and set off to them the land or mine. At this time copper ore had been found; the ore was considered very rich, and it was also supposed that it contained gold. From these circumstances, the fame

of these mines soon reached Europe, and a company was formed in England in 1760 for the purpose of working them; soon after a number of persons in the employ of this company arrived from England for this purpose. But the company was obliged principally to employ men who resided in the neighborhood, who were not acquainted with the business; from which circumstance and others, the work proceeded slowly, and with great difficulty. The company, however, was enabled to freight two vessels with ore, (as they did not calculate to work the ore here, but in England;) these vessels were both lost—one was taken by the French, and the other sunk in the Channel. These losses were so great, and the whole business having been little more than a continuation of disasters and sacrifices, the company became discouraged and abandoned the undertaking. The miners, in digging and exploring, sunk numerous wells or deep excavations. The principal one was upon Copper hill, so called, and is now remaining within the walls of the prison. These caverns were first occupied as a place of confinement about the time of the Revolutionary war. There being at that time no prison in the state besides the county gaols, and the number of convicts increasing, arrangements were made for occupying these caverns as a place of confinement, but no permanent buildings were at this time erected; it is not probable that at first it was contemplated to convert these caverns into a state prison; their occupation for this purpose was regarded as a temporary thing. The confining of convicts having begun, it was continued; and this being found inconvenient, the General Assembly in 1790 passed an act, establishing Newgate prison as a permanent state prison, and provided for the erection of suitable buildings.

The following is from Kendall's travels in the northern parts of the United States. He visited Newgate prison in 1807.

"On being admitted into the gaol yard, I found a sentry under arms within the gate, and eight soldiers drawn up in a line in front of the gaoler's house. A bell summoning the prisoners to work had already rung; and in a few moments they began to make their appearance. They came in irregular numbers, sometimes two or three together, and sometimes a single one alone; but whenever one or more were about to cross the yard to the smithery, the soldiers were ordered to present, in readiness to fire. The prisoners were heavily ironed, and secured both by handcuffs and fetters; and being therefore unable to walk, could only make their way by a sort of jump or a hop. On entering the smithery, some went to the sides of the forges, where collars, dependent by iron chains from the roof, were fastened round their necks, and others were chained in pairs to wheelbarrows. The number of prisoners was about forty; and when they were all disposed of in the manner described, sentries were placed within the buildings which contained them. After viewing thus far the economy of this prison, I left it, proposing to visit the cells at a later hour.

"This establishment, as I have said, is designed to be, from all its arrangements, an object of terror; and every thing is accordingly contrived, to make the life endured in it as burdensome and miserable as possible. In conformity with this idea, the place chosen for the prison is no other than the mouth of a forsaken copper mine, of which the excavations are employed as cells. They are descended by a shaft, which is secured by a trap door, within the prison house, or gaoler's house, which stands upon the mine.

"The trap door being lifted up, I went down an iron ladder, perpendicularly fixed, to the depth of about fifty feet. From the foot of the ladder a rough, narrow, and low passage descends still deeper, till it terminates at a well of clear water, over which is an air shaft, seventy feet in height, and guarded at its mouth, which is within the gaol yard, by a hatch of iron. The cells are near the well, but at different depths beneath the surface, none perhaps exceeding sixty feet. They are small, rugged, and accommodated with wooden berths, and some straw. The straw was wet, and there was much humidity in every part of this obscure region; but I was assured I ought to at-

tribute this only to the remarkable wetness of the season; that the cells were in general dry, and that they were not found unfavorable to the health of the prisoners.

"Into these cells the prisoners are dismissed at four o'clock in the afternoon, every day without exception, and at all seasons of the year. They descend in their fetters and handcuffs, and at four o'clock in the morning they ascend the iron ladder, climbing it as well as they can by the aid of their fettered limbs. It is to be observed that no women are confined here; the law providing that female convicts, guilty of crimes of which men are to be confined in Newgate prison, are to be sent only to the county goals.

"Going again into the workshop or smithery, I found the attendants of the prison delivering pickled pork for the dinner of the prisoners. Pieces were given separately to the parties at each forge. They were thrown upon the floor, and left to be washed and boiled in the water used for cooling the iron wrought at the forges. Meat had been distributed in like manner for breakfast. The food of the prison is regulated for each day in the week; and consists in an alternation of pork, beef, and peas, with which last no flesh meat is allowed. Besides the caverns or excavations below, and the gaoler's house above, there are other apartments prepared for the prisoners, and particularly a hospital, of which the neatness and airiness afford a strong contrast to the other parts of the prison. It was also satisfactory to find that in this hospital there were no sick.

"Such is the seat and the scene of punishment provided by Connecticut for criminals not guilty of murder, treason, or either of a few other capital offences. What judgment the reader will pass upon it I do not venture to anticipate; but for myself, I cannot get rid of the impression, that without any extraordinary cruelty in its actual operation, there is something very like cruelty in the device and design."

In the southwestern part of the town are two remarkable hills, called *Barn door hills*, which rise to an elevation of four or five hundred feet. These hills have the appearance of having been separated by some violent convulsion of nature, as the two sides correspond with each other. A road about half a mile in extent passes through the chasm now separating these two hills. Were this chasm closed up by bringing the hills together, the hill or mountain would present the appearance of a cone.

If we were to credit but a small proportion of what has been related and believed by many persons to be true, this town has been the theater of the most extraordinary transactions. It is stated that about ten or twelve years since, in the west part of the town, in an old house near the Hartland line, the crying of a child, and many other unusual noises, were many times distinctly heard by persons who were in the house, although there was no child near, nor was there any apparent cause for any noise to be heard in the vicinity. Sometimes the crying of the child was very loud and distinct, and appeared to be but a few feet from the persons who heard it. (It ought to be mentioned, that in this house a foul crime is supposed to have been perpetrated.) Two young men, who were possessed of the usual share of courage, supposing the whole to be a kind of "ghost story," determined to sleep all night in the room where these noises were heard, and find out, if possible, the cause. Some time after they had gone to bed, in the dead of the night, something appeared to come with a kind of gust against the house; then something appeared to rush through the window, although nothing was seen; next the chairs were thrown about in great disorder, next there was a noise heard at the fire-place with the shovel and tongs, although there were none in the room, and finally the noise appeared to go off down the ash-hole. Some forty or fifty years since a number of families in the West society were affected in a strange and unaccountable manner. The persons composing these families would often run about like persons distracted; and according to their statements, heard strange noises, saw spirits in the air, &c.

HARTLAND.

HARTLAND is an elevated township, 22 miles from Hartford, bounded n. by the Massachusetts line, e. by Granby, w. by Colebrook and s. by Barkhamsted, and is about 7 miles in length and 5 in breadth. This town is hilly and mountainous, being embraced within the extensive range of granite in this part of the State. From its elevated situation it is cold and frosty, and the soil rather sterile, producing but little grain; it however affords tolerable grazing. The making of butter and cheese, beef and pork, and pasturing of cattle are the principal kinds of business done in the town. The farmers in the east of this to Connecticut river, have been in the practice of sending their growing or young cattle and sheep into this and other grazing towns, to be kept during several months in the spring and summer.

The town is divided into two parts, one called East, the other West Hartland, in each of which is a Congregational church; there is also a Methodist church in the limits of the town. The town is centrally divided by the east branch of the Farmington river, on which are several small tracts of alluvial, and excellent mill seats. The deep ravine or valley through which this stream passes is called *Hartland hollow*, and is characterized by bold, rough, and picturesque scenery.

Hartland is one of the towns sold by the State to the inhabitants of Hartford and Windsor. The first proprietors' meeting was holden in Hartford in 1733. The first person who lived in the town was John Kendall, who being in debt, fled from Granby, and to get out of the way of his creditors, located himself in Hartland Hollow, on the west bank of the branch of the Farmington river; here he made himself a hut with slabs which floated down the stream from Granville, Mass.—this was in 1753. While here Kendall's wife bore a pair of twin daughters, the first white children born in the town. Kendall stayed in the town about one year. In 1755, Simon Baxter came into this town. He was considered a person of suspicious character. In the Revolution he joined the army of Burgoyne, and finally died at Halifax.

Hartland was incorporated as a town in 1761, at which time it belonged to Litchfield County. In 1768, the Rev. Sterling Graves was ordained, being the first minister in the town. He was ordained in the open air, on a knoll about a mile south of the present Congregational church in East Hartland. The first meeting house was erected in 1770. In West Hartland, the first minister was the Rev. Nathaniel Gaylord, who settled there about 1782. Mr. Gaylord is still living, and preaches occasionally.

Hartland, Litchfield County, Jan. 19, 1796.

There is now living in this town, one Mr. Jonas Wilder, in the 97th year of his age, and is a steady, industrious man, seldom losing one day in a month by reason of infirmity and old age; he was one of the first settlers in said town, and has in this town lived near 36 years; he was then the oldest person that ever lived in said town and ever since has been, and still remains, the oldest person by several years. He has had two wives and both of one name, both christian and maiden, the last of which he hath lived with about 65 years; he has had 12 children and never lost one; his eldest child is now in the 73d year of his age, the youngest in his 47th. His sons, though but seven in number, have sustained the following honorable offices, beside town and society

offices, viz. one Colonel, one Major, one Captain, two Lieutenants, three Justices of the Peace, three Representatives, and three Deacons.

His posterity was numbered in 1773, and found to be 232, of which he had lost only 16, and how many hath increased since then is unknown, as two lived near Boston, two at Upper Coos, and three at Genesee.—*Conn. Courant*.

The following inscriptions are copied from monuments in the burying ground by the side of the Congregational church in East Hartland.

IN memory of Deacon Thomas Giddings, the first residing inhabitant in Hartland, he came into town June 12th, 1754. Died May 24th, Aged 67 years.

“ We are Strangers and Pilgrims on the Earth as were all our Fathers.”

IN memory of the Rev. Aaron Church, who died April 19th, 1823, in the 78 year of his age, and 50th of his ministry.

With Abraham's joy, Thy call I follow to the land unknown :
I trust in thee, and know in whom I trust.

MANCHESTER.

MANCHESTER was incorporated as a township in 1823. It was formerly called Orford, the East parish in East Hartford. It is nearly six miles in length, and about the same in breadth, bounded N. by East Windsor and Vernon, E. by Bolton and Vernon, W. by East Hartford, and S. by Glastenbury. The surface of the town is somewhat broken and hilly ; it has a mixed soil of sand, loam and gravel, and is generally fertile. In the western part of it, there is a range of red sandstone, extending through the town ; this stone generally lies under the surface, and being of a soft texture is easily worked, and is valuable for underpinning, hearth and step stones. The township is watered by the Hockanum and its branches, upon which are situated numerous mills and manufactories, among which are six or seven paper mills, one woolen and one satinet factory, and two powder mills.

The cut on the next page is an eastern view of the churches in Manchester. They stand on a light sandy plain, about 8 miles from Hartford. The Methodist church is the first building seen on the right, the one beyond is the Congregational church. There are three principal settlements in the town, in each of which is a post office : Woodbridge's, near the centre, Buckland's corner, and a collection of houses in the northeast part of the town, in the vicinity of the Union Factory.

“ The first cotton mill that was successfully put in operation in Connecticut, was erected within the present limits of this town in 1794, and owned by Messrs. Samuel Pitkin & Co. Velvets, corduroys, fustians, were manufactured at this establishment in considerable quantities, at that early period. The machinery was made by a native of England, and upon the principles introduced by Arkwright. Efforts all of the same nature had been before attempted in the State, but were unsuccessful. The business was regarded as a mystery, difficult of acquisition, and as an experiment hazardous to the undertakers. But one cotton mill was in operation in the country at this time, and that at Providence, and owned by Messrs. Alling & Brown and Samuel

Methodist and Congregational Churches, Manchester.

Slater. A mill was soon afterwards erected at Patterson, N. J. Comparatively little progress was made in extending the cotton manufacture until about 1804, since which it has experienced many vicissitudes, and had to encounter great difficulties. The business was flourishing during the war, but from the vast and alarming influx of goods after the peace, became greatly depressed. New companies, however, were formed upon the passage of the tariff of 1816, and additional capital invested in the business, and the mills, which had discontinued their operations and were suffered to decay, were repaired and put in operation, many of them having been transferred to other hands."

In the vicinity of the two churches, (seen above,) in 1751, Mr. Thomas Kennedy and a young man were buried alive by the caving in of a well 53 feet in depth. Mr. Kennedy, who descended from motives of curiosity, found the earth caving in about him. Having called for help, a rope attached to a windlass was let down, and he was directed to tie it around his body under his arms. This method of extricating him was found ineffectual. In the hurry of the moment, a young man descended the well in order to cut the rope. A large stone now caved in, followed by a mass of sand, which covered both, and they were instantly suffocated. An order was obtained from Gov. Law, who resided at Milford, to raise assistance to disinter the bodies. Ten days had elapsed before they were dug out.

MARLBOROUGH.

THIS town is situated in the southeastern extremity of Hartford County. It was incorporated in 1803, being formed from Colchester, Glastenbury and Hebron, three towns which belonged to three different counties. The township is irregular in its form, having an average length of five and a half miles, and an average breadth of four miles, bounded N. by Glastenbury, E. by Hebron, S. by Colchester, and W. by Chatham. The surface of the town is hilly and stony, and the lands best adapted for grazing. Marlborough pond, in this town, is a con-

siderable body of water, being one mile in length and half a mile in breadth. Black lead has been found in this town. There is one house of worship in the town, which is of the Congregational order.

The most compact settlement in the town is around the Union Cotton Factory, which is 14 miles from Hartford and one mile northerly from the Congregational church. The number of inhabitants in 1810 was 720; in 1830 the population was 704.

The first settlement in the town was commenced in the south part, by persons by the name of Foot and Carrier, who were from Colchester: these settlers located themselves between two and three miles south of the meeting house. The tradition is, that the first person who located himself in the limits of the town was Mr. Carrier, who constructed a kind of log hut on the land now owned by Mr. Gelston. Carrier, who came up from Colchester to make a clearing for a settlement, having got detained from some cause, was obliged to stay in his hut over night, and was attacked by a party of Indians, eight or ten in number. Carrier, who was a strong athletic man, defended himself with such effect that he killed nearly the whole number with his axe, as they attempted to force themselves into his cabin.

The New London and Hartford turnpike passes through the center of this town. After ascending the mountain which forms the eastern boundary of the valley of the Connecticut, about twelve miles from Hartford, the road passes through what is called "*the dark hollow.*" This place is on the mountain, near the western boundary of Marlborough. Large masses of rocks are thrown about in great disorder, giving the place a wild and savage aspect. In the vicinity of this place, westerly from the turnpike, an English gentleman, it is said, who had married the daughter of one of the governors of Connecticut, resided for some time with his family, at the period of the first settlement of the country.

SIMSBURY.

THE ancient name of Simsbury was *Massacoe*. The land was purchased of the Indians, and settlements began under the town of Windsor, of which it was then considered as part. In the session of the General Court, May, 1670, it was enacted, that Massacoe should be a distinct town, by the name of Simsbury; the limits granted were ten miles northward from the north bounds of Farmington, and ten miles westward from the western bounds of Windsor. About six years after the settlement, the inhabitants, numbering about forty families, were so alarmed at the hostility of the Indians, that they buried their effects and went back to Windsor. The settlement being deserted, the Indians destroyed the houses which had been erected, by burning them, and blotted out almost every vestige of improvement which distinguished the new born settlement from the surrounding wilderness; so that when the settlers returned, they could not find the place where their goods

were secreted. This was in the spring of 1676, at which time Simsbury was a frontier settlement, although but about ten miles from Connecticut river. This township is seven miles in length, and about five and a half miles in breadth, upon an average estimate. It is bounded n. by Granby, e. by Windsor and Bloomfield, s. by Avon, and w. by Canton. It is strikingly diversified, being intersected by the Farmington river, and embracing the range of the greenstone mountain, which here is elevated and lofty. The New Haven and Northampton Canal passes through this town, running parallel with the river.

South view of Tariffville, in Simsbury.

Tariffville, a flourishing village, is situated at the northeastern extremity of this town, on the west bank of the Farmington river, which at this place passes south, at the base of a range of mountains, which divides this part of the State from the great valley of Connecticut river. The accompanying view shows the appearance of the village from the heights which rise immediately south. The river passes between the buildings represented and the precipitous heights seen on the right in the engraving. There is in the village a post office, called the Tariffville post office, and two taverns, both of which are seen in the engraving; one is seen on the extreme left, the other south of the Stone Factory, (the building with a cupola,) before which a large tree is standing in the street. This place is a carpet manufacturing village, owned principally by a company called the "New England Carpet Company;" they employ 175 hands, and manufacture yearly about 132,000 yards of carpeting. This flourishing village is between three and four miles south of Newgate or Simsbury mines, near the New Haven and Northampton Canal, and twelve miles from Hartford.

The following extracts are from a publication entitled "the History of my own times," by the Rev. Daniel Barber, A. M. printed at Washington, 1827.

“In the commencement of Philip’s war in New England, in 1675,? this town (Simsbury) was burnt by the Indians. Connected with which event, current tradition has preserved and handed down the following singular and extraordinary fact: that, very shortly before this attack by the Indians, early one Sunday morning, as Lieut. Robe’s father was walking over the plain not from his house, he very plainly and distinctly heard the report of a small arm, which much surprised him, it being the Sabbath. He found on returning to his house, that his family also heard it. On going to meeting, at which the inhabitants from all parts of the town were assembled, it was ascertained that the report was heard at the same hour in every quarter. It was, on further examination, found to have been heard as far south as Saybrook, (fifty miles,) and as far north as Northfield, at that time the extent of the English settlements to the north. The report of this gun alarmed all Connecticut. The Governor summoned a council of war to meet at Hartford; and the council issued an order for the inhabitants of Simsbury, one and all, immediately to withdraw themselves to Hartford, the then capital. This order was punctually obeyed. The fearful apprehension of being suddenly murdered by savages, put in motion, and hastened along, whole bands of women and children, with men in the rear, with sheep, cattle, and such utensils and conveniences as their short notice and hasty flight would permit. Hartford was twelve miles distant. Their heavy articles, such as pots, kettles, and plough irons, were secreted in the bottoms of swamps and wells.

“The father of the first Governor Wolcott and his family, were among those who fled from Simsbury. Old Mr. Wolcott filled up a large brass kettle with his pewter cups, basins, platters, &c. and then sunk the kettle with its contents in the deep mud of the swamp, but was never able to find it afterwards.

“After the inhabitants had spent a day or two in their retreat, the men under arms were sent back, for the purpose of looking about and making discoveries. They came to the highest eminence in the road east of Simsbury river, from which, at one view, they could take a survey of the principal part of their habitations, which, to their surprise and sorrow, were become a desolation, and every house burnt to ashes. They saw no Indians, but plenty of Indian tracks and trails in the sand.

“I have recorded the story as a matter of fact, having very often heard it related as such in my infant years, and also from the children of those who were both witnesses and personal sufferers.

“My father’s name was Daniel Barber. He was the son of Sergeant Thomas Barber, who was the grandson of Lieut. Thomas Barber, who commanded under Captain Westover, in the first military company in said Simsbury. He was one of the original proprietors of that township, as appears from his name being still on the original charter. It is also reported of him, that at a time when the savages were surrounding the town with a determination to destroy its inhabitants in the darkness of the night, that by means of his military skill and sagacity, he prevented their attack; that the next morning, the wind being fair, he ascended the roof of his house, in the place called Hop Meadow, and

beat an alarm on his drum. The beat was heard and understood at Windsor, seven or eight miles off. The militia took the alarm, and a company under arms made their appearance in the afternoon at Simsbury."

The following is from Mr. Barber's pamphlet from which the preceding was taken.

"Immediately after the battle of Bunker's Hill, in 1775, orders were issued for raising a regiment of Connecticut troops, for the term of five months, under Colonel Jedediah Huntington, of Norwich. I enlisted under Captain Elihu Humphrey, of Simsbury. My other officers were Lieut. Andrew Hilyer, Lieut. Ebenezer Fitch Bissel, and Ensign Stoughton; all of whom are men of character and reputation. Captain Elihu, as we generally called him, was the son of the Hon. John Humphrey, formerly one of the Governor's council, and a Justice of the Court of Common Pleas for the County of Hartford. Captain Elihu was a well bred gentleman; his friendly turn of mind, with a sweetness of disposition, secured him the love of all good men; his confidence and esteem procured him the commission of Major, in the second campaign. He dying about the close of the year 1776, left, as a legacy to his family, a name, whose reputation will not be forgotten during many generations. I knew him—I revered him—and I loved him. Lieut. Hilyer, (now Col. Hilyer,) was also of Simsbury. He was a handsome sprightly young gentleman, who had in early life received a college education. As an officer, his manner was unassuming, gentle and persuasive. Whenever he spoke, the soldiers heard him with pleasure, and whatever was his will was cheerfully complied with. E. Fitch Bissel, of Windsor, was second lieutenant. He was a gentleman, though not of the most easy and familiar turn; yet, for his steady, correct attention to the duties of his station, was well respected. I think he was advanced to a captainship the next year. He died many years ago. Of Ensign Stoughton, I remember but little. Sickness detained him long out of camp. He was a tall well made man, and possessed a good military appearance. He was also from Old Windsor. The sergeants in this company were, Aaron Pinney, Jacob Tuller, Daniel Higley, and Thomas Hayden; Jonathan Humphrey, Jr. (afterwards Col. Humphrey,) was Clerk of the Roll; all of Simsbury except Sergeant Hayden. Sergeant Pinney was a man of a fierce and fiery countenance and commanding air, well becoming a soldier of '75. Sergeant Tuller was a man from whom we did not expect much flattery; his brow was generally knit together in a forbidding frown. Sergeant Higley, who had been a soldier in the old French war, was of a musical turn, and his old war songs made the time pass away to very good account. Sergeant Thomas Hayden was, no doubt, a military man; but I should guess no soldier ever admired him for his pleasant airs. Jonathan Humphrey, Clerk of the Roll, was a most charming companion; his social airs and pleasant countenance gained the affection and good wishes of all. He is long since dead, and lies buried near Major Elihu, in Hop Meadow burying ground. Our company being suddenly enlisted, to the number of about seventy-five, rank and file, orders were given for all to meet on a certain day at the house of the Captain, well equipped, and ready to begin their march.

"The Rev. Mr. Pitkin, of Farmington, was requested that day to preach the farewell sermon to the soldiers. At the hour appointed, we marched to the meeting house, where the officers appeared in military style, with their appropriate badges of distinction, and the soldiers in proper order, with their arms and accoutrements, as men prepared for battle. It was a full and overflowing audience, all in high expectation of hearing something new and charming from so gifted a preacher. After his warm and fervent prayer to Heaven for the success and prosperity of the American armies, and the liberties and freedom of our country, he introduced his address, if I remember right, from these words: "Play the man for your country, and for the cities of your God; and the Lord do that which seemeth him good." His sermon was well adapted to the occasion, and the spirit of the day. It was tender and pathetic—lively and animating. It was like martial music; while it touched the finer feelings, it roused and animated for the dreadful onset—the shout of war and the cry of victory! During the time of its delivery, abundance of tears were seen to flow, from both old and young, male as well as female. The sermon being ended, the drums soon beat to arms. Being arranged in military order, we were again, conducted to the Captain's house, and dismissed for a short time. In going to and from the meeting, we were followed and accompanied by a mixed multitude—fathers and mothers—wives and children—sisters, friends and strangers. Now each soldier had the opportunity of mingling for a few moments with his dearest friends and companions. The tender feelings of love—of friendship—of affection—again burst forth. While the fond father and tender-hearted mother are bidding adieu to their sons, the husband,

the wife, the children—brothers, sisters and best friends—are exchanging, as for the last time, the token of their love, and the best affections of the heart.

“In the midst of this mingling scene of sorrow, the drums beat to arms. Soldiers, take your places in the word; the line of march is formed; we add one more wishful, lingering look, while many a silent tear bespeaks the real feeling of the heart.

“The word is given. We begin our march with silence, downcast looks, and pensive feelings and reflections. We were now leaving our homes, our friends, and all our pleasant places behind, and which our eyes might never again behold. The most of us had not, at that time, I believe, been twenty miles from home. After marching awhile, we began to give way to more cheerful and lively feelings. We marched about eight miles that afternoon; at night put up at James Marsh’s inn. Here, for the first time, I slept as a soldier on the floor, with a cartridge-box for my pillow. At that period, horse wagons being very little in use, an ox team was provided to carry our provision for the way, and a barrel of rum. Our provision was salt pork and peas. Wherever we stopped, a large kettle was hung over the fire in which the salt meat was put without freshening, and the dry peas without soaking. Cooks and stewards were appointed who took charge of the table department. When all was ready, a stroke on the drum was the signal to begin to eat; and we were generally hungry enough to stand in need of no great urging. While passing through Connecticut, the females were very polite, in lending us knives and forks; but, after entering Massachusetts, we were not allowed the like favor, without pledging money, or some other kind of security—the people saying they had lost many of their spoons by the soldiers who had gone before us. Our bread was hard biscuit, in which there was a small quantity of lime, just sufficient to make the mouth sore. They were so hard that the soldiers called them candlestick bottoms.

“Now, for the first time, we travelled on the Lord’s day, under arms, and past meeting houses in the time of public worship, with drums and fifes playing martial music; all which was calculated to afford to a New England man some doubts and reflections, whether God would be as well pleased with such parade and military performance, as if we had stayed at home to read our Bibles, or went to meeting to hear the minister. But military discipline and the habits of a soldier, soon effected a degree of relaxation in most of us. In process of time, many once pious, at least in form and appearance, came into the practice of treating all days nearly alike; yet there were some who kept up the practice of reading Watts’ Psalms and Hymns, as a book of devotion.

“It is very natural to expect, that soldiers under arms are not generally inclined to the same degree of civility as others, or as they ought to be; though this is not always the case. Yet, at the period at which I am speaking, and during our march, it was not uncommon, if a soldier thought himself not well treated by the inn-keeper, to shew his resentment by shooting a ball through his sign.

“In our march through Connecticut, the inhabitants seemed to view us with tokens of joy and gladness, and by them we were treated with common civility, and a respect due us as soldiers; but when we came into Massachusetts, and advanced nearer to Boston, the inhabitants wherever we stopped, seemed to have no better opinion of us (except the officers) than if we had been a banditti of rogues and thieves. This served to mortify our feelings, and sometimes drew from us expressions of angry resentment.

“After about nine or ten days’ marching, in company with our ox team, loaded with our salt pork, peas, and candlestick bottoms for bread, and the barrel of rum to cheer our spirits and wash our feet, which began to be very sore by travelling, we came to Roxbury, the place of our destination. There the place of our encampment was already marked out, and a part of our regiment on the spot. For every six soldiers there was a tent provided. The ground it covered was about six or seven feet square. This served for kitchen, parlor and hall. The green turf, covered with a blanket, was our bed and bedstead. When we turned in for the night, we had to lie perfectly straight, like candles in a box: this was not pleasant to our hip bones and knee joints, which often in the night would wake us, and beg to turn over. Our household utensils, altogether, were an iron pot, a canteen, or wooden bottle holding two quarts, a pail, and wooden bowl. Each had to do his own washing, and take his turn at the cookery.”

Simsbury, (Wheatog,) July 28th, 1768.

LAST Saturday we had here such a storm of hail as perhaps has not been known in the memory of man. The forenoon of that day was extremely hot; about noon a very black cloud began to rise, which in about two hours produced a heavy rain, attended with violent thunder. When the rain abated, there came on hail, which increased so much that the last hail stones which fell were supposed to be full the bulk of goose-

eggs—rather bigger than less. It did much damage to the smaller and weaker animals and vegetables. The apple trees, grain, and gardens were considerably damaged, as were also the shingles of some buildings—the glass suffered less than was expected. Cut had not the hail fell considerably perpendicular, but little glass would have escaped. Several of the hail stones were weighed, and amounted to three ounces each, so long after they fell that it was supposed one third of their magnitude was dissolved. 'Tis impossible to communicate a true idea of a phenomenon so rare, unexpected and terrible.

Hartford, July 25th.

In addition to the account in our last of the hail storm at Simsbury, we learn that it destroyed great quantities of English grain, but did more damage to rye than wheat; many large fields of the former having been since mowed for fodder, in which Jonathan Pettibone, Esq. Mr. Thomas Case, and others have been great sufferers. In the park of the above Case, a deer had one of his legs broke, and was otherwise so much wounded that he soon after died. Several hogs had their backs broke, some of which died some days afterwards. Some horses, and other large animals, were cut through the skin by the biggest and more ragged hail stones. 'Tis also to be noted, that great quantities of glass were broke, which the compiler of the former particulars was not apprized of when he communicated the same to us.

SOUTHINGTON.

South view of Southington, (central part.)

SOUTHINGTON is situated in the southwestern corner of Hartford County; bounded n. by Bristol and Farmington, w. by Wolcott, s. by Cheshire, and e. by a range of mountains, separating it from Berlin. The soil is generally good, and well adapted to the culture of rye and Indian corn. The township is about six miles in length, and about the same in breadth. The central part of the town is 18 miles from Hartford and 21 from New Haven. The population in 1810 was 1,807; in 1830, it was 1,844.

The above is a south view of the three churches in the town, and some other buildings in the vicinity. The nearest building seen on the right is now occupied as a post office; the next building north is the

Episcopal church, part of which is seen in the engraving; the building with a spire, in the center, is the Congregational church; the Baptist church, with a square tower, is seen a little to the north. The Episcopal church has stood about 50 years; the first house of worship used by the Baptists stands about twenty rods west, and is now used as an Academy; this building is about as old as the Episcopal church. The first Congregational church was erected about one mile north of its present location, on the southeast part of the elevation, on which is the north burying ground. The first clergyman was Rev. Jeremiah Curtiss.

This town was originally included in the limits of Farmington. It was laid out into lots, and divided among the eighty four proprietors of Farmington, in 1722. Several persons, however, had settled in it at that time, and within four or five years after that period, it was incorporated as a society, by the name of Southington, and was made a town in 1779. The first settlers were principally from Farmington; a few from Wallingford and Waterbury: their names were Woodruff, Hart, Andrews, Gridley, Newell, Lewis, Langdon, Root, Barnes, Clark, and others.

The inhabitants are generally engaged in agriculture; yet several kinds of manufactures receive considerable attention. Peck's patent for machines for making tin ware, a most valuable invention, is exclusively owned in this town, and the business of making them is extensively carried on, by Messrs. Seth Peck & Co. whose manufactory supplies almost the whole of the United States and the British provinces. The manufacture of water cement is very extensively carried on in this town, and furnishes a supply for the wants of the vicinity, and some for distant markets. There is an establishment for the manufacture of lasts, which are turned out by a machine: this is effected by having a model of the shape wanted, inserted into the apparatus connected with the machinery. Besides the above, there is a brass foundery; and several other establishments, for manufacturing various articles, such as saws of different kinds, tin ware, combs, spoons, clocks, brushes, &c. are in operation, more or less extensively, at different times, according to the demands of the market. Copper has been discovered, in several places, in the range of mountains on the eastern border of the town.

The following has been often related as a matter of fact. It is stated, that about the first settlement of the town, one of the inhabitants, by the name of Tufts, a singular sort of a man, became so weary of life, that he determined to

“shuffle off this mortal coil.”

Having understood that those who perished by the cold, suffered but little pain, he concluded to freeze himself to death. Going out in the severity of winter, he seated himself down where a cold “northwester” blew fair upon him, and awaited the accomplishment of his purpose. After sitting awhile, he found the severity of the weather so uncomfortable that he was induced to go in the house, declaring that it was actually *too cold* to freeze to death, and wished for a great coat and mittens, in order to make his exit in a more comfortable manner.

The following inscriptions are from monuments in the burying ground north of the principal village in Southington.

This monument is erected in memory of the Rev^d. Jeremiah Curtiss, he early devoted himself to the gospel ministry. He was settled Nov. 1728, in the 23d year of his age, and continued in that work, till he was regularly dismissed Nov. 1754. Integrity, meekness and humility, were conspicuous and acknowledged parts of his character, both in public and private life. He died March 21st, 1795, in the 89th year of his age.

The memory of the just is blessed.

The just shall live by Faith, Heb. 10. 38.

The Rev. William Robinson was born at Lebanon, Aug. 15th, 1754. In 1780, he was ordained Pastor of the Church in Southington, and continued in that relation 41 years. He died Aug. 15th 1825, on his birth day, aged 71 years—How mild to the righteous the dawn of immortality, how calm the sleep of death. Venerable Father! thy head silvered by age and bedewed with the tears of children and friends is laid in the dust, thy spirit has gone to the land where the wicked cease from troubling and the weary are at rest. There we trust to receive the benediction: "Well done, good and faithful servant." May the remembrance of thy kind counsels, and thy virtues be a strong bond to bind us with the cords of peace, of harmony and love.—May thy loved Spirit still influence us to seek that wisdom whose ways are ways of pleasantness and whose paths are peace.

In memory of Mrs. Naomi Robinson, wife of the Rev. William Robinson. She was born at East Windsor, Sept. 28th 1754, of the ancient and honorable family of the *Wolcotts*. She was peculiarly beloved in Life, and at death universally lamented. She died of the Small Pox in the 28th year of her age, April 16th, 1782. Her's was the character so strikingly described in the 31st Chap. of Proverbs, and to none could that closing verse be more properly applied than to her, "Many daughters have done virtuously but thou excellest them all."

The following is from a monument in a small burying ground upwards of three miles westward of the churches.

The Reverend John Merriman died on Feb. 17th, 1784, in the 89th year of his age. He was a Calvinistic Anti-pedo Baptiss minister.

Here lies the body death has bound,
Whose soul with ministerial gifts was crown'd,
His life his master's doctrine did adorn,
And waits his last reward till the auspicious morn.

SUFFIELD.

THIS town was originally under the jurisdiction of the colony of Massachusetts. It was purchased of two sachems by Mr. Pyncheon, and some others, for about one hundred dollars. In 1670, a grant of Suffield was made to Maj. John Pyncheon and his associates, by the general court of Massachusetts, as a committee to lay it out and plant a township. It was settled about this period, and incorporated with town privileges. It continued subject to the jurisdiction of Massachusetts, till the year 1752, being then annexed to Connecticut.

Suffield is bounded n. by Massachusetts, e. by Connecticut river, separating it from Enfield, w. by Granby and the Southwick ponds in Massachusetts, and s. by Windsor and Granby. The township, which is somewhat irregular in its form, averages about eight miles in length from east to west, and five in breadth. This town, though somewhat

Connecticut Literary Institution, at Suffield.

diversified in its surface and soil, is considered by many to be one of the best townships of land in the State: the eastern section, bordering upon Connecticut river, has a gradual rise for about two miles to the public road, which runs nearly in a parallel direction with the river. This is a fine tract, the soil being a strong and deep loam. There is no alluvial upon the border of the river, and the bank is generally elevated and bold. The town is divided into two parishes, Suffield and West Suffield. There are four houses of worship in the town, two for Baptists and two for Congregationalists. The population of Suffield has not varied much for the last forty years. In 1800, the number of inhabitants was 2,666; in 1810, they numbered 2,630; in 1830, their number was 2,690. The principal street in the first society, which is a mile or more in length, lies on beautiful ground, rising gradually from the south towards the north. It is well settled, and contains many handsome dwelling houses. From the higher parts there is a fine prospect; the peak of Mount Tom is seen at the distance of twenty miles, forming a prominent object in the landscape, opening to the northward. Upon this street are two churches, one for the Congregationalists and one for the Baptists, a post office, stores, and the Connecticut Literary Institution.

The above is a northeastern view of the Institution, which is pleasantly located in the center of the place, 16 miles n. of Hartford and 10 s. of Springfield. It was commenced under the patronage of the Connecticut Baptist Education Society. A distinct act of incorporation was obtained in May, 1835. The edifice, which is constructed of brick, is 72 feet long and 34 wide, four stories high, containing 24 rooms, well furnished for the accommodation of students. "Connected with the Institution, and owned by the corporation, are 16 acres of valuable land, and a large dwelling house for the use of a steward, who furnishes board, including washing, for 1 dol. 25 cts. per week. The average

number of students thus far has been about 60: the number is constantly increasing, and the seminary gives fair promise of rising to an elevated rank among institutions of similar character in the country.

It will be perceived, in all correct maps of Connecticut, that a tract of land, about two miles in length and breadth, on the western boundary of this town, projects into what would seem ought to belong to Connecticut. This tract has been left to the jurisdiction of Massachusetts, since the year 1800. It appears that the bounds of Springfield and Windsor were not defined with much accuracy, in this section; the bounds at the northwest point of the projection, however, appear to have been clearly defined. The western bounds of Springfield, in which part of Suffield was included, were supposed, but erroneously, to extend to this point. A Mr. Moore, living on the tract in question, was knowing to the facts in the case. Having received a warning to a militia training, he refused to appear, denying that he was within the jurisdiction of Connecticut. The case was carried to the General Assembly of Connecticut, who, upon an examination of the facts in the case, were obliged to leave this tract to the jurisdiction of Massachusetts.

"The south line of Massachusetts, according to charter, runs west from a point three miles south of the most southerly branch of Charles river, and every part of it; and the north line of Connecticut is the south line of Massachusetts. When Mr. Pyncheon settled Springfield, and the first plantations were made in Connecticut, in 1635, it was not known whether the territory would fall within the limits of Massachusetts or not. But Mr. Pyncheon at first considered himself as belonging to the jurisdiction of the Connecticut plantations. In 1612, Massachusetts employed two surveyors, Woodward and Saffery, to run the line between the colonies. These pretended to ascertain the south line on Charles river, and then sailing round and going up the Connecticut, they attempted to fix the line there, in the same latitude. But either through inattention or the use of bad instruments, they determined the line to fall in Windsor, many miles south of the true line.—Connecticut was dissatisfied with the determination of Woodward and Saffery, and made repeated proposals to Massachusetts for a mutual adjustment of the controversy, which were ineffectual. In 1694, a committee appointed by Connecticut, run the line and found the former survey very erroneous. In this situation, the inhabitants of Suffield and Enfield, who settled under the claims and jurisdiction of Massachusetts, continued to encroach upon Windsor and Simsbury, which excited warm animosities. In the year 1700, further attempts were made to procure an amicable settlement of the dispute; the line was run by commissioners of both colonies, in 1702, and found to fall far north of the former line; but Massachusetts disagreed to their report. In 1708, Connecticut appointed commissioners with full powers to run the line, and establish the boundary; and resolved, that unless Massachusetts would unite to complete the business, they would apply to the crown. Massachusetts did not agree at once to the proposal of Connecticut; but in 1713, commissioners were appointed on the part of both colonies, who came to an agreement on the 13th of July. On running the line, it was found to fall north of Enfield, Suffield, and Woodstock, which of course came within the jurisdiction of Connecticut. As an equivalent for the land which had been taken from Connecticut by encroachments, Massachusetts granted a tract of land in the western part of that colony, which, in 1716, was sold for two thousand two hundred and seventy-four dollars, which sum was applied to the use of Yale College. This agreement, however, was not considered as conclusive and satisfactory: nor was the boundary between the two states definitely settled till May, 1804."*

Gen. *Phineas Lyman*, distinguished for his services during the French war, and for many public employments, was for several years a

* Webster, Hist. of U. S.

resident in this town. He was born at Durham, about the year 1716, and educated at Yale College. He devoted himself to the profession of law, and commenced practice in this town. "He took a distinguished part in the dispute between this state and Massachusetts, relative to the right of jurisdiction over the town of Suffield, and the other towns upon that boundary, settled by Massachusetts. He afterwards became a councillor, then called a magistrate, which office he held for a number of years. During the French war, he had a distinguished command in the northern army for several years. In the campaign of 1755, he served as major general in the provincial troops. At or soon after the close of the war, he went to England to support a claim of the officers of the provincial troops, having been authorised to act as general agent. After experiencing great difficulties and delay, (having returned once for an extension of his powers,) he succeeded in obtaining a grant of an extensive tract of land upon the Mississippi, in the vicinity of Natchez. He accordingly embarked, and sailed directly for the Mississippi, where he arrived about the year 1774. He dispatched one of his sons for his family, which during this period had remained in Suffield; but just before their arrival, the same year, Gen. Lyman died, upon the tract of land of which he obtained a grant. His wife died during the passage, and his family left there soon after, on the country being reclaimed by the Spaniards."*

Gideon Granger was born in this town, July 19, 1767. "He was graduated at Yale College in 1787, and in the following year was admitted a member of the bar of the supreme court of Connecticut, where he practiced law with great celebrity and distinction. In 1793 he was elected a member of the legislature of Connecticut, and was continued in that body for several years, and distinguished for energy, talents, and usefulness. To his enlightened exertions, this state is principally indebted for its school fund, so justly celebrated as the foundation of its primary schools, and the fostering parent of that useful information which prevails so generally in the state. In 1801, he was appointed postmaster general of the United States, and continued to execute the duties of that important office with great ability, until the spring of 1814, when he removed to the state of New York. In April, 1819, he was elected a member of the senate of that state, which situation he resigned in 1821, on account of ill health. He died at his seat in Canandaigua, on the 31st of December, 1822. Mr. Granger was a man of commanding appearance, of a striking physiognomy, of talents equally brilliant and profound, of a kind and benevolent heart, and unimpeachable rectitude. He was an able speaker and a powerful writer. His writings were confined almost entirely to political subjects. His principal publications were written under the signatures of Algernon Sidney, and Epaminondas, in favor of President Jefferson's and Governor Clinton's administrations, and of Senectus on the school fund of Connecticut."†

* Pease and Niles's Gazetteer.

† Lord's Lempriere's Universal Biography.

“*Oliver Phelps*, Esq. a man of extraordinary enterprise and extensive business, was for many years a resident of this town. He was the ‘maker of his own fortunes.’ He was a native of Windsor, but was bred in this town, and received a mercantile education. He engaged in business in Granville, Mass., and soon became a very enterprising, sagacious and successful trader. During the Revolutionary war, he was employed by the state of Massachusetts, in the commissary department. Whilst in this situation, his transactions were of a most extensive and responsible nature, and his own paper formed a kind of circulating medium. Afterwards he purchased a large estate, and returned to this town. In 1789, he, in connection with the Hon. Mr. Gorham, purchased of the commonwealth of Massachusetts, a tract of land in the western part of the state of New York, in what is commonly called the Genesee country, comprising 2,200,000 acres. This is probably the greatest land purchase, or speculation, ever made by two individuals in the United States. This is a very excellent tract of land, having a mild climate, a fertile soil, and an abundance of waters, and is now comprised in the extensive counties of Ontario and Steuben. In 1795, Oliver Phelps, together with William Hart and their associates, purchased of this state the tract of land in the state of Ohio, called the Western Reserve, comprising 3,300,000 acres. Some years after this, he removed to Canandaigua, situated within his Genesee purchase. In 1802, he was elected member of Congress from the western district of that state.”*

The following inscriptions are copied from monuments in the graveyard by the first Congregational church.

Post Tenebras spero Lucem Felicitatis.—*Titus Vespni.*

Hope is my Guard and guide thro’ this dark night,
To joys Celestial and Eternal Light.

Underneath this stone are reposed the remains of GIDEON GRANGER, Esq. who departed this life suddenly on the 30th Octor. A. D. 1800, in the 66th year of his age.

Mr. Granger inherited Originally from Nature, the Essentials of a strong and vigorous mind; a Liberal education in the circle of the arts and sciences, opened his Mental Faculties, and enlarged his understanding: he possessed a fertile Genius, a clear and sound Judgment, these Accomplishments qualified him to think, and reason as a Philosopher, and furnished him with Talents to discharge the duties of an active Citizen with wisdom and discretion, particularly in the department of the Law which he made his Professional study, which he practiced with reputation and success: He possessed a Generous, Humane, and Benevolent disposition of mind, and a tender sensibility of heart: he was the Friend of man. He was firmly attached to the Constitutional Liberty of his country, to social order and Government. His religion was remote from superstition and equally distant from enthusiasm; he rendered to his Maker the sincere and undissembled homage of his heart.

Tryphosa, the wife of Mr. Granger, lies interred by his side; she died July 21st, 1796; the following lines are inscribed on her monument.

“If virtuous deeds, and Love, and Charity,
Fit us, Great God, to die and dwell with thee;
If there’s a resurrection of the just
To realms of Peace and Joy, this sleeping dust
Shall one day, fixt in Fate, awake and rise;
Mount up, A Form celestial to the Skies,
Convoy’d by Angels, thro’ the airy road,
By Angels hail’d to that divine abode.”

* Pease and Niles’s Gazetteer.

WETHERSFIELD.

WETHERSFIELD was one of the first settled towns in Connecticut. It is claimed by some, to be the oldest settlement in the state, as a few men from Watertown in Massachusetts, came to Connecticut in 1634,* and erected a few huts at Pyquag, now Wethersfield, where they made out to subsist during the winter. The next year, 1635, Dr. Trumbull says, "the Watertown people *gradually* removed and prosecuted their settlement at Wethersfield." The probability is, that most of the Wethersfield settlers came round from Boston by water, and arrived *before* the Windsor and Hartford settlers, who came through the wilderness, and did not reach the Connecticut till about the 9th of November. This appears probable from the tradition which is still preserved, "that the *first white woman who ever set foot in Connecticut*, was a woman by the name of Barber;" the tradition is, that when the settlers arrived at the place where they were to land, some controversy arose who should first set foot on the shore. While the men were contending with each other for this privilege, a woman by the name of Barber, taking advantage of the contention, dextrously sprang forward, and reaching the shore, had the honor of first treading on the soil.

Wethersfield contains three parishes; Rocky Hill (3d society) on the south, Newington (2d society) on the northwest, and Wethersfield proper, on the northeast. The township is bounded n. by Hartford, w. by Berlin, s. by Middletown, and e. by Connecticut river, which separates it from Glastenbury. Extensive and fertile meadows border the Connecticut, and a broad and higher level tract, with light but rich soil, lies immediately west of the meadows. It is on this tract that the pleasant village of Wethersfield is built, four miles south of Hartford. Of the three principal streets two run from north to south, one of which is very broad and extensive; the other runs from southeast to northwest, along the bank of a large cove which sets up from the Connecticut to the north of the village. There are in the village three houses of public worship: 1 Congregational, 1 Baptist, 1 Methodist. There is a female seminary of some celebrity, established some years since, in the village.

It is said that Mr. Hooker's company first pitched near what is now called "the Folly;" the main channel of the river at that time, came round by the Cove. Here they found meadows, or lands, as they termed them, on both sides, but no mill stream; the main body then returned to the Little or Mill river in Hartford, and located themselves on both sides of that stream. The few settlers that remained near the "Folly" afterwards located themselves on Wolcott hill, about one mile westward of the main village in Wethersfield, and nearly in a range with Main street in Hartford, which is in fair view. Finding this place too far from the meadows, the most of the settlers removed to the eastward, to where the principal village is now built.

* Historians do not agree as to the time, some stating it to be 1634, others 1635. It is believed, however, that these men erected their huts in the fall of 1634.

REFERENCES.

A, tract of land over which the bed of the river has passed, now good meadow. B, a similar tract on the western side of the present channel of the river. c, Hockanum river. d, boundary line between Hartford and Wethersfield. e, landing. f, situation of an ancient fort. g, present Congregational church. h, boundary line between Glastenbury and East Hartford. n, old road to the ferry.

Connecticut river has altered its course very materially since the first settlement of Wethersfield. The diagram annexed shows the extent of the changes which have been made. The course of the river which is shaded, shows its course at the time when the first settlers arrived: the present channel is seen by the dotted lines. From the west bank of the cove to the farthest eastern bank of the old channel, is about two miles. The tract A contains a number of hundred acres of good land, over which the river has gradually passed to its present course, from the old channel seen in the diagram, which is now obliterated. The town of Wethersfield retaining its old bounds, it will be perceived that the tract A, although on the east side of the river, is within the bounds of Wethersfield. At Pratt's ferry the present channel crosses the old bed of the river, and the river is now constantly advancing eastward; and it will be perceived that the tract B is within the limits of Glastenbury, although on the west side of the Connecticut. The new made lands, which are formed as the water recedes, are at first too cold and sandy to sustain vegetation: in a short time, however, a growth of willows appears, which are succeeded by a growth of poplars; when these are cleared off the land will produce corn, and from this period it becomes valuable.

The changing of the bed of the river has been the occasion of much litigation respecting the title to the soil. Mr. Butler, who owned a

tract upon which the river was encroaching, found after a while some of his land appearing on the opposite side of the river, and accordingly laid claim to it. His claim was disputed, as he never owned land on *that side* of the river. It was a long time before this case was decided. There appeared some difficulty in making the jury who sat on the case understand the merits of the question. Mr. Ingersoll, a relative of the Ingersoll family in New Haven, was the counsel employed by Mr. Butler. He illustrated the case, by supposing that Mr. B. had built a castle on the land in question. Although the ground on which it stood might be overflowed, yet still it was his castle, and also the ground on which it stood, and he had a right to his property wherever he could find it. The case was finally decided in accordance with these views.—The ancient fort referred to by the letter *f*, stood at the south end of the garden belonging to Frederick Butler, Esq.; some of the foundation stones are still remaining. In April, 1637, a party of Pequots “waylaid the people at Wethersfield, as they were going into the fields to labor, and killed six men and three women. Two maids were taken captive. Besides this they killed twenty cows, and did other damage to the inhabitants.” The place where these two young women were taken captive was about 40 rods east of Mr. Butler’s house: one of the young women that were taken was of the name of Swain.—It will be perceived that a place on the diagram, on the Hartford road, is designated by the word “Folly.” A small stream here passes the road, which has washed down a considerable depth into the clayey soil. This is commonly called “*Wethersfield Folly*;” it is believed, however, the proper term would be “*Wethersfield Wisdom*.” It was occasioned by draining a large tract of land (now valuable, which extended up a considerable distance towards Hartford,) of water accumulated by the melting of snow and ice, and rains, which rendered it of little or no value.

This place has long been celebrated for the great quantities of onions which are raised here annually, and exported to various parts of the United States and the West Indies. The cultivation of this root requires but a small portion of land, and the labor is principally performed by females.

The State Prison of Connecticut was erected in this town in 1826, and the prisoners from Newgate Prison in Granby were removed here the next year. This building is situated on the south margin of the Cove, which sets back from Connecticut river, at the north end of Wethersfield village. The buildings of the prison form very nearly a quadrangle; on the south side of which stands the building which is more properly *the Prison*. The apartments of the warden are situated in the east end of this building; the center surrounds the block of cells, 4 stories high, in which the male prisoners are locked up. This hall or center, is 154 feet long, 43 feet wide, and 30 feet high; the number of cells or night rooms is 200. The west end is used as the female department, (superadded in 1830,) containing cells, rooms for labor, kitchen and apartments for the matron. The east, north, and west sides of this quadrangle, are formed by a wall 20 feet high. Within this yard are situated two ranges of shops; one on the east side, and one upon the

State Prison, at Wethersfield.

west, in which the convicts perform their daily labor. The passage into the prison is through the warden's apartment, into the guard room, thence into the hall surrounding the cells, thence into the yard. This is the only passage, except through a large gate on the north side of the yard.

Rocky Hill, (formerly *Stepney*,) the south parish of Wethersfield, lies on a collection of hills, which are a continuation of the Middletown range: one of these eminences, *Rocky Hill*, has given name to the parish. It has a pleasant little village, on an elevated situation, seven miles from Hartford, with a landing at some distance, where considerable commerce and ship building were formerly carried on.

Newington, the 2d society in Wethersfield, was formerly called *Cow plain*. The village is pleasantly situated in a fertile valley, west of Cedar mountain: the central part is 6 miles from Hartford, and 4 from Wethersfield village. The inhabitants (about 650 in number) are chiefly engaged in agriculture, and are distinguished for their general intelligence, and attachment to the institutions of morality and religion. There are two houses of public worship: 1 Congregational and 1 Methodist. Newington was settled about 140 years since, by five men from Wethersfield, three of whom were of the name of Andrews, who erected their house near the center of the place. The two others were of the names of Sled and Hunn. Sled built his house where the Academy now stands, and Hunn located himself in the north part of the place. One of the Andrews built his house a few rods south of the Congregational church. This house was used for some time as a fort, around which they built a high wall or fence to defend it from the Indians. Here they all lodged at night, with their guns in their hands. The Indians were very numerous, and lived principally around a pond in the center of the place, from which they obtained an abundance of fish. Here was a little city or village of wigwams. These Indians were ever friends to the whites; Sequin was their sachem: they were subject to the sachem at Middletown.—The Rev. Elisha Williams was ordained

the first minister in October, 1722, who removed in 1726, being chosen Rector of Yale College. He was succeeded by the Rev. Simon Backus, who died at Cape Breton in 1745, being a chaplain in the army in that expedition.—The following pleasant and unusual circumstance is said to have taken place in Newington, many years since. Mr. A—— of this place, who was a very religious and conscientious man, married for a wife one of the most ill natured and troublesome women which could be found in the vicinity. This occasioned universal surprise wherever he was known, and one of his neighbors ventured to ask him the reasons which governed his choice. Mr. A—— replied, that having had but little or no trouble in the world, he was fearful of becoming too much attached to things of time and sense. And he thought by experiencing some afflictions, he should become more weaned from the world, and that he married such a woman as he thought would accomplish the object. The best part of the story is, that the wife, hearing of the reasons why he married her, was much offended, and *out of revenge*, became one of the most pleasant and dutiful wives in the town, declaring that she was not going to be made a *pack horse*, to carry her husband to heaven.

Webb House, in Wethersfield.

The above is a view of the "Webb House," formerly so called. It is now occupied by Martin Welles, Esq. It is situated a few rods south of the Congregational church, in the central part of the village of Wethersfield, and is distinguished as the house where Gen. Washington made his quarters while in Wethersfield, during the council of general officers of the American and French armies. Within its walls, it is believed that the plan was matured, which resulted in the capture of Cornwallis at Yorktown, and the establishment of American independence.

The following account of the bloody tragedy of the murder of the Beadle family in this town, is annexed to a sermon preached by the

Rev. John Marsh in Wethersfield, Dec. 13th 1782, at the funeral of Mrs. Beadle and her children.

“A letter from a gentleman in Wethersfield to his friend, containing a narrative of the life of William Beadle, (so far as it is known,) and the particulars of the massacre of himself and Family.”

“*Sir,*—’Tis not strange that reports various and contradictory, should have circulated on so interesting and terrible a subject as that of a man’s consigning to the grave himself and family, in a moment of apparent ease and tranquillity. The agitation of mind which must be the consequence of being near such a scene of horror, will sufficiently apologize for not answering your request for the particulars ere this. Our ignorance of the history of this man, at first precluded a possibility of giving you satisfaction on this head. Perhaps no one in this town had more favorable opportunities of obtaining the particulars of his history; yet I could never induce him to mention a single syllable relating to his age, parentage, or early occupation. To have asked him directly would have been rude, when he evidently meant to be silent on these subjects. My conjecture was, that he was the natural son of some gentleman in England, and that he had been brought up in or near London, and had been about the court. Since his decease I have been able to learn from undoubted authority, that he was born in the county of Essex, in a village not very far from London. As to his business in youth, I am still left in the dark, but find he has once mentioned to a gentleman, some little incidents which happened to him while in company with his father, and that he very early became acquainted with a club in London, who were Deists, where ’tis probable he received the first rudiments in those principles. While in England, where he left a mother and sister, he had a fair character for integrity and honesty. In the year 1755, he went out to the island of Barbadoes, in the family of Charles Pinfold Esq. Governor of that Island, where he tarried six years, then returned to England, purchased some merchandize, and from thence came to New York in the year 1762, and immediately removed to Stratford in this State, from thence to Derby, and then to Fairfield, where he married and dwelt for some years. By this time, he had acquired about twelve hundred pounds property, with which he removed to this town, about ten years since, where he resided until his death. His business was that of retailing; he formerly credited his goods, but since his residence in this town he has refused to give any credit, intending to keep his property within his own reach, believing it always secure while his eye was upon it. While here he added considerable to his stock, none of which he ever vested in real estate: the Continental currency taught him that wealth could take to itself wings and fly away: notwithstanding all his vigilance.

“When the war commenced, he had on hand a very handsome assortment of goods for a country store, which he sold for the currency of the country, without any advance in the price; the money he laid by, waiting and expecting the time would soon arrive when he might therewith replace his goods, resolving not to part with it until it should be in as good demand as when received by him. His expectations from this quarter daily lessening, finally lost all hope, and was thrown into a state little better than despair, as appears from his writing; he adopted a plan of the most rigid family economy, but still kept up the outward appearance of his former affluence, and ever to the last entertained his friend with his usual decent hospitality although nothing appeared in his outward deportment, which evinced the uncommon pride of his heart; his writings shew clearly that he was determined not to bear the mortification of being thought by his friends poor and dependent. On this subject he expresses himself in the following extraordinary manner: ‘If a man, who has once lived well, meant well and done well, falls by unavoidable accident into poverty, and then submits to be laughed at, despised and trampled on, by a set of mean wretches as far below him as the moon is below the sun; I say if such a man submits, he must become meaner than meanness itself, and I sincerely wish he might have ten years added to his natural life to punish him for his folly.’”

“He fixed upon the night succeeding the 18th of November for the execution of his nefarious purpose, and procured a supper of oysters, of which the family eat very plentifully; that evening he writes as follows: ‘I have prepared a noble supper of oysters, that my flock and I may eat and drink together, thank God and die.’ After supper he sent the maid with a studied errand to a friend’s house at some distance, directing her to stay until she obtained an answer to an insignificant letter he wrote his friend, intending she should not return that evening—she did however return, perhaps her return disconcerted him and prevented him for that time. The next day he carried his pistols to a smith for repair; it may be, the ill condition of his pistols might be an additional reason for the delay.

“On the evening of the 10th of December some persons were with him at his house to whom he appeared as cheerful and serene as usual; he attended to the little affairs

of his family as if nothing uncommon was in contemplation. The company left him about nine o'clock in the evening, when he was urgent as usual for their stay; whether he slept that night is uncertain, but it is believed he went to bed. The children and maid slept in one chamber; in the gray of the morning of the 11th of December he went to their bed chamber, awaked the maid and ordered her to rise gently, without disturbing the children when she came down stairs, he gave her a line to the family physician who lived at the distance of a quarter of a mile, ordered her to carry it immediately, at the same time declaring that Mrs. Beadle had been ill all night, and directing her to stay until the physician should come with her; this he repeated sundry times with a degree of ardor. There is much reason to believe he had murdered Mrs. Beadle before he awaked the maid. Upon the maid's leaving the house he immediately proceeded to execute his purpose on the children and himself. It appears he had for some time before, carried to the bedside every night an ax and a carving knife; he smote his wife and each of the children with the ax on the side of the head as they lay sleeping in their beds; the woman had two wounds in the head, the skull of each of them was fractured; he then with the carving knife cut their throats from ear to ear; the woman and little boy were drawn partly over the side of their beds, as if to prevent the bedding from being besmeared with blood; the three daughters were taken from the bed and laid upon the floor side by side, like three lambs, before their throats were cut; they were covered with a blanket, and the woman's face with a handkerchief. He then proceeded to the lower floor of the house, leaving marks of his footsteps in blood on the stairs, carrying with him the ax and knife, the latter he laid upon the table in the room where he was found, reeking with the blood of his family. Perhaps he had thoughts he might use it against himself if his pistols should fail; it appears he then seated himself in a Windsor chair, with his arms supported by the arms of the chair; he fixed the muzzles of the pistols into his two ears and fired them at the same instant; the balls went through the head in transverse directions. Although the neighbors were very near and some of them awake, none heard the report of the pistols. The capital facts of the massacre you have seen in the public papers; a minute detail was too horrible to be given at first, until the mind (especially of the relatives of the unhappy woman) had been prepared for it by a summary narrative, and even now 'tis enough to give feelings to apathy itself to relate the horrid tale.

"The line to the physician obscurely announced the intentions of the man; the house was soon opened, but alas, too late! The bodies were pale and motionless, swimming in their blood, their faces white as mountain snow, yet life seemed to tremble on their lips; description can do no more than faintly ape and trifle with the real figure.

"Such a tragical scene filled every mind with the deepest distress; nature recoiled and was on the rack with distorting passions; the most poignant sorrow and tender pity for the lady and her innocent babes, who were the hapless victims of the brutal studied cruelty of an husband and father, in whose embraces they expected to find security, melted every heart. Shocking effects of pride and false notions about religion!

"To paint the first transports this affecting scene produced, when the house was opened is beyond my reach.—Multitudes of all ages and sexes were drawn together by the sad tale.—The very inmost souls of the beholders were wounded at the sight, and torn by contending passions: Silent grief, with marks of astonishment were succeeded by furious indignation against the author of the affecting spectacle, which vented itself in incoherent exclamations. Some old soldiers accidentally passing thro' the town that morning, on their way from camp to visit their friends, led by curiosity turned in, to view the sad remains; on sight of the woman and her tender offspring, notwithstanding all their firmness, the tender sympathetic tear stealing gently down their furrowed cheeks, betrayed the anguish of their hearts; on being shewed the body of the sacrificer they paused a moment, then muttering forth an oath or two of execration, with their eyes fixed on the ground in silent sorrow, they slowly went their way. So awful and terrible a disaster, wrought wonderfully on the minds of the neighborhood; nature itself seemed ruffled, and refused the kindly aid of balmy sleep for a time.

"Near the close of the day on the 12th of December, the bodies being still unburied, the people who had collected in great numbers, grew almost frantic with rage, and in a manner demanded the body of the murderer; the law being silent on the subject, it was difficult to determine where decency required the body should be placed, many proposed it should be in an ignominious manner where four roads met, without any coffin or insignia of respect, and perforated by a stake. Upon which a question arose, where that place could be found which might be unexceptionable to the neighborhood—but no one would consent it should be near his house or land. After some consultation it was thought best to place it on the bank of the river between high and low water mark; the body was handed out of the window and bound with cords on a sled, with the clothes on as it was found, and the bloody knife tied on his breast, without coffin or box, and the horse he usually rode was made fast to the sled—the horse, unaccustomed

to the draught, proceeded with great unsteadiness, sometimes running full speed, then stopping, followed by a multitude, until arriving at the water's edge, the body was tumbled into a hole dug for the purpose, like the carcase of a beast. Not many days after there appeared an uneasiness in sundry persons at placing the body so near a ferry much frequented; some threatenings were given out that the body should be taken up and a second time exposed to view. It was thought prudent it should be removed, and secretly deposited in some obscure spot; it was accordingly removed with the utmost secrecy; notwithstanding which some children accidentally discovered the place, and the early freshets partly washed up the body, and it has had a second remove to a place where it is hoped mankind will have no further vexation with it.

"On the 13th of December the bodies of the murdered were interred in a manner much unlike that of the unnatural murderer. The remains of the children were borne by a suitable number of equal age, attended by a sad procession of youths of the town, all bathed in tears; side by side the hapless woman's corpse was carried in solemn procession to the parish church yard, followed by a great concourse, who with affectionate concern and every token of respect were anxious to express their heartfelt sorrow in performing the last mournful duties.

"The person of Mr. Beadle was small, his features striking and full of expression, with the aspect of fierceness and determination; his mind was contemplative, when once he had formed an opinion, was remarkably tenacious; as a merchant or trader, he was esteemed a man of strict honor and integrity, and would not descend to any low or mean artifice to advance his fortune. He was turned of 52 years of age when he died.

"Mrs. Beadle was born at Plymouth, in Massachusetts, of reputable parents—a comely person, of good address, well bred, and unusually serene, sincere, unaffected and sensible; died in the middle of life, aged 32 years.

"The children, (the eldest of which was a son, aged 12 years, the other three, daughters, the youngest aged 6 years,) were such as cheered the hearts of their parents, who were uncommonly fond of displaying their little virtues and excellencies, and seemed to anticipate a continuance of growing parental satisfaction; alas, like early tender buds nipped by untimely frosts, they did but begin to live!

"It is more than probable, that this man had for months past desired that some or all of his children might be taken out of the world by accident; he removed all means of security from a well near his house, which he was careful heretofore to keep covered. His little boy he often sent to swim in the river, and has been heard to chide the child for not venturing further into deep water than his fears would suffer him. He has at times declared it would give him no pain or uneasiness to follow his children to the grave: his acquaintance knew these expressions could not arise from want of affection or tenderness for his children, but rather imagined him speaking rashly in jest. He ever spoke lightly of death as a bugbear the world causelessly feared. It appears from his writings, he at first had doubts whether it was just and reasonable for him to deprive his wife of life, and offers against it only this reason, that he had no hand in bringing her into existence, and consequently had no power over her life. She set out the 7th of November on a journey to Fairfield, which he thought was by direction of Heaven to clear him of his doubts and remove her out of the way, at the time the business was to be done; and his intention was to have executed his design on himself and children in her absence. She proceeded no further than New Haven, and by reason of some disappointment, returned ten days earlier than expected; he appeared chagrined at her early return, and soon began to invent some justifying reasons for depriving her of life also. He finally concludes it would be unmerciful to leave her behind to languish out a life in misery and wretchedness, which must be the consequence of the surprising death of the rest of the family, and that since they had shared the frowns and smiles of fortune together, it would be cruelty to her, to be divided from them in death.

"'Tis very natural for you to ask, whether it was possible a man could be transformed from an affectionate husband and an indulgent parent to a secret murderer, without some previous alteration, which must have been noticed by the family or acquaintance. Yet this was the case in this instance: there was no visible alteration in his conduct. It appears by his writings that he thought he had a right to deprive himself of life, and intended to exercise that right if ever he should think himself unfortunate: the extension of this right to his children was very easy. 'Tis probable, the principle had grown up gradually to the last stage. Since his death I have seen a letter he wrote to a friend as early as 1777, in which he has an expression like this—'I believe I and my family shall not live to see the end of the war.' It was then understood to mean nothing more than his expectation that the war would continue a long time: his late conduct has explained it very differently. Whether Mrs. Beadle had any fears of his evil intentions or not, is uncertain: that she had fears some great calamity would befall the family is evident, both from what she said, and what he has left in writing. He writes on the 18th of November, that on the morning of the 17th she

told him, 'She dreamed he had wrote many papers, and was earnestly concerned for her, and that those papers were spotted with blood; and that she also saw a man wound himself past recovery, and blood guggle, (as she expressed it,) from different parts of his body.' In another letter, of a later date, he writes as follows, viz. 'I mentioned before that my wife had a dream concerning this affair; she has since had two more, one of them, that she was suddenly seized and liable to great punishment; that it created great confusion, but she afterwards got free and was happy: from her excellence of heart, I have no doubt but this will be the case with her. On the thanksgiving night she dreamed that her three daughters all lay dead, and that they even froze in that situation; and even yet I am little affected.'

"The afternoon before this terrible execution, Mrs. Beadle walked abroad to visit an acquaintance, and it was observed by the lady she was uncommonly pensive; she asked the reason. Mrs. Beadle with much concern told her, 'She had for months been troubled with frightful and uncommon dreams, and that very morning she dreamed violence had been offered her family, and her children destroyed; she said those dreams wrought on her mind to a very great degree; to divert her thoughts from them she had walked abroad that afternoon; and that she verily believed Providence had judgments in store for their family, which he was about to inflict on them by some sweeping sickness, or in some other awful manner.' Mr. Beadle, who, as appears by his writings, was alone privy to his malevolent intentions, put a very different construction upon her dreams. He doubtless considered them as premonitions from Heaven, and convincing proof to him that his purpose was right, of which he says he had sundry intimations he really thought from God himself, which he does not describe.

"From whence those dreams originated, it is impossible to determine; whether the weapons he carried to his bedside gave her uneasiness, and excited a jealousy in her mind of his intentions, or whether any of his conduct which fell under her observation might be alarming to her, which might trouble her sleep, no one can tell. She has lately mentioned sundry dreams of a similar nature, which she had near six months since. Some great and good characters have thought such intimations were at times given from on high, to convince mankind of the reality of the invisible world—to hazard such a conjecture in these modern days would perhaps be thought by the learned world a great mark of fanaticism—every man must think for himself, no one can pronounce with satisfactory certainty with respect to the origin and cause of such thoughts in sleep, which so nearly correspond with the true state of facts. Her last dream penned by him was nearly literally verified. Although the weather was serene and pleasant on the 10th and near full moon, neither the sun or moon were visible from the time this horrid deed was done, until the body of this man was laid beneath the clods, which redoubled the horror: when suddenly the wind blew from the northwest, dispelled the vapors and discovered a cloudless sky. The air grew cold, and the faces of the other five being opened to view in their coffins, in front of the meeting house, the concourse was so great that much time was spent to give opportunity for all to take a view; the cold still increasing, the bodies in all probability were stiffened with frost.

"Mr. Beadle left sundry letters directed to his acquaintance, and one labored treatise in justification of his conduct; they contain many inconsistencies. He professes himself a Deist, but reprobates Atheism. While in life and prosperity, he claimed to be a Christian, and offered two of his children in baptism. Much has been said in favor of publishing his writings by those who have not seen them; those who have perused them doubt the propriety of such a measure; not because his reasonings against revelation were in any degree unanswerable, but lest they might have some effect on weak and melancholy minds. He attempts to attack all rulers in Church and State, treats the Christian religion with a great degree of bitterness and bigotry; and yet absurdly concludes by saying, 'if it is true he shall be saved by it.' He is very unsettled, wavering and inconsistent in his own beloved system of Deism. He flatters his pride by believing that it was the height of heroism to dare to die by his own hands, and that the Deity would not willingly punish one, who was impatient to visit his God and learn his will from his own mouth, face to face, in some future world or worlds, (which he thinks may be many,) and seems to think there is as great probability of succeeding advantageously, in removing from one world to another as from one country or calling to another; and seeing all men must be lugged off at last, (as he expresses it,) he was determined to make the experiment voluntarily which all must do through necessity. As he was much out of temper with the world, he was unwilling any of his family should stay behind to encounter its troubles, and since 'tis a father's duty to provide for his flock, he chose to consign them over to better hands.

"'Tis doubtful whether any history of modern times can afford an instance of similar barbarity, even in the extreme distress of war. The ancients encouraged by numbers and example, did in hours of despair destroy themselves and families, to avoid the shame of becoming captives to be led in triumph, and the cruelty commonly exercised in those barbarous ages.

"Your very humble Servant."

Extracts from the Wethersfield ancient town records.

Feb. 1652. The townsmen have hired HvgH Wells to beat the Drvm for one whole yeare from the 25th of Aprill from that time twelve month every night and morning for the setting of the watch and the off the watch in the morning, and for to beate it every Lords day the Lectvre daies and for all other occasions of the townsmen shall stand in need for and for the townsmen have promised to pay him fover pouds.

It was voted that the bell should be rvng noe more to call the Assembly together on the Sabbath, and Lectvre days, bvt that the drvm should henceforth be beaten at svch times. . . . 26th day 1660.

Jvne 12th, 1663. At a town meeting at Wethersfield about a minister, it was voted whether the towne would hire Mr. Cotton for another yeare, and those that were of that mind should hold vp their hands, and those that are of the contrary mind hold vp your hands, and there was no hands holden vp to the contrary.

April the 2d, (1665-6.) The townsmen agreed with Sargeant John Killbvrne, to bvrne the woods belonging to the south end of the towne, (viz. the woods betwene vs and Middletowne) at svch a time or times as may be most convenient for the advantage of the towne, and they are to allow him for his paines, in this work : six shillings. At this time, they also agreed with Enoch Bvck to bvrne the woods belonging to the other end of the towne, &c. . . .

July 3d, 1676. At the same meeting Mr. Samll. Talcoat, Lev. Jon. Chester, Ensigne Goodridge, Sarget. Kilbvrne and Sarget. Deming, together with the townsmen in being, were impowered to order the sitting of all persons in seats and places in the meeting hovse.

Oct. 16. It was voted and agreed by the inhabitants of this towne, that the towne shal allow 12s. to every person that shal kill a wolfe in the bovnds of this towne, wh. together with, 8s. . . . the covnty will be 20s.

At a towne meeting Lawfvly assembled in Wethersfield on the 6th day of Jvly, Anno Domini 1710;—At this meeting Sergt. Nathll. Stadart and Jabez Whittlesey, were chosen to take the oversight of the yovth that sit in the lower part of the meeting hovse, viz. all the yovth that sit below, and James Bvtler ehosen to have the oversight of the yovth that sit in the galleries, these persons to have the care and oversight of ym. for one year or more, to endeavour the keeping of ym. in dve order, and that they take especial care that said yovth sanctifie the Sabbath and that they make no distrvbence in the time of pvblic worship.

March 12th, 1706-7. 3 Also yt ye Committee to seat persons in ye meeting should be chosen by papers and yt 7 of ye highest in nvmer should be sd. Committee. The 7 highest in nvmer, were Deac. Belding, Deac. Talcott, Capt. Robins, Sergt. Samuel Wright, Mr. James Treat, Lievt. Benjamin Chvrchil, Mr. Edward Bvckley: also voted that ye said committee should have ye following Instrvtions, or grounds of advancement, viz. Dignity of Descent: Place of pvblic Trvst; Piovs disposition and behaviovr: Estate: Pecvliar serviceableness in any kind.

December the 8th, 1665. At a town meeting at Wethersfield, it was voted and agreed, that Josiah Willard, should teach school for the ensving yeare, and that for his encouragement therein, the town do engage to allow him six pouds besides what will come in, in particvlar by the Scholars, and he to begin the work the 18th of this instant.

Fvrther it was voted and agreed, that William Morris should look after the boys, on the Sabbath day, to keep them from playing, and for encouragement, the towne to allow him ten shillings, fvrther he is to give an accovnt of the names of the yovng men, that are disorderly.

Dec. 13th, A. D. 1714. It is also voated at this meeting, that all those who will kill *old* blackbirds shall have one penny pr. head as formerly, and that they are to bring them to ye select men that they may take accovnt of ym.

Dec. 26th, 1698. The minister's (Mr. Mix,) Rate to be paid in Corne at the prices following : viz. the best sort of upland winter wheat being clean from all trash : at five shillings pr. bvshll. wheat of a meaner sort, at fover shillings pr. bvsh. Rye at three shillings pr. bvshll. Indian Corne at two and sixpence per bvshll.

The following inscriptions are upon monuments in the yard by the first Congregational Church.

HERE LYES THE BODY OF LEONARD CHESTER, ARMIGER,* LATE OF THE TOWN OF BLA-BY, AND SEVERALL OTHER LORDSHIPS IN LEICESTERSHIRE, DECEASED IN WETHERSPEILD, ANNO DOMINI 1648. ETATIS 39.

The above is copied from one of the oldest monuments in the State. The tradition is, that Mr. Chester, who was one of the first settlers of Wethersfield, having some business to perform in the south part of the town, which was then a wilderness, became lost in the woods. Being missed, his neighbors went in search of him, making noises in the woods, and uttering *lamentations*. After a lapse of several days, his neighbors had the good fortune to meet with him on a mountain in Berlin, which has ever since been called Mount Lamentation. The device which appears at the head of the inscription on his monument, has been the subject of much speculation. By some it has been believed to be a representation of some demon in the form of a fiery flying serpent, which according to the legend of the times, appeared to Mr. Chester while in the wilderness. Upon examination, however, it appears to have been nothing more than a rude attempt to engrave the family coat of arms.

The Beadle family are buried in the northeastern part of the yard. The following inscription, said to have been written by the Hon. John Davis of Boston, is upon a slab of sandstone, lying horizontally, being raised about three feet from the ground by brick work underneath.

Here lie interred, MRS. LYDIA BEADLE, aged 32 years. Ansell, Lothrop, Elizabeth, Lydia and Mary Beadle, her children. The eldest aged 11 years, the youngest 6 years. Who on the morning of the 11th of Dec. A. D. 1782, fell by the hands of *William*

* This is a Latin word, equivalent to Esquire.

Beadle, an infuriated man, who closed the horrid sacrifice of his wife and children with his own destruction.

Pale round their grassy tombs bedew'd with tears,
 Flit the thin forms of sorrows and of fears;
 Soft sighs responsive swell to plaintive chords,
 And *Indignations* half unsheath their swords.

In memory of Capt. Gideon Welles, of Wethersfield. A person of an engaging deportment,—his genius naturally good, was cultivated by reading and intercourse with mankind; he had a happy facility in the dispatch of business—punctual and faithful in all his dealings—was exemplary in every social, civil and religious duty—a blessing to mankind. He rests not here, but in returning from the West Indies, he suddenly sickened and died, Feb. 11th, A. D. 1795, aged 39 years.

The bosom of devouring seas, entombs my mould'ring dust,
 There life and all my active powers, are in a moment lost.
 In kind remembrance of my love, my friends will not refuse to weep—
 My hand would once have dry'd your tears—but now lies buried in the deep.
 Yet weep in hope, my bones are safe wrapt in the unchain'd decree,
 The trump that wakes the dead on earth, shall call me from the sea.

This stone, erected by the State, is in memory of Ezra Hoskins, aged 66, whose remains lie beneath it. In an insurrection of convicts, he was inhumanly killed on the night following the 30th of April, 1833, at midnight on duty as a patrol, in the State Prison. He ended an useful and inoffensive life, by a most tragical death.

WINDSOR.

WINDSOR was the first town in Connecticut in which any English settlement was made. This was in 1633, when William Holmes and others erected a house at the mouth of Farmington river. The town, which originally comprised an extensive tract, is now bounded n. by Suffield, w. by Bloomfield, Simsbury and Granby, s. by Bloomfield and Hartford, and e. by Connecticut river. It is $8\frac{1}{2}$ miles in length from north to south; at the north part the town is 6 miles in breadth, at the south part 3 miles. Farmington river, the largest tributary stream of the Connecticut, passes through the central part of the town. Windsor is generally of a level surface, having some extensive tracts of plains, and the other parts are of an undulating character. The soil is various, but generally fertile, and free from stone. There are two societies, Windsor proper, and Poquannoc. There are three houses for worship, 2 for Congregationalists, and 1 for Methodists. In the town there are 4 paper mills, 1 Kentucky jean factory, 2 for cotton batting, 1 wire and 1 satinet factory. Ship plank is manufactured at a village of about 20 houses, at the Windsor Locks, where the canal commences which runs by Enfield falls. This place, called Pine Meadow, is opposite Warehouse Point in East Windsor. Almost all the inhabitants in the first society live on a single street, which runs parallel with the river. The present number of inhabitants is believed to be about 1,900.

South view of the Congregational Church, Windsor.

The above is a south view of the Congregational church, and the bridge, upon Mr. Town's plan, which crosses the Farmington river at this place. A pleasant grove stands upon the south bank of the river; a few of the trees are seen in the engraving. The north bank, on which the church stands, is considerably elevated. In time of freshet, vessels of considerable size can come up as far as the bridge.

One of the first ships which came over to New England in 1630, brought over the Rev. Mr. John Wareham, Mr. John Maverick, Mr. Rossiter, Mr. Ludlow, Mr. Henry Wolcott, and others of Mr. Wareham's church and congregation, who first settled the town of Windsor. This was considered an honorable company. Mr. Rossiter and Mr. Ludlow were magistrates; Mr. Wolcott had a great estate, and was a man of superior abilities. Mr. Wareham had been a celebrated minister in Exeter, the capital of the county of Devonshire. The people who came with him were from the counties of Devonshire, Dorsetshire and Somersetshire.

This company sailed from Plymouth, and arrived at Nantasket on the 30th of May. The next day the master of the ship left them and their goods on Nantasket point, to shift for themselves. By the assistance of the old planters, they proceeded up Charles river to Watertown, but as they had many cattle, and finding a neck of land at Mattapan, where there were good accommodations for them, they soon removed there, and began a settlement, which they named Dorchester.

In 1631, Wahquimaicut, an Indian sachem, living near Connecticut river, made a journey to Plymouth and Boston, and earnestly entreated the governors of each of the colonies to send men to make settlements on the river. He represented the fruitfulness of the country, and promised the English, that if they would make a settlement, he would annually supply them with corn, and give them eighty beaver skins.

The governor of Massachusetts, although he treated the sachem and his company with generosity, paid no attention to his proposals. Mr. Winslow, the governor of Plymouth, judged it worthy of attention. It seems that soon after that, he went into Connecticut, and discovered the river and the adjacent parts. It appeared that the earnestness with which the sachem solicited the English to make settlements on the river, originated from the distressed state of the river Indians. Pekoath, the great sachem of the Pequots, was at war with them and driving them from the country, and they imagined that if the English made settlements on the river, they would assist them in defending themselves against their too powerful enemies.

Governor Winslow being pleased with the appearance of the country, the Plymouth people made preparations for erecting a trading house, and establishing a small company upon the river. In 1633, William Holmes, with his associates, having prepared the frame of a house, with boards and materials for covering it immediately, put them on board of a vessel and sailed for Connecticut. Holmes landed and erected his house a little below the mouth of the Little or Farmington river, in Windsor. The house was covered with the utmost dispatch, and fortified with palisadoes. The sachems who were the original owners of the soil having been driven away by the Pequots were brought back by Holmes' vessel. The Plymouth people purchased of them the land on which they erected their house. This, Governor Wolcott says, was the first house erected in Connecticut.* The Dutch about the same time built their trading house at Hartford.

In June, 1634, the Dutch sent Jacob Van Curter to purchase lands on the Connecticut. He made a purchase of about twenty acres at Hartford, of Nepuquash, a Pequot captain, on the 25th of October. Curter protested against Holmes, the builder of the Plymouth house. Some time afterwards, the Dutch governor, Van Twiller, of Fort Amsterdam, sent a reinforcement to Connecticut, in order to drive Holmes from the river. A party of seventy men under arms, with banners displayed, assaulted the Plymouth house, but they found it so well fortified, and the men who kept it so vigilant and determined, that it could not be taken without bloodshed. They therefore came to a parley, and finally returned in peace.

A number of Mr. Wareham's people came, in the summer of 1635, to Connecticut, and made preparations to bring their families and make a permanent settlement. After having made such preparations as they judged necessary, they began to remove their families and property. "On the 15th of October, about sixty men, women and children, with their horses, cattle and swine, commenced their journey from Massa-

* This house stood about two miles southeast of the first Congregational church, on the river bank, about twenty rods from a point of land extending down the river, near the western shore. It was at this place that the Farmington or Windsor river entered the Connecticut. The mouth of the river is now about sixty rods above. This was changed by Governor Wolcott's cutting a channel for a ferry-boat across the point of land mentioned above. This channel has become so much enlarged that it is now the main channel of the river. The meadow lying in the vicinity of where this house stood, is to this day called the *Plymouth Meadow*.

chusetts, through the wilderness, to Connecticut river. After a tedious and difficult journey, through swamps and rivers, over mountains and rough grounds, which were passed with great difficulty and fatigue, they arrived safely at the places of their respective destination. They were so long on their journey, and so much time and pains were spent in passing the river, and in getting over their cattle, that after all their exertions, winter came upon them before they were prepared."

By the 15th of November, Connecticut river was frozen over, and the snow was so deep, and the weather so tempestuous, that a considerable number of the cattle could not be brought across the river. The severity of the season was such, and so little time to prepare their huts and shelters for their cattle, that the sufferings of man and beast were extreme. They had shipped their household furniture, and most of their provisions at Boston, but by reason of delays, and the tempestuousness of the season, were either cast away or did not arrive in season.

About the beginning of December, provisions generally failed in the settlements on the river, and famine and death looked the inhabitants in the face. In their distress, some of them in this severe season attempted to go through the wilderness, to the nearest settlement in Massachusetts. A company of thirteen, who made the attempt, lost one of their number, who, in passing a river, fell through the ice and was drowned. The other twelve were ten days on their journey, and had they not received assistance from the Indians, would all have perished. Such was the general distress by the 3d and 4th of December, that a considerable part of the settlers were obliged to leave their habitations. Seventy persons, men, women and children, were obliged in the severity of winter, to go down to the mouth of the river to meet their provisions, as the only expedient to preserve their lives. Not meeting the vessels which they expected, they all went on board of the Rebecca, a vessel of about 60 tons. This vessel, two days before, was frozen in, twenty miles up the river; but by the falling of a small rain, and the influence of the tide, the ice became so broken, that she made a shift to get out. She however ran upon the bar, and the people were forced to unlade her to get her off. She was reladed, and in five days reached Boston. Had it not been for these providential circumstances, the people must have perished from famine.

The people who remained and kept their stations on the river, suffered in an extreme degree. After all the help they were able to obtain, by hunting and from the Indians, they were obliged to subsist on acorns, malt and grains. The cattle, which could not be got over the river before winter, lived by browsing in the woods and meadows. They wintered as well, or better, than those that were brought over, and for which all the provision was made, and care taken, of which the settlers were capable. A great number of the cattle, however, perished. The Dorchester or Windsor people lost, in this species of property, about two hundred pounds sterling. Upon the breaking up of winter, and during the summer following, the settlers came in large companies, and the settlements at Windsor, Hartford and Wethersfield were firmly established.

The original boundaries of the town of Windsor were very extensive, being about forty six miles in circumference, lying on both sides of Connecticut river. Within the limits of the town, there were ten distinct tribes or sovereignties. About the year 1670, it was estimated that there were in the town nineteen Indians to one Englishman. They had a large fort, a little north of the plat on which the first meeting house was erected ; but, in the language of Ossian,

“The chiefs of other times are departed. They have gone without their fame.” Another race has arisen. “The people are like the waves of the ocean: like the leaves of woody Morven, they pass away in the rustling blast, and other leaves lift their green heads on high.”

“For several years after the settlement of Windsor, the people were harassed with wars. Such was the fear which agitated the minds of the inhabitants, that they repaired to a fortress nights, and slept with their arms by their side, and used to go to labor in the fields in companies, prepared for battle. It was the common practice on the Lord’s day to go to meeting armed.”

The following is a list of the names of the settlers of Windsor, which appear on the records of the town in 1640.

Henry Wolcott, Esq.	George Phelps,	John Taylor,	John Hillyer,
William Phelps,	Thomas Ford,	Eltwed Pomeroy,	Thomas Barber,
John Whitefield,	Edward Griswold,	William Hosford,	Nicolas Palmer,
Humphrey Pinney,	John Bissell,	Aaron Cook,	Thomas Buckland,
Deacon John Moore,	Thomas Holcomb,	Elias Parkman,	Isaac Shelden,
Deac. Wm. Gaylord,	Daniel Clark,	Thomas Stoughton,	Robert Watson,
Lieut. Walter Filer,	Peter Tilton,	Owen Tudor,	Stephen Terry,
Matthew Grant,	Messrs.—Newberry,	Capt. John Mason,	Bray Rosseter,
Thomas Dibble,	Roger Ludlow, Esq.	Matthew Allen,	Thomas Dewey,
Samuel Phelps,	Joseph Loomis,	Richard Oldage,	William Hurlburt,
Nathan Gillet,	John Loomis,	Henry Stiles,	Roger Williams,
Richard Vore,	John Porter,	William Hayden,	Thomas Bascomb,
Abraham Randall,	William Hill,	George Philips,	Nicolas Denslow,
Bigot Eglestone,	James Marshall,	Return Strong,	Thomas Thornton.

The Rev. John Wareham, the first minister at Windsor, died April 1st, 1670. “He was about forty years minister in New England ; 6 at Dorchester, and 34 at Windsor. He was distinguished for his piety, and the strictest morals ; yet at times was subject to great gloominess and religious melancholy. Such were his doubts and fears, at some times, that when he administered the Lord’s supper to his brethren, he did not participate with them, fearing that the seals of the covenant did not belong to him. It is said that he was the first minister in New England who used notes in preaching, yet he was applauded by his hearers, as one of the most animated and energetic preachers of his day. He was considered as one of the principal fathers and pillars of the church of Connecticut.”—In 1639, the Rev. Ephraim Huit was installed as *Teacher* to the church at Windsor, over which Mr. Wareham was pastor. At this period, it was the opinion of the principal divines in New England, that in every church completely organized, there should be a pastor, teacher, ruling elder, and deacons. It was the general opin-

ion, that the pastor's work consisted principally in exhortation ; but the teacher's business was to teach, explain and defend the doctrines of Christianity.

Roger Wolcott, governor of Connecticut, was born in this town, January 4th, 1679. "His parents lived in a part of the country which suffered much from the Indians, and in the town there was neither a schoolmaster nor minister, so that Mr. Wolcott was not a member of a common school for a single day in his life. When he was twelve years of age, he was bound as an apprentice to a mechanic. At the age of twenty one, when the laws permitted him to enjoy the fruits of his labors, he established himself on the east side of Connecticut river, in the same town in which he was born, where, by the blessings of God upon his industry and frugality, he acquired what was considered as a plentiful fortune. He is an eminent proof of the power of talents and integrity, in a free country, in raising one to distinction, notwithstanding the disadvantages of education and of birth. He rose by degrees to the highest military and civil honors. In the expedition against Canada, in 1711, he was commissary of the Connecticut forces, and at the capture of Louisbourg, in 1745, he bore the commission of major general. He was successively a member of the assembly and of the council, judge of the county court, deputy governor, chief judge of the superior court, and from 1751 to 1754, governor. He died May 17th, 1767, in the eighty ninth year of his age. In all his exaltation above his neighbors, he exhibited no haughtiness of deportment, but was easy of access, free and affable, of ready wit and great humor. His literary attainments were such, that in conversation with the learned upon most subjects he secured respect. He was much attached to the peculiar doctrines of the gospel, and was for many years a member of a Christian church. From the year 1754, when his life was more retired, he devoted himself particularly to reading, meditation and prayer. He was very careful in searching into himself, that he might perceive his own character, and know whether he was rescued from that depravity, to which previously to the renewing agency of the divine Spirit the human mind is subjected, and whether he was interested in the salvation of the gospel. In his last moments he was supported by the hopes of the Christian, and he entered into his rest. He published poetical meditations, with a preface by Mr. Bulkley of Colchester, in 1725 ; and a letter to Mr. Hobart in 1761, entitled the new English Congregational churches are and always have been consociated churches, and their liberties greater and better founded in their platform, agreed upon at Cambridge in 1648, than in the agreement at Saybrook in 1708. A long poem, written by Governor Wolcott, entitled, A brief Account of the Agency of John Winthrop in the Court of Charles II. in 1662, in procuring the Charter of Connecticut, is preserved in the Collections of the Historical Society. It describes with considerable minuteness the Pequot war."*

* Allen's American Biographical and Historical Dictionary.

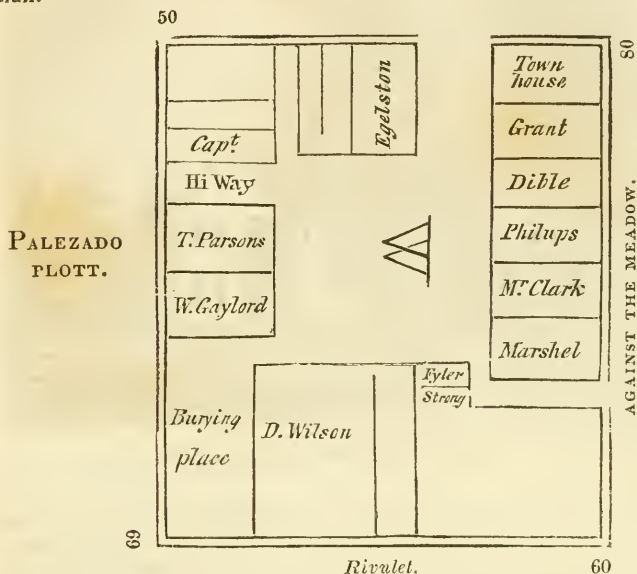

S. W. view of Judge Ellsworth's House, Windsor.

The above is a southwestern view of Judge Ellsworth's house, near the spot where he was born, about a mile north of the Congregational church. The elms appearing in front of the house were set out by his hand. An ancient cedar, about seven feet in girth, which was standing in the forest at the time Windsor was first settled, is still standing a few feet north of the house.

"*Oliver Ellsworth*, LL. D., Chief Justice of the United States, was born 29th of April, 1745, and was graduated at New Jersey college in 1766. Devoting himself to the practice of law, he soon rose by the extraordinary energy of his mind and force of his eloquence, to distinguished eminence. In 1777 he was elected a delegate to the continental congress, and in 1784 appointed a judge of the superior court of Connecticut. He held a seat in the convention which formed the constitution of the United States, and was one of the most conspicuous and useful in that assembly, illustrious for learning, talents, and patriotism. On the organization of the federal government in 1789, he was elected a member of the senate, and continued in the office till he was appointed in 1796, chief judge of the supreme court of the United States. After discharging the duties of that station with great credit to his legal science, integrity, and eloquence, for near four years, he was appointed, towards the close of 1799, envoy extraordinary to France. The decline of his health disqualifying him for the duties of his office as judge, he resigned it toward the end of the year 1800. After his return to Connecticut, he was again elected into the council of that state, and appointed chief justice of the supreme court. He however declined the latter office, and soon after died, November 26th, 1807, greatly regretted, as in his life he had been admired for his extraordinary endowments, his accomplishments as an advocate, his integrity as a judge, his patri-

otism as a legislator and ambassador, and his exemplariness as a Christian."*

Plan of the ancient Palisado Plot in Windsor.

The above plan was copied from a larger one in the ancient records of the town of Windsor. The book from which it is taken, entitled "*A book of Towne Wayes in Windsor*," appears to have been first written in 1654. The present first Congregational church in Windsor, (a view of which is given at page 124,) is situated, it is believed, near the southeast corner of the lot marked D. Wilson. Some remains of the ditch, which, it is believed, was excavated outside of the palisadoes, is still visible, running along near the summit of the hill which forms the north bank of the Windsor or Farmington river, and passing within a few feet of the church. The following is extracted from the record mentioned above.

"26th. To return again to the Common wayes from the ferry at the rivulet, it ascends up upon the side of the bank to the house that was Capt. Mason's, and bounds west by the fence that was John Strong's—on the top of the bank, and east by Samuel Marshall's at the foot of the bank, and then turns to the gate, and is to be three rods in breadth betwixt John Strong's garden on the south, and Henry Clark's on the north. And seeing I am intered into the pallasadow, I will speak a little of the original of it: about 1637 years, when the English had war with the Pequot Indians; our inhabitants on Sandy bank gathered themselves nearer together from their remote dwellings, to provide for their safety, set upon fortyfying, and with palazado, which some particular

* Lord's Lempriere's Universal Biography.

men resigned up out of their properties for that end, and was laid out into small parcells, to build upon; some 4 rods in breadth, some five, six, seven, some eight—it was set out after this manner: (*Here in the record the foregoing plan is inserted.*) These building places were at first laid out of one length, that was sixteen rods, but differ as afores^d. Also on all sides within the outmost fence, there was left two rods in breadth for a common way, to go round within side the *Palazado*, and when divers men left their places and returned to their lotts for their conveniences, some that staid, (by consent of the town,) enlarged their gardens. Some had 2, some 3, some 4 plats to their propriety, with the use of the two rods in breadth round the outside, every one according to his breadth, only with this reserve concerning the two rods, that if in future time there be need of former fortification, to be repaired, that then each man should resign up the two afores^d two Rods for a way only for common use.—*Note*, that in the west corner of the afores^d plott there is reserved for a common Burying Ground, one particular parcel that is six rods in breadth, all the length on one side, and one end take it together, it is eight rod in breadth, and eighteen in length.”

“There goeth out of the palazado towards northwest a highway two rods wide; when past the house plotts it is larger. Also from the Palazado, runs a way north easterly, called the common street, and is to be four rods wide.

The following are extracts from ancient newspapers.

We hear from Poquonnuck, a parish in the western part of Windsor, that about half an acre of the surface of the ground there has lately sunk or fallen to a considerable depth below the common surface or level; not unlike to what is frequently occasioned by earthquakes, though attended with no eruptions, either of water or fire; for which event no natural cause has as yet been assigned. And it is more unaccountable, as the ground that is sunk was not contiguous to, or bordering upon any precipice or declivity, nor adjacent to any collection of water that should occasion it to sink.—*Connecticut Journal, June 22d, 1770.*

Hartford, Feb. 27th, 1767.

ONE night last week, a panther having killed nine sheep in a yard at Windsor, the owner of the sheep, one Mr. Phelps, the next morning followed the panther by his track into a thicket about half a mile from his house, and shot him. He was brought to this town, and the bounty of five pounds allowed by law, was paid for his head.—*New London Gazette, No. 172.*

The following singular entry appears in the ancient records of the town of Windsor.

Aug. 17th, 1659.—Mr. John Drake, Senr. dyed accidentally, as he was driving a cart loaded with corn to carry from his house to his son Jacob's. The cattle being two oxen and his mare, in the highway against John Griffin's, something scared the cattle, and they set a running, and he laboring to stop them, by taking hold on the mare, was thrown upon his face, and the cart wheele went over him, and broke one of his legs, and bruised his body so that he was taken up dead; being carried into his daughter's house, had life come again, but dyed in a short time, and was buried on the 18th day of August; 59.

The following inscriptions are from monuments in the buryingground back of the first Congregational church, the first of which is believed to be the oldest inscription on any monument in this state.

HEERE LYETH EPHRAIM HVIT, SOMETIMES TEACHER TO YE CHVRCH OF WINDSOR, WHO DYED SEPTEMBER 4TH, 1644.

WHO WHEN HEE LIVED WEE DREW OVR VITALL BREATH,
WHO WHEN HEE DYED HIS DYING WAS OVR DEATH,
WHO WAS YE STAY OF STATE, YE CHVRCHES STAFF,
ALAS, THE TIMES FORBID AN EPITAPH.

HERE VNDER LYETH THE BODY OF HENRY WOLCOT, SOMETIMES A MAIESTRATE OF THIS IVRISDICTION, WHO DYED YE 30TH DAY OF MAY, ANNO { Salvtis 1655,
Aetatis 77.

The above is a representation of the monument of the first Henry Wolcott, and a copy of the inscription on its side. The monument was made by his son-in-law, Matthew Griswold, ancestor of the Griswold family in Lyme. He was a stone-cutter by trade, previous to his leaving England.*

Here lyeth the body of the Hon. Roger Wolcott, Esq. of Windsor, who for several years was Governor of the Colony of Connecticut, died May 17th, Anno { Aetatis 89,
Salvtis 1767

Earth's highest station ends in "Here he lies,"
And "dust to dust" concludes her noblest song.

To the memory of *Oliver Ellsworth*, LL. D., an assistant in the Council, and a judge of the Superior Court of the State of Connecticut. A member of the Convention which formed, and of the State Convention of Connecticut, which adopted the Constitution of the U. States.—Senator and Chief Justice of the United States; one of the Envoys extraordinary and Ministers Plenipotentiary, who made the convention of 1800 between the United States and the French Republic. Amiable and exemplary in all the relations of the domestic, social and christian character. Pre-eminently useful in all the offices he sustained, whose great talents under the guidance of inflexible integrity, consummate wisdom, and enlightened zeal, placed him among the first of the illustrious statesmen who achieved the independence, and established the independence of the American Republic.—Born at Windsor April 29th, 1745, and died Nov. 26, 1807.

* MSS. in possession of Judge Griswold, of Lyme.

NEW HAVEN COUNTY.

NEW HAVEN COUNTY is bounded n. by Litchfield and Hartford Counties, e. by Middlesex County, s. by Long Island Sound, and w. by Litchfield County and the Housatonic river, which separates it from Fairfield County. Its average length from east to west is about 26 miles, and its width from north to south 21 miles; containing 540 square miles, or 345,600 acres. This county, lying on Long Island Sound, has a very extensive maritime border, but its foreign trade is chiefly confined to New Haven harbor. Its fisheries of oysters and clams, and other fish, are valuable. It is intersected by several streams, none of them of very large size, but of some value for their water power and fish. Of these the principal are the Pomperaug and Naugatuc, on the west; the Quinnipiac, Menunkatuc, West and Mill rivers, on the east. The Quinnipiac is the largest, and passes through extensive meadows. The county is intersected centrally by the New Haven and Northampton Canal, which passes through this county from north to south. There is a great variety of soil in this county, as well as of native vegetable and mineral productions. The range of secondary country which extends along Connecticut river as far as Middletown, there leaves that stream, crosses into this county, and terminates at New Haven. This intersection of the primitive formation by a secondary ridge, affords a great variety of minerals, and materials for different soils. Considerable tracts on the mountains and sandy plains are of little value. This county contains the largest city in the state, one of its capitals, a seaport with pretty extensive trade, and one of the most beautiful towns in the Union. The manufacturing business in this county is carried on to a considerable extent, and is yearly increasing.

The following is a list of the several towns in the county, with the population according to the census of 1830 :

New Haven - 10,678	Madison - - 1,809	Oxford - - 1,763
Bethany - - 1,049	Meriden - - 1,708	Prospect - - 651
Branford - - 2,332	Middlebury - - 816	Southbury - 1,557
Cheshire - - 1,780	Milford - - 2,256	Wallingford - 2,418
Derby - - 2,253	North Branford —	Waterbury - 3,070
East Haven - 1,229	North Haven 1,284	Wolcott - - 843
Guilford - - 2,344	Orange - - 1,341	Woodbridge - 1,000
Hamden - - 1,669		

Population of the county in 1820, 39,616 ; in 1830, 43,847.

NEW HAVEN.

THE local situation of New Haven appears to have been known to the Dutch some years before the arrival of the English settlers; they designated the place by the name of "*Red Mount.*" It was doubtless so called from the appearance of the East and West Rocks near the place. Its Indian name was *Quinnipiac*, which name was given to the river forming the eastern boundary of the township, and now commonly called Wallingford river; to the adjacent country, and to the tribe by which it was inhabited. The Quinnipiacs have long since been extinct: they dwelt in the summer on the shore, for the convenience of fishing; and in the winter, in the forests, for the convenience of fuel.

They had a place for powwowing in East Haven, about three quarters of a mile east of the harbor bridge. The spot was formerly a swamp, and is now a meadow.

Charles, the last sachem of this tribe, died about one hundred years ago. He was frozen to death near a spring, about one mile north of the Congregational church in East Haven.

They are said to have had neither marriages nor divorces.

They caught round clams with their feet, and taught the English to catch them in this manner.

The Indian arrow-heads, frequently found here, are exactly like some which have been brought from Cape Horn.

At Fort Hill, or, as it is now called, Beacon Hill, there was formerly an Indian fort, and an Indian burying ground, on the eastern side of the hill. The name of this spot was formerly *Indian Hill*.—The above is about all the account we have of the original inhabitants.

On the 26th of July, 1637, Mr. John Davenport, Mr. Samuel Eaton, Theophilus Eaton, and Edward Hopkins, Esq.'s, Mr. Thomas Gregson, and many others of good characters and fortunes, arrived at Boston. Mr. Davenport had been a celebrated minister in the city of London, and was a distinguished character for piety, learning and good conduct. Many of his congregation, on account of the esteem which they had for his person and ministry, followed him into New England. Mr. Eaton and Mr. Hopkins had been merchants in London, possessed great estates, and were men of eminence for their abilities and integrity. The fame of Mr. Davenport, the reputation and good estates of the principal gentlemen of this company, made the people of Massachusetts exceedingly desirous of their settlement in that commonwealth. Great pains were taken, not only by particular persons and towns, but by the general court, to fix them in the colony. Charlestown made them large offers; and Newbury proposed to give up the whole town to them. The general court offered them any place which they should choose. But they were determined to plant a distinct colony. By the pursuit of the Pequots to the westward, the English became acquainted with that fine tract along the shore, from Saybrook to Fairfield, and with its several harbors. It was represented as fruitful, and happily situated for

navigation and commerce. They therefore projected a settlement in that part of the country.

In the fall of 1637, Mr. Eaton and others, who were of the company, made a journey to Connecticut, to explore the lands and harbors on the sea coast. They pitched upon Quinnipiac for the place of their settlement. They erected a poor hut, in which a few men subsisted through the winter: this was at the corner of Church and George streets.

On the 30th of March, 1638, Mr. Davenport, Mr. Prudden, Mr. Samuel Eaton, and Theophilus Eaton, Esq., with the people of their company, sailed from Boston for Quinnipiac. In about a fortnight they arrived at their desired port. On the 18th of April they kept their first Sabbath in the place. The people assembled under a large spreading oak,* and Mr. Davenport preached to them from Matthew vi. 1. He insisted on the temptations of the wilderness, made such observations, and gave such directions and exhortations, as were pertinent to the then present state of his hearers. He left this remark, that he enjoyed a good day. The settlers first began to build on George street and the opposite hill, between which small vessels then passed, in a creek which for many years has been filled up. Their first houses were commodious, of two stories.

One of the principal reasons which these colonists assigned for their removal from Massachusetts was, that they should be more out of the way and trouble of a general governor of New England, who at this time was an object of great fear in all the plantations.

Soon after they arrived at Quinnipiac, in the close of a day of fasting and prayer, they entered into what they termed a plantation covenant. In this they solemnly bound themselves, "that as in matters that concern the gathering and ordering of a church, so also in all public offices which concern civil order, as the choice of magistrates and officers, making and repealing laws, dividing allotments of inheritance, and all things of like nature, they would all of them be ordered by the rules which the scripture held forth to them." This was adopted as a general agreement, until there should be time for the people to become more intimately acquainted with each other's religious views, sentiments and moral conduct; which was supposed to be necessary, to prepare the way for covenanting together as Christians, in church state.

The planters of Quinnipiac determined to make an extensive settlement; and, if possible, to maintain perpetual peace and friendship with the Indians. They therefore paid an early attention to the making of such purchases and amicable treaties, as might most effectually answer their designs.

On the 14th of November, 1638, Theophilus Eaton, Esq., Mr. Davenport, and other English planters, entered into an agreement with Momauguin, sachem of that part of the country, and his counsellors, respecting the lands. The articles of agreement are to this effect:

That Momauguin is the sole sachem of Quinnipiac, and had absolute power to aliene and dispose of the same: that in consequence of

* This tree was situated near the corner of George and College streets; both New Haven and Milford churches were formed under it.—*Dr. Dana's Sermon*, 1801.

the protection he had tasted, by the English, from the Pequots and Mohawks,* he yielded up all his right, title and interest, to all the land, rivers, ponds and trees, with all the liberties and purtenances belonging to the same, unto Theophilus Eaton, John Davenport and others, their heirs and assigns forever. He covenanted, that neither he nor his Indians would terrify or disturb the English, or injure them in any of their interests; but that, in every respect, they would keep true faith with them.

The English covenanted to protect Momauguin and his Indians, when unreasonably assaulted and terrified by either of the other Indians; and that they should always have a sufficient quantity of land to plant on, upon the east side of the harbor, † between that and Saybrook fort. They also covenanted, that by way of free and thankful retribution, they gave unto the said sachem and his council and company, twelve coats of English cloth, twelve alchymy spoons, twelve hatchets, twelve hoes, two dozen of knives, twelve porringers, and four cases of French knives and scissors.

This agreement was signed and legally executed, by Momauguin and his council on the one part, and Theophilus Eaton and John Davenport on the other. Thomas Stanton, who was the intrepeter, declared in the presence of God, that he had faithfully acquainted the Indians with the said articles, and returned their answers.

The following signatures are marks of Momauguin and his counsellors to the above agreement, and are copied from the ancient records of New Haven, nearly in the position they stand on the record.

1. Momauguin, *his mark*.
2. Sugcogisin.
3. Quosaquash.
4. Carroughood.
5. Woosauruck.
6. The mark of Shaumpishuh, the sister of Momauguin, called in the agreement *Squaw Sachem*, who, it appears, had some interest in part of the lands.

In December following, they made another purchase of a large tract, which lay principally north of the former. This was of Montowese, son of the great sachem at Mattabeseck. This tract was ten miles in

* The Indians of Quinnipiac, in this treaty, declared, that they still remembered the heavy taxes of the Pequots and Mohawks; and that, by reason of the fear of them, they could not stay in their own country, but had been obliged to flee. By these powerful enemies they had been reduced to about forty men.

† This was in the present town of East Haven.

length, north and south, and thirteen in breadth. It extended eight miles east of the river Quinnipiac, and five miles west of it towards Hudson's river. It included all the lands within the ancient limits of the old towns of New Haven, Branford and Wallingford, and almost the whole contained in the present limits of those towns, and the towns of East Haven, Woodbridge, Bethany, Meriden, North Branford, Cheshire, Hamden, North Haven, and part of Orange. These have since been made out of the three old towns. For this last tract the English gave 13 coats, and allowed the Indians ground to plant, and liberty to hunt within the lands. The annexed is a copy of the signature of Montowese and Sawsounck, an Indian who came with him to New Haven. Montowese's signature is the bow and arrow. It appears the above land descended to him from his deceased mother. His tribe or company consisted of but ten men, with their women and children.

The New Haven adventurers were the most opulent company which came into New England; and they designed to plant a capital colony. They laid out their town plat in squares, designing it for a great and elegant city. In the center was a large and beautiful square. This was compassed with others, making nine in the whole.

The first principal settlers were, Theophilus Eaton, Esq., Mr. Davenport, Samuel Eaton, Thomas Gregson, Robert Newman, Matthew Gilbert, Nathaniel Turner, Thomas Fugill, Francis Newman, Stephen Goodyear, and Joshua Atwater.

There appears no act of civil, military, or ecclesiastical authority, during the first year; nor is there any appearance that this colony was ever straitened for bread, as the other colonies had been.

Meanwhile, Mr. Henry Whitfield, Wm. Leet, Esq., Samuel Desborough, Robert Kitchel, William Chittenden, and others, who were part of Mr. Davenport's and Mr. Eaton's company, arrived to assist them in their new settlement. These were principally from Kent and Surry, in the vicinity of London. Mr. Whitfield's people, like Mr. Davenport's, followed him into New England. There were now three ministers, with many of the members of their former churches and congregations, collected in this infant colony, and combined in the same general agreement.

On the 4th of June, 1639, all the free planters at Quinnipiac convened in a large barn of Mr. Newman's, and, in a formal and very solemn manner, proceeded to lay the foundations of their civil and religious polity.

Mr. Davenport introduced the business, by a sermon from the words of the royal preacher, "Wisdom hath builded her house, she hath hewn out her seven pillars."

The following is the most ancient record of this event, and is a curiosity in the history of civil government.

The 4th day of the 4th moneth, called June 1639, all the free planters assembled together in a general meetinge, to consult about settling civil government according to God, and about the nomination of persons that may be found, by consent of all, fittest in all respects for the foundation work of a Church which was intended to be gathered in Quinipiack. After sollemne invocation of the name of God in prayer, for the presence and help of his spirit and grace in these weighty businesses, they were reminded of the business whereabout they met, (viz.) for the establishment of such civil order as might be most pleasing unto God and for the chusing the fittest men for the foundation work of a church to be gathered. For the better enabling them to discern the minde of God, and to agree accordingly concerning the establishment of civil order, Mr. John Davenport propounded divers queries to them, publicly praying them to consider seriously in the presence and feare of God, the weight of the business they met about, and not to be rash or sleight in giving their votes to things they understood not, but to digest fully and thoroughly what should be propounded to them, and without respect to men, as they should be satisfied and perswaded in their own minds to give their answers in such sort as they would be willing they should stand upon record for posterity.

This being earnestly expressed by Mr. Davenport, Mr. Robert Newman was intreated to write in characters, and to read distinctly and audibly in the hearing of all the people, what was propounded and accorded on, that it might appear that all consented to matters propounded according to words written by him.

Quære 1. Whether the Scriptures do holde fourth a perfect rule for the direction and government of all men in all duties which they are to perform to God and men, as well in the government of famylyes and commonwealths as in matters of the church?

This was assented unto by all, no man dissenting, as was expressed by holding up of hands. Afterwards it was read over to them, that they might see in what wordes their vote was expressed: they againe expressed their consent thereto by holding up their hands, no man dissenting.

Quære 2. Whereas there was a covenant sollemnely made by the whole assembly of free planters of this plantation, the first day of extraordinary humiliation that we had after we came together, that as in matters that concern the gathering and ordering of a church, so likewise in all publique offices, which concern civil order, as choyce of magistrates and officers, making and repealing of laws, divideing allotments of inheritances, and all things of like nature, we would all of us be ordered by those rules which the scripture holds forth to us. This covenant was called a plantation covenant, to distinguish it from a church covenant, which could not at that time be made, a church not being then gathered, but was deferred till a church might be gathered according to God. It was demanded whether all the free planters doe holde themselves bound by that covenant in all business of that nature which are expressed in the covenant, to submit themselves to be ordered by the rules which are held forth in the scripture.

This also was assented unto by all, and no man gainsayed it, and they did testify the same by holding up their handes, both when it was first propounded, and afterwards confirmed the same by holding up their hands when it was read unto them in publique. John Clark being absent when the covenant was made, doth now manifest his consent to it. Also Richard Beach, Andrew Low, Goodman Bamster, Arthur Halbidge, John Potter, Richard Hill, John Brockett, and John Johnson, these persons being not admitted planters when the covenant was made, doth now expresse their consent to it.

Quære 3. Those who have desired to be received as free planters, and are settled in the plantation with a purposed resolution and desire that they may be admitted into church fellowship, according to Christ, as soon as God shall fit them thereunto, were desired to expresse it by holding up of hands—accordingly all did expresse this to be their desire and purpose, by holding up their hands twice, (viz.) both at the proposal of it, and after, when these written words were read unto them.

Quære 4. All the free planters were called upon to express whether they held themselves bound to establish such civil order as might best conduce to the securing the purity and peace of the ordinances to themselves and their posterity, according to God. In answer hereunto they expressed by holding up their hands twice, as before. That they helde themselves bound to establish such civil order as might best conduce to the ends aforesaid.

Then Mr. Davenport declared unto them by the scriptures what kind of persons might best be trusted with matters of government, and by sundry arguments from scripture proved that such as were described, Ex. 18. 1. Deut. 1. 13. with Deut. 19. 15. and 1 Cor. 6. 1 to 7, ought to be entrusted by them, seeing they were free to cast themselves into that mould and forme of commonwealth which appeareth best for them in reference to the securing the pure and peaceable enjoyment of all Christ his ordinances in the church according to God, whereunto they have bound themselves as hath

been acknowledged. Having said this, he sat down, praying the company freely to consider whether they would have it voted at this time or not. After some space of silence, Mr. Theophilus Eaton answered it might be voted, and some others also spake to the same purpose, none at all opposing it. Then it was propounded to vote.

Quære 5. Whether free Burgesses shall be chosen out of Church members, they that are in the foundation work of the church being actually free burgesses, and to chuse to themselves out of the like estate of church fellowship, and the power of chusing magistrates and officers from among themselves, and the power of making and repealing laws according to the word, and the dividing of inheritances, and the deciding differences that may arise, and all the business of like nature, are to be transacted by those free burgesses.

This (viz. Quære 5.) was put to vote, and agreed unto by the lifting up of hands twice, as in the former cases it was done. Then one man stood up after the vote was past, and expressing his dissenting from the rest, in that yet granting, 1. That magistrates should be men fearing God. 2. That the Church is the company whence ordinarily such men may be expected. 3. That they that chuse them ought to be men fearing God, onely at this he stucke, That free planters ought not to give the power out of their hands.

Another stood up and answered, that in this case nothing was done but with their consent. The former answered, that all the free planters ought to resume this power into their own hands again, if things were not orderly carried. Mr. Theophilus Eaton answered, that in all cases they choose committees. In like manner the companys of London chuse the liverys by whom the publique magistrates are chosen. In this the rest are not wronged; because they expect to be of the livery themselves, and to have the same power. Some others intreated the former to give his arguments and reasons whereupon he dissented. He refused to doe it, and said they might not rationally demand it, seeing he let the vote pass on freely, and did not speak until after it was past because he would not hinder what they agreed upon. Then Mr. Davenport, after a short relation of some former passages between them two about this question, prayed the company that nothing might be concluded by them in this weighty qestion, but what themselves were persuaded to be agreeing with the minde of God, and they had heard what had been sayd since the vote, intreated them agayne to consider of it, and agayne to put it to vote as before. Agayne all of them by holding up their hands, did shew their consent as before. And some of them professed, that whereas they did waver before they came to the assembly, they were now fully convinced, that it is the minde of God. One of them said, that in the morning before he came, reading Deuteronomy 17, 15. he was convinced at home. Another said that he came doubting to the assembly, but be blessed God, by what had bene said he was now fully satisfied that the choyce of burgesses out of Church members, and to intrust these with the power before spoken of, is according to the minde of God revealed in the scripture. All having spoken their apprehensions, it was agreed upon, and Mr. Robert Newman was desired to write it as an order, whereunto every one that hereafter should be admitted here as planters should submit, and testify the same by subscribing their names to the order, namely,

That church Members only shall be free Burgesses, and that they only shall chuse magistrates and officers among themselves, to have the power of transacting all publique civil affairs of this plantation, of making and repealing laws, deviding of inheritances, deciding of differences that may arise; and doing all things or businesses of like nature.

This being settled as a fundamental article concerning civil government, Mr. Davenport propounded and proposed some things to consideration about the gathering of a Church. And to prevent the blemishing of the first beginnings of the work, He advised that the names of such as were to be admitted be publicly propounded, to the end that they who were most approved might be chosen; for the town being cast into several private meetings, wherein they that dwelt nearest together gave their accounts one to another of God's gracious work upon them, and prayed together, and conferred to their mutual edification, sundry of them had knowledge one of another, and in every meeting some one was more approved of all than any other. For this reason, and to prevent scandalls, the whole company was intreated to consider whom they found fittest to nominate for this worke.

Quære 6. Whether are you all willing and do agree in this, that twelve men be chosen, that their fitness for the foundation work may be tried, however there may be more named, yet it may be in their power who are chosen to reduce them to twelve, and it be in the power of those twelve to chuse out of themselves 7, that shall be most approved of, the major part to begin the church.

This was agreed upon by consent of all, as was expressed by holding up of hands, and that so many as should be thought fit for the foundation work of a church, shall

be propounded by the plantation, and written down and passe without exception, unless they had given public scandall or offence, yet so as in case of publique scandall and offence, every one should have liberty to propound their exceptions at that time publicly against any man that should be nominated when all the names should be writ down, but if the offence were private, that men's names might be tendered, so many as were offended, were intreated to deal with the offender privately. And if he gave no satisfaction, to bring the matter to the twelve, that they might consider of it impartially and in the feare of God. The names of the persons named and agreed upon, were Theophilus Eaton, John Davenport, Robert Newman, Matthew Gilbert, Richard Malbon, Nathaniel Turner, Ezekiel Chevers, Thomas Fugill, John Punderson, William Andrews, and Jeremiah Dixon. No exception was brought against any of these in public, except one about taking an excessive rate for meal that he had sold to one of Poquonnoek in his neede, which he confessed with grief, and declared that having been smitten in heart, and troubled in his conscience, he offered such a part of the price back again, with confession of his sin to the party, as he thought himself bound to do. And it being feared that the report of the sin was heard further than the report of his satisfaction, a course was concluded on to make the satisfaction to as many as heard of the sin. It was also agreed upon at the said meetinge, that if the persons above named did find themselves straitened in the number of fit men for the seven, that it should be free for them to take into tryal of fitnessse such other as they should think meete. Provided that it should be signified to the town upon the Lord's day who they so take in, that every man may be satisfied of them, according to the course formerly taken.

[The foregoing was subscribed and signed by one hundred and eleven persons.]

"After a proper term of trial, Theophilus Eaton, Esq., Mr. John Davenport, Robert Newman, Matthew Gilbert, Thomas Fugill, John Punderson and Jeremiah Dixon, were chosen for the seven pillars of the church.

"October 25th, 1639, the court, as it is termed, consisting of these seven persons only, convened, and after a solemn address to the Supreme Majesty, they proceeded to form the body of freemen, and to elect their civil officers. The manner was indeed singular and curious.

"In the first place, all former trust, for managing the public affairs of the plantation, was declared to cease, and be utterly abrogated. Then all those who had been admitted to the church after the gathering of it, in the choice of the seven pillars, and all the members of other approved churches, who desired it, and offered themselves, were admitted members of the court. A solemn charge was then publicly given them, to the same effect as the freemen's charge, or oath, which they had previously adopted. The purport of this was nearly the same, with the oath of fidelity, and with the freemen's administered at the present time. Mr. Davenport expounded several scriptures to them, describing the character of civil magistrates given in the sacred oracles. To this succeeded the election of officers. Theophilus Eaton, Esq. was chosen governor, Mr. Robert Newman, Mr. Matthew Gilbert, Mr. Nathaniel Turner, and Mr. Thomas Fugill, were chosen magistrates. Mr. Fugill was also chosen secretary; and Robert Seely, marshal.

"Mr. Davenport gave Governor Eaton a charge in open court, from Deut. 1: 16, 17. 'And I charged your judges at that time, saying, Hear the causes between your brethren, and judge righteously between every man and his brother, and the stranger that is with him. Ye shall not respect persons in judgment, but ye shall hear the small as well as the great; ye shall not be afraid of the face of man; for the judgment is God's: and the cause that is too hard for you, bring it unto me, and I will hear it,'"

“It was decreed by the freemen, that there should be a general court annually, in the plantation, on the last week in October. This was ordained a court of election, in which all the officers of the colony were to be chosen. This court determined, that the word of God should be the only rule for ordering the affairs of government in that commonwealth.

“This was the original, fundamental constitution of the government of New Haven. All government was originally in the church, and the members of the church elected the governor, magistrates and all other officers. The magistrates, at first, were no more than assistants of the governor; they might not act in any sentence or determination of the court.* No deputy governor was chosen, nor were any laws enacted, except the general resolutions which have been noticed; but, as the plantation enlarged, and new towns were settled, new orders were given; the general court received a new form, laws were enacted, and the civil polity of this jurisdiction gradually advanced, in its essential parts, to a near resemblance of the government of Connecticut.”†

Letter from the Rev. J. Davenport and Gov. Eaton, “To the much honored the Governor, Deputy and Assistants, &c.” of Massachusetts.

“It may please the worthy and much Honored Governor, Deputy & Assistants, & with them, the present Courte, to take knowledge that our desire of staying within this patent was Reall and strong, if the eye of God’s providence (to whom we have committed our waies, especially in so important an enterprise as this, which, we confess is far above our Capacities) had guided us to a place convenient for our families, & for our friends. Which as our words have often expressed, so, we hope, the truth thereof is sufficiently declared by our almost nine moneths patient wayting in expectac̄on of some opportunity to be offered us, for that end, to our great charge & hindrance, many waies.

“In all which time we have, in many prayers, commended the guidance of our apprehensions, judgments, spirits, resolućons & wayes, into the good hand of the onely wise God, whose prerogative it is to determine the bounds of our habitac̄ons according to the ends for which he hath brought us into these countreyes, and we have considered, as we were able, by his helpe, whatsoever place hath bene propounded to us, being ready to have, with contentment accepted (if by our stay any publick good might be promoted) smaller accommodac̄ons, & upon dearer termes (if they might be moderately commodious) then, we believe, most men, in the same case with us, in all respects, would have done. And whereas a place for an Inland plantac̄on, beyond Wattertowne, was propounded to us, & pressed with much importunity by some, whose words have the power of a law with us, in any way of God, we did speedily, and seriously deliberate thereupon, it being the subject of the greatest part of a dayes discourse. The conclusion was, that, if the upland should answer the meddow ground in goodnes & desirableness (whereof yet there is some ground of doubting) yet, considering that a Boate cannot pass from the Bay thither, nearer than 8 or 10 miles distance, and that it is so remote from the Bay, & from any towne, we could not see how our dwelling there would be advantagious to these plantations, or compatible with our conditions, or commodious for our families, or for our friends.

“Nor can we satisfye ourselves that it is expedient, for ourselves, or for our friends, that we chuse such a condition, wherein we must be compelled to have our dwelling houses so farr distant from our Farmes, as Boston, or Charlestowne is from that place, few of our friends being able to beare the charge thereof (whose cases nevertheless we are bound to consider) & some of them that are able not being persuaded that it is lawfull for them to live continually from the greatest part of theyre families, as, in this case, they would be necessitated to doe. The season of the yeare, & other weighty considerations, compelled us to hasten to a full & finall conclusion, which we are, at

† Trumbull’s History of Connecticut.

last, come unto, by God's appointment and direction, we hope in mercy, and have sent letters to Connecticut for a speedy transacting the purchase of the parts about Quilypieck from the Natives which may pretend title thereunto. By which Act we are Absolutely, & irrevocably ingaged that way, & we are persuaded that God will order it for good unto these plantations, whose love so abundantly, above our desarts, or expectations, expressed, in your desire of our abode in these parts, as we shall ever retain in thankfull memory, so we shall account ourselves thereby obliged to be any way instrumentall, & serviceable for the common good of these plantations as well as of those; which the Divine providence hath combined together in as strong a bond of Brotherly affection, by the sameness of theyre condition, as Joab and Abishai were, whose severall armyes did mutually strengthen them boath against several enimyes—2 Sam. x. 9, 10, 11, or rather they are joynd together, as Hippocrates his Twinnes, to stand & fall, to growe & decay, to flourish & wither, to live and dye together. In witness of the premises we subscribe our names.

John Davenport.
Theoph: Eaton.

The 12th day of the first moneth,
Anno 1638 [= 12 March, 1639].*

John Davenport.
Theoph: Eaton.

The above is a fac simile of the hand-writing of Mr. Davenport and Gov. Eaton, subscribed to the preceding letter.

New Haven lies at the head of a harbor, which sets up four miles from Long Island Sound; in north latitude $41^{\circ} 18'$, and in west longitude $72^{\circ} 56'$; seventy six miles from New York, thirty four from Hartford, and one hundred and thirty four from Boston. It is the capital of a county of the same name, and the semi-capital of Connecticut. The site of New Haven is a plain, lying between two ranges of hills, on the east and on the west; and limited, partly, on the northern side, by two mountains, called the East and West Rocks; a spur from the latter, named Pine Rock, and another from the former, named Mill Rock, which descends in the form of a handsome hill to the northern skirt of the city. Between these mountains the plain opens into a valley, which extends northward seventy six miles, to Northampton; and between the East Rock, and the eastern range of hills, into another valley, terminating at Wethersfield, thirty two miles. Both these valleys coincide at the places specified, with the valleys of Connecticut river. The mountains are bold bluffs of greenstone rocks, with summits finely figured, and form a delightful part of the New Haven landscape.

The harbor of New Haven is created by the confluence of three rivers with the Sound; Wallingford or Quinnipiac river on the east, Mill

* Collections of the Massachusetts Historical Society, 3d vol. 3d series.

river on the north, and West river. The two last are merely mill streams. Mill river is a very fine one, being plentifully supplied with water during the year. Wallingford river, originally called Quinnipiacc, rises in Farmington, and after running a winding course of thirty five miles, empties its waters into the Sound. These streams are also ornaments of the landscape.

South view of New Haven and Fort Hale.

Fort Hale, the most prominent object in the above view, is situated on an insulated rock, two miles from the end of Long Wharf. It is so named from Captain Nathan Hale, who sacrificed his life for his country in the Revolutionary war. The city of New Haven is seen in the distance, with the East and West Rocks, as they appear in sailing up the harbor.

The harbor of New Haven, from the entrance of Wallingford and Mill rivers, has in the channel fifteen feet of water to its mouth, except on Crane's bar, a small spit of sand, formed by the erection of a pier, about three fourths of a mile from the shore. Here the depth is only seven and a half feet; but the obstruction might be removed with no great difficulty. At the time when the first settlers arrived in this town, there was in the northwestern region of this harbor, a sufficient depth of water for all the ordinary purposes of commerce. Ships were built and launched where now there are meadows, and gardens and shops: sloops loaded and unloaded where the market now stands. So late as the year 1765, the long wharf extended only twenty rods from the shore. It extends now three thousand nine hundred and forty three feet. Yet there is less water a few rods from its foot now, than at its termination in the year 1765. The substance which here accumulates so rapidly, is what in this country is called *marsh mud*; the material of which its salt marshes are composed. It has been suspected to be of a vegetable nature, and where the experiment has been tried, it has been found to be peat, and yields a tolerably good fire.

The plain on which New Haven is built, is not improbably a congeries of particles, floated down to this place in early times from the inte-

rior. Its surface is sand, mixed with loam and gravel; beneath this is usually found a stratum of yellow loam. Still lower, at the depth of fifteen or eighteen inches, a mass of coarse sand extends about six feet. Beneath this is another, composed principally of pebbles, rounded and smoothed like stones washed by the ocean. Still further down, the materials, generally like those which have been mentioned, are more mingled and confused. Formerly the surface was covered with shrub oaks; and wild turkeys and partridges were found in great numbers.*

The soil of this plain is dry, warm, and naturally unproductive, but, by cultivation, is capable of producing every vegetable suited to the climate, and in any quantity. For gardens, except in dry years, it is remarkably well suited. The original town was laid out on the north-western side of the harbor, in nine squares, each fifty three rods on a side; separated by streets about four rods in breadth; and thus formed a quadrangular area of one hundred and sixty rods on a side. The central square is open, and is styled the Green; and the upper, or north-western half, is a beautiful slope. It was formerly used as a burying ground, but in 1821 the monuments were removed to the new burying ground, and the ground leveled. The lower part of the square is fifty two rods long, and twenty five rods wide. It is surrounded on all sides by rows of stately elms, and is considered one of the most beautiful in the United States. The surrounding squares are, by law, divided each into four, by streets running from N. W. to S. E., and from N. E. to S. W., the direction of the original streets. Besides these thirty two squares, the town covers several considerable tracts bordering upon them, and is constantly extending. The principal of these is on the southeast side, and is called the New Township, a beautiful tract bounded by the East river and the harbor. The town of New Haven contains about eight square miles, the city about six: bounded N. by Hamden, W. by Orange and Woodbridge, S. by the waters of the harbor, and E. by the Quinnipiac, dividing it from East Haven.

New Haven contained in 1830, 10,678 inhabitants. In Dec. 1833, the population was 12,201, of which 11,534 were within the city limits. The area occupied by the city, is probably as large as that which usually contains a city of six times the number of inhabitants in Europe. Many of the houses have court-yards in front, and gardens in the rear. The former are ornamented with trees and shrubs; the latter are filled with fruit trees, flowers and culinary vegetables.

The houses are generally two stories high, built of wood, in a neat, handsome, but not expensive style. Many of those recently erected, however, are good and substantial edifices of brick and stone. The public edifices are, the College buildings; twelve churches, viz., six Congregational, two Episcopal, two Methodist, one Baptist, and one Roman Catholic; a tontine, a state house, a jail, four banks, a custom house, and a state hospital. There are ten printing offices, from which are issued one daily, and three weekly newspapers; and two weekly, one monthly, and one quarterly, religious publications; and the American Journal of Science and Arts, conducted by Professor Silliman.

EASTERN VIEW OF THE PUBLIC SQUARE OR GREEN IN NEW HAVEN CT

Yale College.

This seminary is commonly said to have been founded in the year 1700. In this year, ten of the principal ministers, nominated by a general consent, both of the clergy and the inhabitants of Connecticut, viz.

The Rev. <i>James Noyes</i> , Stonington,	The Rev. <i>Samuel Andrew</i> , Milford,
“ “ <i>Israel Chauncey</i> , Stratford,	“ “ <i>Timothy Woodbridge</i> , Hartford,
“ “ <i>Thos. Buckingham</i> , Saybrook,	“ “ <i>James Pierpont</i> , New Haven,
“ “ <i>Abra'm Pierson</i> , Killingw'ith,	“ “ <i>Noadiah Russel</i> , Middletown, and
“ “ <i>Samuel Mather</i> , of Windsor,	“ “ <i>Joseph Webb</i> , Fairfield,

met at New Haven, and formed themselves into a society, which, they determined, should consist of eleven ministers, including a rector; and agreed to found a college in the colony. At their next meeting, which was at Branford, the same year, each of them brought a number of books, and presenting them to the society, said, “*I give these books for the founding a College in this colony.*” Antecedently to this event, the subject had been seriously canvassed by the clergy, particularly Messrs. Pierpont, Andrew, and Russell of Branford, and by the people at large, during the two preceding years; and had come thus far towards maturity.

The act of the Legislature which gave birth to Harvard College was passed in 1636. Only ten years, therefore, elapsed after the beginning of a settlement in Massachusetts, before a college was commenced in earnest: whereas sixty five years passed away, after the colonization of Connecticut was begun, and sixty three after that of New Haven, before any serious attempt was made toward the founding of Yale College. But we are not hence to conclude that the colonists of Connecticut and New Haven were less friendly to learning than those of Massachusetts. The project of establishing a college in each of these colonies was early taken up, but checked by well founded remonstrances from the people of Massachusetts, who very justly observed that the whole population of New England was scarcely sufficient to support one institution of this nature, and that the establishment of a second would, in the end, be a sacrifice of both. These considerations put a stop to the design for a considerable time.

Of the serious intention of the New Haven colonists to establish a college, the following document, copied from the records of Guilford, furnishes decisive evidence.

"At a General Court, held at Guilford, June 28, A. D. 1652."

"Voted, The matter about a College at New Haven, was thought to be too great a charge for us of this jurisdiction to undergo alone; especially considering the unsettled state of New Haven Town; being publicly declared, from the deliberate judgment of the most understanding men, to be a place of no comfortable subsistence for the present inhabitants there. But if Connecticut do join, the planters are generally willing to bear their just proportions for erecting and maintaining of a College there. However, they desire thanks to Mr. Goodyear, for his kind proffer to the setting forward of such a work."

In October, 1701, the Legislature granted the before named gentlemen a charter, constituting them "Trustees of a Collegiate School in his Majesty's Colony of Connecticut;" and invested them with all the powers which were supposed to be necessary for the complete execution of their trust. The following November, they chose one of their number, Mr. Pierson, rector of the school, and determined that it should be fixed for the present at Saybrook.

In the year 1702, the first commencement was held at Saybrook, at which five young gentlemen received the degree of A. M.

From this time many debates arose concerning the place where the school should finally be established, and continued to agitate the community, until the year 1718. In 1716, a majority of the trustees voted, on the 17th of October, to remove the school to New Haven. Four of their number, out of nine, were however strongly against it; and the community was equally disunited. The trustees, nevertheless, proceeded to hold the commencement, the following year, at New Haven, and to order a college to be erected. It was accordingly raised in October, 1717, and finished the following year. This building they were enabled to erect by a considerable number of donations, which they had received for this purpose, both within and without the colony. Their principal benefactor, both during this period and all which have succeeded, was the Legislature.

Among the individuals who distinguished themselves by their beneficence to this infant institution, was the Hon. Elihu Yale, Esq., of London. This gentleman was descended from an ancient and respectable family in Wales. His father, Thomas Yale, Esq., came from England with the first colonists of New Haven. In this town his son Elihu was born, April 5th, 1648. He went to England at ten years of age, and to Hindoostan at thirty. In that country he resided about twenty years; was made governor of Madras; and married the widow of Governor Hinners, his predecessor. Having acquired a large fortune, he returned to London; was chosen governor of the East India Company; and died at Rexon, July 8th, 1721.

This gentleman sent, in several donations, to the collegiate school, £500 sterling, between 1714 and 1718; and, a little before his death, ordered goods to be sent out to the value of £500 more, but they were never received.

In gratitude to this benefactor, the trustees, by a solemn act, named their seminary Yale College; a name which, it is believed, will convey the memory of his beneficence to distant generations.*

The college which was erected at this time, was built of wood, one hundred and seventy feet long, twenty two feet wide, and three stories high; contained near fifty studies, besides the hall, library and kitchen, and cost about £1000 sterling. Before it was erected, the students were scattered in various places, as Milford, Killingworth, Guilford, Saybrook, Wethersfield, &c. Soon afterwards, they all removed to New Haven. From this time the institution began to flourish. The number of the students was about 40, and the course of education was pursued with spirit. The benefactions, also, which it received, were increased in number and value.

In the list of its principal benefactors was the Rev. Dr. Berkeley, dean of Derry in Ireland, and afterwards bishop of Cloyne. This highly respectable man came to America in the year 1732, for the purpose of establishing a college in the island of Bermuda. The project failed, however, for want of assistance from England, which was promised him. While he was in America, he became acquainted with the Rev. Mr. Williams, and with the design and circumstances of the seminary. With all these he was so well pleased, that he made a present to it of a farm, which he had purchased at Rhode Island; and after his return to Europe, sent to the library "the finest collection of books that ever came together at one time into America."† Jeremiah Dummer, Esq. of Boston, and the Hon. James Fitch, Esq. of Norwich, deserve to

* Dr. Dwight.

† President Clap.

be mentioned as distinguished benefactors of the institution. Sir Isaac Newton, Sir Richard Steele, Doctors Burnet, Woodward, Halley, Bently, Kennet, Calamy, Edwards, the Rev. Mr. Henry, and Mr. Whiston, presented their own works to the library. Many other respectable men afterwards made similar presents.

In 1745, a new charter, drawn by the Hon. Thomas Fitch, Esq. of Norwalk, afterwards governor, was given to the trustees, in which they were named, *The President and Fellows of Yale College*. This is the present charter of the institution. In the year 1750, another college was built, and named *Connecticut Hall*. The building, as originally constructed, was 100 feet long, 40 feet wide, and three stories high, with a cellar under the whole. It was built of brick, and contained thirty two chambers, and sixty two studies. This is the only college of that period that now remains, and even this has been essentially altered and enlarged by the addition of a fourth story. It is known in the language of direction now used by the students, as the South Middle College. The expense of this building was £1,660 sterling. In April, 1761, a chapel was begun, and finished in 1763. This chapel, in modern times, has undergone much alteration, and is at this time devoted solely to academic purposes, under the name of the Athenæum. In 1782, a brick dining hall was erected, sixty feet in length, and thirty in breadth. This hall has since been converted into a chemical laboratory and lecture room, and is now used for these purposes. In April, 1793, the corner stone of the building usually designated as the South College was laid. This building is of brick, one hundred and four feet long, thirty six feet wide, and four stories high, and was completed on the 17th of July, 1794. The faculty, to whom is committed the government and instruction of the students, consists of a president; a professor of chemistry, mineralogy, and geology; a professor of the Latin language and literature; a professor of mathematics, natural philosophy and astronomy; a professor of divinity; a professor of rhetoric and oratory; a professor of the Greek language and literature; and eight tutors. The whole course of instruction occupies four years. In each year there are three terms or sessions.

The general library of Yale College consists of above ten thousand volumes, exclusive of pamphlets. The libraries of the Linonian Society, and of the Brothers in Unity, comprise each rather more than five thousand volumes. The Calliopean Society, which is comparatively of recent formation, has made a collection of three thousand eight hundred volumes. In addition to the several libraries, there is a collection of books belonging to the Moral Society, consisting of five or six hundred volumes. The aggregate of books in the several libraries, is about twenty five thousand volumes. The college possesses a handsome mineralogical cabinet. In 1811, Col. George Gibbs deposited in this seminary two cabinets, one consisting of more than six thousand choice specimens, and the other of about eighteen thousand, the two best collections ever opened in this country. In 1825, this collection was purchased of Colonel Gibbs, at a price of twenty thousand dollars; of which sum the officers of Yale College and the citizens of New Haven contributed ten thousand dollars, the

citizens of New York three thousand dollars, and the alumni of South Carolina seven hundred dollars, and an individual five hundred dollars.*

The principal edifices of Yale College face the western boundary of the green, and present an imposing front, including passage ways, of upwards of eight hundred feet. The buildings are chiefly constructed of brick, and consist of five spacious edifices, each four stories high, one hundred and four feet by forty, containing thirty two studies; a chapel for religious worship, and ordinary public exhibitions; a Lyceum, containing the library and recitation rooms; an Athenæum; a chemical laboratory; an extensive stone dining hall, containing also, in the upper story, apartments for the mineralogical cabinet; a separate dining hall for theological students; a dwelling house for the president; a large stone building occupied by the medical department; and the *Trumbull Gallery*, a neat and appropriate building, erected as a repository for the valuable historical and other paintings of Col. Trumbull.

In the cut, the first building with a tower, on the left, is the old chapel or Athenæum; that on the right is the new chapel, erected in 1824. The middle building is the Lyceum. There are many more trees in the yard in front of the college buildings, than are represented in the cut, but it was thought advisable not to insert the whole number, as it would much obscure the view of the buildings. The last college building was erected in 1835; it stands in a range with the others, north of those seen in the engraving.

General Hospital of Connecticut.

“The General Hospital Society of Connecticut was chartered in May, 1826, no similar institution having previously existed in this state. To aid the infant undertaking the legislature of the state appropriated the sum of five thousand dollars, and individuals from different parts of

* A well written work, by the late Ebenezer Baldwin, Esq. entitled “Annals of Yale College,” has been published in this city; likewise a more recent history, by Professor Kingsley of Yale College.

the state have contributed handsome sums. With funds obtained from these sources, the society have erected a neat building on an eminence south westerly from the densely peopled part of the city ; commanding an excellent view of the town and harbor, and Long Island sound, together with the distant ridge of hills which appear to skirt the horizon on every side except that bounded by the water. The building was completed in July, 1832. It consists of a center and two wings, its whole length being one hundred and eighteen feet ; its breadth in the center is forty eight feet. The number of rooms is about twenty, besides those in the basement, and a large room for operations in the attic story. The building is of stone, stuccoed on the outside. In front of the center is a portico with four columns, constructed after the best Grecian models. The whole expense of the building was about twelve thousand dollars. The funds of the society being limited, it was not deemed prudent to build on a more expensive scale at present. Should more room at any future time be wanted, additions can be made to any extent required, without injuring the appearance of the edifice.

“ The design of this institution is to afford medical and surgical aid, and other necessaries of sickness, to such as cannot command such necessaries elsewhere. The poor, whom we ‘ always have with us,’ if wounded or taken sick, without possessing the means of procuring necessary aid, will here find an asylum, infinitely superior to that, but too often resorted to, in the town alms-houses. The stranger, sojourning with us, taken ill at a public boarding-house, with no friend or relative to care for him, may here find a substitute for the affectionate attentions of home. The sick mariner will here find a ‘ snug harbor.’ To the poor every thing will be gratuitously furnished, board, bed, medicines, nursing, and medical and surgical aid. Such as are wealthy, and may choose to become inmates of the hospital, will be expected to pay for board only. All medical and surgical aid is to be in all cases gratuitous. It is to be essentially a charitable institution ; and, should more apply than can be received, the poor are always to have the preference over those who are able to pay for their accommodations.”

The cut on the next page is a representation of the southern termination of West Rock and a part of the village of Westville, (formerly known by the name of Hotchkisstown,) about two miles N. W. from the state house in New Haven. That part of West Rock seen in the engraving, is about 400 feet in height, and is similar in its formation and general appearance to the East Rock, about two miles N. E. from New Haven. These rocks are trap, and are composed of hornblende and feldspar : iron enters considerably into their composition ; hence, during their decomposition, iron rust gradually covers the exterior of the stone, thus giving it a reddish brown appearance. It forms an excellent building stone, and is extensively employed for that purpose in New Haven. Their fronts are composed of vast assemblages of columns, more or less regular, and are full of cracks and fissures, from which cause it probably arises that they are liable to break off and fall. Hence vast masses of broken rocks, from the smallest size to that of the largest columns, are found sloping

Southeastern view of West Rock and Westville.

from the bases of these mountains up their fronts, for more than half their height. They are also distinguished by their backs declining so gradually that whilst the ascent is often easy, in front it is impracticable.

The above view was taken from the sandy bluff rising at the eastern extremity of the village. The building seen on the extreme left in the distance, is the Congregational church. The Methodist house of worship is seen in the distance, at the base of West Rock, in the center of the engraving. There are three paper mills, one iron foundry, and some other manufacturing establishments in the village, which contains about 600 inhabitants.

The two Judges of King Charles I., Goffie and Whalley, (commonly called the Regicides,) on the restoration of Charles II. to the throne of his father, in order to save their lives were obliged to flee the kingdom: they arrived at Boston from England, the 27th of July, 1660, and took up their residence in Cambridge; but finding it unsafe to remain any longer, they left that place and arrived at New Haven the 7th of March, 1661. They were well treated by the minister and magistrates, and for some days thought themselves entirely out of danger. But the news of the king's proclamation being brought to New Haven, they were obliged to abscond. The 27th of March they returned, and lay concealed in the house of Mr. Davenport, the minister, until the 30th of April. Mr. Davenport was threatened with being called to an account, for concealing and comforting traitors; but the Judges, who had before removed from Mr. D.'s house, upon intimation of his danger, generously resolved to deliver themselves up to the authorities of New Haven. They accordingly let the deputy governor, Mr. Leete, know where they were; but he took no measures to secure them; and the next day, some of their friends came to them and advised

them not to surrender. Having publicly shown themselves at New Haven, they had cleared Mr. Davenport from the suspicion of concealing them; after which they returned to their cave, which still goes by the name of the *Judges' Cave*. It is situated on the top of West Rock, about half or three quarters of a mile from the southern extremity. It is a place well chosen for observing any approach to the mountain; likewise any vessel coming into the harbor, can from this rock be easily seen. The cave is formed on a base of perhaps forty feet square, by huge broad pillars of stone, fifteen or twenty feet high, standing erect and elevated above the surrounding superficies of the mountain, surrounded with trees, which conceal it from observation. The apertures being closed with branches of trees, or otherwise, a well covered and convenient lodgment might be formed, as these rocks, being contiguous at the top, furnished space below large enough to contain bedding and two or three persons. Mr. Richard Sperry, who lived on the west side of the Rock, about a mile from this cave, supplied them daily with food, sometimes carrying it himself, and at other times sending it by his boys, tied up in a cloth, with directions to leave it on a certain stump, from which the Judges would take it.

South view of the Judges' Cave.

The incident which caused them to leave the cave was this; the mountain being a haunt for wild animals, one night as the Judges lay in bed, a panther or catamount, putting his head into the aperture of the cave, blazed his eye-balls in such a frightful manner as greatly to terrify them. One of them took to his heels, and fled down to Sperry's house for safety. Considering this situation too dangerous to remain any longer, it was abandoned.

Another place of their abode, in the vicinity of New Haven, was at a spot called the *Lodge*. It was situated at a spring, in a valley, about three miles west, or a little northwest, from the last mentioned residence. North of it was an eminence, called the *Fort* to this day, from which

there was full view of the harbor, to the southeast, seven miles off. There were several other places on and about the West Rock, which were used by them for places of concealment. The two mentioned, however, were their principal places.

Among the many traditionary anecdotes and stories, concerning the events which took place at and about the time the Judges' pursuers were at New Haven, are the following:—

1. The day they were expected, the Judges walked out towards the Neck bridge, the road the pursuers must enter the town. At some distance from the bridge, the sheriff, who then was Mr. Kimberly, overtook them, with a warrant for their apprehension, and endeavored to take them. The Judges stood upon their defense, and planted themselves behind a tree; being expert at fencing, they defended themselves with their cudgels, and repelled the officer, who went into town to obtain assistance, and upon his return, found they had escaped into the woods beyond his reach.

2. That immediately after this, during the same day, the Judges hid themselves under the Neck bridge, where they lay concealed while the pursuivants rode over it and passed into town; and that the Judges returned to New Haven that night and lodged at the house of Mr. Jones. All this tradition says, was a preconcerted and contrived business, to show that the magistrates of New Haven had used their endeavors to apprehend them before the arrival of the pursuers.

3. That when the pursuers were searching the town, the Judges in shifting their situations, happened, by accident or design, at the house of a Mrs. Eyers, a respectable lady; she seeing the pursuivants coming, ushered her guests out at the back door, who after walking a short distance, instantly returned to the house, and were concealed by her in one of the apartments. The pursuers coming in, inquired whether the regicides were at her house; she answered, they had been there, but were just gone away, and pointed out the course they went into the woods and fields; by her polite and artful address, she diverted their attention from the house, and putting them upon a false scent, thereby secured her friends.

4. That while the Judges were at the house of Mr. Richard Sperry, they were surprised by an unexpected visit from their pursuers, whom they espied at a distance, as the causeway to the house lay through a morass, on each side of which was an impassable swamp. They were seen by the Judges, when several rods from the house, who therefore had time to make their escape to the mountain.

5. At or about the time the pursuers came to New Haven, and perhaps a little before, to prepare the minds of the people for their reception, the Rev. Mr. Davenport preached publicly from this text. ISAIAH, xvi. 3, 4.—*Take counsel, execute judgment, make thy shadow as the night in the midst of the noonday; hide the outcasts, betray not him that wandereth. Let mine outcasts dwell with thee, Moab; be thou a covert to them from the face of the spoiler.* This doubtless had its effect, and put the whole town upon their guard, and united the people in caution and concealment.

6. To show the dexterity of the Judges at fencing, the following story is told: that while at Boston, there appeared a fencing master, who, on a stage erected for the purpose, walked it for several days, challenging and defying any one to play with him at swords; at length, one of the Judges disguised in a rustic dress, holding in one hand a cheese, wrapped in a napkin, for a shield, with a broomstick, the mop of which he had besmeared with dirty puddle water as he passed along—thus equipped, mounted the stage. The fencing master railed at him for his impudence, asked him what business he had there, and bid him begone. The Judge stood his ground, upon which the gladiator made a pass at him with his sword to drive him off—a rencounter ensued—the Judge received the sword into the cheese, and held it until he drew the mop of the broom gently over his mouth and gave the gentleman a pair of whiskers. He made another pass, and plunging his sword a second time, it was caught and held in the cheese, whilst the mop was drawn gently over his eyes. At a third lunge, it was again caught and held in the cheese, until the Judge had rubbed the broom all over his face. Upon this the gentleman let fall his small sword, and took up the broad sword. The Judge then said, “stop, sir; hitherto, you see, I have only played with you, and not attempted to harm you; but if you come at me now with the broad sword, know that I will certainly take your life.” The firmness with which he spoke struck the master, who, desisting, exclaimed, “Who can you be? You must be either Goffe, Whalley, or the Devil, for there was no other man in England that could beat me.”

On the 13th of October, 1664, they left New Haven, and arrived at Hadley the latter part of the same month. During their abode at Hadley, the famous Indian war, called “*King Philip's war*,” took place. The pious congregation of Hadley were observing a fast on the occasion of this war, and being at public worship in the meeting house, Sept. 1st, 1675, were suddenly surrounded by a body of Indians. It was customary in the frontier towns, and even at New Haven, in these Indian wars, for a select number of the congregation to go armed to public worship. It was so at Hadley at this time. The people immediately took to their arms, but were thrown into great confusion. Had Hadley been taken, the discovery of the Judges would have been unavoidable. Suddenly, and in the midst of the people, there appeared a man of very venerable aspect, and different from the inhabitants in his apparel, who took the command, arranged and ordered them in the best military manner. Under his direction, they repelled and routed the enemy, and thereby saved the town. He immediately vanished, and the inhabitants could account for the phenomenon in no other way, but by considering that person as an angel sent by God, upon that special occasion for their deliverance; and for some time after said and believed, that they had been saved by an angel. Nor did they know otherwise, till fifteen or twenty years after, when at length it became known at Hadley that the two Judges had been secreted there. The angel was Goffe, for Whalley was superannuated in 1675. The last account of Goffe is from a letter dated ‘*Ebenezer*, (the name they gave their several places of

abode,) April 2, 1⁶⁷69.' Whalley had been dead some time before. The tradition at Hadley is, that they were buried in the minister's cellar, and it is generally supposed that their bodies were afterwards secretly conveyed to New Haven, and placed near Dixwell's. The supposition is strongly confirmed, by three stones yet remaining in the old burying ground, at New Haven, in the rear of the Center church, which are marked E. W. for Whalley, M. G. for Goffe, and J. D. Esq. for Dixwell.

The following is a correct copy of each of the E. W. stones. The reader will observe in the cut, that the date on Whalley's head-stone may be read 1658, which was about twenty years before his death. The extension, however, of the line, in a direct course beyond the curve of the 5, has the aspect of design for concealment. The inscription upon the foot-stone E. W. and the three figures 16-8 are plain and distinct, but the intermediate figure is obscure. In the date of the foot-stone, the 5 is discernible; the upper line of the 7 is also obvious; it may be read, therefore, 1658 or 1678, and there is little doubt but that the latter was the date intended, as, according to Goffe's letter to his wife, Whalley died about this time.

HEAD STONE, 2 feet wide and high, 8 inches thick.—Dark blue stone.

FOOT STONE.

Upon the same principle of designed deception, the M. on the M. G. stone may be taken for an inverted W. and thus W. G. read for William Goffe, which seems more probable, as a deep strong line is drawn under the M. (see cut,) which was evidently intentional. 80, over these initials, may be referred to the year of his death, for his last letter was dated 1679, and he disappeared soon after.*

The object of these inscriptions being so obscure, was doubtless to prevent a discovery of their burial place, by their enemies, who, it was justly feared, if in their power to have obtained the bodies of the regicides, would have carried their resentment beyond the grave.

A royalist historian, in speaking of Goffe, thus remarks: "In 1660, a little before the restoration of King Charles 2d, he betook himself to his heels to save his neck, without any regard had to his majesty's proclamation, wandered about, fearing every one that he met should slay him; and was living at Lausanna in 1664, with Edward Ludlow, Edward Whalley, and other regicides, when John Lisle, another of that number, was there, by certain generous royalists, dispatched. He afterwards lived several years in vagabondship, but when he died, or where his carcass was buried, is as yet unknown to me."

Colonel John Dixwell came from Hadley to New Haven before the year 1672, and was known here by the name of James Davids. During the seventeen years or more in which he lived in New Haven, nothing extraordinary occurred concerning him. From 1674 to 1685, the church had no settled minister with whom he might associate. The Rev. Nicholas Street, the minister at his first coming here, soon died. For above eleven years, the church was destitute of a pastor, and supplied by occasional and temporary preaching only, until Mr. Pierpont's settlement in 1685. With him the Colonel entered immediately into an open and unreserved communication; but this was only for the short space of three or four of the last years of his exile. During this short time, however, there was the greatest intimacy between them, which appears to have been concealed even from the minister's wife. For tradition says, that madam Pierpont, observing their remarkable intimacy, and wondering at it, used to ask him what he saw in that old gentleman, who was so fond of leading an obscure, unnoticed life, that they should be so intimate and take such pleasure in being together, for Mr. Dixwell's house being situated on the east corner of College and Grove streets, and Mr. Pierpont's near the corner of Elm and Temple streets, and their house lots being contiguous and cornering upon one another, they had beaten a path in walking across their lots to meet and converse together at the fence. In answer to his wife's question, Mr. Pierpont remarked, that the old gentleman was a very learned man, and understood more about religion, and all other subjects, than any other person in the place, and that if she knew the value of him, she

1 foot broad, 10 inches high.

* See Stiles' History of the Judges.

would not wonder at their intimacy. Among other traditional anecdotes concerning him, this is one.

“Sir Edmund Andross came into America, and became governor of New York in 1675 to 1684, and of Massachusetts from 1686 to 1689. In one of his tours through the colony of Connecticut, about 1686, attending public worship at New Haven, he observed a venerable old gentleman at meeting, and noticing him closely, discerned something singular in him and suspected him. After meeting he inquired who that person was, and was told that he was a merchant who resided in town. Sir Edmund replied that he knew that he was not a merchant, and became particularly inquisitive about him. Probably Colonel D. was notified of the inquisitiveness of the stranger concerning his person and character, for the Colonel was not seen at meeting in the afternoon.”

In connection with this, another tradition makes mention of a circumstance indicating how obnoxious Sir Edmund was at New Haven, as well as through New England. He being at meeting here, and probably on the same Lord's day as the above, the deacon gave out the 52d psalm to sing, in Sternhold and Hopkins' version, which begins thus :

Why dost thou tyrant boast abroad,
Thy wicked works to praise ?
Dost thou not know there is a God,
Whose mercies last always ?

Why dost thy mind yet still devise
Such wicked wiles to warp ?
Thy tongue untrue, in forging lies,
Is like a razor sharp.

Thou dost delight in fraud and guile,
In mischief, blood, and wrong ;
Thy lips have learned the flattering stile,
O false, deceitful tongue !

Governor Andross felt it as an intended insult upon himself, and after meeting resented it as such, and reprehended the deacon for it. But being told that it was the usage of the church to sing the psalms in course, he excused the deacon and let the matter drop. But it is not improbable, that though this might be the general custom, yet in this instance a psalm was selected for Sir Edmund's contemplation.

Colonel Dixwell carried on no secular business, but employed his time in reading and walking in the groves and woods adjacent to his house. Mr. Pierpont had a large library, from which, as well as from his own collection, he could be supplied with a variety of books. He often spent his evenings at Mr. Pierpont's, and when they were by themselves, retired to his study, where they indulged themselves with great familiarity and humor, and had free and unrestrained conversation upon all matters, whether of religion or politics. But when in company, Mr. Pierpont behaved towards Colonel D. with caution and reserve. The Colonel spent much of his retirement in reading history, and as a token of his friendship for Mr. Pierpont, he, in his last will, presented him with Raleigh's History of the World.

After a pilgrimage of twenty nine years in exile from his native country, and banishment into oblivion from the world, of which seventeen years at least, probably more, were spent in New Haven, by the name of James Davids, Esq. Colonel Dixwell died in this place.

He and all the other Judges lived and died in the firm expectation of a revolution in England. This had actually taken place the November before his death, but the news not having arrived, he died ignorant of it, about a month before the seizure of Sir Edmund Andross at Boston. At his death, he discovered his true character to the people, and owned the name of John Dixwell, but requested that no monument should be erected at his grave, giving an account of his person, name, and character, alledging as a reason, "lest his enemies might dishonor his ashes"—requesting that only a plain stone might be set up at his grave, inscribed with his initials, J. D. Esq., with his age and time of his death. Accordingly, a plain rough stone was erected at his grave, close by the graves of Governor Eaton and Governor Jones, charged with this inscription, as at first put up and engraved by his friends. The following is a correct copy, both of the shape of the stone and the inscription upon it.

2½ feet high and broad, 5 inches thick:—red stone.

Whilst residing at New Haven he was twice married, and at his death he left a wife and two children. His will was afterwards exhibited, approved and recorded in the probate office.

President Stiles, in his History of the Judges, says: "So late as the last French war, 1760, some British officers passing through New Haven, and hearing of Dixwell's grave, visited it, and declared with rancorous and malicious vengeance, that if the British ministry knew it, they would even then cause their bodies to be dug up and vilified. Often have we heard the crown officers aspersing and vilifying them; and some, so late as 1775, visited and treated the graves with marks of indignity too indecent to be mentioned." It was especially so in Queen Anne's time, and even in that of the Hanoverian family, there has been no time in which this grave has not been threatened by numerous sycophantic crown dependents, with indignity and ministerial vengeance.

South view of Fair Haven, (western part.)

The above is a representation of that part of Fair Haven which lies within the present city limits of New Haven. This flourishing village is situated about two miles eastward of the Court House, on both sides of the Quinnipiac, and contains about one thousand inhabitants. The village, which is nearly equally divided, is connected by a bridge, which is seen in the distance, on the right of the engraving. The Methodist church, erected in 1835, is seen on the left; the Congregational church appears in the central part of the engraving. A building with a small tower is seen a little to the left; this is the "Collegiate and Practical Institute," which has just been erected, and where all the higher branches of education are intended to be taught.

The oyster trade is the leading business of the inhabitants, and is steadily increasing. It commences in October and closes in April. "There are oysters brought here from different places, but the largest amount is from Virginia. The last season (1835 and 1836) there were brought from the North river 12,000 bushels, making 130,841 bushels brought here in the season." Many of these oysters are laid down in beds. The quantity taken in Fair Haven varies from 20,000 to 40,000 bushels yearly: from 300 to 400 boats are engaged in taking them. In the summer of 1835 there were brought into the village 5,000 bushels of round clams, of which 2,000 were caught in the vicinity. It is estimated that there are dug on our shores, every season, 4,000 bushels of long clams. There are twenty vessels owned in this village, whose whole amount of tonnage is 1,188 tons: six of these are engaged in the West India trade a part of the season, and the others in the coasting business.

There is a large amount of excellent stone, for building and other purposes, found in the village; and the getting it out during the spring

and summer season receives considerable and increasing attention. In 1835, there were quarried by different companies 270,000 solid feet. "This year (1836) there is going into operation the manufacture of lime from oyster shells; and the person who is engaged in the business calculates there may be made 200,000 bushels in a year." "The population and business in general is constantly increasing, and there is every promise of this being one of the most prosperous villages in the State."—This place was formerly called Dragon, from a sandy point of that name, about forty rods below the bridge, on the eastern side of the river. The tradition is, that at the time of the first settlement of New Haven this point was a place of resort for seals, which lay here and basked themselves in the sun. At that time these animals were called *dragons*, hence the name Dragon Point.

That part of New Haven which lies between the nine original squares and Mill River, is called the *New Township*. Within a few years this part of the city has rapidly increased, and contains two of the most extensive coach-making establishments in this country. There are within the city limits twelve coach-making establishments; and it is estimated that the value of the carriages manufactured at present, will amount to about half a million of dollars annually. There are also four coach-spring and step manufactories, and five plating establishments. The manufacture of boots and shoes, ready made clothing, cabinet work, chairs, &c., are important branches of industry in this place. There has been put in operation an establishment for the manufacture of carpeting of a superior quality; also, three iron founderies. There are many other articles besides those mentioned, manufactured in the place. It is believed that there is not in the Union a body of working men more distinguished for their general intelligence and morality, than are the mechanics of New Haven.

The following is a list of the planters, and the persons numbered in their families, with an estimate of their estates, in 1643.

It was ordered that every planter should give in the names of the heads or persons in his family, wherein his wife, together with himself and children only were reckoned, with an estimate of his estate, according to which he will pay his proportion in all rates and public charges, from time to time to be assessed for civil uses, and expect lands in all divisions which shall generally be made to the planters.

The foregoing planters, likewise those who omitted to return their names to the Secretary, were entered in a book, and the quantity of land which each owned, and amount of taxes assessed, were annexed to their respective names. This book answered the purpose of a grand list for many years in succession. Whenever any planter disposed of his land, it was passed to his credit on said book, and diminished his taxes in proportion to the quantity sold; each purchaser was made debtor, and his taxes were increased in proportion to the quantity bought.

That commerce may the better be carried on betwixt man and man in those parts where money is scarce,—It is ordered, that Spanish money, called pieces of eight, shall pass here as they do in some other parts of the country, at 5s. a piece. And that Indian Wampom shall pass, the white at 6 a penny, and the black at 3 a penny.

And forasmuch as the public occasions require that a Rate should be levied forthwith, it was ordered that all the rates already due, and the rates due in April next, shall be paid in to the Treasurer at his own house within one month after the date hereof, in Money, Beaver, Wampom or Corn, in good Wheat at 4s. per bushel, in Rye and Pease at 3s. 4d. per bushel; and if any pay in Indian Corn, at 2s. 8d. per bushel—in Butter, Cheese, and great Cattle, moderately appraised.

New Haven having been exceedingly disappointed in trade, and sustained great damages at Delaware, and the large estates which they brought into New England rapidly declining, this year made uncommon exertion, as far as possible to retrieve their former losses. Combining their money and labors, they built a ship at Rhode Island, of 150 tons; and freighted her for England, with the best part of their commercial estates. Mr. Gregson, Capt. Turner, Mr. Lamberton, and five or six of their principal men embarked on board. They sailed from New Haven in January, 1647. They were obliged to cut through the ice to get out of the harbor. The ship foundered at sea, and was never heard of after she sailed.

According to the belief of the inhabitants at that period, this ship was seen in the air after she was lost. We take the following account as we find it in Mather's Magnalia. Mather, hearing of the circumstances, wrote to his friend, the Rev. Mr. Pierpont, for information, and received from that gentleman the following answer:—

Reverend and Dear Sir—

In compliance with your desires, I now give you the relation of that *apparition of a ship in the air*, which I have received from the most credible, judicious and curious surviving observers of it.

In the year 1647, besides much other lading, a far more rich treasure of passengers, (five or six of which were persons of chief note and worth in New Haven,) put themselves on board a new ship, built at Rhode Island, of about 150 tons; but so walty, that the master (Lamberton) often said she would prove their grave. In the month of January, cutting their way through much ice, on which they were accompanied with the Reverend Mr. Davenport, besides many other friends, with many fears, as well as prayers and tears, they set sail. Mr. Davenport, in prayer, with an observable emphasis, used these words: *Lord if it be thy pleasure to bury these our friends in the bottom of the sea, they are thine; save them!* The spring following no tidings of these friends arrived with the ships from England: New Haven's heart began to fail her: this put the goodly people on much prayer, both publick and private, *that the Lord would (if it was his pleasure) let them hear what he had done with their dear friends, and prepare them with a suitable submission to his Holy Will.* In June next ensuing, a great thunder storm arose out of the north west; after which (the hemisphere being serene) about an hour before sun-set, a ship of like dimensions with the aforesaid, with her canvass and colors abroad, (though the wind northerly,) appeared in the air coming up from our harbour's mouth, which lies southward from the town, seemingly with her sails filled under a fresh gale, holding her course north, and continuing under observation, sailing against the wind for the space of half an hour.

Many were drawn to behold this great work of God; yea, the very children cried out, *There's a brave ship!* At length, crouding up as far as there is usually water sufficient for such a vessel, and so near some of the spectators, as that they imagined a man might hurl a stone on board her, her main-top seemed to be blown off, but left hanging in the shrouds; then her mizen-top; then all her masting seemed blown away by the board: quickly after the hulk brought unto a careen, she overset, and so vanished into a smoaky cloud, which in some time dissipated, leaving, as every where else, a clear air. The admiring spectators could distinguish the several colours of each part, the principal rigging, and such proportions as caused not only the generality of persons to say, *This was the mould of their ship, and this was her tragick end:* but Mr. Davenport also in publick declared to this effect: *That God had condescended, for the quieting of their afflicted spirits, this extraordinary account of his sovereign disposal of those for whom so many fervent prayers were made continually.*

Thus I am, Sir, your humble servant,

JAMES PIERPONT.

The loss of this ship, with the former losses which the company had sustained, broke up all their expectation with respect to trade, and as they conceived themselves disadvantageously situated for husbandry, they adopted the design of leaving the country. Accordingly they entered into treaties for the city of Galloway in Ireland, which they de-

signed to have settled, as a small province for themselves. They were however disappointed with respect to all these designs, and their posterity, who they feared would be reduced to beggary, made respectable farmers, and flourished no less than their neighbors.

It appears that the first planters had no written code of laws. The court determined all differences, &c., according to their views of justice and propriety, as occasion required.

The following extracts are taken from the ancient Records of New Haven during this period.

At a Court held at New Haven, A. D. 1643.—Andrew Low, jun., for breaking into Mr. Laing's house, where he brake open a cupboard and took from thence some strong Water, and 6*d.* in money, and ransackt the house from roome to roome, and left open the doors, for which fact being committed to prison, broke forth and escaped, and still remains horrible obstinate and rebellious against his parents, and incorrigible under all the means that have been used to reclaim him. Whereupon it was orderd that he shall be as severly whipt as the rule will bear, and work with his father as a prisoner, with a lock upon his leg so that he may not escape.

December 3d, 1651.—It was propounded that some safer way might be found out to Connecticut, that the danger of East River may be avoyded. The new way was desired to be viewed again, as William Bradley offered to lend his cannow to lie in the East River, if the town will find ropes to draw it to and agayne.

A Court holden 3d November, 1639.—It was orderd that Mr. Hopkins shall have two hogsheds of lime for his present use, and as much more as will finish his house as he now intends itt, he thinking that two hogsheds more will serve.

It is orderd, that a meeting-house shall be built forthwith, fifty foote square; and that the carpenters shall fall timber where they can find it, till allotment be layed out, and men know their proprieties.

It is orderd that Mr. Gregson and Mr. Evance shall have fower dayes liberty after this day to square their timber, before the former order shall take hold of them.

It is orderd, that Mr. Eaton, Mr. Davenport, Robert Newman, Mathew Gilbert, Capt. Turner and Thomas Ffugill, shall from henceforward have the disposing of all house lotts, yett undisposed of about this towne, to such persons as they shall judge meete for the good of the plantation; and thatt none come to dwell as planters here without their consent and allowance, whether they come in by purchase or otherwise.

It is orderd, that every one that bares armes shall be completely furnished with arms, (viz.) a muskett, a sword, bandaleers, a rest, a pound of powder; 20 bullets fitted to their muskett, or 4 pound of pistoll shott, or swan shott at least, and be ready to show them in the market place upon Monday the 16th of this mouthe, before Captaine Turner and Lientenant Seeley, under the penalty 20*s.* fine for every default or absence.

4th of December, 1639.—It is orderd, that Thomas Saule shall agree with Goodman Spinnage before the next Court, or else the Court will determine the difference between them.

Roger Duhurst and James Stewart are enjoyned to make double restitution to John Cockerill for five pound and seventeen shillings which they stole out of his chist on the Lord's day in the meeting time, and they being servants to the said Cockerill, for which aggravation they were whipped also.

Thomas Manchester, servant to Mr. Perry, being accused by his master for being druncke, and for giving his master uncomely language, for which his master having given him some correction, the Court (ouely) caused him to be set in the stocks for a certain time.

Nicholas Tamer, servant to the said Mr. Perry, for drunkenness and abusing his master in wordes was whipped.

A General Court, 4th January, 1639.—It is agreed by the towne and accordingly orderd by the Court, that the Neck shall be planted or sown for the tearme of seaven yeares, and thatt John Brockett shall goe about laying it out, for which and all differences betwixt party and party aboute ground formerly broke up and planted by English there, shall be arbitrated by indifferent men, which shall be chosen to that end.

It is orderd, that some speedy course shall be taken to keepe hogs out of the neck.

It is orderd, that a convenient way to the Hay-place be left common for all the towne.

It is orderd, that no cattell belonging to this towne shall goe without a keeper after the first of May next.

A Court, holden February 5th, 1639.—It is ordered, that brother Andrews, bro. Kimberley, Wm. Eves, and Sergeant Beckley, shall assist Mr. Ling to ripen Goodman Trap's business against the next Courte, concerning his demaunds for certaine moneys which he disbursed for bringing cattell from the Bay, appertaining to divers persons.

It is ordered, that brother Andrews shall detaine so much of Robert Campion, his wages in his hands, as may secure a debt of £3 which Mr. Mouland demands of the said Robert.

It is ordered, that Mr. Mouland shall pay to Mr. Perry 20s. which he owes to him.

It is ordered, that Mr. Wilks shall pay five bushells and a half of Indian corne to Thomas Buckingham, for corne destroyed by Mr. Wilks his hogs.

Isaiah, Captain Turner's man, fined £5 for being drunk on the Lord's day.

Wm. Bromfield, Mr. Malbon's man, was sett in the stocks for prophaning the Lord's day and stealing wine from his master, which he drunk and gave to others.

Elice, Mr. Eaton's boy, was whipped for stealing a sow and a goate from his master and selling them.

David Anderson was whipped for being drunke.

John Fenner, accused for being drunke with strong waters was acquitted, itt appearing to be of infirmity, and occasioned by the extremty of the colde.

Mr. Mouland, accused of being drunke, butt nott clearly proved, was respited.

Peter Browne, Licensed to bake to sell, so long as he gives no offence in it justly.

18th February, 1639.—John Charles forbidden to draw wine, because there hath been much disorder by it.

Goodman Love was whipped and sent out of the plantation, being not onely a disorderly person himselfe, but an encourager of others to disorderly drinking meetings.

George Spencer being prophane and disorderly in his whole conversation, and an abettor of others to sin, and drawing on others into a conspericie to carry away the Cock to Virginia was whipped, and sent out of the plantation.

John Proute, Hen. Brasier and Will. Broomfield, was whipped for joyning in the aforesaid conspericie, and the said Hen. and Wm. were ordered to weare irons during the magistrate's pleasure.

At a General Court held the 1st of the 7th month, 1640.—It is ordered, that none in this plantation shall either sell or lett a lott to any stranger, for yeares, without allowance from the Courte.

A Courte held at New Haven the 3d of the 7th month, 1642.—Mathew Wilson, for killing a dog of Mr. Perry's willfully and disorderly, fined 20s. for his disorder, and ordered to pay 20s. damage to Mr. Perry, which 40s. Edward Chipperfield undertooke to see pay'd by the last of September next.

8th Month, 1642.—It is ordered, that whosoever findes any things thatt are Lost shall deliver them to the Marshall, to be kept safe till the owners challenge them.

2d November, 1642.—Jervas Boykin is ordered to pay unto George Badcocke the sum of 20s. for taking his cannow without leave.

It is ordered, that those who have ffarmes att the River, called stony River, shall have liberty to make a sluice in the River for their own convenience.

7th December, 1642.—Fforasmuch as John Owen hath had some damage done in his corne by hogs, occasioned through the neglect of Mr. Lamberton. John Bud and Will Preston, in not making up their fence in season, It is therefore ordered, thatt the said Mr. Lamberton, John Bud and Will Preston shall make satisfaction to the said John Owen for the damage done; (viz.) Eight days worke and two pecks of Corne, which is to be pay'd according to the severall apportions of fence unset up respectively.

In 1640, Robert Feaks and Daniel Patrick brought Greenwich, in behalf of New Haven. Another large purchase, sufficient for a number of plantations, was made by Capt. Turner, agent for New Haven, on both sides of Delaware bay or river. This purchase was made with a view to trade, and for the settlement of churches in gospel order and purity. The colony of New Haven erected trading houses upon the lands, and sent nearly fifty families to make settlements upon them. The settlements were made under the jurisdiction of New Haven, and in close combination with that colony, in all fundamental articles.

The first Newspaper issued in New Haven was the *Connecticut Gazette*, published at its commencement by *James Parker*, near the Hay-market; afterwards by *James Parker & Co.*, with whom it is said Dr. Franklin was connected. The earliest number before us, (perhaps the oldest one in existence,) is No. 23, dated [Saturday] October 18, 1755, from which it would seem that it first appeared in April, 1755. It is a sheet of 4 pages, each containing two columns; and measures, when opened, $10\frac{1}{4}$ inches in length, and $15\frac{1}{2}$ in breadth. It gives "A List of the Representatives returned in the General Assembly, now met at New Haven:" their number is 103, and the number of towns by them represented, 53. The following advertisements, notices, &c. are copied from various numbers of this paper.

NEW HAVEN:

Printed by J. PARKER & COMPANY, at the Post Office, near Captain Peck's at the Long Wharf, where this paper may be had at 2s. 6d. *Lawful Money*, per quarter, if sent by the special post; or 1s. 10d. *Half Penny*, without Postage; the first Quarter to be paid at Entrance. *Note.*—Thirteen Papers go to a Quarter, none to stop but at the end of the Quarter. *Saturday, October 1st, 1757.*

New Haven, June 16th, 1758.

Next week will be publish'd proposals for sending by Subscription a post to Albany, during the Summer, and for paying the postage of all Letters to the Connecticut Soldiers in the Army. Towards which the Printers of this paper will advance *Five Pounds* lawful money. This is mentioned now, that Gentlemen may be as expeditious as possible in sending in subscriptions.

New Haven, January 22d, 1761.

His Honour the Governor, having received Dispatches, confirming the accounts of the death of our late most Gracious Sovereign, King George the Second, on the 25th day of October, 1760:—and other Dispatches also, for proclaiming his present Majesty. In pursuance thereof, yesterday issued orders for the Militia to appear under arms.

Whereupon (though many of them from considerable distances,) two troops of Horse, and Four companies of foot, with great dispatch and alertness, were this day before noon, drawn up on the Great Square, before the Town House; on notice whereof his Honour, the Governor, with the Gentlemen of the Council, (on this occasion convened,) with many other Gentlemen of Character and Distinction, were escorted by Capt. Peck's company of foot, from the Council Chamber to the place of Parade; where in the audience of a numerous Concourse (the severity of the season notwithstanding,) *with great alacrity* convened.

His Sacred Majesty was proclaimed by reading and proclaiming aloud the following

P R O C L A M A T I O N .

WHEREAS, it hath pleased Almighty God to call in his Mercy our late Sovereign Lord King George the Second, of blessed and Glorious memory, by whose decease the Imperial Crown of Great Britain, France, and Ireland, as also the supreme dominion and sovereign right of the Colony of Connecticut in New England, and all other his late Majesty's dominions in America, are solely and rightfully come to the High and Mighty Prince George, Prince of Wales; We therefore the Governor and Company, assisted with numbers of the principal Inhabitants of this Colony, do now, hereby with one full voice and consent of tongue and heart, publish and proclaim, that the high and mighty Prince George, Prince of Wales, is now by the death of our late sovereign, of happy and glorious memory, become our only lawful and rightful Liege, Lord George the Third, by the Grace of God, King of Great Britain, France and Ireland, Defender of the Faith, Supreme Lord of the said Colony of Connecticut in New England, and all other his late Majesty's dominions and Territories in America, to whom we do acknowledge all Faith and constant obedience, with all hearty and humble affection; beseeching God, by whom the Kings and Queens do reign, to bless the Royal King George the Third, with long and happy years to reign over us.

Given at the Council Chamber at New Haven, the Twenty-second day of January, in the first year of the reign of our Sovereign Lord *George*, The third King of Great Britain, France and Ireland, Defender of the Faith, &c. Annoque Domini 1761. *GOD SAVE THE KING.*

Which proclamation was subscribed by his Honour the Governor, Deputy Governor and the Gentlemen of the Council, and many other Gentlemen of a Civil, Military and Ecclesiastical Character, &c. Which was followed by three general Huzzas, and a Royal salute of 21 Cannon, the Governor, Deputy Governor, and Council with numbers of Clergy, and other Gentlemen of Distinction, were again escorted to Mr. Bear's; where an elegant entertainment was provided on the occasion; and his Majesty's, the Royal Family's, the King of Prussia's, and other loyal healths were drank; and the Militia, after proper refreshment, seasonably discharged; and the whole conducted and concluded with great Decency and Order, and great demonstrations of joy.

Whereas on last Tuesday evening, a number of persons gathered together near the Colledge, and there, and round the town, fired a great number of guns, to the great disturbance and terror of his Majesty's subjects, and brake the Colledge windows and fences, and several of them had gowns on, with a design to bring a scandal upon the Colledge. These may certify, that I and the Tutors, several times walked among, and near the rioters, and could not see any scholars among them; but they appeared to be principally, the people of the town with a few strangers.

September 12, 1761.

T. CLAP.

TO THE PRINTER.

Please to insert the following in your next.

I have now the pleasure of being able to inform the public, that the haws, or thorn seeds, which I sowed last Autumn, after having been buried on the ground, lay the space of one year before the sowing (as mentioned by me, in a late newspaper,) are now fairly come up, and growing, so that 'tis no longer a doubt, that the nature of those seeds is to remain one year and a half after gathering before they spring and grow.

Yours, &c.

J. INGERSOLL.

May 8th, 1762.

New Haven, March 5, 1762.

Last Saturday afternoon, David Slusher and James Daley were cropt, branded with the letter B, on their Fore-heads, and received each of them Fifteen Stripes on their naked Bodies, pursuant to their sentences, for sometime since breaking open, and robbing the shop of Mr. *Philo Mills*, of Derby.

A Likely *Negro Wench* and *Child* to be sold.—Inquire of the Printer.

To be sold by the Subscriber of Branford, a likely *Negro Wench*, 18 years of age, is acquainted with all sorts of House Work; is sold for no fault. June 15, 1763.

New Haven, July 4, 1763.

We the subscribers, Select men of the town of New Haven, do hereby give notice to the Inhabitants of said town that there will be a Vendue on the 2d Monday of August next, at the State-house in said Town, at four of the Clock in the afternoon, where those persons which are maintained by the Town will be set up, and those persons who will keep them at the cheapest rate may have them. Also a number of Children will be bound out, until they are either 14 or 21 years of age if any persons appear to take them.

WILLIAM GREENOUGH,	} <i>Select-Men.</i>
AMOS HITCHCOCK,	
JOHN MIX,	
THOMAS HOWELL,	

A year is past since the printer of this paper published proposals for reviving the *Connecticut Gazette*. 'Tis needless to mention the reasons why it did not appear sooner. He returns thanks to all those who favored him at that time, and hope they are yet willing to try how far he is able to give them satisfaction. A sample of it is now sent abroad, in order to collect a sufficient number of Subscribers barely to pay the charge of carrying it on. When such a number appears—it shall be printed weekly and delivered to subscribers in town and Country, at the rate of *two-pence*, for each paper, which is *Eight Shillings and Eight Pence*, for one year. And no addition shall be made to the price when the Stamp Act takes effect, if it is then encouraged so as to be afforded at that rate.—Subscribers are not desired to engage for any particular time, so that they can stop it when they please.—A special post is appointed to carry it out of the common Post-Roads.—Advertisements shall be printed at a moderate Price, according to their length.—All kinds of Provision, Fire Wood, and other suitable country Produce will be taken as pay, of those who cannot spare money, if delivered at the Printer's Dwelling House, or at any other place which may accidentally suit him.

The Printer hereby invites the benevolent of all parties to send him an account of whatever novelties they think may be useful to their countrymen. The shortest hints on such subjects, however written, will be gratefully received and faithfully communicated to the Public if convenient.

Besides the help he hopes to receive from different Correspondents in this colony and elsewhere, the Printer has sent for three sorts of English Magazines, the Monthly Review of New Books, and one of the best London News-papers; these, together with American Intelligence from Nova Scotia to Georgia, inclusive, and also from Canada, cannot fail to furnish him with a constant stock of momentous materials and fresh advices to fill this Gazette.

BENJAMIN MECOM, at the
Post Office, New Haven.

July 5, 1765.

Just Imported from Dublin, in the brig Darby,

A parcel of Irish Servants both Men and Women, and to be sold cheap, by Israel Boardman, at Stanford. 5th January, 1764.

TO THE GOOD PEOPLE OF CONNECTICUT.

When I undertook the office of Distributor of Stamps for this colony, I meant a service to you, and really thought you would have viewed it in that light when you come to understand the nature of the stamp act and that of the office; but since it gives you some uneasiness, you may be assured if I find (after the act takes place, which is the first of November) that you shall not incline to purchase or make use of any stamp Paper, I shall not force it upon you, nor think it worth my while to trouble you or myself with any exercise of my office; but if, by that time, I should find you generally in much need of the stamp paper, and very anxious to obtain it, I shall hope you will be willing to receive it of me, (if I shall happen to have any) at least until another person more agreeable to you can be appointed in my room.

I cannot but wish you would think more how to get rid of the stamp act than of the Officers who are to supply you with the Paper, and that you had learnt more of the nature of my office, before you had undertaken to be so very angry at it.

I am yours, &c.

J. INGERSOLL.

New Haven, 24th August, 1765.

New Haven, Sept. 20, 1765.

On the 17th inst. the Freemen of this town met here. After choosing Roger Sherman, Esq. and Mr. Samuel Bishop, to represent them in the General Assembly to be holden next month, they unanimously desired those Representatives to use their utmost endeavors, (at the assembly now sitting at Hartford, and also at the ensuing Session here,) to obtain a repeal of the Stamp Act. The Stamp Master General of this Colony was at the said meeting, where these words were read aloud, "Likewise voted that the Freemen present earnestly desire Mr. Ingersoll to resign his Stamp Office immediately." Numerous were the signs of consent to this vote, when a gentleman condemned it as needless and inconsistent after their former proceedings. The Stamp Officer then arose and declared in the strongest terms, that he would not resign till he discovered how the General Assembly were in that respect. 'Tis said he is gone to Hartford in order to make that important discovery; and that he has wrote to New York, requesting that the Stamp Paper may be detained there, 'till they are wanted here.

BENEDICT ARNOLD—Wants to buy a number of large genteel fat Horses, Pork, Oats and Hay.—And has to sell choice Cotton and Salt, by quantity or retail; and other goods as usual.

New Haven, January 24, 1766.

MR. PRINTER: Sir—As I was a party concerned in whipping the Informer, the other day, and unluckily out of town when the Court set, and finding the affair misrepresented much to my disadvantage and many animadversions thereon, especially in one of your last by a very fair candid gentleman indeed as he pretends; after he had insinuated all that malice could do, adds, that he will say nothing to prejudice the minds of the people.—He is clearly seen through the Grass, but the weather is too cold for him to bite.—To satisfy the public, and in justice to myself and those concerned, I beg you'd insert in your next, the following detail of the affair.

The Informer having been a voyage with me, in which he was used with the greatest humanity, on our return was paid his wages to his full satisfaction; and informed me of his intention to leave the town that day, wished me well, and departed the town as I imagined.—But he two days after endeavored to make information. to a Custom

House Officer; but it being holy time was desired to call on Monday, early on which day I heard of his intention, and gave him a little Chastisement; on which he left the town; and on Wednesday returned to Mr. Beecher's, where I saw the fellow, who agreed to and signed the following acknowledgment and Oath.

I, Peter Boole, not having the fear of God before my Eyes, but being instigated by the Devil, did on the 24th instant, make information, or endeavor to do the same, to one of the Custom House Officers for the Port of New Haven, against *Benedict Arnold*, for importing contraband goods, do hereby acknowledge I justly deserve a Halter for my malicious and cruel intentions.

I do now solemnly swear I will never hereafter make information, directly or indirectly, or cause the same to be done against any person or persons, whatever, for importing Contraband or any other goods into this Colony, or any Port of America; and that I will immediately leave New Haven and never enter the same again. *So help me God.*
New Haven, 29th January, 1766.

This was done precisely at 7 o'clock, on which I engaged not to inform the sailors of his being in town, provided he would leave it immediately according to our agreement. Near four hours after I heard a noise in the street and a person informed me the sailors were at Mr. Beecher's. On enquiry, I found the fellow had not left the town. I then made one of the party and took him to the Whipping-Post, where he received near forty lashes with a small cord, and was conducted out of town; since which on his return, the affair was submitted to Col. David Wooster and Mr. Enos Allen, (Gentlemen of reputed good judgment and understanding,) who were of opinion that the fellow was not whipped too much, and gave him 50s. damages only.

Query.—Is it good policy; or would so great a number of People, in any trading town on the Continent, (New Haven excepted,) vindicate, protect and caress an informer—a character particularly at this alarming time so justly odious to the Public? Every such information tends to suppress our trade, so advantageous to the Colony, and to almost every individual both here and in Great Britain, and which is nearly ruined by the late detestable stamp and other oppressive acts—acts which we have so severely felt, and so loadly complained of, and so earnestly remonstrated against that one would imagine every sensible man would strive to encourage trade and discountenance such useless, such infamous Informers. I am Sir, Your humble servant,
BENEDICT ARNOLD.

New Haven, May 23, 1766.

“Last Monday morning early, an express arrived here with the charming news; soon after which many of the Inhabitants were awakened with the noise of small-arms from the different quarters of the town; all the Bells were rung; and cannon roared the glad tidings. In the afternoon the Clergy publicly returned thanks for the blessing and a company of Militia were collected under the principal direction of Colonel Wooster. In the evening were Illumination, Bonfire and dances—all without any remarkable indecency or disorder. The arrival of the regular Post from Boston last night, has completed our joy for the wise and interesting repeal of the stamp act.—Business will soon be transacted as usual in this loyal Colony.—In short, every thing in nature seems to wear a more cheerful aspect than usual—to a great majority.”

The news of the battle of Lexington arrived at New Haven about noon, and Capt. Benedict Arnold,* afterwards General Arnold, who was at the time commander of the Governor's Guards, immediately called out his company, and proposed their starting for Lexington, to join the American army as volunteers; about forty of them consented to accompany their commander. Being in want of ammunition, Arnold requested the town authorities to furnish the company, which they refused to do. The next day, immediately before they started, Arnold marched his company to the house where the select men were sitting, and after forming them in front of the building, sent in word that if the keys of the powder house were not delivered up to him in five minutes, he would order the company to break it open and furnish themselves. This threat had the desired effect, and the keys were delivered up.

* Arnold lived in Water street, near the Ship-Yard. His house is still standing.

They stopped at Wethersfield the second night, where the inhabitants vied with each other in their attentions to them. They took the middle road, through Pomfret, at which place they were joined by General Putnam. On the Guards' arrival at Cambridge, they took up their quarters at a splendid mansion, owned by Lieut. Governor Oliver, who was obliged to flee on account of his attachment to the British cause. This company was the only one on the ground that was complete in their uniform and equipments, and, owing to their soldier-like appearance, were appointed to deliver the body of a British officer, who had been taken prisoner by the Americans, and had died in consequence of wounds received at the battle of Lexington. Upon this occasion, one of the British officers appointed to receive the body from the Guards, expressed his surprise at seeing an American company appear so well in every respect, observing that in their military movements and equipments, "they were not excelled by any of his Majesty's troops."

Whilst at Cambridge, Arnold was sent by Gen. Washington, with 1000 men, with orders to penetrate into Canada, which, after encountering immense obstacles, was finally accomplished. About a dozen of the Guards accompanied him in this expedition. The remainder, after remaining nearly three weeks at Cambridge, returned to New Haven.

During the Revolutionary war, while the enemy held possession of New York, the towns on the sea-board were continually liable to their incursions. In the campaign of 1779, the British seemed to have aimed at little more than to plunder, distress, and consume. The attack on this town took place on Monday, July 5th, 1779, the day on which the citizens were to assemble for the purpose of commemorating the Declaration of Independence. The following account of this event is taken from the Connecticut Journal, published in New Haven, July 7th, 1779.

New Haven, July 7th.

About two o' clock on the morning of the 5th instant, a fleet consisting of the Camilla and Scorpion men of war, with tenders, transports, &c. to the number of 48, commanded by Commodore Sir George Collier, anchored off West Haven. They had on board about 3000 land forces, commanded by Major Gen. Tryon; about 1500 of whom, under Brigadier Gen. Garth, landed about sun-rise on West Haven point. The town being alarmed, all the preparation which the confusion and distress of the inhabitants, and a necessary care of their families would permit, was made for resistance. The West bridge, on Milford road, was taken up, several field pieces were carried thither and some slight works thrown up for the defense of that pass. The division under Gen. Garth being landed, immediately began their march towards the town. The first opposition was made by about 25 of the inhabitants, to an advanced party of the enemy of two companies of light infantry. These, though advancing on the height of Milford hill, were attacked with great spirit by the handful of our people, driven back almost to West Haven, and one of them was taken prisoner. The enemy then advanced in their main body, with strong flanking parties, and two field pieces: and finding a smart fire kept up from our field pieces at the

bridge aforesaid, chose not to force an entrance to the town by that, the usual road, but to make a circuitous march of nine miles, in order to enter by the Derby road. In this march our small party on Milford hill, now increased to perhaps 150, promiscuously collected from several companies of the militia, had a small encounter with the enemy's left flank, near the Milford road, in which was killed their adjutant *Campbell*,* the loss of whom they lamented with much apparent sensibility. Our people on the hill, being obliged by superior numbers to give way, kept up a continual fire on the enemy, and galled them much, through all their march to Thomson's bridge on the Derby road. In the mean time, those who were posted at the West bridge, perceiving the movements of the enemy, and also that another large body of them had landed at the South End, on the east side of the Harbor, quitted the bridge and marched thence to oppose the enemy at Thomson's bridge. But by the time they had reached the banks of the river, the enemy were in possession of the bridge, and the places at which the river is here fordable; yet having received a small accession of strength by the coming in of the militia, they gave the enemy a smart fire from two field pieces and small arms, which continued with little abatement, till the enemy were in possession of the town. Our people being obliged to retreat, either to the fields north and west of the town, or through the town across the Neck bridge, the enemy entered the town between 12 and 1 o'clock. In the mean time, the division of the enemy, before mentioned to have landed at South End, which was under the immediate command of Gen. Tryon, was bravely resisted by a small party of men, with one field piece, who, besides other execution, killed an officer of the enemy, in one of their boats at their landing. This division marched up by land, and attacked the fort at Black Rock; at the same time their shipping drew up and attacked it from the harbor. The fort had only 19 men, and 3 pieces of artillery, yet was defended as long as reason or valor dictated, and then the men made good their retreat.

The town being now in full possession of the enemy, it was, notwithstanding the subjoined proclamation, delivered up, except a few instances of protection, to promiscuous plunder: in which, besides robbing the inhabitants of their watches, money, plate, buckles, clothing, bedding and provisions, they broke and destroyed their household furniture to a very great amount. Some families lost every thing their houses contained: many have now neither food nor clothes to shift.

A body of militia sufficient to penetrate the town, could not be collected that evening: we were obliged therefore to content ourselves with giving the enemy every annoyance in our power, which was done with great spirit for most of the afternoon at and about the *Ditch-corner*.

* His grave is still to be seen on the summit of the high ground on the Milford road, near the intersection of the Orange or West Haven road. After he was shot, he was carried into a small house then standing in the vicinity. He was attended by his servant till he expired.

Early on Tuesday morning, the enemy unexpectedly, and with the utmost stillness and dispatch, called in their guards and retreated to their boats, carrying with them a number of the inhabitants captive, most, if not all of whom, were taken without arms, and a few who chose to accompany them. Part of them went on board their fleet, and part crossed over to General Tryon at East Haven. On Tuesday afternoon the militia collected in such numbers, and crowded so close upon Gen. Tryon, that he thought best to retreat on board his fleet, and set sail to the westward.

The loss of the enemy is unknown; but for many reasons it is supposed to be considerable, and includes some officers whom they lament besides Adjutant Campbell. Ours, by the best information we can obtain, is 27 killed, and 19 wounded. As many of our dead upon examination appeared to have been wounded with shot, but not mortally, and afterwards to have been killed with bayonets, this demonstrated the true reason why the number of the dead exceeded that of the wounded to be, that being wounded and falling into the enemy's hands, they were afterwards killed. A further confirmation of this charge is, that we have full and direct testimony, which affirms that Gen. Garth declared to one of our militia who was wounded and taken, that "he was sorry his men had not killed him, instead of taking him, and that he would not have his men give quarter to one militia man, taken in arms."

Although in this expedition it must be confessed, to the credit of the Britons, that they have not done all the mischief in their power, yet, the brutal ravishment of women, the wanton and malicious destruction of property, the burning of the stores upon the wharf, and eight houses in East Haven; the beating, stabbing, and insulting of the Rev. Dr. Daggett, after he was made a prisoner, the mortally wounding of Mr. Beers, senior, in his own door, and otherwise abusing him; the murdering the very aged and helpless Mr. English in his own house, and the beating and finally cutting out the tongue of and then killing a *distracted man*, are sufficient proofs that they were *really Britons*.

They were conducted to the town by William Chandler, son of Joshua Chandler, late of this town, who with his family went off with the enemy in their retreat.

The enemy carried off between thirty and forty of the inhabitants of the town, among whom was John Whiting, Esq. judge of probate, and clerk of the county court.

Names of the persons killed and wounded by the British troops at New Haven, July 5th and 6th, 1779.

Killed.—John Hotchkiss, Caleb Hotchkiss, junr. Ezekiel Hotchkiss, Capt. John Gilbert, Michael Gilbert, John Kennedy, Joseph Dorman, Asa Todd, Samuel Woodin, Silas Woodin, Benj. English, Isaac Pardis, Jeduthan Thomson, Aaron Russell, a lad, Jacob Thorp, and Pomp, a negro, all of New Haven, Eldad Parker, Wallingford, — Bradley, Derby, Timothy Ludington, Guilford, John Baldwin, Gideon Goodrich, Branford, and one person whose name is unknown.

Wounded.—Rev. Dr. Daggett, Nathan Beers, since dead of his wounds, David Austin, junr. Elizur Goodrich, junr. Joseph Bassett, Capt. Caleb Mix, Thomas Mix, Israel Woodin, and taken, John Austin, Abraham Pinto, Nathan Dummer, Jeremiah Austin, Edmund Smith, and Elisha Tuttle, (since dead of his wounds, whose tongue was cut out by the enemy,) all of New Haven, — Atwater, and a negro, of Wallingford, and Benjamin Howd of Branford.

The following is the proclamation alluded to in the foregoing account.
 By Commodore Sir George Collier, commander-in-chief of his majesty's ships and vessels in North America, and Major Gen. William Tryon, commanding his majesty's land forces on a separate expedition.

Address to the inhabitants of Connecticut.

The ungenerous and wanton insurrection against the sovereignty of Great Britain, into which this colony has been deluded, by the artifices of designing men, for private purposes, might well justify in you, every fear which conscious guilt could form, respecting the intentions of the present armament.

Your towns, your property, yourselves lie within the grasp of the power whose forbearance you have ungenerously construed into fear; but whose lenity has persisted in its mild and noble efforts, even though branded with the most unworthy imputation.

The existence of a single habitation on your defenseless coast, ought to be a subject of constant reproof to your ingratitude. Can the strength of your whole province cope with the force which might at any time be poured through every district in your country? You are conscious it cannot. Why then will you persist in a ruinous and ill judged resistance? We hoped that you would recover from the phrenzy which has distracted this unhappy country; and we believe the day to be near come, when the greater part of this continent will begin to blush at their delusion. You who lie so much in our power, afford that most striking monument of our mercy, and therefore ought to set the first example of returning to allegiance.

Reflect on what gratitude requires of you; if that is insufficient to move you, attend to your own interest: we offer you a refuge against the distress, which you universally acknowledge, broods with increasing and intolerable weight over all your country.

Leaving you to consult with each other upon this invitation; we do now declare that whosoever shall be found, and remain in peace, at his usual place of residence, shall be shielded from any insult, either to his person, or his property, excepting such as bear offices, either civil or military, under your present usurped government, of whom it will be further required, that they shall give proofs of their penitence and voluntary submission; and they shall then partake of the like immunity.

Those whose folly and obstinacy may slight this favorable warning, must take notice, that they are not to expect a continuance of that lenity which their inveteracy would now render blamable.

Given on board his Majesty's ship Camilla on the Sound, July 4, 1779.

GEORGE COLLIER, WM. TRYON.

The following is from the London Gazette, of Oct. 6, 1779.

Whitehall, Oct. 6, 1779.

Copy of a letter from Major Gen. Tryon, to Gen. Sir Henry Clinton, dated New York, July 20, 1779.

Having on the 3d instant, joined the troops assembled on board the transports at Whitestone, Sir George Collier got the fleet under way the same evening; but the winds being light, we did not reach the harbor of New Haven until the fifth, in the morning.

The first division consisting of the flank companies of the Guards, the Fuziliers, 54th regiment, and a detachment of the Yagers, with 4 field pieces, under the command of Brig. Gen. Garth, landed about 5 o'clock, (A.M.) a mile south of West Haven, and began their march, making a circuit of upwards of seven miles, to head a creek on the west side of the town.

The second division could not move until the return of the boats, but before noon I disembarked with the 23d, the Hessian, Landgrave, King's American Regiments, and 2 pieces of cannon, on the eastern side of the harbor, and instantly began the march of three miles, to the ferry from New Haven, east, towards Branford.

We took a field piece, which annoyed us on our landing, and possessed ourselves of the Rock Battery, of three guns, commanding the channel of the harbor, abandoned by the rebels on our approach. The armed vessels then entered and drew near the town.

Gen. Garth got into the town, but not without opposition, loss, and fatigue, and reported to me at half past one, that he should begin the conflagration, which he thought it merited, as soon as he had secured the bridge between us, over Neck Creek.

The collection of the enemy in force, on advantageous ground, and with heavier cannon than his own, diverted the General from that passage, and the boats that were to take off the troops being not up, I went over to him, and the result of our conference was a resolution, that, with the first division, he should cover the north part of the

town that night, while with the second, I should keep the heights above the Rock Fort. In the morning the first division embarked, at the southeast part of the town, and crossing the ferry, joined us on East Haven side, excepting the 54th, which were sent on board their transports.

In the progress of the preceding day, from West Haven, they were under a continual fire; but by the judicious conduct of the General, and the alertness of the troops, the rebels were every where repulsed. The next morning, as there was not a shot fired to molest the retreat, Gen. Garth changed his design, and destroyed only the public stores, some vessels and ordnance, excepting six field pieces, and an armed privateer, which were brought off.

The troops re-embarked at Rock Fort,* in the afternoon, with little molestation; and the fleet leaving the harbor that evening, anchored the morning of the 8th off the village of Fairfield.

* * * * * The general effect of the printed address from Sir George Collier and myself, to the inhabitants, recommended by your Excellency, cannot be discovered till there are some further operations and descents upon their coasts. Many copies of it were left behind at New Haven, and at Fairfield.

I have the honor herewith to transmit to your Excellency a general return of the killed, wounded, and missing, on this expedition.

At New Haven, July 5.

Guards, 1 officer, 1 rank and file killed; 1 officer, 1 sergeant, 9 rank and file wounded: 14 rank and file missing.—7th or Royal Fusiliers, 1 sergeant, 7 rank and file wounded; 2 rank and file missing.—23d, or Royal Welch Fusiliers, 1 drummer, 1 rank and file wounded.—54th Regiment of foot, 1 sergeant, 5 rank and file killed; 2 officers, 1 drummer, 5 rank and file wounded; 1 sergeant, 7 rank and file missing.—Landgrave regiment, 2 rank and file wounded.—Detachment of Yagers, 1 rank and file wounded; 1 rank and file missing.—King's American Regiment, 1 officer killed; 1 sergeant, 6 rank and file wounded.—Royal Artillery, 1 driver wounded.

Names of the officers Killed and Wounded.

Guards, Adjutant Campbell, killed; Captain Parker, wounded.—54th Regiment of foot, Captain Bickop, Lieut. Powell, wounded.—King's American Regiment, Ensign and Adjutant Watkins, killed.

WM. TRYON, M. G.

The following additional particulars, relative to the invasion of New Haven by the British Troops, were received from persons who were residents of the town at the time.

When information of the enemy's landing at West Haven reached the town, and as their forces approached the place, persons of every age and sex were seen fleeing in all directions. A number of the inhabitants took refuge on the East Rock, where they remained until the enemy left New Haven. Many, however, chose to remain, hoping that by staying quietly in their habitations, they should be secure from the molestations of the enemy; but a large number of the more patriotic inhabitants made instant preparations to harass the English as much as possible. Capt. *James Hillhouse*, with a small band of brave young men, some of whom were students of Yale College, advanced very near the royal troops, while on parade ground near the West Haven church; and when they commenced their march, fired on the advanced guards and drove them back to the main body; but owing to superior numbers, this little band was soon forced to retreat. The Rev. Dr. Daggett, at that time president of Yale College, was a warm friend to the American cause;—armed with a musket, he joined his fellow citizens and went out to oppose the enemy; he was wounded and taken

* Now Fort Hale.

prisoner near the West bridge. Dr. Daggett would in all probability have been murdered by the British, but for the interference of Chandler, their guide, who was formerly his pupil at the College. Whilst in their hands, the President was asked, whether if released, he would again take up arms against them?—to which he answered, “I rather believe I shall if I get an opportunity.”

The British entered New Haven on the old Derby road, through Westville: a small body of men, under Capt. Phineas Bradley, with two small cannon, made a stand to oppose their entrance on the top of the hill, on the east side of the Westville bridge, (formerly called Thompson’s bridge,) but their ammunition failing, they were obliged to retreat. The embankments thrown up on this occasion by the Americans are still visible. The enemy then continued their course towards New Haven, and when at the west end of Chapel street, placed a large loaded field piece, and fired it off down the street. Our informant, Mr. Amos Doolittle, who was one of the party that resisted the enemy at Westville, states, that when obliged to leave there, his wife being sick, he returned to his house, which was near the College, and after throwing his gun and equipments under the bed, awaited the coming of the enemy with anxiety. As soon as they arrived in front of his house, an English lady who resided with him stepped to the door, and addressing one of the officers, requested a guard for the house. The officer asked her, with an oath, who she was; she informed him that she was an English woman and then had a son in his majesty’s service; upon which the officer addressing a Highlander, ordered him to guard the house, and not allow the least injury to be done to its inmates. It was owing to the address of this lady, that Mr. D. was not carried to New York by the enemy; for some of the soldiers entering the house by the back door, and discovering the gun under the bed, inquired the purpose of it. The lady, with great presence of mind, answered that the law obliged every man to have a gun in his house, adding that the owner of it was as strong a friend to *King George* as themselves. A store near his house having been broken open by the soldiers, one of them advised Mr. D. to go and provide himself with whatever he wanted, adding that he was perfectly welcome—but not wishing to take advantage of his neighbor’s distress, the offer was of course declined.

It is mentioned in the preceding account, that among the killed and wounded were Mr. Beers and Capt. Gilbert. The circumstances of the death of these persons are stated to be as follows:—

As the British entered the town, Capt. Parker, a British officer, overtaking Capt. Gilbert, ordered him to surrender; upon which, Capt. G. turning round shot the officer and badly wounded him. He was immediately pursued, and being wounded in the leg whilst endeavoring to escape, was soon overtaken by the enemy and immediately dispatched with their bayonets. Mr. Beers lived near the corner of York and Chapel streets: a shot was fired at the enemy near his premises; they immediately came into the house, charged him with the act, and mortally wounded him, while he declared his innocence.

After the royal troops left the town, thousands of country people and militia flocked in, without any order: soon after they entered, a report having been circulated that the British army was surrounding the place, they fled for the country, and their progress could be traced for miles by the immense clouds of dust which arose in all directions. It is said, that some of the country people were base enough to take advantage of the general confusion, and carried off goods to a large amount.

The following is a copy of President Daggett's account of the treatment he received from the enemy, which is preserved in the Secretary of State's office at Hartford.

An account of the cruelties and barbarities, which I received from the British soldiers, after I had surrendered myself a prisoner into their hands.—It is needless to relate all the leading circumstances which threw me in their way. It may be sufficient just to observe, that on Monday morning the 5th inst. the town of New Haven was justly alarmed, with very threatening appearances of a speedy invasion from the Enemy. Numbers went out armed to oppose them; I among the rest, took the station assigned me upon Milford hill, but was soon directed to quit it, and retire further north, as the motions of the Enemy required. Having gone as far as I supposed was sufficient, I turned down the hill to gain a little covert of bushes which I had in my eye; but to my great surprise, I saw the Enemy much nearer than I expected, their advanced guards being little more than 20 rods distant, plain open ground between us. They instantly fired upon me, which they continued till I had run a dozen rods, discharging not less than 15 or 20 balls at me alone; however thro' the preserving providence of God, I escaped them all unhurt, and gained the little covert at which I aimed, which concealed me from their view, while I could plainly see them thro' the weeds and bushes, advancing towards me within about 12 rods. I singled out one of them, took aim, and fired upon him; I loaded my musket again, but determined not to discharge it any more, and as I saw I could not escape from them, I determined to surrender myself a prisoner. I begged for Quarter, and that they would spare my life. They drew near to me, I think two only in number, one on my right hand, the other on my left, the fury of infernals glowing in their faces, they called me a damned old Rebel and swore they would kill me instantly. They demanded, what did you fire upon us for? I replied, because it is the exercise of war. Then one made a pass at me with his bayonet, as if he designed to thrust it thro' my body. With my hand I tossed it up from its direction and sprung in so near to him that he could not hurt me with his bayonet. I still continued pleading and begging for my life, with the utmost importunity, using every argument in my power to mollify them, and induce them to desist from their murderous purpose. One of them gave me four gashes on my head with the edge of his Bayonet, to the skull bone, which caused a plentiful effusion of blood. The other gave me three slight pricks with the point of his bayonet on the trunk of my body, but they were no more than skin deep. But what is a thousand times worse than all that has been related, is the blows and bruises they gave me with the heavy barrels of their guns on my Bowels, by which I was knocked down once, or more, and almost deprived of life; by which bruises, I have been almost confined to my bed ever since. These scenes might take up about two minutes of time. They seemed to desist a little from their design of murder, after which they stript me of my shoe and knee buckles, and also my stock buckle. Their avarice further led them to rob me of my Pocket handkerchief, and a little old tobacco box. They then bade me march towards the main body, which was about twelve rods distant; where some officers soon inquired of me who I was, I gave them my name, station and Character, and begged their protection, that I might not be any more abused or hurt by the soldiers. They promised me their protection. But I was robbed of my shoes and was committed to one of the most unfeeling savages that ever breathed. They then drove me with the main body, a hasty march of five miles or more. I was insulted in the most shocking manner by the ruffian soldiers, many of which came at me with fixed bayonets and swore that they would kill me on the spot. They damned me, those that took me, because they spared my life. Thus amidst a thousand insults, my infernal driver hastened me along faster than my strength would admit in the extreme heat of the day, weakened as I was by my wounds and the loss of blood, which at a moderate computation could not be less than one quart. And when I failed in some degree, thro' faintness, he would strike me on the back with a heavy walking staff and kick me behind

with his foot. At length, by the supporting power of God, I arrived at the green in New Haven. But my life was almost spent, the world around me several times appearing as dark as midnight. I obtained leave of an officer to be carried into the widow Lyman's and laid upon a bed, where I lay the rest of the day and succeeding night, in such acute and excruciating pain as I never felt before. NAPHTALI DAGGETT.

New Haven, July 26th, 1779.

New Haven, July 26th, 1779.

Personally appeared the Rev. Doctr. Naphtali Daggett, and made oath to the foregoing account as true and genuine before me. DAVID AUSTIN, Jus. of Peace.

The following advertisements, notices, &c. are copied from the Connecticut Journal and New Haven Post Boy, published during the Revolutionary war.

New Haven, April 12th, 1775.

"We are informed from the parish of East Haven, that last week, the women of that parish, in imitation of the generous and laudable example of the societies in the town of New Haven, presented the Rev. Mr. Street, of said parish, with upwards of one hundred and thirty run of well spun linen yarn; which was gratefully received by the family; and the generous guests after some refreshment, and taking a few dishes of coffee, agreeable to the plan of the Continental Congress, to which that society unanimously and fixedly adheres, dispersed with a cheerfulness that bespoke that they could be well pleased without a sip from that baneful and exotic herb,* which ought not so much as to be once more named among the friends of American liberty.

I, ABRAHAM HICKOX, having by my conduct for some time past, given great offense to my countrymen, do take this public occasion to acknowledge that my conduct has been such as justly to alarm the friends of this distressed and injured country,—in that I have ridiculed the doings of the Hon. Continental Congress; the Committees chosen in consequence of their resolutions; and in not complying with their advice. I confess that I have not only treated the Continental Congress with disrespect and abuse, but I have also greatly abused the General Assembly of this Colony, in saying that they spent their money for nothing, which appears by evidence, though I don't myself recollect it, and have also tried to ridicule the soldiers which have been raised for the defense of the Colony, by asking the question whether they intended to fight Gage with their feathers, and at the same time told them that they would go to fight New England Rum, more than any thing else; and that the soldiers enlisted for no other motive, but to get the government's money, and to live a lazy life. I further have said that the full character of a Whig is a liar or words to that effect, and that Gage is an honest man, with many other reflections upon the character and doings of those, who in this day of distress, stand forth for the defense of the liberties of this country. My conduct herein I acknowledge to be imprudent and unjustifiable, and for which I am sincerely sorry, and I do promise for the future, so far as I am able, to behave myself in such a manner as to give no offence to the community.

Dated New Haven, May 31st, 1775.

ABRAHAM HICKOX.

Messrs. Printers,—Please to give the following lines a place in your next, and you will oblige your humble servant. Z.

Wednesday evening last, a number of ladies and gentlemen, belonging to this town, collected at a place called East Farms, where they had a needless entertainment, and made themselves extremely merry with a good glass of wine;—such entertainments and diversions can hardly be justified upon any occasion; but at such a day as this, when every thing around us has a threatening aspect, they ought to be discountenanced, and every good man should use his influence to suppress them. And are not such diversions and entertainments a violation of the eighth article of the Association of the Continental Congress? And is it not expected that the Committee of inspection will examine into such matters, and if they find any persons guilty of violating said Association, that they treat them according as the rules of it prescribe?

July 19th, 1775.

New Haven, July 5, 1775, No. 403.

LAST Wednesday, his excellency General Washington, Major General Lee, Major Thomas Mifflin, General Washington's aid-de-camp, and Samuel Griffin, Esq. General Lee's aid-de-camp, arrived in town, and early next morning they set out for the

* Tea.

Provincial Camp, near Boston, attended by great numbers of the inhabitants of the town. They were escorted out of town by two companies dressed in their uniform, and by a company of young gentlemen belonging to the Seminary in this place, who made a handsome appearance, and whose expertness in the military exercises gained them the approbation of the Generals.

I, ABIATHAR CAMP of New Haven, in the county of New Haven, in the colony of Connecticut, do confess, although I well knew that it was the opinion of a number of inhabitants of said town, that vessels ought not to clear out under the *Restraining Act*, which opinion they had, for my satisfaction, expressed by a vote when I was present; and although I had assured that I would not clear out my vessel under said Restraining Act, did nevertheless afterwards cause my vessel to be cleared out agreeable to said Restraining Act; and did, after I knew that the Committee of Inspection had given it as their opinion that it was most advisable that vessels should not clear out under said Restraining Act, send my vessel off to sea with such clearance; for which I am heartily sorry; and now publicly ask the forgiveness of all the friends of America, and hope that they will restore me to charity; and I do now most solemnly assure the public, though I own that I have by my said conduct given them too much reason to question my veracity, that I will strictly comply with the directions, and fully lend my utmost assistance to carry into execution all such measures as the Continental Congress have or may advise to.

ABIATHAR CAMP.

New Haven, October 2d, 1775.

Voted, That this Confession be published in Messrs. Greens' paper.

A true copy of the original.

Test,

JOHN LATHROP, | JACOB PINTO,
ISRAEL BISHOP, | ISAAC BISHOP.

BEACON.—The town of *New Haven*, having this day erected a *Beacon* on Indian Hill, at East Haven, now Beacon Hill, about a mile a half southeast of the town; and ordered us, their Committee, to give public notice thereof. We now inform the public in general, and the neighboring towns in particular, that the Beacon will be fired on Monday evening next, the 20th instant, at six o'clock; all persons are then desired to look out for the Beacon, and take the bearings of it from their respective places of abode, that they may know where to look out for it, in case of an alarm, which will be announced by the firing of three cannon. If our enemy should attack us, and we be under the necessity of making use of this method to call in the assistance of our brethren, we request that all persons who come into the town, will take care to be well armed with a good musket, bayonet and cartridge box, well filled with cartridges,* under their proper officers, and repair to the State House, where they will receive orders from Col. Fitch, what post to take.

The ministers of the several parishes of this and the neighboring towns are requested to mention to their respective congregations the time when the Beacon will be fired.

New Haven, 14th November, 1775.

FRANCIS VANDALE, *from Old France*,—Intends to open a Dancing School in this town, and also teach the French Language, on very reasonable terms; as he gave entire satisfaction to his pupils of both sexes at Cambridge, Boston, and Newport, (Rhode Island,) in these necessary arts, he will acquit himself of his duty in the same manner. He is a Protestant, and provided with good certificates. For further particulars, enquire at Mr. Gould Sherman's, where he lives, in New Haven.

December 13th, 1775.

New Haven, April 10.

In Committee Meeting, New Haven, March 7th, 1776.

A complaint being made against *William Glen*, Merchant, for a breach of the association, by buying Tea and selling it at an extortionous price, and also refusing paper currency therefor:—said Glen was cited to appear before the Committee, and make answer to the foregoing charge;—he appeared and plead not guilty,—wherefore the evidences against him were called in and sworn: and on motion, voted that the evidence is sufficient to convict *William Glen* of buying and selling tea, contrary to the association,—and ordered that he be advertised accordingly, that no person hereafter have any dealing or intercourse with him. Also *Freeman Huse, jun'r*, being complained of for buying and selling Tea, contrary to association, was cited to appear

* Those who are deficient in any respect, of being thus armed, are earnestly requested to exert themselves to be immediately furnished therewith.

before the Committee—he neglecting to appear or make his defense, the evidences were called in and sworn:—On motion, voted that the evidence is sufficient to convict Freeman Huse, jun'r, of a breach of the association by buying and selling Tea,—and ordered that he be advertised accordingly, that no person have any further dealing or intercourse with him.

Signed per order of Committee, JON'TH FITCH, *Chairman*.
A copy of the minutes, Test, PETER COLT, *Clerk*.

I, *William Glen*, merchant, being advertised by the Committee of Inspection in this town, as a violater of the Continental Association for buying tea and selling it at an exorbitant price, confess myself guilty of the same, for which I humbly ask their and the public's pardon, and promise for the future my conduct shall be such as shall give no occasion of offense, professing myself firm for the liberties of America. I desire the committee and the public to restore me to my wonted favor. I am with sincerity their most humble and obedient servant,
WM. GLEN.

The confession of William Glen being read, voted satisfactory, and ordered to be published.

TO WHOM IT MAY CONCERN.—An express having arrived in this town, on Monday evening last, from *General Washington*, on his way to Providence, with Dispatches to Governor Cooke and General Spencer: and being in great want of a horse to proceed, application was made to a Justice of Peace, for a warrant to impress one, which he absolutely refused granting.

New Haven, 8th April, 1777.

N. B. The Printers are at liberty to mention the author's name whenever the Justice pleases to call upon them—likewise the names of the persons ready to testify to the above charge.

New Haven, July 15th, 1778.

ON Wednesday the 8th inst. the *Rev. Ezra Stiles, D. D.* was inducted and inaugurated into the Presidency of Yale College, in this town.

The formalities of this installation were conducted in the following manner:—

At half after ten in the forenoon, the students were assembled into the Chapel, where the procession was formed, consisting of the Undergraduates and Bachelors. At the tolling of the Bell, they moved forward to the President's House to receive and escort the Rev'd Corporation, and President Elect; by whom being joined, the Procession returned to the chapel in the following order.

The four classes of Undergraduates,
consisting of 116 students present,
Bachelors of Arts,
The Beadle and Butler,
carrying
The College Charter, Records, Key and Seal,
The Senior presiding Fellow,
One of the Hon. Council and the President Elect,
The Reverend Corporation,
The Professors of Divinity and Natural Philosophy,
The Tutors,
The Reverend Ministers,
Masters of Arts,
Respectable Gentlemen.

The Rev'd Eliphalet Williams, Senior and Presiding Fellow, began the solemnity with prayer; The Oath of fidelity to this state was then administered to the President Elect, by the Hon. Jabez Hamlin, Esq. one of the Council of the State; which

being done, the President elect publickly gave his assent to the Ecclesiastical Constitution of this Government, and thereupon the Presiding Fellow delivered a Latin Oration well adapted to the occasion; in which he committed the Care, Instruction and Government of the College to the President Elect: and in the name, and by the authority of the Rev'd Corporation, constituted him *President of Yale College in New Haven, and Professor of Ecclesiastical History*, and delivered to him the Charter, Records, Key and Seal of the College.—The President being seated in the chair, Sir Dana, one of the Senior Bachelors, addressed him in the Auditory in a beautiful Latin Oration, delivered in a graceful manner. Then the President arose and politely addressed the audience, in an elegant, learned, and animated Oration in Latin, upon the *Cyclopadia*, or general system of universal literature; which for the beauty of classical diction, elevation of thought and importance to the cause of learning in general was worthy its author.—After which an anthem, the 122 Psalm set to music, was sung by the students; and the President closed the solemnity with a blessing.

The Rev'd Corporation, officers of Institution, Ministers, and other respectable Gentlemen, after a short Recess in the Library, dined together in the College Hall; an Entertainment having been provided for the occasion.

Mess. Printers—By inserting the following in your next Paper, you'll oblige one of your constant readers.

A. B.

New Haven, Jan. 30, 1778.

Last evening, a number of persons in this town, presented a very short Dialogue, with a short Farce, to a very large number of spectators, who paid the very reasonable price of *one dollar* each for their seats. Considering the serious state of our public affairs, the absolute necessity of industry, and frugality among all ranks of people; and more especially among the common tradesmen, mechanics, &c. (who almost invariably have the vanity of aping their superiors in every fashionable extravagance,) I conceive an entertainment of this kind very improper, both on account of the expense, and the time taken up in preparation for attendance at the exhibition. And as the Hon. Continental Congress have strongly enjoined on all the good people of the United States, to abstain from all expensive diversions, such as Theatrical Entertainments, Gaming, &c. I believe no good Whig, who duly considers the respect due to that venerable body, (were there no other objection,) can approve of this transaction. I am far from supposing the persons concerned had any criminal design; but believe they engaged without deliberating on the consequences that naturally attend a performance of this kind, at the present day; but if the sentiments here held forth are just, I presume they will be kindly received, and any thing of this sort not attempted hereafter.

The students of Yale College are hereby notified, that the present winter vacation is extended a fortnight from the 4th of next month. As this is occasioned by the difficulty which the Steward finds in procuring flour or bread, it is earnestly requested of the parents, that they would assist in furnishing the necessary supplies.

Yale College, January 29th, 1779.

EZRA STILES, President.

Wanted to purchase immediately,

Two Negro or Mulatto Boys or men, from 14 to 24 years of age. Also wanted a second hand *Sulkey*. Inquire of the printers.

New Haven, May 9, 1779.

The STEWARD of Yale College wants to purchase a quantity of Butter and Cheese, for which he will pay the best Kind of Rock salt, Molasses, Continental or State's money, or part in hard money.

Thursday night last, a small schooner, belonging to this place, having on board a valuable cargo, was taken from the Long-wharf, and carried to the enemy.

November 16, 1780.

New Haven, June 28, 1781.

Yesterday passed through this town on their way to join the American army, the Duke Laeuzon with his Legion, consisting of about 600. The strictest order and discipline was observed among them.

New Haven, November 8, 1781.

There has been public rejoicings in this and the neighboring towns, on account of the signal and important victory obtained by his Excellency General Washington,

over General Earl Cornwallis. In this town on Monday last, a numerous assembly convened at the Brick Meeting-House, where the audience were highly entertained with an animating, pathetic and ingenious oration, delivered by one of the Tutors of the College, and a triumphant Hymn sung by the Students:—the Clergy and a number of other gentlemen dined in the State-House;—in the evening, the State-House, College, and all the Houses round the Market-place, were beautifully illuminated:—The whole was conducted with the greatest regularity, good nature, festivity and joy.

We the subscribers being (by the Court of Probate for the District of New Haven, Conn.) appointed Commissioners to receive and examine the claims of the several creditors of *Benedict Arnold*, late of New Haven, in New Haven County, now joined with the enemies of the United States of America, whose estate hath been in due form of law confiscated, give notice to all concerned, that we shall attend to the business of our said appointment, at the dwelling house of Pierpont Edwards, Esq. in said New Haven, on the second Monday of December next at two o'clock in the afternoon, on the second Monday of January next at the same time of day; and on the third Monday of February next, also at the same time of day.

New Haven, November 29, 1781.
 ISAAC JONES, }
 MICHAEL TODD, } Commissioners.

All persons that were indebted to said Arnold at the time he joined said enemies, are requested by the Subscriber, who is, by said court of Probate, appointed Administrator on said Arnold's estate, that was the property of said Arnold at the time he joined as aforesaid, are requested to deliver the same to the subscriber, or account with him therefor.

New Haven, November 29, 1781.
 PIERPONT EDWARDS.

TO BE SOLD,—At the Subscriber's in Goshen, a young, lusty, and very likely *Negro Wench*, that can cook, wash, and spin either flax or wool.
July 27, 1780. HUGH HUGHES.

To be sold a Mulatto *Slave*, about 21 years old, is healthy, strong and active; well acquainted with all kinds of farming business, and can work at the Shoe Maker's trade. For further particulars, enquire of *Edward Barker*, of Branford, or the Printers hereof.

November 25, 1778.

Any Gentlemen, Farmers or others, that have any juice extracted from Corn-Stalks, which they are desirous of having distilled into Rum; are hereby notified, that the subscribers, Distillers in the town of New Haven, will distill the same on shares, or otherwise, as they can agree. And those who please to favor them with their employ, may depend on having the strictest justice done them, and their liquor distilled to the fullest proof. Or any person that would rather dispose of said juice or Corn-stalks, on delivering it at the Distillery, will receive the Market Price; and every favor will be most gratefully acknowledged, by the Public's very obedient servants,

September 24, 1777.

JACOBS & ISRAEL.

N. B.—Private Families may have Cider distilled for their own use by Jacobs & Israel.

In the Connecticut Journal, from which the foregoing advertisements and notices are taken, we find the following notice.

*** We are very sorry that we cannot procure a sufficiency of paper to publish a whole sheet:—but as there is now a paper-mill erecting in this town, we expect after a few weeks, to be supplied with such a quantity as to publish the Journal regularly on a uniform sized paper, and to be able to make ample amends for past deficiencies.
July 3, 1776.

The average size of this paper was fourteen inches long, and sixteen wide; occasionally there was a supplement, which varied from six to eight inches square. It contained three columns to a side, and was printed by *Thomas and Samuel Green*, near the College.

The following is an account of the manner in which the news of peace between the United States and Great Britain, at the close of the Revolutionary war, was celebrated in New Haven.

New Haven, May 1st, 1783.

Thursday last was observed as a day of festivity and rejoicing in this town, on receipt of indubitable testimony of the most important, grand and ever memorable event—the total cessation of hostilities between Great Britain and these United States, and the full acknowledgment of their sovereignty and independence. Accordingly the day, with the rising sun, was ushered in by the discharge of thirteen cannon, paraded on the Green for that purpose, under elegant silk colors, with the Coat of Arms of the United States most ingeniously represented thereon, which was generously contributed upon the occasion by the ladies of the town. At 9 o'clock in the forenoon, the inhabitants met in the brick Meeting-house for divine service, where were convened a very crowded assembly: the service was opened with an anthem, then a very pertinent prayer, together with thanksgiving, was made by the Rev. Dr. Stiles, President of Yale College; after was sung some lines purposely composed for the occasion, by the singers of all the congregations in concert: Then followed a very ingenious Oration, spoken by Mr. Elizur Goodrich, one of the Tutors of the College; after which a very liberal collection was made for the poor of the town, to elevate their hearts for rejoicing. The service concluded with an anthem.

A number of respectable gentlemen of the town dined together at the Coffee-House: after dinner several patriotic toasts were drunk.

At 3 o'clock were discharged thirteen cannon—at 4 twenty one ditto—at 5 seven ditto—at 6 thirteen ditto—at 7 were displayed the fire-works, with rockets, serpents, &c.—at nine o'clock a bonfire on the green concluded the diversions of the day. The whole affair was conducted with a decorum and decency uncommon for such occasions, without any unfortunate accident; a most pacific disposition and heart-felt joy was universally conspicuous and most emphatically expressed by the features of every countenance.

April 13th, 1785, the “Connecticut Silk Society” was established by a number of the principal inhabitants of New Haven, which had for its object the “culture and manufacture of silk, throughout the state of Connecticut.” A large number of mulberry trees for this purpose were planted on the outskirts of the city, many of which are still remaining.

The following list of newspapers and other periodical works, published in New Haven, Conn. is furnished by a gentleman of the place, who has drawn it from a detailed manuscript catalogue by him prepared. It is believed to be nearly complete.

The Connecticut Gazette, printed by James Parker, near the Hay Market. Weekly. Begun in April 7 1755; suspended April 14, 1764; revived July 5, 1765, by Benjamin Mecom, and ended with No. 596, Feb. 19, 1768.—The Connecticut Journal and New Haven Post Boy. Begun October 23, 1767, by Thomas and Samuel Green. It passed through the hands of many publishers, and ended with No. 3517, April 7, 1835.—The New Haven Gazette, by Meigs, Bowen & Dana; begun May 13, 1784; ended February 9, 1786. Weekly.—The New Haven Gazette and the Connecticut Magazine, by Meigs & Dana. Begun February 16, 1786; ended——. Weekly.—American Musical Magazine, monthly, 4to. published by Amos Doolittle and Daniel Read. 10 numbers; about 1788.—The New Haven Gazette, begun January 5, 1790; ended June 29, 1791. Weekly.—Federal Gazetteer, begun in February, 1796; weekly; ended——. The Messenger, begun January 1, 1800; ended August 9, 1802. Weekly.—The Sun of Liberty, begun in 1800; ended——. The Visitor, begun October 30, 1802, and Nov. 3, 1803, became the Connecticut Post and New Haven Visitor. Supposed to have ended November 8, 1804. Weekly.—The Churchman's Monthly Magazine, 8vo. monthly, begun January, 1804. Four volumes published.—Connecticut Herald, begun 1804, by Comstock, Griswold & Co. Weekly.—The Literary Cabinet, begun November 15, 1806; ended October 31, 1807: edited by members of the Senior Class in Yale College. 8vo. pp. 160.—Belles-Lettres Repository, edited and published by Samuel Woodworth; begun and ended in 1808.—Memoirs of the Connecticut Academy of Arts and Sciences. 8vo., begun 1810; ended 1813. pp. 412.—Columbian Register, begun December 1, 1812. Weekly.—The Athenæum, begun February 12, 1814; ended August 6, 1814: edited by Students of Yale College. 8vo. pp. 120.—Religious Intelligencer, begun June 1, 1816. 8vo.—The

Guardian, monthly, commenced 1818, ended Dec. 1828; 10 vols. published.—The Christian Spectator, 8vo. monthly, begun January, 1819; ended in this form, Dec. 1828. It has been continued since as a Quarterly.—The American Journal of Science and Arts, conducted by Benjamin Silliman; begun 1818. Quarterly. Volume 31 was published in Jan., 1837.—The Microscope, edited by a Fraternity of Gentlemen, begun March 21, 1820; ended September 8, 1820. 8vo. pp. 200. Semi-weekly.—The National Pilot, begun October, 1821; ended in 1824.—United States Law Journal and Civilian's Magazine. 8vo. quarterly, begun June, 1822; ended 1823?—American Eagle, begun 1826; ended ———. New Haven Chronicle, begun February, 1827; ended about June, 1832.—New Haven Advertiser, begun May 1, 1829; ended October 30, 1832. Semi-weekly.—New Haven Palladium; weekly; begun Nov. 7, 1829.—The Sitting Room, edited by members of Yale College, 1830.—New Haven City Gazette, begun April 1, 1830; ended May 7, 1831. Weekly.—The Miscellany, semi-monthly, begun November 12, 1830; ended ———. The Student's Companion, by the Knights of the Round Table, 8vo.; begun January, 1831; ended May, 1831. Monthly.—The Little Gentleman, begun January 1, 1831; ended April 29, 1831. 18mo.—National Republican, begun July 26, 1831; ended March, 1832.—The Boy's Saturday Journal, begun December 3, 1831, ended February 18, 1832: in 12 numbers, 48mo.—The Literary Tablet, semi-monthly; begun March 3, 1832; ended March 29, 1834.—The Sabbath School Record, 12mo. monthly; begun January, 1832, ended December, 1833.—The Child's Cabinet, monthly, begun April, 1832, ended ———. Daily Herald, begun November 26, 1832.—Watchtower of Freedom, begun October 20, 1832; ended ———. Morning Register, (daily,) begun November, 1833, ended ———. Morning Palladium, (daily and thrice a week,) begun Nov. 15, 1833, ended Jan. 1834. The Medley, conducted by an Association of the Students of Yale College; begun March, ended June, 1833. 8vo. pp. 166.—Journal of Freedom, weekly; begun in May, 1834, ended about May, 1835.—Jeffersonian Democrat, begun June 7, 1834, and continued about six weeks. Weekly.—The Microcosm or the Little World of Home, 8vo. monthly; begun July, 1834.—The Perfectionist, monthly; begun August 20, 1834; ended March 15, 1836. The last four numbers bore the name of the *New Covenant Record*.—Literary Emporium, 4to. begun June 16, 1835.—Religious Intelligencer and New Haven Journal, begun January 2, 1836.—The American Historical Magazine and Literary Record, begun January, 1836: monthly, 8vo.—Yale Literary Magazine, conducted by the Students of Yale College; begun Feb. 1836. 8vo. 3 numbers per term.—Chronicle of the Church, 4to. begun Friday, Jan. 6, 1837.

Previous to about the year 1800, that part of the public square now denominated the *Upper Green* was used as a public burying ground. In 1796, the honorable James Hillhouse purchased, near the northwest corner of the original town plot, a field of ten acres; which, aided by several gentlemen, he leveled and inclosed. The field was then divided into parallelograms, railed and separated by alleys: the whole field, except four lots given to the several congregations and the College, and a lot destined for the reception of the poor, was distributed into family burying places; purchased at the expense actually incurred, and secured by law from civil process. Each family burying lot is 32 feet in length and eighteen in breadth. In 1821, the monuments in the old burying ground were removed to the new. There are, however, some of the old monuments which still remain standing under the Center church, that building being erected over part of the ancient burying place. The following inscription is on a marble slab affixed on the west end of the Center church.

“From the settlement of New Haven, 1638, to 1796, the adjoining ground was occupied as a common place of burial. Then a new burying ground was opened and divided into family lots and city squares.—In 1813 this church was placed over the monuments of several whose names are engraved on tablets in the vestibule. In 1821 the remaining monuments were by the consent of survivors, and under the direction of the city, removed to the new ground.

In a moment, in the twinkling of an eye,
At the last trump the dead shall be raised.”

The following is engraved on the monument of Gov. Eaton, which has been removed to the new ground.

Theophilus Eaton, Esqr. Govr. dec'd. Jan'y 7, 1657, Ætat. 67.

Eaton so fam'd, so wise, so just,
The Phœnix of our world, here hides his dust,
This name forget, N. England never must.

Wm. Jones, Esqr. D. Govr. dec'd. Oct. 17, 1706, Ætat. 82. Hannah Jones, daughter of Govr. Eaton, died May 4, 1707, Ætat. 74.

The last part of the above, from the poetic lines, is a modern addition; the following lines being taken out in order to give place for it.

T' attend you, sir, under these framed stones,
Are come your honored *Son* and daughter *Jones*,
On each hand to repose their weary bones.

"Here lyeth interred the body of the reverend and learned Mr. Thomas Clap, the late President of Yale College, in New Haven; a truly great man, a gentleman of superior natural genius, most assiduous application, and indefatigable industry. In the various branches of learning he greatly excelled; an accomplished instructor; a patron of the College; a great divine, bold for the truth; a zealous promoter and defender of the doctrines of grace; of unaffected piety, and a pattern of every virtue; the tenderest of fathers and the best of friends; the glory of learning, and the ornament of religion; for thirteen years the faithful and much respected pastor of the church in Windham; and near twenty-seven years, the laborious and principal President of the College, and served his own generation by the will of God, with serenity and calmness, he fell on sleep, the 7th day of January, 1767, in his sixty-fourth year.

"Death, great proprietor of all,
'Tis thine to tread out empires,
And to quench the stars."

The two following inscriptions are on monuments erected by the corporation of Yale College.

Hic jacet sepultus EZRA STILES, S. T. D. LL. D. Qui Alta Mente præditus, Eruditione omnigena imbutus, Urbanitate suavissima, Moribus probis, Charitate, Fide, Pietate evangelica; Officiis Patris, Amici, Præceptoris, Ecclesie ministri, hominis, Enitens; suis percarus, In Ecclesia magno cultu dignatus, Per terras honore habitus, Vixit. Lacrymis Omnium Obiit; Maii xiiimo mdcxcvto. Ætat. lxxviii. Ecclesie iudæ, Nov. Port. Rhod. Ins. Pastor annos xxii; Collegii Yalensis Tutor vi, Præses xviii. Senatus Academicus Coll. Yal. hoc saxum posuit.

Hic sepultus jacet Vir ille admodum reverendus TIMOTHEUS DWIGHT, S. T. D. LL. D. Collegii Yalensis Præses, et ejusdem Sacrosanctæ Theologiæ Professor: Qui De Litteris, de Religione, de Patria optime meritus; Maximo suorum et bonorum omnium desiderio, mortem obiit, Die xi. Januar. Anno Domini mdcxcvii. Ætatis suæ lxxv.

Ecclesie Greenfieldensis Pastor Annos xii. Collegii Yalensis Tutor vi. Præses xxii. Senatus Collegii Yalensis Hoc Saxum Ponendum Curavit.

Sacred to the memory of Joseph, eldest son of Hezekiah and Mehitabel Frith of the Island of Bermuda, a member of the Senior class in Yale College. . . . He survived his wound but 24 hours, and left this world for a better, on the Lord's day, October 5th, 1806, aged 16 years, 9 months and 11 days.—His virtues had gained the love of all who knew him, and his remembrance to his bereaved friends, who have experienced a loss which Time will never repair.

Cropp'd like a rose, before 'tis fully blown,
Or half its worth disclosed.

This young man was killed, it is said, in a hunting excursion, by an ill directed discharge of a gun by one of his companions, who was hunting partridges in the bushes. It appears that the friends of young Frith had the impression that he was shot by design, and in accordance with this belief inserted something on his monument which gave this impression. His companions, feeling that this was an unjust and injurious reflection, demolished the slab on which the offensive words were

inserted, and placed another in its room, without any inscription. This accounts for the apparently disconnected mention of a wound.

The monument of Col. Humphreys stands near the southwestern part of the yard. It is composed of granite, and is about twelve feet in height. The following inscription is upon two tablets of copper, which are inserted into the sides of the pedestal.

David Humphreys, LL. D. Acad. Scient. Philad. Mass. et Connect. et in Anglia Aquæ Solis, et Regiæ Societat. socius. Patriæ et libertatis amore accensus, juvenis vitam reipub. integram consecravit. Patriam armis tuebatur, consilii auxilium, literis exornavit, apud exterarum gentium concordiam stabilivit. — In bello gerendo maximi ducis Washingtoni administrator et adjutor; in exercitu patrio Chiiarchus; in republica Connecticutensi, militum evocatorum imperator; ad aulam Lusitanæ et Hispaniæ legatus. Iberia reversus natale solum vellere verè aureo ditavit. In Historia et Poesi scriptor eximius; in artibus et scientiis excolendis, quæ vel decori vel usui inserviunt, optimus ipse et patronus et exemplar. Omnibus demum officiis expletis, cuiusque vitæ feliciter peracto, fato cessit, Die XXI Februarii. Anno Domini MDCCCXVIII, cum annos vixisset LXV.

The above may be rendered into English in the following manner.

DAVID HUMPHREYS, Doctor of Laws, Member of the Academy of Sciences of Philadelphia, Massachusetts and Connecticut; of the Bath [Agricultural] Society, and of the Royal Society of London.—Fired with the love of country and of liberty, he consecrated his youth wholly to the service of the Republic, which he defended by his arms, aided by his counsels, adorned by his learning, and preserved in harmony with foreign nations. In the field, he was the companion and aid of the great Washington, a Colonel in the army of his country, and commander of the Veteran Volunteers of Connecticut. He went Ambassador to the courts of Portugal and Spain, and returning, enriched his native land with the true golden fleece. He was a distinguished Historian and Poet;—a model and patron of Science, and of the ornamental and useful arts. After a full discharge of every duty, and a life well spent, he died on the 21st day of February, 1818, aged 65 years.

Humphreys' Monument.

Ashmun's Tomb.

The above is a representation of the monument erected to the memory of Jehudi Ashmun, Esq. the first Colonial Agent at Monrovia, Africa; it is formed after the model of the tomb of Scipio, at Rome.

The monuments of Mr. Whitney, (the inventor of the Cotton Gin,) and the late Dr. Nathan Smith are of the same form. The following is the inscription on Mr. Ashmun's monument.

ASHMUN. First Colonial Agent at LIBERIA, AFRICA. Born at Champlain, N. Y. Ap. 21st, 1794. Landed in Africa, Aug. 8, 1822. Died at New Haven, Aug. 25, 1828. Erected by the Am. Colon. Soc. 1829.

Mr. Ashmun arrived in New Haven about a fortnight before his death, laboring under severe bodily infirmities, brought on by his labors and exposures, in a tropical climate, for the benefit of the African colony. His constitution was so broken down by the hardships which he had endured, that the best medical skill could not save him from an early grave.

His funeral was attended by a large concourse of citizens, the faculty and members of Yale College, a number of the neighboring clergy, and the governor of the State. His remains were carried to the Center church, where an appropriate and eloquent sermon was delivered by the Rev. Mr. Bacon. Just as the services commenced, an affecting scene took place,—the mother of Mr. Ashmun, in her traveling dress, came into the congregation, supported by two persons, who conducted her to a seat. She had just arrived from the shores of Lake Champlain, to visit her son in his last illness, whom she had not seen for twelve years. But she was too late; she could only reach forth her aged hand and touch his coffin.

Eli Whitney, the inventor of the Cotton Gin. Of useful Science and Arts, the efficient patron and improver. Born Dec'r 8th, 1765. Died Jan. 8th, 1825. In the social relations of life, a model of excellence. While private affection weeps at his tomb, his country honors his memory.

In memory of Lucretia Pickering, wife of Samuel F. B. Morse, who died Feb. 7th, A. D. 1825, aged 25 years. She combined in her character and person a rare assemblage of excellence. Beautiful in form, features, and expression, peculiarly bland in her manners, highly cultivated in her mind, she irresistibly drew attention, love, and respect. Dignified without haughtiness, amiable without tameness, firm without severity, and cheerful without levity, her uniform sweetness of temper spread a perpetual sunshine around every circle in which she moved. "When the ear heard her it blessed her; when the eye saw her it gave witness to her." In sufferings the most keen her serenity of mind never failed her, death to her had no terror, the grave no gloom; though suddenly called from earth, eternity was no stranger to her thoughts, but a welcome theme of contemplation. Religion was the sun that illumined every varied virtue, and united all in one bow of beauty. Her's was the religion of the gospel, Jesus Christ her foundation, the author and finisher of her faith. In Him she rests in sure expectation of a glorious resurrection.

Col. William Lyon, born March 6, 1748, died Oct. 12, 1830. He was the first Cashier of the first Bank established in this city. Scrupulously exact in his intercourse with others, he was rigidly faithful in the discharge of every trust committed to him. Ardent in the pursuit of literature, his acquaintance with the biography, manners and customs of his native State was minute and extensive; and history, ancient and modern, especially that relating to the land of his forefathers, was to him peculiarly familiar: unshaken in the principles of civil liberty he abhorred tyranny in every form. "He loved mercy and walked humbly with his God."

In the year 1667, the Rev. Mr. Davenport of New Haven, having been invited to take charge of the first church in Boston, accepted the invitation, and next year removed to that capital. He had been about

thirty years minister at New Haven, and was greatly esteemed and beloved by his congregation. His church were very unwilling that he should leave them, and never formally gave their consent. Owing to his removal, the church and congregation at New Haven were for many years unable to unite in the choice of a person to take the pastoral charge of them. Mr. Davenport died at Boston, of an apoplexy, March 15th, 1670, in the 73d year of his age.

In Sir Fernando Gorges' "Wonder-working Providence," &c. a relation of the planting of the New Haven colony is given. Speaking of Mr. Davenport, it mentions the judicious and godly Mr. John Davenport, of whom the author is bold to say as followeth :

When men and Devils 'gainst Christ's flock conspire,
 For them prepar'd a deadly trapping net:
 Then Christ to make all men his work admire,
Davenport, he doth thee from thy country fet
 To sit in Synod, and his folk assist:
 The filthy vomit of Hels Dragon, deepe
 In Earth's womb drawn, blest they this poison mist,
 And blest the meanes doth us from error keep.
 Thy grave advice and arguments of strength
 Did much prevail, the errorist confound.
 Well hast thou warr'd, Christ draws thy dayes in length,
 That thou in learn'd experience may'st abound:
 What though thou leave a city stor'd with pleasure,
 Spend thy prime days in heathen desert land,
 Thy joy's in Christ, and not in earthly treasure,
Davenport rejoice, Christ's kingdome is at hand;
 Didst ever deem to see such glorious dayes?
 Though thou decrease with age and earth's content,
 Thou liv'st in Christ, needs then must thy joy raise;
 His kingdome's thine, and that ne'er be spent.

BETHANY.

BETHANY was incorporated as a town in 1832. It was previously a parish in the town of Woodbridge, by the name of Bethany. It is upwards of five miles in length and four in breadth, bounded n. by Prospect and Waterbury, w. by Oxford, s. by Woodbridge, and e. by Hamden. The central part of the town is ten miles from New Haven. The inhabitants are principally farmers, and the population of the town has not perhaps varied much during the last twenty or thirty years. The township is hilly and in some parts mountainous, and some portions of the town are not calculated for cultivation, and have been suffered to remain for wood and timber, which is of an excellent quality.

About 14 miles from New Haven, the main road to Waterbury passes by Beacon mountain, a rude ridge of almost naked rock, stretching southwest; at this place is "Collins' tavern," long known as an excellent public house, and the "Straitsville post office." About half a mile south of Mr. Collins', the road passes through a narrow defile, formed by a gap in the mountain, and is barely sufficient in width for a road and a small but sprightly brook, which winds through the narrow pas-

sage. On both sides, the cliffs are lofty, particularly on the west; on the east, at a little distance from the road, they overhang in a threatening manner.—“The ridges of the Beacon mountain present fine geological and picturesque features, and are much more abrupt and grand than most of the mica slate regions of Connecticut.”

On the night following the 14th of March, 1780, the house of Capt. Ebenezer Dayton, then residing in this place, was broken into and robbed by seven men, who were tories, and headed by a British officer, from Long Island. Mr. Dayton's house was situated nearly opposite where the first meeting house in Bethany was erected, about half a mile south of the present Congregational church, and about ten miles *n. w.* of New Haven. The particulars of this robbery were obtained from the Rev. Mr. Dayton, son of Capt. Dayton mentioned above. Mr. Dayton, who belonged to Long Island, was, on account of his attachment to the American cause, obliged to leave that island, and bring his effects with him to Bethany. A number of men, some of his neighbors, were obliged to leave the island for the same cause, and brought a considerable quantity of money with them, and for a while resided in Mr. Dayton's house. With these facts, the robbers appear to have become acquainted. At the time of the robbery, Mr. Dayton was absent on business at Boston, and the men who had been staying in the house, had left the day before, so that there was no one in the house but his wife, Mrs. Phebe Dayton, three small children and two servant colored children. About midnight, while they were all asleep, the window in the bedroom where Mrs. Dayton was sleeping, was burst in at once; seven armed men rushed in, passed through the room, and immediately rushed into the chambers, expecting (it is supposed) to find the men who had left the day before. While they were up stairs, Mrs. Dayton went to the front part of the house, raised the window, and endeavored to alarm the neighbors. Mr. Hawley, the minister of the parish, and Dr. Hooker, the physician of the place, both lived within 20 rods distance, both had lights in their houses at the time, and both heard the alarm, but did not know from whence it proceeded. The robbers, hearing Mrs. Dayton, came down, and tearing a sheet into strips, tied her hands behind her, made her sit in a chair, and placed her infant, (about six months old,) in her lap, while one of the robbers, placing the muzzle of his gun near her head, kept her in this position for about two hours, while the house was thoroughly ransacked from top to bottom. They found about 450 pounds in gold and silver, which belonged to Mr. Dayton, besides other valuable articles; what they could not conveniently carry off they wantonly destroyed, breaking in pieces all the crockery, furniture, &c. The whole amount of property carried off and destroyed, including bonds, notes, &c. amounted to five thousand pounds. The robbers left the house about 2 o'clock, and went to a place in Middlebury called *Gunn-town*, where they were secreted in a cellar by a family who were friendly to the British cause. While they were on their way to *Gunn-town*, they met a young man by the name of Chauncey Judd, of Waterbury, on a bridge, who had been to see

the young lady he afterwards married. Fearing he might discover them, they took him along with them. In the cellar kitchen where they were all secreted, there was a well. Into this well they talked of putting Mr. Judd; but the old lady of the house begged they would not think of it, as it would spoil the water. They stayed in this house a number of days: afterwards they went to Oxford, where they were secreted for several days longer in a barn; from thence they went to Stratford, took a whale boat, and crossed over to Long Island. The people at Derby, having received information of their passing through that place, two whale boats and crews, commanded by Capt. William Clarke and Capt. James Harvey, pursued them to the Island, and were fortunate enough to catch them all but one, just within the British lines. They were brought back, tried, condemned, and sent to Newgate; they however broke prison, and finally fled to Nova Scotia.

It was customary in this, as in many others places, in ancient times, to have nicknames for many of the inhabitants. These names originated from various circumstances. The following may answer as specimens: *Teachum*, *Hiccups*, *Toad-mounter*, *Satan's kingdom*, &c. were names by which some of the most respectable inhabitants of Bethany were designated. *Teachum* was the schoolmaster of the place,—he derived his name from his occupation: *Hiccups* was the name of an Indian,—it was applied to a person of very dark complexion. *Toad-mounter* derived his name from the following occurrence—this person, to show what could be done, took a piece of board and placed the central part on a stick of timber; he then put a toad on one end, and struck the other with considerable force, with an axe or club,—the consequence was, that the toad was *mounted* to a considerable height; in allusion to this feat, he ever afterwards went by the name of *Toad-mounter*. The person who went by the name of *Satan's kingdom* was a deacon and justice of the peace. This ungracious name was given in consequence of an unfortunate mistake. The minister of the place being sick, the deacon was called upon to officiate in his stead, it being the custom in those days, in the absence of the minister, for the deacon or some other principal person to make a prayer in the pulpit and read some approved sermon. The time, place, and occasion, all probably tended to disturb that collection of thought in the mind of the deacon, which would be desirable on such occasions. Instead, therefore, of praying that Satan's kingdom might be *destroyed*, as he intended, he prayed that Satan's kingdom might be *established*. A mistake of this kind, and on such an occasion, of course could not be easily forgotten.

The following account of the industry of a Bear, (copied from the Connecticut Journal of July 5th, 1766,) was taken from a man who was an active and eye witness to part of the scene, which happened at Bethany, about twelve miles from this town, [New Haven.]

He says that on the morning of the 8th of April (1766) last, his brother missed a three weeks old calf, which was housed the night before, in a small building. It appeared that the Bear tried to get under the sill of the door by removing two or three

bushels of dirt, but some stone hindered his passage that way; upon this disappointment, he changed his measures, and worked against the door with so much strength that he drew six tenpenny nails out of the wooden hinges and ketch of the latch. 'Tis supposed he did this by putting his paws under the door and prying and pushing, by which means he got in and carried off the best of two calves, a great part of which was found in a swamp about half a mile from the house. 'Twas observed that the track of the Bear was plain, but no appearance of his dragging the calf along the ground, so that he must have carried it on his back. While people were looking for the calf, a favorite old dog, called Beaver, suddenly left his master and soon after returned wounded, supposed in an engagement with the Bear. On a morning about a fortnight afterwards, the Bear was discovered eating a lamb about a mile and a half from the other place. After he was scared from thence by dogs who lugged him, 'tis said that he was three times driven from a flock of sheep about four miles from the last place. He then destroyed a hive of bees at another place. About four days after this performance he returned to the dwelling house near which he seized the calf, and at night unnailed the wooden bars which defended the window of a milk room, got in and feasted on a tray of milk, turned another over and spilt it, then took up a punch bowl containing about three quarts of cream, carefully carried it through the window, near fifteen feet from the house, without spilling; and after he had drunk or lapped it, gently turned the bowl bottom upwards (as if he had drunk a dish of tea for breakfast) and left it whole. The noise occasioned by the Bear's returning out of the window (which to be sure must have been greater than the noise occasioned by getting in) disturbed the man and his wife, who got up to discover the cause. They soon found where the robber got in; and both together putting their heads out at a window under which the bear happened to be, he rose up, like a lion rampant, and struck at them with his paws. The woman screamed, the man shuddered, got his gun and loaded it. The Bear was then mounted on the rails of a fence. The man shot, the Bear roared, and made off. The man then sent an express for his brother (the author of this story) who soon appeared with a good gun and his young dog Drover. After hunting awhile, they discovered the Bear lying in a swamp. Drover (who had never before seen a Bear) made towards him with a kind of half courage, as if unwilling to be thought a coward, at the same time prudently determining to do nothing rashly. 'Twas now remarked that brave old Beaver instead of running at the Bear, attacked Drover and prevented him showing how much he dared to do. This uncommon and seemingly strange behavior of Beaver (since it allowed their actions to speak louder than words) was reasonably imputed to a natural jealousy, lest Drover should have the honor of disabling Bruin, which Beaver seemed sensible he had done before, and therefore claimed and strove to maintain the respect due to his merit. Drover's master then shot, the Bear groaned hideously, and both dogs fell on him, who at last forced him to take shelter in a tree. There he was suffered to remain till daylight, when another shot brought him to the ground. His carcass weighed 162 lbs. and it appeared that six bullets had been shot through at three charges. Let it here be supposed that he was wounded once for killing the calf, once for eating the lamb, and once for destroying the bee-hive. For lapping the milk, oversetting the rest, stealing the cream, and damaging a garden, he was worried by the dogs. Several punishments for different crimes, all of which the same Bear was judged guilty of, and thus suffered for. His body was quartered, and partly eaten at Bethany, and the remainder brought to this town as a rarity.

BRANFORD.

BRANFORD was purchased by the New Haven colonists in December, 1638, a few days after they had bought New Haven, of Momanguin, sachem of Quinnipiac. The occasion of its first settlement was owing to a division among the people at Wethersfield. The members of the church at this place removed to Connecticut without their pastor, and having no settled minister at first, fell into unhappy contentions and animosities. These continued for a number of years, and divided the inhabitants of the town, as well as the brethren of the church. They were the means of scattering the inhabitants, and of the formation of new settlements and churches in other places. Great pains were taken

to compose their differences, but all attempts to effect this object were unsuccessful. Mr. Davenport and some of the brethren of the church at New Haven were sent for, in order to effect a reconciliation. The advice which Mr. Davenport and his brethren gave was, that if they could not be united among themselves, it would be expedient for one of the parties to remove and commence another settlement. This advice was ultimately followed.

In 1644, a tract of land was sold by New Haven to Mr. William Swaim and others, for the accommodation of those persons in Wethersfield who wished to remove. The settlement of the town was immediately commenced.* At the same time, Mr. Abraham Pierson, with part of his church and congregation, from Southampton, on Long Island, removed and united with the people of Wethersfield in the settlement of the town. A regular church was soon formed, and Mr. Pierson was chosen pastor. The town was named Branford.

Branford, (central part.)

The above shows the appearance of the Congregational and Episcopal churches and the academy, from the west, as you pass the main road towards Guilford, 7 miles from New Haven. The Congregational church is seen on the right; the next building, with a cupola, is the academy. The Episcopal church is the building with three windows

* Sept. 5, 1640.—The General Court, at New Haven, made a grant of Totokett to Mr. Samuel Eaton, brother of Gov. Eaton, upon the condition of his procuring a number of his friends from England, to make a settlement in that tract of country. Mr. Eaton failed in fulfilling the conditions.—About three years after, the subject was acted upon thus: "Totokett, a place fit for a small plantation, betwixt New Haven and Guilford, and purchased from the Indians, was granted to Mr. Swayne and some others in Wethersfield, they repaying the charges, which are betwixt £12 and £13, and joining in one jurisdiction with New Haven and the forenamed plantations, upon the same fundamental agreement settled in October, 1643, which they duly considering accepted."—*N. Haven records.*

in front. These buildings stand upon a large and open area, irregular in its form and uneven on its surface. The burying ground is situated a short distance eastward of the house seen on the extreme right.

At the time of the union of the colony of New Haven with Connecticut, all the towns under the jurisdiction of New Haven were satisfied with the union, except Branford. Mr. Pierson and almost his whole church and congregation were so displeased, that they soon removed to Newark, in New Jersey. They carried off the records of the church and town, and after it had been settled about five and twenty years, left it almost without inhabitants. For more than twenty years from that time, there was not a church formed in the town. People from various parts of the colony gradually moved into it, and purchased lands of the first planters, so that in about twenty years it became resettled. In 1685, it was reinvested with town privileges.*

The township is bounded n. by North Branford, w. by East Haven, e. by Guilford, and s. by Long Island sound. Its average length from east to west is about 7 miles, and its breadth 4. The surface of the town is uneven, being composed of hills and valleys; the soil is strong, but cold. When quickened with manure, it yields rich crops. The inhabitants are principally farmers. There is no considerable river in the town; the largest stream discharges itself into the harbor, which is small but convenient, admitting vessels from 40 to 60 tons. There is a cluster of small islands belonging to this town, called Thimble Islands, and another cluster called Indian Islands. Various kinds of salt water fish are taken plentifully in almost every month in the year. There are 8 vessels belonging to this town, manned by about fifty hands, which are engaged in taking salmon in the river Kennebeck, in the state of Maine. This business is commenced about the 1st of April, and continued till the 1st of July. The inhabitants of Branford are generally industrious, and property is very much equalized. In 1835, they had but one town pauper.

About the year 1740 was a time of great attention to the subject of religion in almost every part of the country. The religious part of the community were mostly divided in two parties, the *New Lights* and the *Old Lights*. The New Lights were active and zealous, in the discharge of every thing which they conceived to be their religious duty, and were in favor of Mr. Whitfield and others, itinerating through the country and stirring up the people to reform, &c. The Old Lights considered much of their zeal as wild-fire, and endeavored to suppress it. In the year 1741, when the grand council met at Guilford, the association drew up several resolutions to be laid before that council; among which was the following: "That, for a minister, to enter into another minister's parish, and preach, or administer the seals of the covenant, without the consent of, or in opposition to the settled minister of the parish is disorderly, &c." A majority of the ministers being of the Old Light stamp, "they expelled from the association, all the zealous Calvinistic preachers, or enthusiasts as they esteemed them, except Mr.

* Dr. Trumbull.

Robbins of Branford, a young preacher, who had been ordained about eight or ten years." Him they disciplined, &c. for some time. His first offense seems to have been his preaching for the Baptists, who had established themselves in the first society of Wallingford about 1735. Mr. John Merriman, their pastor, had requested some of the standing ministers to preach occasionally for them. There was a complaint made against Mr. Robbins for his irregular preaching, and he was required to make a confession. As he could not conscientiously acknowledge that his preaching to the Baptists was contrary to the word of God, or the Saybrook platform, he refused to make the confession they desired, although it was evident he wished to live in harmony with his brethren in the ministry.

After a variety of proceedings against Mr. Robbins, he (Mr. R.) laid the case before the society meeting at Branford. The meeting was very full, and the following votes were passed.

"1. That this society is of opinion, that what our pastor has offered to the association of New Haven county, relating to his preaching to the Baptists in Wallingford, is sufficient."

"2. That this society desire the Rev. Mr. Robbins to continue in the ministry among us, notwithstanding his preaching to the Baptists, and what the consociation of New Haven county have done thereon."

"3. That we desire the Rev. consociation and association not to send any councils or committees among us, unless the society desire it."

"4. That a particular people have a right to choose their own minister; and as no ecclesiastical authority has right to impose one upon them without their vote and consent, so no authority has right to censure, suspend or depose a minister regularly ordained, without the vote and consent of his people."

"5. That we cannot submit to the act or conclusions of any councils respecting the ministry among us, that are made without the vote and consent of this society."

Votes in the affirmative, 52—in the negative, 15.

At a church meeting in Branford, Nov. 4th, 1745, the church passed the following votes:

"1. That we renounce the Saybrook platform, and cannot receive it as a rule of government and discipline in the church."

"2. That we declare this church to be a congregational church."

"3. That we receive the scriptures of the Old and New Testament as the only perfect rule and platform of church government and discipline."

"4. That though we receive the scriptures as the only perfect rule; yet as we know of no human composure that comes nearer to the scriptures in matters of church government and discipline, than the Cambridge platform; so we approve of that for substance, and take it for our platform, agreeably to the word of God."

"5. That we are not hereby straightened in our charity, but free to hold communion, not only with congregational churches, and church members that are in good standing, but with those called Presbyterian, and also with those under the Saybrook platform regimen."

"Voted, That in testimony of our respect to other churches, and freeness to commune with them; we are willing that our Rev. pastor should exchange labors with ordained ministers in New Haven county, or invite any of them to preach with us, as opportunity presents."

In 1746, Mr. Robbins was cited to appear before the consociation. With the citation, the articles of complaint were delivered. They are introduced here, to give some light on the nature of the religious controversies at that period. Those which respected his doctrine were—

"1. That he, the said Mr. Robbins, has in public taken it upon him to determine the state of infants, dying in infancy, declaring that they were as odious in the sight of God, as snakes and vipers were to us; and left it wholly in the dark whether there were any saved or not.

"2. That he had assumed to himself the prerogative of God, the righteous judge, in judging the condition of the dead, in a funeral sermon, saying that they were in hell, to the great grief of mourning friends and others.

"3. That in his public preaching he had been guilty of speaking evil of dignities; declaring that the leaders or rulers of the people were opposers of the glorious work of God in the land; and comparing our civil authority to and with Darius, who cast Daniel in the lion's den.

"4. In judging and declaring those persons carnal and unconverted, that did not approve of the late religious stir that has been made in the land; and in the improvement of his sermon dividing them, and calling one part, that is, the approvers, the children of God, and branding the other part with the name and character of opposers.

"5. The said Mr. Robbins has also publicly and censoriously judged those that did not fall in with and impute the religious stir in the land (which he calls a glorious work of God) to be the work of God's spirit, declaring such were guilty of the unpardonable sin.

"6. He has publicly asserted, and taught and laid down, that a man might be sincere in religion, and a strict observer of the sabbath, and yet be a hypocrite.

"7. Said Mr. Robbins has publicly reflected upon and reviled the standing ministers of this land, calling them Arminians, and comparing them with and to false prophets, putting himself in the place of Micajah."

With respect to his Antinomian doctrines, they complained,

"1. That he has publicly taught us, that there is no promise in all the bible that belongs to sinners: thereby frustrating the covenant of God's free grace, and the condescension and compassion of God, and his Son, our Saviour, to poor, lost and perishing sinners.

"2. That there is no direction in all the bible how men should come to Christ, nor could he direct any persons how they should come to him: thereby rendering the study and search of the holy scriptures, at least an unsafe and insufficient way of finding Christ and the preaching thereof useless.

"3. He has publicly taught that it is as easy for persons to know when they are converted, as it is to know noonday light from midnight darkness; making the only sure evidence of conversion to consist in inward feeling, and a sense of their love to God.

"4. He has declared in public, that believers never doubt of their interest in Christ, after conversion; and if they do, it is the sign of an hypocrite; rendering sanctification no evidence of conversion or justification, and that believers are never in the dark.

"5. He has also taught that God could easier convert the seat a man sits on than convert a moral man; and that the most vicious or vile person stands as fair for conviction and conversion as the strictest moral man: thereby making holiness and obedience to the moral law, no way necessary to be found in men for their salvation.

"6. Mr. Robbins has taught that there are some sinners that Christ never died for, nor did he come to save them; thereby perverting the great doctrines of redemption in the gospel, and rendering all endeavors in men to obtain salvation, useless; Arminianism and blending the covenant of works and covenant of grace together."

With relation to his enthusiasm, which they complained of as exceedingly grievous to them, these articles were charged against him:

"That bitter and censorious spirit discovered by the said Mr. Robbins, against all, even civil magistrates, as well as ministers, who do not think the commotions in the land which bear the name of religion, a glorious work of God, and the effect of the agency of the Holy Spirit, declaring all such to be guilty of the unpardonable sin.

"2. In that strange heat of spirit, under which the said Mr. Robbins has acted; discovered in a perpetual uneasiness, or craving to be preaching; going into those many unscriptural night meetings, and frequent public preaching under a religious pretence; consorting with and improving those to preach and carry on in public, as well as in those private meetings, that have been most forward and famous for their enthusiasm in the present day.

"3. In the spirit of pride and conceitedness, and expectation to be believed only upon positive and bold assertion, discovered by said Robbins; among other instances thereof, by publicly declaring, in a sermon, that the standing ministers in this land were Arminians, and calling them false prophets, while he put himself in the place of Micajah before Ahab, in 1 Kings, xxii. pronouncing these words upon it, That if the body of the people were in the way to eternal life, the Lord had not spoken by him.

"4. Mr. Robbins has publicly taught, that unconverted persons have no right to praise God."

With respect to his conduct, these articles were charged:

"1. Mr. Robbins' earnestness in promoting and improving strolling or travelling preachers; and improving those that were most disorderly, to preach and exhort in the society; more especially at one such meeting carried on at his own house, by Messrs. Brainard and Buel; and another at the same place, carried on by Messrs.

Wheelock and Munson; to the dishonor of religion, to the just offence of many of the church and people, and to the destruction of peace and gospel order, in church and society.

"2. His introducing Mr. Davenport to preach and exhort, and also his man to pray and sing, at the time when he went through the country, singing along the streets; attended with this aggravating circumstance, that it was on sacrament day; to the great confusion and disturbance of the church, and profaning of the sabbath in this society.

"3. His preaching in Wallingford, in the meeting-house of the anabaptists there; and that contrary to the desire of a great number of the people at Wallingford, requesting him that he would not, and to the advice of neighboring ministers to the contrary."*

These complaints were evidently got up in a spirit of exaggeration. "Mr. Robbins," says Dr. Trumbull, "was a most inoffensive gentleman; mild, peaceable and a peace maker: was uncommonly gifted in prayer: a sound and searching preacher, and greatly beloved by his people. He was popular in the neighboring towns and societies, and gradually grew in esteem among his brethren in the ministry. In the year 1755, about seven years after, he was invited to sit with the consociation, at the ordination of Mr. Street, at East Haven; and no objections were made on account of any thing which had passed in the times of his trouble.

The following is copied from an inscription on one of the monuments in the burying ground.

The Revd. Mr. Saml. Russel, Decd. ye 25th day of June, 1731, in ye 71st year of his age, and 44th of his Ministry. Mrs. Abigail Russel, his virtuous consort, Decd. ye 7th day of May, 1733, in ye 67 year of her age.

From vulgar dust distinguish'd lies
The active Heralds of the skies,
Whose voice Salvation did attend,
Could comfort to the meeker send,
And make the stubborn hearted bend;
With Honor watch his urn around,
And ne'er forget the silver sound,
Till Trumpets bid the Final day,
And laboring Angels rouse his clay,

By Heaven dismiss'd you'll shine his crown,
And bow his head with glory down.

In slumber bound fast by his side,
The tender part, his pious bride,
Reclines her head.
So round the oak the ivy twines,
With faithful bands in spiral lines,
Though both are dead.

CHESHIRE.

CHESHIRE was originally a parish in the town of Wallingford, by the name of New Cheshire. It was made a society in 1723; it consisted then of about thirty five families. The Rev. Samuel Hall was their first minister; he was ordained their pastor in December, 1724. A church was formed, and the first meeting house erected the same year. The number of male members in the church at its formation was eleven. In the year 1770, the number of members was about 400. The Rev. Mr. Foot was ordained colleague pastor with Mr. Hall in March, 1767.

In the center of the town there is a pleasant village of 40 or 50 dwelling houses, three churches, and an Academy. The engraving on the succeeding page shows the central part of the village; the Congregational church is seen on the left; the spire of the Episcopal church is seen on the right; the next building seen westward of this is the Meth-

* Trumbull's Hist. Conn. Vol. 2.

dist church, a plain brick edifice without a spire; the Academy stands eastward of these buildings, on the opposite side of the street. This place is $13\frac{1}{2}$ miles from New Haven, 25 from Hartford, $9\frac{1}{2}$ southeast from Waterbury, and one mile from Beachport, a small cluster of buildings on the New Haven and Northampton canal.

South view of Cheshire, (central part.)

Cheshire was incorporated as a town in 1780. It is bounded n. by Southington, w. by Waterbury and Prospect, e. by Meriden and Wallingford, and s. by Hamden. It is about 7 miles in length from north to south, and 4 miles in breadth. The northeast section of the town is watered by the Quinnipiac. The New Haven and Northampton canal passes through the whole length of the town. The township is pleasantly diversified by hills and valleys, and the prevailing soil is a gravelly loam, generally rich and fertile. Agriculture is the principal business of the inhabitants.

In March, 1732, (a little more than eight years after the society of New Cheshire was formed,) the *Small Pox* "broke out in the center of the society." How it came there is to this day a secret. Being an unusual disease, and many opinions about it, people went upon the Sabbath and other public days, to see the sick. After some time, when it began to spread, some were afraid it was the small pox, and sent for those who had had "the distemper, to know whether it was the small pox," who "all agreed it was not; which made people careless, till Dr. Harpin came and told 'em it was. Thus the infection was spread in many families, and they were brought into the greatest distress, for want of experienced nurses—yea, had scarcely help to bury the dead." It appears from the Rev. Mr. Hall's discourse on the occasion, that 124 persons, probably about one third of the whole population in the society, had the disorder, and it is somewhat remarkable, considering the circumstances, that but seventeen persons died.

Episcopal Academy at Cheshire.

The above is a western view of the Episcopal Academy. It is a substantial brick edifice, 54 feet by 34, and was erected by the town in 1796; it is surrounded by a spacious court yard, and stands a little back from the main street.* This institution was incorporated in 1801, and was called the Episcopal Academy of Connecticut.

Cheshire, April 29, 1796.

Yesterday was laid the first stone of the Episcopal Academy, (now building in this town,) by the master of Temple Lodge, assisted by the Brethren—under the stone was laid a slate, with the following inscription:

April 28, 1796.

The Corner Stone
of the Episcopal Academy,
erected by proprietors,
was laid by the Fraternity
of free and accepted Masons.

The day being fine, a procession was formed from the lodge room to the Episcopal church, where a well adapted discourse was delivered by the Rev. Mr. Ives—from thence to the ground, and after laying the stone, the Rev. Mr. Brunson addressed the brethren and crowd of spectators assembled on the occasion, with a few pertinent observations. The procession then returned, and together with the proprietors of the building partook of a festive entertainment. The whole was conducted with order and regularity to the satisfaction of all present.

Extract from Cheshire Town Records.

June 26th, 1780.—At a special town meeting held at Cheshire, major Reuben Atwater was chosen moderator. Voted, that the selectmen shall see that the soldiers which are drafted and to march to-morrow morning, be provided each man with a horse. Voted, that Miles Hull, Nathaniel Bunnell, Robert Martin and David Hitchcock, be a committee for hiring the soldiers to fill up the continental army for the term of three years, or during the present war.

Voted, that the town would give to each soldier which shall enlist into the continental army for three years, or during the present war, to be paid equivalent to silver at 6s. 8d. per ounce, the sum of twenty shillings per month, during the time of their continuance in the service, to be paid annually.

* Since the above drawing was taken, the poplars seen standing around the Academy have been cut off, and the building has been somewhat improved in its general appearance.

Voted, that any that enlist as before mentioned, and in want of bounty money, the selectmen shall hire money for that purpose.

June 27, 1781.—Voted, to lay a tax of two pence on the list of 1780, to be paid in silver or grain, at market price, for the purpose of raising men into the army.

1781, Dec. 11th.—Voted, that Asa Brunson, Munson Merriam and John Bryan, be a committee to supply the soldiers' families the year ensuing.

1784, March 30.—Voted, in said meeting, that they would prefer a memorial to the General Assembly of this State for the purpose of making the town of Cheshire a half shire county town.

The following are copied from monuments in the old burying ground, eastward from the Congregational church.

In memory of ye Rev. Samuel Hall, Pastor of ye ch'h in Cheshire, died Feb. 26th, A. D. 1776, Æ. 81, and ye 42d year of his ministry. Also of Mrs. Ann Hall, died 1775, aged 74.

A friend to God, a guide in Christ,
Do here repose their peaceful dust,
To rest in darkness in the tomb,
Till Gabriel's trumpet wake the just.

Here lies the body of Capt. Elnathan Beach, a gentleman who from a small fortune, by an honest industry and diligent application to business, raised a very considerable estate. His liberal benefactions to the Parish of Cheshire will perpetuate his name: And as he was perhaps the first in Connecticut, who began a fund for the relief of the poor, so he deserves a particular place in the memory of all who wish well to mankind. He departed this life, Aug. 16th, 1742, in ye 45th year of his age.

Here lies the body of Capt. Samuel Cooke, who died Nov. 7th, 1745, in his 51st year. His indefatigable industry and success in business were equally admirable: his views of trade were large, and as his estate was sufficient for the purpose, so he generously designed to deliver his country from the slavery it had been so long in to the neighboring colonies, by opening a new scene of commerce with Europe. His design herein, as also his benefactions to the church, and poor of the parish of Cheshire, are worthy the imitation of all whom Providence has so remarkably blessed.

DERBY.

THE original name of this town was Paugasset. It appears, that about the year 1653, Gov. Goodyear, and others in New Haven, made a purchase of a considerable tract at this place. In 1654, it seems some few settlements were made. The next year the planters presented a petition to the General Court of New Haven, to be made into a distinct town. The Court granted their petition, and gave them liberty to purchase lands sufficient for a township. The Milford people, however, at the next Court made such strong remonstrances against the act, that the Court determined that the people at Paugasset should continue as they had been, under the town of Milford, unless the parties should come to an agreement, respecting the incorporation of the inhabitants there into a distinct township. In 1657 and 1659, a purchase was made of the lands, of the chief sagamores, Wetanamow and Raskenute. This purchase appears to have been confirmed afterwards by Okenuck, the chief sachem. Some of the first planters were Ed. Wooster, Ed. Riggs, Richard Baldwin, Samuel Hopkins, Thomas Langdon, and Francis French. In October, 1675, the planters renewed their application for town privileges. They represented that they then consisted

of twelve families, and that eleven more were about moving into the plantation; they had procured a minister, built him a house, and made provision for the support of the ministry. Upon these representations, the Assembly made them into a town, by the name of Derby.

Derby is bounded north by Oxford, southwest by the Housatonic, separating it from Huntington, on the east by Woodbridge, and south by Orange. Its mean length is about $5\frac{1}{2}$ miles, and its mean breadth $4\frac{1}{2}$ miles. The face of the town is diversified with hills and valleys, and with some fine tracts of alluvial upon the borders of the Housatonic and Naugatuc. There are two societies or parishes, Derby proper, and the parish of Great Hill, in the northern section of the town. There are six houses of worship in the town, 3 Congregational, 2 Episcopal, and 2 for Methodists.

Southeast view of Derby Landing.

The above engraving shows the appearance of the village at Derby Landing, or Narrows, (as it is sometimes called,) as you enter it on the New Haven road, descending the hill, looking towards the northwest. The village is on the east side of the Housatonic, immediately below its junction with the Naugatuc or Waterbury river. It consists of about 50 dwelling houses, 4 or 5 mercantile stores, and a number of mechanics' shops. These buildings are mostly built on three short streets running parallel with the river, and on the side of a high hill, which from its summit descends with considerable abruptness to the water, and of course the easternmost street is considerably elevated above the others. There are two churches in Derby proper; 1 for Congregationalists and one for Episcopalians; both situated about a mile north of the Landing. On the left of the engraving, in the distance, is seen the Leavenworth bridge, leading to Huntington, crossing the Housatonic river. The present bridge was erected in 1831, at an expense of about 12 or 14,000 dollars. Part of Birmingham is seen in the distance, situated on

the elevated point of land between the Naugatuc and Housatonic rivers. There are two packets which ply weekly between this place and New York. Considerable quantities of wood and ship timber are exported, and ship building, to some extent, is carried on at the Landing. Derby Landing is about 14 or 15 miles from the mouth of the river, where it empties into Long Island sound, and $8\frac{1}{2}$ miles northwest from New Haven. The river is navigable to the Landing, for vessels of about 80 tons, there being about 10 feet of water.

Southeastern view of Birmingham, Derby, (1836.)

The first settlers at the Landing were Thomas Parsons, Samuel Plumb, Joseph Hull, Ebenezer Chatfield, Ebenezer Johnson, and two families of Weeds. Thomas Parsons' house stood on the ground where the Episcopal church now stands; Plumb located himself about half a mile north; Joseph Hull, the great grandfather of Commodore Hull, had his house about half a mile north of Plumb; Chatfield settled a little north of Hull; Johnson built his house about a mile s. e. of the Landing; he was a captain, afterwards a colonel. The Weeds located themselves about a mile n. e. of the Landing, at a place since called *Squabble hole*. This place is said to have derived its name from the circumstance of the two first families who lived here having much contention with each other. Capt. Ethel Keeney, now living, was the first white child born at the Landing. He was born March 17th, 1755.

The engraving above shows the appearance of Birmingham, from the shore at Derby Landing. This village was commenced in 1834. There are at present, (July 1st, 1836,) about 20 dwelling houses, and 3 mercantile stores: there is in, and about to be put in operation, 1 factory for making sheet copper and copper wire; 1 for making augers; 1 for making carriage springs and axles; 1 for making nails or tacks; 1 for flannels and satinets, with some other minor manufacturing establishments. The water by which the mills and factories are put in operation is taken from the Naugatuc, by a canal which extends upwards

of a mile and a half northward of the village. A steamboat is about to commence running between this place and New York. Part of the Leavenworth bridge, over the Housatonic, is seen on the extreme left. The house of Sheldon Smith, Esq. is seen a little eastward of this, on the elevated ground above the copper factory. This edifice is elegantly situated, and commands a most beautiful and interesting prospect to the southward, particularly of the village at the Landing, and the passage of the Housatonic through what is called the Narrows. A small round structure is seen on the right: this is the *Reservoir*, from which water is supplied to the inhabitants of the village. It is raised fifty feet, from a well under the grist mill, on the canal below.

The village of Humphreysville, about four and a half miles north of Derby Landing, owes its rise and name to the Hon. David Humphreys. The original name of this place was *Nau-ko-tunk*, which signifies in the Indian language *one large tree*, so named from a large tree which formerly stood near Rock Rimmon, about three fourths of a mile north of the falls. *Naugatuc*, the English pronunciation of the above word, was the name given to the stream passing through the village. For a long period after the settlement of this place, it was called *Chuse-town*, so named from Chuse, the last sachem of the Derby Indians, who is said to have derived this name from his manner of pronouncing the word "choose." His proper name was Joe *Mau-we-hu*: he was the son of Gideon Mauwehu, a Pequot Indian, who was the king or sachem of the Scatacook tribe of Indians in Kent. It appears that Gideon, previous to his collecting the Indians at Kent, lived in the vicinity of Derby, and wishing to have his son brought up among the white people, sent Joe to Mr. Agar Tomlinson of Derby, with whom he lived during his minority. Chuse preferring to live at Derby, his father gave him a tract of land at the falls, called the *Indian field*. Here he erected his wigwam, about six or eight rods north of where the cotton factory now stands, on the south border of the flat. It was beautifully situated, among the white oak trees, and faced the south. He married an Indian woman of the East Haven tribe. At the time Chuse removed here, there were but one or two white families in the place, who had settled on Indian hill, the height of land east of the river, and southeast of the cotton factory, in the vicinity of the Methodist and Congregational churches. These settlers wishing Chuse for a neighbor, persuaded him to remove to the place where the house of the late Mrs. Phebe Stiles now stands, a few rods north of the Congregational church. When Mr. Whitmore built on the spot, Chuse removed back again to the falls, where a considerable number of the Indians collected, and built their wigwams in a row, a few rods east of the factory, on the top of the bank, extending to Indian hill. Near the river, in the Indian field, was a large Indian burying ground; each grave was covered with a small heap of stones. Mr. Stiles, of this place, purchased this field about forty six years since, of the Indian proprietors, and in plowing it over, destroyed these relics of antiquity. The land on the west side of the river from this place, where the Episcopal church stands, was formerly called *Shrub oak*. Both the Indians and the whites went to meeting

on foot at Derby. Those of the whites who died here, were conveyed on *horse litters* to be buried at Derby; these litters were made by having two long poles attached to two horses, one of which was placed before the other; the ends of the poles were fastened, one on each side of the forward horse, and the other ends were fastened to the horse behind. A space was left between the horses, and the poles at this place were fastened together by cross pieces, and on these was placed whatever was to be carried.

Chuse lived at this place forty eight years, and then removed with most of the Derby Indians to Scatacook, in Kent, where he died, at the age of about eighty years. He was a large, athletic man, and a very spry and active hunter. He had ten children.* Chuse and his family were in the habit of going down once in a year to Milford "to salt," as it was termed. They usually went down in a boat from Derby Narrows; when they arrived at Milford beach, they set up a tent made of the sail of their boat, and stayed about a fortnight, living upon oysters and clams. They also collected a considerable quantity of clams, which they boiled, dried them in the sun, and strung them in the same manner as we do apples which are to be dried. Clams cured by this method were formerly quite an article of traffic.

The Indians in the interior used to bring down dried venison, which they exchanged with the Indians who lived on the sea coast for their dried clams. Chuse used to kill many deer while watching the wheat fields; also great numbers of wild turkies, and occasionally a bear. Some of the whites also were great hunters; the most famous were Gideon Washburn and Alexander Johnson. Rattlesnakes were formerly very numerous about *Niumph*, near Rock Rimmon, and occasionally have been known to crawl into the houses in the vicinity.

About the time of the first settlement at Humphreysville, a white man by the name of Noah Durand, killed an Indian named John Sunk, by mistake. They were hunting deer on opposite sides of the river—Durand on the west side, and the Indian on the east; it was in the dusk of the evening, in the warm season, at the time the deer went into the river to cool themselves. Durand perceived something moving among the bushes on the east side, and supposing it to be a deer, aimed his gun at the place and fired. Sunk, mortally wounded, immediately cried out, "you have killed me." Durand sprang through the river to the assistance of the dying Indian, who begged for water; Durand took off his shoe, filled it from the river, and gave it to Sunk, who after drinking, died immediately. This took place perhaps twenty or thirty rods below the bridge at Humphreysville, just below where Henry Wooster lived. A kind of arbitration was afterwards held upon this case by the white people and the Indians. One of the Indian witnesses remarked, that he never knew of deer wearing red stockings before, alluding to the common Indian dress. The Indians, however, appeared satisfied that their countryman was killed by mistake, and ever afterwards made Mr. Durand's house their stopping place.

* *Eunice Mauwehu*, aged 72 years, the youngest daughter of Chuse, is still living (1836) at Scatacook, in Kent, and it is from her that most of the particulars respecting Chuse and the Indians are derived.

S. E. view of Humphreysville, in Derby.

The above cut shows the appearance of Humphreysville, as it is entered upon the New Haven road. The Humphreysville Manufacturing Company was incorporated in 1810. The village is situated in a small valley on the Naugatuc, four and a half miles from its junction with the Housatonic river at Derby Landing. It is surrounded with lofty hills, excepting the narrow valley through which the Naugatuc passes. The heights south of the village, on the western side of the river, are lofty, rocky and precipitous. The building seen in the central part of the engraving is the Humphreysville Cotton Manufactory; it is four stories in height, and about 100 feet long. On the left of the print, on elevated ground, is seen the Episcopal church: there are two other houses of worship in this place, one for Congregationalists, and one for Methodists; the last two are situated on the heights a few rods s. e. from the central part of the village. Directly underneath the Episcopal church is seen, in the engraving, a part of Naugatuc river, with the falls. At this place a ledge of rocks, about twenty feet in height, crosses the river, and forms a perfect dam about two thirds the distance: the remaining third is closed by an artificial dam. This place was formerly known by the name of *Rimmon Falls*. There are about 50 or 60 dwelling houses in the vicinity of the factories, 3 or 4 mercantile stores, &c. Most of the dwelling houses are south of the cotton factory; only a few of them appear in the engraving. A small but beautiful grove of pines is situated at the southern extremity of the village, through which the buildings, which are mostly painted white, appear uncommonly beautiful, as the village is approached from the south upon the river roads.

“Gen. *David Humphreys* was a native of this town. He was a son of the Rev. Daniel Humphreys, and was born in July, 1752. In 1767 he entered Yale College, and received his first degree in 1771.

Whilst in college, he cultivated an attachment to the muses, and disclosed early evidences of poetical talent. During the Revolutionary war, he entered the army as a captain; but at what time we are not informed.

"In 1778, however, he was aid to Gen. Putnam, with the rank of major. Two years after this, he was appointed aid to the commander in chief; having been the successful candidate of four who solicited the office. His competitors were Col. Tallmadge, Gen. William Hull, and Roger Alden. He continued in this situation during the war, having the rank of colonel, and was particularly distinguished at the memorable siege of York; and Congress as a respectable testimony of their high estimation of his valor, fidelity, and signal services on this occasion, voted him an elegant sword. At the close of the war, he accompanied Gen. Washington to Virginia. In 1784, he embarked for France, in company with the brave, but unfortunate Kosciusko; having, on the appointment of Mr. Jefferson as ambassador to France, been nominated as his secretary. In 1786, he returned to America and revisited the scenes of his youth in his native town. Soon after his return, he was elected by his fellow citizens to be their representative in the legislature of the State, and continued to be elected for two years, when he was appointed to the command of a regiment raised for the western service. During the period that he held his office, he remained most of the time in Hartford; and, with Hopkins, Barlow and Trumbull, assisted in the publication of the *Anarchiad*. On the reduction of his regiment, he repaired to Mount Vernon, and continued with Gen. Washington until 1790, when he received an appointment to the court of Portugal. In 1794, he visited America, but soon returned to Lisbon. Soon after this, he received an appointment to the court of Spain, where he continued until 1802, when he again returned to his native country. This was the end of his public life. After his return to America, he was, until his death, extensively engaged in various objects of public utility, particularly manufactures and agriculture. He is well known to have been one of the first who introduced merino sheep into this country, which has greatly improved the quality of wool, and given a strong impetus to domestic manufactures. The extensive woolen and cotton factory, which he established in this town has already been noticed. He also did much for the promotion of agriculture; and just previous to his death was making exertions to form a society for the purpose of procuring a farm for agricultural experiments.

"Gen. Humphreys possessed considerable literary acquirements, although he published no work of magnitude; his writings consist principally of various poetical productions. Of these, the most important are an address to the armies of the United States; a poem on the happiness of America; a poem on the future glory of the United States; a poem on the industry of the United States; a poem on the love of country; and a poem on the death of General Washington. He wrote also a memoir of Gen. Putnam, various political tracts, &c. He died in New Haven, 21st Feb. 1818, aged 66 years."*

Isaac Hull is a native of this town, and was born near Derby landing. It was to this officer that the first British flag was struck on the ocean, during the last war with Great Britain. Commodore Hull, in early life, adopted the profession of a seaman, and soon became master of a vessel. He was in this situation at the first establishment of the navy, and at that time received the appointment of a lieutenant. The first exploit which brought him into notice, was the admirable seamanship displayed in his escape in July, 1812, when in command of the *Constitution* of 44 guns, from a British squadron, consisting of one ship of the line, four frigates, a brig and a schooner. The chase continued for sixty hours. On the 19th of August, 1812, Capt. Hull, with the same vessel and crew, fell in with a large frigate, which struck to him after a close action of thirty minutes. She proved to be his majesty's ship the *Gurriere*, rated at thirty eight guns, and carrying fifty; commanded by Capt. J. R. Dacres. At the time the *Gurriere* surrendered she had not a spar standing, and her hull below and above water was

* Pease and Niles's Gazetteer.

so shattered, that a few more broadsides must have carried her down. The Constitution had six killed and seven wounded. The loss of the *Gurriere* was 15 killed, 62 wounded, and twenty-four missing.

[From the *Connecticut Gazette*.]

Derby, Feb. 18th, 1764.

On the evening of the seventh of this instant, Feb. 1764, there was a violent storm of hail and rain; the next morning after was observed a large breach in a hill on the west side of the old river,* supposed to be occasioned by some subterraneous wind or fire; the breach is about twenty feet deep, though much caved in, in length one hundred and thirteen feet; about sixty rods of land was covered with the gravel and sand cast out of the cavity, some of which was carried two hundred and fifty nine feet to the brink of the river; four trees of about a foot diameter were carried one hundred and seventy three feet distance, and 'tis supposed by their situation that they must have been forced up forty feet high; some small stones about the bigness of walnuts, were carried with such velocity that they stuck fast in a green tree that stood near the cavity; a large dry log better than two feet diameter was carried up so far in the air, that by the force of the fall one end of it stuck so fast in the ground that it kept the other end up. The narrowest part of the breach is about thirty feet at the surface of the ground, and the bottom of the breach is crooking, winding much like the streaks of lightning.†

The above account was taken by exact rule by us.

SILAS BALDWIN,
NEHEMIAH FISHER,
DAVID WOOSTER.

The ancient burying ground in Derby is upon a small and beautiful knoll, which rises a few rods north of the Episcopal church in Derby proper. The following inscription is on the monument of one of the ancient ministers of the place.

Here lyes interr'd ye body of ye Rev. Mr. Joseph Moss, ye faithful and affectionate Pastor of ye flock in this town, 25 years; a learned man, a good Christian, who departed this Life Jany. 23d, Anno Dom. 1731, *Ætatis Suxæ* 53.

With holy ardor of Seraphic Love
He dropt his clay and soared to Christ above.

The Rev. John Bowers appears to have been the first minister in this town. He removed from Derby and settled at Rye, about the year 1688. Mr. Webb then preached at Derby about twelve years, but was not ordained. The Rev. Daniel Humphreys, the father of Gen. Humphreys, was ordained in this place about the year 1733. The following is the inscription on his monument in the old burying ground.

The Rev^d. Daniel Humphreys died Sept. 2d, 1787, in the 81st year his age. For more than half a century he was the established minister of the first Society in this town. Mrs. Sarah Humphreys, the affectionate wife of his youth, and the tender companion of his advanced age, died July 29th, 1787, just five weeks before him.

The seasons thus

As ceaseless round a jarring world they roll,
Still find them happy; and consenting spring
Sheds her own rosy garlands on their heads:
Till evening comes at last serene and mild,
When after the long vernal day of Life
Enamour'd more as more remembrance swells
With many a proof of recollected love,
Together down they sink in social sleep,
Together freed their gentle spirits fly,
To scenes where love and bliss immortal reign.

* This was a little north of Birmingham, perhaps 80 or 100 rods.

† "A light was seen on the spot in the evening before the explosion. It was accompanied by a loud report, and some fossil substances were ejected, which were analyzed by Dr. Munson, of New Haven, and found to contain arsenic and sulphur."—*Webster on Pestilence*, Vol. 1, p. 262.

EAST HAVEN.

EAST HAVEN was originally a part of New Haven. In June, 1639, the free planters of Quinnipiac convened in Mr. Newman's barn, and formed their constitution of government. Among the subscribers to that instrument who settled in East Haven, or were concerned in that settlement, were William Edwards, Jasper Crayne, Thomas Gregson, Wm. Tuttle, Garvis Boykim, John Potter, Matthew Moulthrop, Matthias Hitchcock and Edward Patterson. To these were added Thomas Morris and John Thompson. After the first division of lands had been made at New Haven, several enterprising farmers began to settle on the eastern side of the Quinnipiac, when a second division was made. In 1639, Thomas Gregson petitioned for his second division at Solitary (now Morris') Cove, and on the 5th of August, 1644, 133 acres were allotted to him at that place. There he placed his family, the first in East Haven. In 1647, Mr. Gregson and a number of the principal planters of New Haven were lost at sea on a voyage to England.

The first iron works in Connecticut were established in this town and continued about twenty five years. This business was introduced in the following manner.

“ *General Court, N. H. 12th Nov. 1655.* ”

“ The Towne was acquainted that there is a purpose, that an *Iron Worke* shall be set up beyond the farmes at Stoney River, which is considered will be for the publike good; and Mr. Goodyear declared that Mr. Winstone and himself did intend to carry it on; only he desired now to know what the Town desired in it; much debate was about it; but no man engaged in it at present; but divers spoke that they would give some worke towards making the Damm, whose names and number of days worke were taken, which amounted to about 140 days: so it issued for that time.”

“ 29th Nov. 1655.—The Governor informed the Towne that this meeting was called to consider something further about the Iron Worke, sundry who engaged to worke last Court, have not yet performed, tho' all others have: and it was now concluded that those who are now behinde, should be called upon to perform what they promised, It was also now desired that men would declare, who will engage in the worke, and what estate they will put in. But few speaking to it, it was desired that those who are willing would meet at the Governor's this afternoon at 2 o'clock, to declare themselves therein, and it was now propounded whether the Towne will give up their right in the place, and what accommodation is necessary for the best conveniency of the said *Iron Worke*; in this case all the Towne voted to give a full libertie for the *Iron Worke* to go on, and also for wood, water, ironplace, oares, shells for lime, or what else is necessary for that worke, upon the Towne lands upon the side of the great river, called the East River; provided that no man's propertie, laid out, or to be laid out, be entered upon, nor no planter prohibited, from cutting wood, or other conveniency upon the said common, in an orderly way; and that Branford doe make the like grant, according to their proportion they have in the worke, that future questions about this thing may be prevented.

“ 19th May, 1656.—Upon motion of Mr. Goodyear and John Cooper in behalf of the Collier that comes to burn coal for the Iron workes; he had 12 acres of land granted him as his own, if the Iron Workes go on, and he stay three years in the worke. Provided that all minerals there be reserved, and that he attend all orders of the Towne for the present, and in disposing of said lands hereafter, if it shall so fall out, to have it. The place propounded for is a piece of land lying betwixt the Great Pond, and the Beaver Meadows, a 100 or 2 acres, about two miles from the Iron worke. Against which grant or place none objected, so as to hinder the same.”

Business was carried on here both from New Haven and Branford. It continued until about 1680. Why the business was relinquished cannot be now satisfactorily ascertained. The tradition is, that it was

occasioned by the death of the principal workmen, during a season of great mortality in 1679. The furnace was supplied with bog ore from North Haven. It was chiefly carted, but sometimes brought from Bog mine wharf by water, round to the point below the furnace; and from that circumstance the point to this day is called *Bog mine*.

East Haven was incorporated as a distinct town in 1785. It is bounded n. by North Haven, e. by Branford, s. by Long Island sound, and w. by the harbor and Quinnipiac river, dividing it from New Haven. It is about 6 miles long and 3 wide. Central part, $3\frac{1}{2}$ miles from New Haven. Agriculture and fishing constitute the principal business of the inhabitants. Considerable mercantile business is done in Fair Haven.

Congregational and Episcopal Churches, East Haven.

The above is a western view of the Congregational and Episcopal churches. The Congregational church is seen on the left, the Episcopal is on the right, a small building with three windows on the west side. The Congregational church is constructed of stone, and is 70 feet by 50. The walls were raised and covered in 1773-4; the finishing of the house was suspended for several years. Public worship commenced in it in September, 1774. Considering the time this edifice was built, it is a "great and honorable work, and stands as a lasting monument of the enterprise, public spirit, wisdom and perseverance of the inhabitants." The Episcopal church was erected in 1789.

"The village bore their proportion of town and colony charges, and endured great hardships and dangers, in attending public worship at New Haven. After the termination of King Philip's war, the powerful tribes that were under the influence of the French in Canada, frequently assumed a hostile attitude. In 1689, the town prepared a flying army, which stood ready to march at a moment's warning. A patrol of four horsemen was continually scouring the woods. And all the militia were obliged to carry their arms with them to public worship,

prepared for battle. The Indians near the village were sometimes employed as scouting parties, and in other respects as useful auxiliaries. The following anecdote received from the oldest man now living in the town, and received by him from his father, may be worth preserving :

“ A friendly Indian warrior was requested to act as sentinel in the Gap, north of Mullen hill. He consented, and for this purpose borrowed Mr. Heminway’s gun, and was assured it was well loaded. Without examination, he took the gun and repaired to his post. He soon perceived two enemy Indians descending into the valley from the Pond Rock, and advancing towards the Gap. They passed him, and when he had them in range, intending to kill both at one shot, he attempted to fire, but his gun only flashed, for it was not charged. The spies, without observing it, passed on across the fresh meadows, and mingled with the friendly Indians about Grave Hill. The disappointed warrior was enraged, and threatened to kill Mr. H. for deceiving him in order that *he* might be killed. Mr. H. was innocent of the charge ; for he had charged the gun himself, but some other person had discharged it without his knowledge, and priming, left it in the usual place in that condition. With the discovery of this fact, the warrior was finally pacified. But in a day or two, one of these spies was found dead on the Indian land,—and supposed to have been killed by the enraged warrior.”

The following account of the first settlement of Mr. Heminway, their first minister, is from the Rev. Mr. Dodd’s History of East Haven.

Jacob, the youngest son of Samuel Heminway, and born in the village, graduated at the college at Saybrook, under the Presidency of the Rev. Abraham Pierson, 1703, and was then about 20 years of age.—To him the people turned their attention.

“ At a meeting of the village, 20th Nov. 1740. Voted to look out for a minister to carry on the public worship of God amongst us ; it was voted—1. To seek to Sir Heminway that he would give them a taste of his gifts in order to settlement in the worke of the ministry. And—2. Voted to desire John Potter, Sen. Caleb Chedsey, and Ebenezer Chedsey, to treat with Sir Heminway, to get him, if they could, to give them a taste of his gifts in preaching the Word.”

At another meeting of the Village, 19th Dec. following—“ They having had some taste of Sir Heminway in preaching the Word, did declare their desire to have him go on in the worke of the Ministry amongst us, in order to settlement ; and towards his encouragement they engage to allow him after the rate of £40 by the year in pay. And, Voted that George Pardee and Caleb Chedsey signify our desires and propositions to Sir Heminway, and take his answer and make returne.”

The Committee immediately consulted Mr. Heminway, and reported at the same meeting, “ That Sir Heminway does comply with their motion, God’s grace assisting, and does accept the proposition, and desire some consideration with respect to wood.”

The next month they voted to give him £50 a year. They continued in this state until the close of the year 1706, when, at a meeting, the village appointed “ William Ludington and John Potter to treat with Sir Jacob Heminway, to see whether he will goe on in the work of the Ministry amongst us.” And the same day reported Mr. Heminway’s answer in writing.

“ Gentlemen, Whereas you have given me notice by two men, that you desire me to carry on the work of the Ministry in order to settlement among you. I do, therefore, hereby give you notice that so far as God shall enable me thereunto, I am heartily ready and willing to gratify these your desires upon these conditions—1. That you give me £50 yearly, and my wood. 2. That you build me a good convenient dwelling house, within 2 years time, or give me money sufficient to do the same, one half this year ensuing, and one half the next. 3. That when it is in your power, you give me a good and sufficient portion of land. Yours to serve,

From my study, 2d Decr. 1706.

JACOB HEMINWAY.”

On the 26th of the same month, the village met and voted, “ We do promise Mr. Heminway, if he will carry on the worke of the ministry in said village, to build him a house, if we can, in two years after this date, and give him £50 pay, and his wood.

And in the mean time, if he wants a house to hire him one." To accomplish these objects they laid a tax of four-pence farthing.

In the year 1707, the village built a house for Mr. Heminway, 40 feet long and 20 feet wide, on a five acre lot, on the southeast corner of the Green. One half acre was allowed to set the house upon, adjoining to Mr. Heminway's home lot. The wages in working at the house were three shillings a day for a man, and six for a team.

The terms proposed were adjusted and ratified in 1709. They gave to him the house and lot it stood on—also twelve acres on the cove road, twelve acres in the bridge swamp, 30 acres in the half mile, £50 per annum, and sufficient wood, "if he performs the work of the Ministry so long as he is able; or if it be our fault that he is forced to leave us, it shall be his. But if it be his fault, or he leaves the place, or is hindered in the worke, then the property is to return to the village. And he is to have the use of the Parsonage land." The same year, "3d May, 1709, voted to petition the General Assembly that we may embody into a Church state."

"The great burying place of the Indian tribes in this town and vicinity, is on the north end of the hill on which the Fort stands, which, anciently, in allusion to this place, was called *Grave Hill*. Some of the graves have been leveled by the plow, but many of them are yet visible. In the year 1822, I examined three of these graves. At the depth of about three feet and a half the sandstone appears, on which the bodies were laid, without any appearance of a wrapper or enclosure. They all lay in the direction of southwest and northeast—the head towards the west. Of two of them, the arms lay by the side; the other had the arms across the body, after the manner of the white people. The large bones and teeth were in a sound state. The thigh bones of one measured 19 inches in length, the leg bone 18, and the arm from the elbow to the shoulder 13. By measuring the skeleton as it lay, it was concluded to be that of a man six and a half feet high. No article of any description appeared with the bones. It is said, that about fifty or sixty years ago some of these graves were opened, and a number of Indian implements, of the kitchen and of war, were found in them. Few Indians have been buried there within a century past.

"The Indians had a fort on the hill in the burying ground, and from that circumstance it was called Fort Hill. It is also a tradition, that they had another on the hill north of Daniel Hughes' house, and near the old ferry road. The appearance of shells shows that they had a village on that spot. The same indications appear in the woods of Southend Neck, west of the sluice. Great quantities of oyster shells are collected among the rocks and in the little valleys, on the banks of the river, showing the places where their weekwams stood."*

East Haven, April 26, 1781.

Early on Thursday morning last, the Guard House on the East side of our Harbor, near the Battery, was discovered to be nearly destroyed by fire, and John Howe lying dead near the House; the rest of the Guard (eleven in number) who were stationed there the evening before missing, supposed to be taken off by a Party from Long Island in Whale Boats, who set the building on Fire, and that Howe being on Centry, was shot dead; but whether any others were killed or wounded, is not known, as the party who did the mischief got off undiscovered, and no accounts have been received of them since.

* Rev. Mr. Dodd's History of East Haven.

The following incidents were related by an aged lady, who is now living in the town of East Haven. They are said to have taken place at the time of the great excitement about witchcraft. These events were related to the lady by her father, who is now dead, and was an eye-witness of these occurrences. The relation may be considered as a fair sample of *Witch stories*, which in ancient times were generally believed.

"The old gentleman referred to above, was riding on one bright moonlight evening in a very lonely place called the *Dark Hollow*, (a by-road which leads from East Haven to Fair Haven,) when he saw two females at the head of his horse, very earnestly (apparently) engaged in conversation, and keeping pace with his horse. He was considerably excited, and his feelings of fear were aroused, as he had no doubt that these were the famous hags that were disturbing the peace of the land. He had, however, courage enough to speak to them in these words,—"*In the name of God, I beseech you to tell me who you are.*" When wonderful to behold, they immediately vanished. He got off from his horse to look for them, but could find nothing but a riding hood, which lay where they disappeared.

"A short time after this event, the same gentleman was riding, as he says, past one of his orchards, and there appeared to him to be some one shaking one of his apple trees: a considerable quantity were falling to the ground. He went up to the tree, and the ground was covered with apples which had just fallen from this tree; but there was no one to be seen—all was still as the grave."

"The following is still more mysterious,—there was an old woman that lived not far from the neighborhood of this gentleman, who was suspected by the neighbors of being one of these tormentors of mankind. Their hogs would run about on their hind legs, and squeal as though they were possessed by legions of unclean spirits; their children would be taken sick and crying out "that some one was sticking pins in them." A member of one of the families, would roll about the floor with great rapidity, as though urged forward by some invisible power; and the members of the family had to keep an Eagle's eye on the rolling gentleman, lest he should roll into the fire. When the neighbors made their bread it was full of hairs, and their soap would run over their kettles, and fly about the floor like burning lava, from the crater of Mt. Etna. In the night large stones would tumble down their chimneys and break their cooking utensils, setting the whole family in an uproar. It appeared as though the powers of darkness had been let loose from Pandemonium to torment these neighbors. But not long after these difficulties all ceased in a singular manner. *i. e.* One of the neighbors' pigs was running about on its hind legs as described, and the man who was noticing it, jumped over into the pen and cut off one of its ears, and the old woman mentioned, always afterwards had one of her ears muffled. The neighbors were now satisfied that this woman was the cause of all their troubles. However they thought they would say nothing or do nothing for the present, but see how these things continued; and a short time after this one of the neighbors was making potash beside the river, and it began to fly out and run about so that they could do nothing with it. They held a consultation and concluded that they would shoot into it with a rifle, accordingly they did; and immediately there was a calm, and they were enabled to go on with their work and finish it. In the morning the neighbors went to the place where this woman resided, and they found her dead, and thus their troubles ended.* But it appears this woman was not the only suspected witch in the place; for in an old lonely house which stood on the road leading to New Haven, lights were seen in the night; the sound of the violin, and the noise of persons dancing, was heard by the inhabitants of the place, around it, until they went to work day after day, pulling its clapboards off, until the house was completely destroyed, to the joy of the inhabitants of the town, and nothing more of any consequence was heard of witches from that time."†

* A granddaughter of this old woman is now living in East Haven. She is noted for her eccentricities, her singular life, &c.

† The house which stands on the east side of the Episcopal church in East Haven, was built on the foundations of this house.

GUILFORD.

THE Indian name for Guilford was *Menunkatuc*. It is an ancient town, its settlement having commenced in 1639, the year after that in New Haven. "The principal planters were Henry Whitfield, Robert Kitcher, William Leet, Samuel Desborough, William Chittenden, John Bishop, and John Cassinge. The lands in Milford and Guilford, as well as in New Haven, were purchased by the principal men, in trust for all the inhabitants of the respective towns. Every planter, after paying his proportional part of the expenses, arising from laying out and settling the plantation, drew a lot or lots of land, in proportion to the money or estate which he had expended in the general purchase, and to the number of heads in his family. These principal men were judges in the respective towns, composing a court, to judge between man and man, divide inheritances and punish offenses according to the written word, until a body of laws should be established. The purchasers of Guilford agreed with the Indians, that they should move off the lands which they had purchased. According to the agreement they soon all removed from the plantation. The number of the first free planters appears to have been about forty."*

The following extract is from a history of Guilford, by Rev. Thomas Ruggles, in the 4th vol. of the Massachusetts Historical Collections.

"It fully appears that the purchase from the natives was full, clear, and satisfactory: That the purchase was made for, and the purchasers acted in behalf of, the planters as well as themselves: That all divisions of the purchased land were made to the respective planters, in an exact proportion to the sums they advanced in the purchasing and settling of the town: And that the Indians, inhabiting the town, were to, and accordingly did, remove from said land. Where they went to is not certain: The tradition is, that they removed to the westward, where Branford and East Haven now are: So that there is not one of the original Indians belonging to the township. From Aigicomoock or East river to Tuxisshoag, (a pond contiguous to East Guilford meeting house,) was purchased of Uncas, sachem of the Mohegan Indians: from which it appears that the East river was the western limits of Uncas's jurisdiction. The remaining part of the town, to Hammonasset river, Mr. Fenwick, of Saybrook, gave to the town on this condition, that the planters should accommodate Mr. Whitfield (who was his particular friend) with land in the town, agreeable to his mind. There were some small purchases made of particular Indians, within the limits of the township, who claimed a right to particular parts.

"As soon as the purchase was completed, the planters removed from New Haven, though it was almost winter, and settled themselves at Guilford. How the planters conducted themselves until the year 1643, does not appear upon record; only this, the lands were left in the hands of their six purchasers, to whom the Indians gave the deed, as trustees, until a church should be gathered, into whose hands they might commit the fee of the land, to be properly divided amongst the planters. And while they remained in this unsettled state, they chose four of the principal planters, to whom they gave the full exercise of all civil power for administering justice, and preserving the peace among the planters; whose power was also to continue till the church appeared in form, when their power was to end.

"As, therefore, so much depended on this, as soon as their wilderness state would admit, they did, in the month of April, 1643, form themselves into a congregational church, into whose hands the purchasers of the land, and the persons invested with civil power, did actually, in a formal manner, in writing, resign all their rights and authority unto the church gathered on that day. Presently after this, the planters, who were chiefly church members, made regular divisions of all the lands, according to their respective shares, agreeably to their original covenant, and according to

* Dr. Trumbull.

their expenses and number in each family, (servants excepted.) But their divisions of land were under two restrictions: First, that no one should put into stock more than £500, without liberty: And, 2. That no person should sell or alien, in any manner, or purchase the share, or any part thereof, allotted to another, without express liberty from the community. The last article was strictly observed, which proved highly beneficial to the town, by preventing persons engrossing too much land; and sundry persons who presumed to violate this agreement were punished by fines and whipping. As this plantation was connected with New Haven, the inhabitants carefully adhered to the agreement made in Mr. Newman's barn, in all their affairs, religious and civil.

"The planters, finding civil government absolutely necessary for their subsistence, established a system, as nearly as they could, conformed to the grants from the lords Say and Brook to Mr. Eaton and company. Their form of government was something singular. Like that at New Haven, it was a pure aristocracy, yet modeled and exercised in a peculiar way. They had one magistrate, who was Mr. Samuel Desborow, allowed them as a part of New Haven colony, of which he was one of the assistants and council, who was their head, and invested with the whole executive and judicial power. But the planters were allowed to choose, annually, three or four deputies to sit with him, in judging and awarding punishments in all civil causes, in courts held by him, called General Courts. The inhabitants were divided into classes, or orders, by the names of freemen and planters. The freemen consisted of all the church members who partook of the sacrament, and no others were admitted. They were all under oath agreeably to their plan of government. Out of this number were those deputies, and all public officers, chosen; and by them was managed all public business that was regarded either interesting or honorable. The second class included all the inhabitants of the town, who composed their town-meetings, which were styled, emphatically, General Courts. It is however required, that they should be of age, (twenty one years,) and have a certain estate, to qualify them to act in said meetings. In these town meetings, or general courts, all divisions of land were limited and established, and all the bye or peculiar laws, for the well ordering the plantation, were made. And, in general, all transgressions of the town laws, relating to the buying or selling land, were punished, and fines and stripes were imposed and executed, according to the nature of the offense, by the judgment of the said judicial court. Besides these general assemblies of the planters, and the said magistrates' court, they appointed particular courts for the administration of justice, much like our justices' courts at present. These were held quarterly through the year. The magistrate presided in these courts, and deputies were annually chosen to sit in council with him, in these courts also, by the freemen. Like New Haven, they had no juries in any trial; their deputies, in some measure, supplied that defect. From this court lay appeals, in allowed cases, to the court of assistants at New Haven. The said Mr. Samuel Desborow was the first magistrate who held the courts. In general, their judgment was final and decisive. Town officers were annually chosen, viz. marshals, a secretary, surveyors of highways, &c. much in the present manner. Military order and discipline were soon established, and watch and ward were kept, day and night, under a very strict charge; and the punishments for defaults, in this duty, were very severe and exactly executed. Many of the houses were fortified with palisadoes, set deep in the ground. And a guard of soldiers, under a proper officer, was appointed every sabbath, in time of public worship, that no enemy might surprise them, and this was continued many years. All the laws, orders, and regulations were entered at large upon the town records.

"The Rev. Mr. Henry Whitfield, who led forth this little flock into the wilderness, was their first pastor and minister. He had been episcopally ordained in England. No mention is made on record, or by tradition, of any ordination of him here. As the members of his church came with him, and were his cure in England, gathering the church here seems to have been only matter of form, arising from place and local distance, on their removal; but he exercised his ministerial authority in the same manner, and by the same authority, he had done in England. Neither minister, church, or people, were ever dissenters or separatists from the church of England, only by local remove from the realm. The minister and church were as truly such in Guilford as in England: All which rights, powers, and privileges remain to this day; and to depart from its communion, from any pleas of the professors of the church of England, are unreasonable, and without good foundation. Like the church in New Haven, they required a relation of experiences of members on their admission into the church.

"Mr. Whitfield, their pastor, was a well bred gentleman, a good scholar, a great divine, and an excellent preacher. He was properly the father of the plantation. He loved his flock tenderly, and was extremely loved by them. He was possessed of a large estate, and by far the richest of any of the planters; all of which he laid out

and spent in the plantation, for the benefit of it. At his own expense he built a large, firm, (and for those days,) handsome stone house, which served as a fort for himself and many of the inhabitants, upon the land allotted to him by the planters, in a very conspicuous and delightful place, having an extensive view of the sea in front; and, with a comparatively small expense, might now be made the most durable and best house in the town: [That house has since been handsomely repaired.] A lasting memorial of his greatness and benefactions to the town. In the change of times in England, under the commonwealth, he returned thither. Several of the planters returned with him; among whom was Mr. Desborow, (who was near relation of Colonel Desborow,) Mr. Jordan, &c. It was then the general opinion that the whole plantation would be deserted, as they had opportunity to transport them and families.

"In consequence of his own expenses in purchasing the plantation, and Mr. Fenwick's gift of the eastern part of the town, Mr. Whitfield had a large and very valuable allotment of some of the best lands in the township allotted to him.

"Upon his return to England, he offered all his estate to the planters upon very low terms; but partly from poverty, but chiefly from a persuasion that they should all follow him, they did not make the purchase; but when it was too late, they repented their refusal. After his return home, he sold his estate to major Thompson, to whose heirs it descended. No mention is made on record of the time of Mr. Whitfield's removal; the tradition is, that he lived in the plantation about twelve years. When he left them, he left Mr. John Higginson, his son-in-law, their teacher. He was son to Mr. Higginson, first pastor of Salem church. He preached first at Saybrook fort, as chaplain, about the year 1643; after which he removed to Guilford, was one of the seven pillars, and assisted Mr. Whitfield in preaching until his removal. He was never ordained in Guilford; but Mr. Whitfield left him to take care of the flock, as their teacher. In this work he continued about twelve years, and then determined to go to England. After Mr. Higginson's removal, the town was in a very unsettled state for about twenty years. There were several who ministered to them, particularly Mr. Bowers, who had a house and land in the town, but afterwards removed to New Haven and Derby. In this headless state of the church, they fell into great confusion, by diversity of opinions; many removed to Killingworth, (about ten miles east,) which was then settling; some of them returned afterwards, of whom was Doctor Rosseter. After they had waded through those troublesome times, about the year — Mr. Joseph Elliott, son of the famous and pious Mr. John Elliott, of Roxbury, the Indian New England apostle, was ordained over the church here. After he had preached about thirty years he died, May 24, 1694. Some time after, in the summer of this year, Mr. Thomas Ruggles, of Roxbury, came and preached as a candidate; and in the fall of the year 1695 was ordained pastor of the church, under whose ministry the church enjoyed great peace, and religion flourished, though the seeds of division were then sowed. He deceased June 1, 1728. His eldest son, Thomas Ruggles, who was the author of this manuscript, succeeded him March 26, 1729."

The following is a west view of the old Stone House in Guilford, which is believed to be the oldest house now standing in the U. States. This building was erected by the company who first settled the town, about the year 1640. The leader or head of the company was Henry Whitfield, a minister of the church of England, and one of the number of those who were called Non-Conformists. This house was built for him. The stone of which the building is constructed was brought on hand-barrows, from a ledge some considerable distance from the place where the house stands. The cement used in building the walls is said now to be harder than the stone itself. The walls were plastered 15 or 20 years since. Mr. Whitfield, and several others of the company who came to this place in 1639, returned to England in 1649. This house was used by the first settlers as a kind of fort for some time, to defend themselves against the hostile savages. The first marriage which took place in this town was solemnized in this building. The supper which was provided for the occasion consisted of pork and pease.*

* MSS. from Guilford. This house is now occupied, and in good repair.

Ancient House at Guilford, Conn.

Guilford is 16 miles east of New Haven, and 36 south from Hartford; bounded n. by Durham, w. by Branford, e. by Madison, and s. by Long Island sound. Its length from north to south is about eleven miles, and its breadth averages about four. The township is divided into two parishes or societies, Guilford and North Guilford. In the first society is the borough of Guilford, which was incorporated in 1815; it is handsomely situated upon a tract of alluvial or maritime plain, about two miles back from the sea, and near a small stream, called the Menunkatuc. Its limits embrace the ancient town plot, which is laid out with considerable regularity. In the center there is an extensive open public square. The borough is compactly built, consisting of about 150 dwelling houses, 2 churches, 1 Congregational and 1 Episcopal, and a town house. Many of the houses are ancient in their appearance, and the people have retained, more than most others in the State, the ancient manners of the New England colonists.

The following is a view of the Congregational church, situated on the north side of the public square. The first building north of the church is the academy, the next is the town house; the last two buildings formerly stood on the square. About sixty rods west of the church, the cellar in which Goffe and Whalley were secreted for a time, is still to be seen; Governor Leete's store formerly stood over it. The tradition is that they remained in this cellar three days and nights. "A daughter of Governor Leete afterwards married in New Haven to Mr. Trowbridge. It is an anecdote still preserved in that family, that she often used to say that when she was a little girl these good men lay concealed under her father's store, but that she did not know of it till afterwards; that she well remembered, that at the time of it, she and the rest of the children were strictly prohibited from going near that store for several days, and that they wondered at it, and could not conceive the reason

of it at the time, though they knew it afterwards. Tradition says that they were however constantly supplied with victuals from the governor's table, sent to them by the maid, who long after was wont to glory in it, that she had fed those heavenly men."

Congregational Church at Guilford.

Guilford is a place of considerable resort during the warm season of the year, for the benefit of the sea air, &c. There are two establishments for this purpose; one about a mile and a half below the Congregational church; the other at Sachem's Head, about three and a half miles to the southwest. Both these places are accessible to steamboats. The scenery in the vicinity of Sachem's Head is wild and picturesque. Agriculture is the principal business of the inhabitants.

The following is from Ruggles' MS. history of Guilford, in the 10th vol. of the Massachusetts Historical Collections.

"So early as 1643, a Congregational church was gathered, or rather they then combined into a visible church state. They adopted Mr. Davenport's notions; and formed the church by covenant upon *seven pillars*, as they termed it. The names of the seven pillars were

Mr. Henry Whitfield,	Mr. William Leete,	Mr. John Mipham, and
" John Higginson,	" Jacob Sheefe,	" John Hoadly;
" Samuel Desborow,		

and on the nineteenth day of the month of April (probably the very day the church was thus settled) the records say, the feoffees in trust formally in writing resigned the land purchased by them to the church, &c.

"The manner of gathering or forming the church was this, viz. a doctrine of faith was drawn up and assented to as the foundation of their connexion. And then they mutually entered into covenant, first with God to be his people in Jesus Christ; then one with another, to walk together in attending all the duties of the christian religion, and enjoyment of all the ordinances that belong to a particular visible church. Their doctrine of faith was judiciously drawn. It is short, comprehensive, and rational, upon true primitive, Calvinistical, and Congregational principles. This *doctrine of faith* with the *covenant* is continued and made use of constantly in admitting church members to this day by the first church."

* * * * *
Mr. Higginson continued in the ministry at Guilford about twelve years, "and then determined to go to England to Mr. Whitfield. Accordingly he shipped himself and family, and sailed. But meeting with bad weather, the vessel put into Salem for harbor. Going ashore to his father's people, they wanting a pastor, prevailed with him to preach, and then unship his family and goods, and settle with them. He accepted their call; was ordained their pastor; and left a numerous pos-

terity, which have been in renown in their several generations. This is the account he gives of himself in a book of sermons printed by him in his old age, and dedicated by him to the church and people of God at Salem, Guilford and Saybrook, where he preached at first in the time of the Pequod war."

After Mr. Higginson's removal, "while they had no ordained pastor," and "fell into great confusion by diversity of religious opinions, many of the planters removed, especially to Killingworth, which was then settling, particularly Dr. Rosseter, Meigs, the Stevens family, and Chatfield, &c. who were useful in that town, and continue to be respectable in church and state there. Some of these returned, especially Rosseter and Meigs, after the town was restored to a peaceable settlement of a pastor."

"After they had waded through these troublesome times, providence provided for them a pastor after God's own heart, to feed them with knowledge and understanding. For about the year 1664 or 1665, the renowned Mr. Joseph Eliot, son of the famous and pious Mr. John Eliot of Roxbury, (the Indian New England apostle) was called and introduced, and by the laying on of the hands of the presbytery, was ordained to the pastoral office in the church. Mr. Mather of Northampton, with whom Mr. Eliot had lived some time before he came to Guilford, being the chief in the ordination. The church and town greatly flourished under his successful ministry.

"After this burning and shining light had ministered to this good people about thirty years, he deceased May 24, 1694, to the inexpressible grief of his beloved flock, whose memory is not forgotten to this day. Some time in the summer of this year, the Rev. and pious Mr. Thomas Ruggles, likewise from Roxbury, was persuaded to come and preach to them as a candidate for the ministry, and in the fall of the year, 1695, was ordained pastor of this church, by the laying on of the hands of the presbytery."

* * * * * "After he had faithfully fed the flock, he deceased June 1, 1728, in the thirty fourth year of his ministry, and fifty-eighth year of his age."

"His eldest son, Thomas Ruggles,* was called to succeed him, and was ordained by the laying on of the hands of the presbytery, March 26, 1729.

"Out of the first or western society the General Assembly, upon the desire of the inhabitants and consent of the society, made another society, calling it North-Guilford; and in June, 1725, the Rev. Mr. Samuel Russell from Branford, was by the laying on of the hands of the presbytery ordained the first pastor of the new church gathered there. He proved a worthy and faithful minister. He deceased January 19, 1746: and Rev. Mr. John Richards from Waterbury, was ordained by the laying on of the hands of the presbytery, pastor of the church, in the month of November, 1748."

"He, at his desire, was, by the counsel of the Consociation of New Haven county, dismissed, December, 1765, from his pastoral office there: and Mr. Thomas Wells Bray, from Farmington, was ordained pastor of the church, December 31, 1766."

"Within the limits of the first, the General Assembly made another, calling it the Fourth Society in Guilford, May 10, 1733. Mr. Edmund Ward of Guilford was ordained their pastor; but being soon dismissed, they did in August 1743, call and ordain Mr. James Sprout, of Middleborough, their pastor; who being dismissed from them in October, 1768,† they now are destitute of a settled pastor."

"In the year 1743, a number of the inhabitants of the First Society declared themselves of the Church of England, and built a house for their public worship. They have no curate, their number small, but meet every sabbath to attend church service. And in 1748 a number at North Guilford also declared for the church, having built a house, and meet on sabbaths for worship. Perhaps there may be about sixty or seventy in all, young and old, belonging to the whole town of that communion."

"It is uncertain who were the first or original planters. The first account of names upon record is so late down as 1650. These forty-six persons following are entered and named as such, viz.

Henry Whitfield	Thomas Jones	Richard Bristow
Samuel Desborow	William Dudley	John Parmelin, jun.
John Higginson	Thomas Cook	Jasper Stilwell
William Leete	Henry Kingsnoth	George Bartlet
Robert Kitchil	John Stone	John Scramton
William Chittenden	William Hall	John Fowler
Thomas Jordan	John Parmelin, sen.	Edward Benton
George Hubbard	Thomas Betts	Abraham Cruttenden
John Hodley	Richard Guttridge	John Evarts

* The author of this history, who died November 20, 1770. Rev. Amos Fowler was ordained his colleague, June 8, 1757.

† He was resettled in Philadelphia, and afterwards became D. D.

“It is a thing evident by this list of planters, that the account of all the original names is not ascertained; for some of the first planters are not mentioned in it, particularly Mr. Coffinge, who was one of the purchasers from the Indians. Tradition concerning is, that he soon died, leaving no other memorial of his name but a small island in the salt meadow near the sea, called to this day Coffing’s island. And some that are named it is certain were not original planters or purchasers, particularly Hubbard and Fowler; they came from Hartford or Wethersfield, and as many others were, who came into the town afterwards, admitted planters in it, and had land laid out and assigned to them. Among such was Dr. Bryan Rosseter. One of this Dr. Rosseter’s daughters married a Cotton, and his posterity continue to this time in town. Dr. Rosseter purchased Dr. Desborow’s house and lands of him when he left the town with Mr. Whitfield, and returned to England.”

“As this plantation was connected with New Haven, so they carefully conformed to the agreement in Mr. Newman’s barn in all their affairs religious and civil. Like their brethren at New Haven, they adopted and acted upon that unhappy mistake, that it is a thing of more importance to save and be governed by the steeple than the state.

“Besides [having mentioned the Magistrates’ Court, and Town Meetings, or General Courts, as in Coll. Hist. Soc. iv. 185.] they held a Court of Probate. By which court, as often as there was occasion, wills as well as intestate estates were settled. The whole lands belonged to the community. And the title to any particular lands was by order of the town in their meetings. So upon this principle that the fee was really in the community, they in settling estates sometimes departed from the rule of East-Greenwich tenure: And sometimes settled the intestate estates upon the widow, sometimes on one of the children; or sometimes on a stranger called to the family, as best served the general good of the family, and the prosperity of the infant plantation, in its minority.

“But neither this court nor this practice continued long. As soon as New Haven colony government became better settled and more fixed, settling estates was transferred and determined by the court of assistants at New Haven, agreeable to the present rules of the court of probate.”

“As the town was an immediate part of New Haven government, they were from the early times allowed an assistant or magistrate. Mr. Samuel Desborow, who next to Mr. Whitfield was esteemed the first and richest of the planters, was the first assistant. The next assistant in the town was Mr. William Leete. He came from England a young but a very hopeful man, as he proved to be afterwards both in New Haven, and, after the union, in Connecticut colony. The family tradition is, that in England he was a clerk in the quarter sessions of the county, bred for the law. He was an excellent writer, and for many years served as secretary or clerk of the town, all the ancient records being written in his hand; and had a good understanding in the law. His eldest son, John Leete, it is said, was the first child born in the town; and has left a numerous posterity. He was deputy governor of New Haven colony, and after the union was governor of the colony. He removed to Hartford, and there died and was buried.

“The next magistrate in town was his second son Mr. Andrew Leete. He married a daughter of Mr. Jordan, one of the original planters. Like his father he proved an excellent man, who, it is said and believed, was the principal hand in securing and preserving the Charter, when it was just upon the point of being given up to Sir Edmond Andross. In his house it found a safe retirement until better times. Next after Mr. Leete was Mr. Josiah Rosseter, son of Dr. Rosseter, and since him Mr. Abraham Fowler, son of John Fowler.

“The first planters who came to the town were of two ranks, viz. such who in England are called gentlemen and commonality. None were poor men, and few or no servants. The gentlemen were all men of wealth, and they bear the appellation of Mr. as Mr. Desborow, &c. while according to the plain customs of those times the commonality were named only *Goodman* or *Neighbor*, such or such an one. How greatly are times now changed! Every man almost is called Mr., every woman *Miss*, *Madam* or *Lady*. Popularity destroys all civil distinction.

“The first planters, whether *Gentlemen* or *Yeomen*, were almost all of them husbandmen by profession: few tradesmen; not one blacksmith among them; it was with great cost the town obtained one to live among them. In this respect they were

quite different from the first settlers of New Haven, although they came with them. The good people who came with Mr. Davenport were Londoners, bred to merchandise, and fixed upon a place proper for trading, which was their design. But Mr. Whitfield's people were quite the reverse, country people, and therefore chose their lands for different ends. Milford and Guilford were some time under consideration; but at length they fixed their choice upon Guilford. As they came from Kent, &c. so they chose for their plantation land as near like those as they could."—"And what justly deserves to be remembered is, that the ancient skill and spirit of the first planters in husbandry has descended, and still continues among their posterity. There is a certain niceness and delicacy, wherein the perfection of husbandry consists. This is conspicuously to be found among them. It would be looked upon as a piece of vanity unofferable, to say all the good husbandry in the country has been learnt from these skillful people. But it is no vanity to say, there is no where better to be found. All strangers and Europeans agree to say, there is no place in the country to be found where the husbandry so nearly resembles the husbandry in England, especially in the fine piece of land called the Great Plain.

"As the first planters of the town were, like Jacob, plain men, bred to tillage and keeping cattle: so a great deal of the same temper, and spirit, and manners, remains among their descendants to this day, as it was in Israel among the Rachabites. Industry, labor, and frugality, are in general the reigning spirit of the inhabitants. There is no such thing as tavern haunting, and little wasting of time in drinking and fruitless diversions, the inhabitants are perhaps as little in debt as any town, and possessed of as much solid estate: yet with grief it must be said, that of late years fashionable vices, by a flowing in of strangers, and a great increase of sailors, and some other incidents, are too sadly predominant. Thus evil communication will ever corrupt good manners. It is a disease, as catching, as deadly as the plague itself. Alas, what a pity is it, that the country in general is so much overspread with and polluted by luxury and its attendants; and these recommended by the fair character of politeness and good breeding!

"The harbor lies south of the town [of Guilford.] We go through the great plains to it. It is a very poor thing, shallow, and encumbered with many rocks. But then about two miles westward from it is an excellent though small harbor. It is landlocked on all sides, but the southwest; the entrance or mouth narrow. It is well known by coasters. It is called *Sachem's Head*. It may not be unentertaining to mention the occasion of its taking this extraordinary name. After the Pequod Indians were driven from their forts at Mystick river, they fled to the westward towards Fairfield, the English pursued them, and though most of the forces went from the fort at Saybrook by water, a number of soldiers with UNCAS and his Indians scoured the shores near the sea, lest any of the Pequods should lurk there. Not a great way from this harbor, they came across a Pequod sachem with a few Indians, whom they pursued. As the south side of the harbor is formed by a long narrow point of land, the Pequods went on to this point, hoping their pursuers would have passed by them. But UNCAS knew Indian's craft, and ordered some of his men to search that point. The Pequods, perceiving that they were pursued, swam over the mouth of the harbor, which is narrow. But they were way-laid, and taken as they landed. The sachem was sentenced to be shot to death. UNCAS shot him with an arrow, cut off his head, and stuck it up in the crotch of a large oak tree near the harbor, where the skull remained for a great many years. Thus from this extraordinary incident, the name was adopted to the harbor."

[From the *Connecticut Journal*.]

Guilford, Aug. 18, 1769.

In the town of G——d, an under shepherd lately deserted or run away from his flock without leave or license, either from his own or the flocks of the circuit with which he was consociated, having nothing to keep him in countenance but the advice of seven of his brethren, and the concurring yelps of four of their spaniels. When he come to them, he had neither crook, shoes nor scrip, nor two coats; but soon clothed and warmed himself with their fleeces, and very soon became a listener to the bleatings of other flocks, and nothing would stop their din from his ears, but to stuff them with the fleeces of his own purchase. He may be found in the cool of the evening rolling in his chaise, with his charming shepherdess,—had on when he went away, a large presbyterian cloak somewhat soiled, with a full bottomed wig, and five or six hundred pounds of fleece from his flock. Whoever shall secure him, or set him over a herd of goats, till his master's will shall be known, no doubt when the flocks are gathered together, will meet with an ample reward.

P. S. The reason why no inquiry has been made after him any sooner, was because he has made several rambles before, of a month or six weeks; it was not known but he would have returned again, and as there is no signs of it at present, it is likely there will be monthly some such inquiry made.

The following appears in the next paper.

This may certify all whom it may concern, that the *art of barking* is taught by *Toby Ramshorn*, Bell wether of the flock of *G—l—d*. It is unnecessary to expatiate on the benefit arising from the noble art, let it suffice that the flock in *G—l—d* under the instructions and directions of old *Toby*, have regained their liberty, driving away their shepherd, and are now barking at him after he is gone. Old *Toby* instructs at the lowest price, in all the various ways of barking—teaches to bark by note both treble, tenor, and bass, and is preparing a treatise upon the subject of barking. He proposes for ready money, to bark either for religion or liberty, or against them; and will bark gratis, monthly, for public good. He at present bears the bell in the flock at *G—l—d*, which is a fine flock, though we must confess very much *hide-bound*. A specimen of his skill in barking may be seen in the last paper. If any man, dog, wolf, sheep, or any other kind of animal, desires to be instructed in this noble art, let him repair to aforesaid *Toby*, who with all possible cheapness and diligence will teach him the exercise of the *windpipe*.

Guilford, May 29th, 1777. No. 502.

General Parsons having received intelligence that the enemy had collected, and were collecting large quantities of forage at Sag Harbor, on Long Island—last Friday about 200 of the continental troops who had previously rendezvous'd at Sachem's Head, in Guilford, embarked on board a number of whale boats, commanded by Lieut. Col. Meigs, to destroy it; at about six o'clock, afternoon, they arrived at the beach, this side of Plumgut, and transported their boats about 50 rods, over the beach, when they again embarked, and landed several miles from Sag Harbor, where, (after leaving a suitable guard to protect the boats,) they marched with such secrecy, as not to be discovered till within a few rods of the sentry; they soon set about destroying the forage, &c. As the enemy stationed there were entirely off their guard, our troops met with little opposition; an armed schooner of 12 guns, which lay not far from the shore, kept an incessant fire on them, but happily did them no damage. Our people returned the fire, with their small arms, but whether with effect is not known; five or six of the enemy on shore, were destroyed, and three or four made their escape; the others were made prisoners. Our people set fire to the hay (about 100 toas) which was on board transports, and on the wharves, which was entirely destroyed, with ten transport vessels, mostly sloops and schooners, and one armed vessel of six or eight guns, two or three hogsheads of rum, &c. Our troops are all returned, having performed their expedition in 24 hours.

Return of prisoners taken at Sag Harbor.

1 Captain, 2 Commissaries, 3 Sergeants, 53 Rank and file, 10 Masters of transports, 27 Seamen; in the whole, 90. Our people brought off 50 muskets. One of the commissaries above mentioned, is Mr. Joseph Chew, formerly of New London.

Guilford, June 21st, 1781.

Last Monday morning, two armed brigs and a schooner of the enemy's came to off Leete's Island, near Guilford harbor, where they landed about 150 men, who immediately proceeded to the dwelling house of Mr. Leete, which they set on fire, together with two barns, which were entirely consumed. They also set fire to another dwelling house, but the inhabitants of the town being alarmed at their first approach, arrived soon enough to extinguish the flames. The enemy continued on the island about an hour and a half, in which time a large body of the militia having collected, very spiritedly attacked them, and, it is supposed, killed and wounded six or seven, as about the same number of muskets were left by them in their flight. Our loss was five wounded, two of which are since dead. The others are in a fair way of recovery.

H A M D E N .

HAMDEN was originally included within the limits of New Haven. It was made a distinct town in 1786. There are two societies, *Mount Carmel*, the northern section of the town, and *East Plains*, the southern. The church at Mount Carmel was formed Jan. 26th, 1764. It consisted of members from New Haven and North Haven. The Rev.

Nathaniel Sherman was installed May 18th, 1768, dismissed August, 1771, and died at East Windsor. The Rev. Joshua Perry was ordained Oct. 15th, 1783, and dismissed 1790. "The church at East Plains was embodied 1795, and the Rev. Abraham Allen ordained 1796." There are now four houses of worship within the limits of this town; 2 Congregational, 1 Methodist, and 1 Episcopal.

Hamden is centrally situated in the county, and is bounded n. by Cheshire and Wallingford, e. by North Haven, s. by New Haven, and w. by the West Rock range of mountains, separating it from Woodbridge and Bethany. "Its average length is seven and a half miles, and its average breadth about three and a half, making about 26 square miles. A considerable section of the township is level; the western border of it is mountainous, and the eastern considerably hilly. The township is situated between the West Rock range of mountains and the East Rock range. East Rock is the termination of an extensive greenstone range of mountains, which extends far into the interior of New England, leading through Cheshire, Southington, Farmington, Simsbury and Granby, into Massachusetts. It consists of a broken ridge, or a succession of hills, which become more elevated as you proceed from East Rock. At Farmington, Simsbury and Granby, the ridge is more continuous and lofty, and bold in its features. West Rock is the termination of the west range of the same mountain; it extends as far into the interior as the western section of Southington, where it subsides, or more properly unites with the East Rock range, of which it is properly a branch. This range consists also of greenstone, and is a succession of eminences, and exhibits similar features to the other. Hamden is situated between these two ranges; the one being upon its western, and the other upon its eastern border. Mount Carmel, which is in some measure an insulated eminence, and appears to be a spur of the East Rock range, lies wholly within this town. This is one of the most elevated greenstone eminences in the State. The greenstone of these mountains forms an excellent building stone, and is extensively used for that purpose in New Haven. In the greenstone hills of this town, various minerals have been discovered. Iron pyrites, in minute pieces, and sometimes imperfectly crystallized, is found disseminated; and sulphuret of copper is sometimes found, connected with crystallized quartz. At a distant period, a large mass of native copper, weighing about 90 lbs. was accidentally discovered upon one of the greenstone hills of this town. It was preserved for a long time, and the remains of it were used, not more than 15 or 20 years since, in New Haven; it was said to be very pure, and free from alloy. It is not known precisely upon what spot this mass of native copper was found; but copper is now known to exist in various places, in the greenstone hills of this town. Lead, in small quantities, has also been found."*

The following is a south view of the central part of the town, $5\frac{1}{2}$ miles from New Haven. The building on the extreme left with a spire is the Episcopal church: that on the right is the new hotel, erected the

* Pease and Niles' Gazetteer.

Central part of Hamden.

present year, (1836.) The road seen passing to the north is the turnpike from New Haven to Hartford, on the Farmington route. The building seen in the extreme distance stands by the New Haven and Northampton canal; the elevation beyond is Mount Carmel, which is 8 miles from New Haven. This mountain is one of the most striking objects seen when off the harbor of New Haven. Its western descent is lofty and precipitous. The defile at the foot of the mountain is but barely sufficient in width to admit Mill river, the turnpike and the canal, which at this place is cut through a solid rock. This place is called the *Steps*. The town is watered by Mill river, a fine mill stream, affording numerous sites for water works. There is 1 manufactory, called the Carmel Works, $6\frac{1}{2}$ miles from New Haven, for manufacturing coach and elliptic springs, steps and axletrees: 1 carriage and 1 brass factory, 1 paper mill, and some minor establishments for manufacturing purposes in other parts of the town. About three miles north from New Haven, upwards of 100 acres of land are now (1836) in a state of preparation for raising mulberry trees, and extensive preparations are making for the silk business.

The engraving on the next page shows the appearance of the little village of Whitneyville, as seen from the rise of ground a few rods south, on the New Haven road. This spot, which is two miles from New Haven, is admirably adapted for manufacturing purposes, and justly admired for the romantic beauty of its scenery. The village owes its rise and name to Eli Whitney, Esq. the inventor of the cotton gin. East Rock, (the northern descent of which is seen in the engraving,) a little distance s. e. of the village, rises to the perpendicular height of three hundred and seventy feet, and is a majestic feature in the landscape. A small but handsome Congregational church has been recently erected a little distance north of this village, and is beautifully situated among the cedars.

South view of Whitneyville, in Hamden.

Mr. Whitney was born at Westborough, Mass. Dec. 8th, 1765. He was educated at Yale College, and soon after he graduated went into the state of Georgia.

“He had been but a short time in Georgia, before he had an opportunity of conversing with several respectable planters of that state, and of frequently hearing their conversations with each other. In these casual meetings, inquiries relating to the most productive kinds of crops, were topics upon which the planters dwelt with peculiar interest. Here he learned, that no crop then produced in Georgia, yielded much profit; that several attempts had been made to raise a species of *Cotton*, known by the name of *Green Seed Cotton*; but which had never been cultivated for the purposes of commerce in any country. The planters informed him, that the shrub, which yielded this cotton, grew well in Georgia, and was abundantly productive; but that its fibres adhered so closely to the seed, as to be detached with great difficulty; that no convenient and efficacious method of separating them had hitherto been discovered; and that, if this difficulty could be surmounted, this cotton would be a more profitable crop than any which had hitherto been introduced into the southern section of the United States. On these and other occasions the wish was often and ardently expressed, that a machine might be invented for this purpose; and the declaration made, that such an invention would insure an independent fortune to its author.

“A mind always awake and attentive to every thing passing before it, could not easily suffer an object, on which so much stress was laid, to escape without examination. Mr. Whitney immediately set himself to investigate the structure of this product, and to devise means for rendering it valuable to mankind. After pursuing his inquiries during a few months, he contrived and executed, under the patronage of Phineas Miller, Esq. a respectable planter in Georgia, a machine entirely new, both in its form and principle, which effectually answered the purpose; and the utility of which has greatly exceeded every anticipation.

“For this machine he obtained a patent: but, like many other benefactors of the public, had the mortification to see himself plundered of the benefits of his invention. The law, originally made to protect this species of property, was imperfect: and almost all the individuals, composing the courts and juries of Georgia, were personally interested. The machine was converted into a political engine: and demagogues rose into popularity by unfounded and vociferous declamation against this species of right, and the law which was made for its protection.

“To give a detailed account of the expedients, to which recourse was had, in order to defeat the claims of Mr. Whitney, would carry me beyond my limits. Suffice it to observe, that thirteen years of his patent term had expired, during which more than sixty suits were instituted in that state, before any decision on the *merits* of his claim was obtained; and that, although every such decision has been in his favor, the expenses of prosecution have far exceeded what he has received from the citizens of Georgia.

"The Legislature of South Carolina voted him \$50,000 as a purchase of the patent right for that state. The succeeding Legislature rescinded the vote, and ordered a suit to be instituted against him for the recovery of \$20,000 of the purchase money, which had been paid. To the honor of many citizens of that state it ought to be observed, that this act was regarded by them with the detestation which it merited; and that to their zealous and honorable exertions it was owing, that Mr. Whitney, after much delay and expense, was enabled to obtain a re-establishment of the contract.

"The Legislature of North Carolina laid and collected a tax on such of his cotton machines as were then in use in that state, and after deducting the expense of collection, paid over the avails of the tax to Mr. Whitney. Though the cultivation of cotton in the state of North Carolina was then quite limited, and the amount which he received was small, yet the remuneration from that state, was considered by him as more liberal, in proportion to the use of his machines there, than the amount he received from South Carolina.

"The only method of separating the fibres of this cotton from the seed so as to leave it fit for spinning, which was known, anterior to this discovery, was to pick out the seeds, one by one with the fingers; and it was thought a proof of great dexterity, skill and industry, for one person to clean one pound in a day. With the aid of this machine, a single person will, in one day, clean with ease a thousand pounds. As a labor saving machine, therefore, it has, perhaps never been rivalled.

"Before the invention of this machine, it will be remembered, that this species of cotton was not known in commerce: the expense of cleaning it being such, as absolutely to forbid its cultivation for market. If we add to these considerations the immense increase of wealth derived from it to the southern states, the incomprehensible increase of cheap, comfortable, and even handsome clothing, especially for the poor and middle classes of mankind, the value of this invention can hardly be exaggerated, or its benefits too highly appreciated.*

Notwithstanding the immense importance of this invention to the southern states, "an invention," says Judge Johnson, of South Carolina, "by which *their lands trebled in value*," Mr. Whitney declared to a friend, near the close of his life, "that all he had received for the invention of the cotton gin, had not more than compensated him for the enormous expenses which he had incurred, and for the time which he had devoted during many of the best years of his life, in the prosecution of this subject. He therefore felt that his just claims on the cotton growing states, especially on those that had made him no returns for his invention, so important to his country, were still unsatisfied, and that both justice and honor required that compensation should be made."

In 1798, Mr. Whitney became deeply impressed with the uncertainty of all his hopes founded on the cotton gin, and of the necessity of devoting himself to some business in order to sustain himself and family. The enterprise which he selected in accordance with these views, was the *manufacture of arms for the United States*. Through the influence of the Hon. Oliver Wolcott, Secretary of the Treasury, he obtained a contract for ten thousand stand of arms. The contract was concluded Jan. 14th, 1798, upon which he purchased the site in Hamden and erected his works.

"Several other persons made contracts with the government at about the same time, and attempted the manufacture of muskets, following, substantially so far as they understood it, the method pursued in England. The result of their efforts was a complete failure to manufacture muskets of the quality required, at the price agreed to be paid by the government: and in some instances they expended in the execution of their contracts a considerable fortune in addition to the whole amount received for their work.

"The low state to which the arts had been depressed in this country by the policy of England, under the colonial system, and from which they had then scarcely begun to recover, together with the high price of labor, and other causes, conspired to render

* Dr. Dwight.

it impracticable at that time even for those most competent to the undertaking, to manufacture muskets here in the English method. And doubtless Mr. Whitney would have shared the fate of his enterprising but unsuccessful competitors, had he adopted the course which they pursued; but his genius struck out for him a course entirely new.

"In maturing his system he had many obstacles to combat, and a much longer time was occupied, than he had anticipated; but with his characteristic firmness he pursued his object, in the face of the obloquy and ridicule of his competitors, the evil predictions of his enemies, and the still more discouraging and disheartening misgivings, doubts, and apprehensions of his friends. His efforts were at last crowned with success, and he had the satisfaction to find, that the business which had proved so ruinous to others, was likely to prove not altogether unprofitable to himself.

"Our limits do not permit us to give a minute and detailed account of the system; and we shall only glance at two or three of its more prominent features, for the purpose of illustrating its general character.

"The several parts of the musket were, under this system, carried along through the various processes of manufacture, in lots of some hundreds or thousands of each. In their various stages of progress, they were made to undergo successive operations by machinery, which not only vastly abridged the labor, but at the same time so fixed and determined their form and dimensions, as to make comparatively little skill necessary in the manual operations. Such was the construction and arrangement of this machinery, that it could be worked by persons of little or no experience; and yet it performed the work with so much precision, that when, in the later stages of the process, the several parts of the musket came to be put together, they were as readily adapted to each other, as if each had been made for its respective fellow. A lot of these parts passed through the hands of several different workmen successively, (and in some cases several times returned, at intervals more or less remote, to the hands of the same workman,) each performing upon them every time some single and simple operation, by machinery or by hand, until they were completed. Thus Mr. Whitney reduced a complex business, embracing many ramifications, almost to a mere succession of simple processes, and was thereby enabled to make a division of the labor among his workmen, on a principle which was not only more extensive, but altogether more philosophical, than that pursued in the English method. In England, the labor of making a musket was divided by making the different workmen the manufacturers of different limbs, while in Mr. Whitney's system the work was divided with reference to its nature, and several workmen performed different operations on the same limb.

"It will be readily seen that under such an arrangement any person of ordinary capacity would soon acquire sufficient dexterity to perform a branch of the work. Indeed, so easy did Mr. Whitney find it to instruct new and inexperienced workmen, that he uniformly preferred to do so, rather than to attempt to combat the prejudices of those who had learned the business under a different system.

"When Mr. Whitney's mode of conducting the business was brought into successful operation, and the utility of his machinery was fully demonstrated, the clouds of prejudice which lowered over his first efforts, were soon dissipated, and he had the satisfaction of seeing not only his system, but most of his machinery, introduced into every other considerable establishment for the manufacture of arms, both public and private, in the United States."*

The following is from the muster roll of the first company organized in the East Plains society, in Hamden. It is stated to be "A true Roll of the 17th company, or train band, of the second regiment in the colony of Connecticut, under the command of Colonel Edward Alling, Esq. Test, Charles Alling, clerk of said company." This roll was previous to the Revolution, and from some entries thereon, it is believed that the company was formed about the year 1770. The names of the five sergeants were torn off.

Stephen Ford, *Captain*; John Gillis, *Lieutenant*; Elisha Booth, *Ensign*; Charles Alling, *Clerk*; Samuel Cooper, Hezekiah Tuttle, *Drummers*; Caleb Alling, Moses Gilbert, Joseph Gilbert, Moses Ford, *Corporals*. Zaddock Alling, Amos Alling, Medad Atwater, Abraham Alling, Ebenezer A——, —— Bassett, —— Ball, —— Bradley, —— Bassett, Timothy Cooper, Dan Carrington, Hezekiah Dickerman, Jonathan

* Silliman's Journal of Science, Vol. xxi.—Memoir of Whitney.

Ford, Stephen Ford, Nathaniel Ford, Daniel Ford, Michael Gilbert, Gregson (?) Gilbert, Lemuel Gilbert, Daniel Gilbert, Ebenezer M. Gilbert, John Gorham, Amos Gilbert, Sackit Gilbert, Nathaniel Heaton, jr. John Hubbard, jr. — Homberston, John Munson, David Munson, Nathaniel Munson, John Manser, Jabez Munson, John Munson, jr. Job Potter, Abel Potter, Timothy Potter, Levi Potter, Stephen Potter, Thomas Potter, Amos Potter, jr. John Roe, Abel Stockwell, Thos. Wm. Tallmage, Daniel Tallmage, jr. Gordain Turner, Japhet Tuttle, Josiah Tallmage, Israel Woodin, Silas Woodin, *Privates.*

Mr. John Gilbert, it is believed, was one of the sergeants whose names were lost; he was afterwards a captain, and was killed, with five others of the Hamden company, at the time the British entered New Haven, July 5th, 1779: their names were Michael Gilbert, Samuel Woodin, Silas Woodin, Joseph Dorman, and Asa Todd. Most of these were killed outright, at the west end of Broadway, by a discharge of grape shot from the enemy. Capt. Stephen Ford, who was a member of the Hamden company, and from whom the foregoing roll was obtained, is still living in Hamden. He states that Capt. Gilbert was wounded in the leg at the discharge mentioned above: he fled for his horse, which was tied near the College, and as he was not able to go very fast, he was overtaken by Capt. Parker: Capt. Gilbert offered to surrender, if his life could be spared. Parker, calling him a d——d rebel, ordered a soldier to shoot him down. Upon this, Capt. Gilbert discharged his gun at Parker, who fell from his horse, badly wounded; of course Capt. Gilbert was immediately killed.

Connecticut Gazette, (New London,) July 12, 1782. No. 971.

New Haven, June 26, 1782.

Last Monday morning about 9 o'clock, Mrs. Mary Edwards, the consort of the Rev. Mr. Jonathan Edwards of this town, was drowned in Mr. Sabine's mill pond.*

She rode out in a chair, with a view to transact some domestic affairs with a family about two miles from town, and coming to the pond, appeared to have turned the horse with a view to water him at a place which appeared smooth and convenient for the purpose; but the shore a few feet from the edge of the pond was uncommonly steep, descending at once, and the horse, probably eager to drink, and pressing forward too far, plunged instantly into eight or ten feet water. No person saw Mrs. Edwards when she was drowning, but a lad on horseback just behind her, hearing a person scream, rode forward, and seeing the horse and chair in the pond, immediately alarmed the neighborhood. The waters were so deep and muddy, that it was an hour and a half before she was found, though the utmost exertions were made. The physician tried every probable expedient for more than an hour to recover her, but in vain. The jury gave their verdict that she was accidentally drowned. * * * *

Her funeral was attended yesterday, when an animated and exceedingly tender sermon was preached from Phil. i. 21, to a very numerous and solemn audience, by the Rev. Dr. Stiles. Her remains were followed to the grave by the most numerous procession ever seen in this town; which gave an ocular demonstration, that as she lived desired, so she departed universally lamented. * * * *

The following inscription is copied from a monument in a small graveyard in this town.

In memory of Mr. John Potter, who died Nov. 10, 1784, *Æ.* 78. Also Mrs. Esther, his wife, who died Dec. 21st, 1773, *Æ.* 64; and of Maj. Thomas Potter and family, who are removed to Meadville, Pennsylvania.

* This was about 60 rods north of the bridge at Whitneyville.

MADISON.

Lee's Academy and Congregational Church in Madison.

THIS town was incorporated in 1826. Its limits embrace what was formerly the second and fourth ecclesiastical societies in Guilford. There are now two parishes; Madison, formerly called *East Guilford*, and North Madison, formerly North Bristol. The town is about nine miles in length, and may average perhaps about four in breadth. The lands in Madison, the south parish, by the use of white fish as a manure, have become quite productive. These fish were first used here for this purpose in the summer of 1798. It is believed they were first used as a manure in this country on Long Island. This fishery commences about the first of June, and continues for three or four months. From 10 to 15,000 fish are considered as a sufficient dressing for an acre of ground. The best method of using them is thought to be to plow them in: a great proportion are left on the top of the ground,—a fish thrown on a hill of corn or potatoes makes a material difference in the produce. These fish are now extensively used in the maritime towns in the state. Madison produces considerable quantities of potatoes for exportation, rye, Indian corn, &c. There are a number of quarries near the shore, from which considerable quantities of paving stone are taken for exportation. Ship building is the leading mechanical business done in the place. North Madison is rocky and hilly, and it is believed that full one half of the land is unfit for cultivation, and is left for the growth of wood. Great quantities of excellent charcoal are made in this parish, which is carried to New Haven and Middletown for a market.

The above is a western view of Lee's Academy and the Congregational church in Madison. The Academy, which is a respectable institution, derived its name from the late Capt. Frederick Lee, com-

mander of a revenue cutter, who was one of its benefactors. This place is five miles from Guilford, and twenty one from New Haven. The principal part of the buildings in this society are situated on one street, passing through the town, and running a short distance from and parallel with the sea coast.

The Rev. John Hart was the first minister in Madison. In May, 1703, the General Assembly formed the society of East Guilford. Mr. Hart was ordained the first pastor of the newly gathered church, in November, 1707. He was from Farmington, and was a preacher of the first eminence in his day. He died March 4th, 1732, aged 49. Their next minister was the Rev. Jonathan Todd, from New Haven, who was ordained in 1733. The first minister in North Madison, was the Rev. Richard Ely, from Lyme, who was ordained here June 8th, 1757.

Mr. Nathan Bradley* was one of the first settlers of this town. He built his house about two and a half miles eastward of Madison church, and near the Killingworth line. He was but a lad when he came from England. He intended to have landed at New Haven, but was obliged to land at Saybrook, and come across the wilderness to New Haven, there being no settlement at that time between that place and Saybrook. Mr. Bradley, who was quite a hunter, was the first white person who discovered the source of Hammonasset river, which originates in a pond still called Nathan's pond. Mr. B. lived to an advanced age, and it is said that he killed several hundred deer while he resided in this town. In the winter season, bears, wolves, and other wild animals, would resort to the sea coast in considerable numbers. Mr. B. in his old age went to see a friend who lived about a mile northerly from the present meeting house in Madison. On his way he was met by a bear and her cubs. He endeavored to ride round her, but as he moved, the bear moved; when he stopped, she stopped, and sitting on her haunches, presented an undaunted front, and seemed determined to oppose his farther progress. Mr. B. was obliged to turn back, and being somewhat childish in his old age, shed tears, that he who had killed so many of these creatures, should be obliged at last to turn his back upon one of them.

Some of the inhabitants of Madison follow the sea-faring business. In accordance with this occupation, some of the inscriptions on the monuments in the grave yard west of the Academy, correspond. The following is from a tabular monument in memory of Capt. E. Griffin.

Though Boreas' blasts and Neptune's waves
Have toss'd me to and fro,
In spite of both by God's decree
I harbor here below,

Where I do at anchor ride
With many of our fleet;
Yet once again I must set sail
Our Admiral, Christ, to meet.

The Hon. *Thomas Chittenden*, for many years governor of the state of Vermont, was a native of this town. He was born 6th January,

* Mr. Zebul Bradley of New Haven, now 56 years of age, is his great grandson. Mr. Bradley had five or six brothers, who came over about the period he arrived. They were all Cromwell's men, and staunch dissenters.

1730; and at the age of twenty one years (1751) he removed to Salisbury in this state, where he continued until 1773, when he the second time encountered the privations and hardships of a new country, by emigrating into the state of Vermont. But he was amply rewarded for his enterprise, having made a valuable location of land, upon the beautiful alluvial of the Onion river, which soon became valuable, and enabled him to leave a large estate to his posterity. He was also honored with the confidence of the public, and attained to distinguished public employments, having been elected the first governor of that state, in March, 1778. He died August 25th, 1797.*

Ebenezer Chittenden, brother to the preceding, was possessed of a great mechanical genius, and was the inventor of a machine for cutting and bending card teeth. This was before the Revolution. Being of an open and communicative disposition, some person, taking advantage of this trait in his character, obtained a knowledge of his invention, went to England and took out a patent, claiming himself to have been the original inventor.

MERIDEN.

MERIDEN was originally a society in the town of Wallingford, and was incorporated as a town in 1806. The society was formed in 1725, "It consisted at first of between 30 and 40 families. They had preaching only in the winter season, for the first three years, and met in a private house two winters. Their first meeting house was built in 1727. The Rev. Theophilus Hall went to preach to them in December, 1728. The next year a church was gathered, and Mr. Hall was ordained their pastor. Their second meeting house was built in 1755. Mr. Hall died in 1767, in the 60th year of his age and 38th of his ministry. He was much esteemed as a preacher of great firmness and stability, and a zealous advocate for civil and religious liberty."†

The following view is rather east of south; the first building on the left, before which a stage is passing, is the Episcopal, the next the Baptist, the other is the Congregational church, which is the largest of the three. The building in the distance, on the right, has been long known as an excellent tavern, and is the *half-way house* from Hartford to New Haven, it being seventeen miles from each place. The elevated peak seen in the distance above the half-way house is Mount Lamentation, about 3 miles distant, and is by far the most elevated point of the Middletown and Wallingford range of mountains. It is the most prominent object which meets the eye for many miles, as you pass either north or south from Meriden.

Meriden is bounded n. by Berlin, e. by Middletown, s. by Wallingford, and w. by Cheshire and Southington. Its average length from east to west is 5 miles, and its average breadth $4\frac{1}{2}$ miles. The township is hilly, and some sections of it are mountainous. The Middle-

* Pease and Niles' Gazetteer.

Southern view of the Churches in Meriden.

town and Wallingford range of mountains or hills passes through the eastern border of the town. Of this range, Mount Lamentation, which is in the northeastern part of the township, is the most elevated. The soil in the town is a gravelly and sandy loam, and is considerably fertile, producing grass, grain, &c. The Quinnipiac river passes through the southwestern part of the town, and several of its branches run through the interior.

This is one of the most flourishing and enterprising manufacturing towns in the State. There is a considerable variety of manufactures here, forming the chief employment of the inhabitants. The following is a list of the manufactories, viz. 2 for patent augers and auger bits, 3 for ivory combs, 6 for tin ware, 4 for Britannia ware, 2 iron founderies, 1 manufactory for coffee mills, 1 for clocks, 1 for Norfolk door-latches, 3 for block-tin spoons, 1 for wood combs, 1 for skates and iron rakes, and 1 for gridirons. The value of articles manufactured yearly, has been estimated from 800,000 to 1,000,000 of dollars. The Meriden Bank is located in the village.

About thirty years since a road was constructed from the northwestern part of Meriden to Berlin, through a narrow and romantic glen, between two ridges of the Blue Mountains; this pass, which is more than a mile in extent, is called the *Cat Hole*. In some parts of this glen there is but barely room for a path; small angular fragments of rocks rise on each side, at about an angle of forty five degrees; these rocks have been beaten down and covered with earth, which must have been brought here for the purpose. The engraving shows the narrowest part of the passage, as you go to the south. A few yards south of this place, elevated perpendicular rocks appear on the left, one of which has very much the appearance of a profile of the human face, and it is thought by some to resemble in a slight degree the profile of Washing-

North view of the Cat Hole pass, in Meriden.

ton, the Father of his country; there was, however, at the time this drawing was taken, a defect in the under lip, which it will be necessary for the imagination to remedy. Following the foot of the mountain on the right, for about a mile, you will find large pieces of rocks lying upon each other in great disorder, which have evidently fallen from the precipitous heights above. Underneath these rocks ice may be found in almost every month in the year. A spring issues from between them, called the *Cold Spring*, and is a place of resort on the fourth of July.

The tradition is, that the regicides, in their wanderings, came to Meriden, and made a stopping place on the bank of a stream west of the churches, and gave it the name of "*Pilgrim's Harbor*." "It is now spoken of as the "harbor," as much or as familiarly as that at New Haven."

The first stage in Connecticut ran through Meriden, on the old country road west of the central village, where the rail road is now located; this was in 1784. At or before the union of the colonies of Connecticut and New Haven, there was a grant made to a Mr. Belcher of a tract of land containing five hundred acres, upon condition of his building a stone house or fort with port holes, and to keep arms and ammunition. With the land, he was to have the right of keeping tavern forever. Belcher did not come himself, but it appears he sent some one to take his place. The house or fort was erected between the years 1660 and 1667. This building proving too small, another was erected about 1690. This remained and was occupied till after the close of the Revolutionary war, with the addition of a wooden building, and whoever lived there kept tavern if they pleased, until the turnpike was made in 1799. It was situated in quite the upper part of the town, on the old road, and was a noted place during the French and Revolutionary wars. The village where the half-way tavern now is, has all been built during the last fifty years, with the exception of two or three houses.

MIDDLEBURY.

MIDDLEBURY was incorporated as a town in 1807. It was formed from a section of the towns of Waterbury, Woodbury and Southbury. It derived its name from the fact of its occupying a *middle* position in reference to these towns. It is 22 miles from New Haven, and 36 from Hartford, bounded N. by Watertown and Woodbury, W. by Woodbury, S. by Oxford, and E. by Waterbury. It is about five miles in length from north to south, and has an average breadth of about four.

The surface of the town is hilly and rocky, and its appearance rather rough and sterile. The rocks are principally granite, and the soil is a hard, coarse, gravelly loam, affording tolerable grazing; rye is cultivated with some success. The town forms one Congregational society, and a society of Methodists, each of which has a house of worship in the center of the town. The number of inhabitants in 1830 was 816, being 31 less than there were in 1810. Agriculture is the principal business of the inhabitants. A satinet factory has, however, been recently erected at the outlet of *Quasepaug* pond or lake, a body of water on the western border of the town, which discharges its waters into the Housatonic. This pond, in some places, is of great depth, and furnishes at its outlet very superior water privileges. There is in the place a pump manufactory upon a new plan, recently invented by Mr. Daniel Abbot.

About a mile north of the meeting houses in this town, is a hill of considerable elevation, called *Break neck* hill. It derives its name from the circumstance of one of the cattle falling and breaking its neck in descending the hill, while employed in transporting the baggage of the troops under the command of Gen. La Fayette. The army, which was passing from the eastward to Hudson river, encamped one night on the summit of this hill. La Fayette and some of his officers lodged in a tavern in the valley eastward, then kept by Mr. Isaac Bronson. A new house has been recently erected on the site by his grandson.

MILFORD.

MILFORD is one of the oldest towns in Connecticut. It was one of the six plantations which composed the "Old Jurisdiction of New Haven." The settlement was commenced in 1639. The first purchase of land was made of the Indians on the 12th of February, which comprehended about two miles of what is now the center of the town. The deed was given to Mr. William Fowler, Edmond Tapp, Zacheriah Whitman and Alexander Bryan, in trust for the body of planters. The consideration was "6 coats, 10 blankets, 1 kettle, besides a number of hoes, knives, hatchets and glasses." The instrument was signed by Ansantawae, the sagamore, by Arracowset, Anshuta, Manamatque and others. Afterwards at different times other purchases were made. The

tract lying west of the settlement, on the Housatonic river, was bought on the 20th of December, 1659, for the sum of £26, to be paid in goods. The Indian Neck, lying between the East river and the Sound, was purchased on the 2d of January, 1659-60, for the consideration of £25. A reservation of 20 acres was made by the Indians in this tract for planting ground, which reservation they sold on the 12th of December, 1661, for six coats, two blankets and two pair of breeches. By this last agreement, "Ansantawae, and wife, and his sons Tountonemoe and Ankeanach, in case of danger," were granted "liberty to sit down for shelter in some place near the town, where the townsmen should think most fit." A tract of land lying above the path that goeth from Derby to New Haven, a mile and six score rods in breadth, was bought on the 17th of June, 1685. A tract, commonly called the two-bit purchase, "lying north of Bladen's brook, and extending to Lebanon brook, a mile and six score rods in breadth," was bought on the 29th of February, 1700, for the consideration of £15 in pay, and 15s. in silver; and that tract commonly denominated the one-bit purchase lying north of Lebanon brook, and running upward to Beacon hill river, a mile and six score rods in breadth, was purchased on the 23d day of February, 1702, for £5 in money, or otherwise £7 10s. in pay. Thus it appears that the town once extended 20 miles north to Waterbury line, but its territory has been ceded to help form other towns, till it is now contracted into a little triangle of about 6 miles in length on each side. Parts of these ancient purchases are now contained in the towns of Waterbury, Derby, Woodbridge and Orange.

The town is (now) bounded west by the Housatonic river, southeast by Long island sound, and northeast by Orange. The Indian name of the place was Wepawaug. The original settlers were mostly from the counties of Essex and York. A number of them came to New England with Messrs. Eaton and Davenport's company, and remained with them at New Haven during the year of 1638. Their pastor, Mr. Peter Prudden, (from Edgeton, Yorkshire,) preached with the people of Wethersfield, who at that time had no minister, while his congregation were making preparation to commence the settlement. While he officiated there, a number became so attached to him, that when he left, they accompanied him, and incorporated with his church. These were before from Watertown, Massachusetts, and were part of Sir Richard Saltonstall's company.

The first planters of the town stand enrolled in the following order on the first page of Lib. I. of Milford Records.

November 20th, 1639.—"Those persons whose names are hereunder written, are allowed to be Free Planters, having for the present, liberty to act in the choyce of public officers, for the carrying on of public affaires in this plantation.

Zechariah Whitman	Mr. Peter Prudden	Nathaniel Baldwin
Thomas Welch	William Fowler	James Prudden
Thomas Wheeler	John Astwood	Thomas Baker
Edmond Tapp	Richard Baldwin	George Clark, senior
Thomas Buckingham	Benjamin Fenn	George Hubbard
Richard Miles	Samuel Coley	Jasper Gunn
Richard Platt	John Peacocke	John Fletcher
Thomas Tapping	Henry Stonhill	Alexander Bryan

Frances Bolt	Thomas Sandford	Nicholas Camp
Micah Tomkins	Timothy Baldwin	John Rogers
John Birdsey	George Clark, junior	Thomas Uffot
Edmond Harvey	John Burwell	Nathaniel Brisco
John Lane	Henry Botsford	Thomas Tibbals
William East	Joseph Baldwin	John Sherman
Thomas Lawrence	Philip Hatler	

The following persons are recorded immediately after, but not as free planters, they not being in church fellowship, which was a requisite qualification in the view of these colonists, before a person could be admitted a "free planter."

Robert Plum	William Slough	Robert Treat
Roger Terrill	Andrew Benton	Henry Lyon
Joseph Northrup	William Brooke	John Fowler
John Baldwin		

By this list it appears there were 54 heads of families, (admitting them all married,) and if we allow only four individuals to a family, it would make upwards of 200 persons who first came to Milford. From some data on the Record, there is reason to suppose this calculation not too large.

The following is a list of the principal after planters :

Henry Allen	Stephen Freeman	John Prindle
Edward Adams	John Fisk	Joseph Peck
Joshua Atwater	Nathaniel Gould	Roger Pritchard
Joseph Ashburn	Joseph Guernsey	David Phillips
Hants Albers	Thomas Hine	Edward Riggs
Thomas Andrew	Richard Haughton	William Roberts
Thomas Bayley	Thomas Hayes	Thomas Read
Thomas Beardsley	Richard Holbrook	Joseph Sill
John Brown	Richard Hollingworth	Richard Shute
Roger Betts	Walter Joye	John Smith
Thomas Betts	Simon Lobdell	John Stream
Thomas Beach	Jonathan Law	John Stone
Thomas Campfield	Jesse Lambert	Vincent Stilson
Robert Denison	Miles Merwin	Peter Simpson
Gilbert Dalison	Miles Moore	Edward Turner
Charles Deal	Jonathan Marsh	Henry Tomlinson
Robert Downs	Thomas Meacock	William Tyler
Samuel Eells	Samuel Nettleton	Edward Wooster
Thomas Farman	Roger Newton	Edward Wilkinson
Nathaniel Farrand	Francis Norton	Thomas Ward
John Ford	Abraham Pierson	Joseph Waters
Thomas Ford	James Prime	

Twelve of the first settlers afterwards removed, viz. Richard Miles to New Haven; Thomas Tapping to Southampton, L. I., but returned in 1773. John Astwood went to England as agent for the Court of Commissioners of the United Colonies, and died in London in 1654. Henry Stonhill (in 1648) and Philip Hatly (in 1649) returned to London. John Peacocke removed in 1651 to Newport, (R. I.); Thomas Baker in 1650 to East Hampton; Edward Harvey and Henry Lyon in 1654 to Fairfield; George Hubbard in 1650; John Fowler in 1660; Andrew Benton in 1666 to Guilford; John Birdsey in 1649 to Stratford.

The body of planters moved from New Haven to Milford by land, following the devious Indian foot path, driving their cattle and other domestic animals before them, while their household utensils and the materials for "the common house" (which was fitted at New Haven)

were taken round by water. Thomas Tibbals piloted the company through the woods to the place, "he having been there a number of times before; for which service the town, in 1670, "made him two grants of land lying in Westfield as a free gift." All safely arrived; they erected their common house at the head of the harbor on the west side, and a few rude huts for temporary residences. They then proceeded to form their civil polity. Considering themselves as without the pale of jurisdiction, (as in fact they were until they united with New Haven in 1644,) they combined into a little republic. At their first general meeting, Nov. 20th, 1639, it was voted "that the power of electing officers and persons to divide the land into lots, to take order for the timber, and to manage the common interests of the plantation, should be in the church only. It was also voted that they would guide themselves in all their doings by the rule of the written Word of God, till such time as a body of laws should be established."

William Fowler, Edmond Tapp, Zechariah Whitman, John Astwood and Richard Miles, were then chosen for judges in all civil affairs, to try all causes between man and man; and as a court to punish any offense and misdemeanor.

It was "voted that the persons invested with magistracy should have power to call a general court (*or town meeting*) whenever they might see cause, or the public good require it."

It was also voted that they should hold particular courts once in six weeks, wherein should be tried such causes as might be brought before them, they to examine witnesses upon oath as need should require.

It was further voted and agreed, that according to the sum of money which each person paid toward the public charges, in such proportion should he receive or be repaid in lands, and that all planters who might come after should pay their share equally for some other public use.

The first settlers located themselves on each side of the Mill river and the West End brook, probably for the convenience of water for themselves and cattle. Most of them soon erected frame houses, covered with rent oak clapboards, in the old leanto style. Their house lots were laid out in parallel narrow slips, containing each about three acres. They thus kept near together for their better security in case of an attack from the Indians. They immediately fenced in common three tracts of land, in which each individual received by lot his portion of "upland." Westfield, which was the land that lies south of the town between the turnpike and great meadow, was laid out to those who settled at the west end. Eastfield, which enclosed the Gulf Neck, was possessed by those located on the river. Mill Neck, the tract lying between Wharf street and Bear Neck lane, was owned by a part of both. Each person was further allotted a piece of meadow land lying either in the great or the harbor meadows. As the population increased and the danger from the Indians became less, the land further from the center was gradually laid out and settled.

At the second General Court, held March 9th, 1640, "It was agreed between William Fowler and the brethren that he should build a mill and have her going by the last of September." For his encourage-

ment the town made him a grant of 30 acres of land, which long bore the name of the mill lot. This agreement had reference only to a grist mill, but he soon added a saw mill. This mill establishment is yet retained in the family. At the next General Court held November 24th, 1640, "With common consent and general vote of the freemen, the plantation was named Milford," in commemoration of the town of this name in their native England. The Court of *five Judges* at this meeting were directed "to build a bridge over the Mill river with all expedition," and also "to set out a meeting house thirty feet square, after such manner as they should judge the most convenient for the public good." The site of the building was the same of the present meeting house of the first society. In 1709, this house had become so much crowded that it was voted in town meeting that "whosoever should needlessly set out of his seat, should forfeit the sum of five shillings to the town treasury." It stood until 1727.

The first settlers being of those people who left England that they might enjoy their religious sentiments unmolested, they took an early opportunity to form themselves into a church constituted according to their particular views. It was organized at New Haven at the same time with the church in that place on the 2d of August, 1639. The method of forming their churches was similar to that of New Haven. Seven persons were first chosen, who joined in covenant to be the church, and were called "the pillars." To these the rest were added. They took their plan from the text, "Wisdom hath builded her house, she hath hewn out her seven pillars." Milford church pillars were Peter Prudden, pastor, William Fowler, Edmond Tapp, Zechariah Whitman, John Astwood, Thomas Buckingham, Thomas Welch. Mr. Prudden was installed at New Haven on the 18th of April, 1640. John Sherman was chosen teacher, (but declined the office.) Zechariah Whitman was ordained ruling elder June 26, 1645.

The ministers of this church since Mr. Prudden, have been Roger Newton, installed August 22d, 1660. Samuel Andrew, ordained Nov. 18, 1685. Samuel Whittlesey, ordained Nov. 9, 1737. Samuel Wales, ordained Dec. 19, 1770. In 1776 he went into the army as chaplain. William Lockwood, ordained March 17, 1784, and Bezaleel Pinneo, the present pastor, who was ordained on the 26th of October, 1796. This church, for more than a century, was the only one in the town—their present meeting house was built in 1824.

In 1741, some persons (47 in number) being dissatisfied with Mr. Whittlesey's more moderate religious opinions, "declared their *sober dissent* from the established church, and professed themselves to be Presbyterians according to the church of Scotland." They were soon joined by twelve others, and the society continued gradually to increase. They had to encounter much violent opposition from the first church, and were not invested with full privileges as an ecclesiastical society till the session of the Legislature in May, 1760. They erected their meeting house in November, 1742. Their first settled minister was Job Prudden, a native of this town, (great grandson of Peter Prudden.) He was ordained at New Brunswick, in May, 1747. The succeeding

ministers have been Josiah Sherman, David Tully, Sherman Johnson, Caleb Pitkin, Jehu Clark, and the present, Asa M. Train. The meeting house at present occupied by the society, was built during the summer of 1834. It is seen on the right, with six pillars in front.

Congregational Churches in Milford.

The above is a south view of the two Congregational churches in Milford; they are but a few rods apart, separated by the Wepawaug, a mill stream passing through the center of the village. A small but beautiful mill pond is directly south of these churches, and adds very much to the variegated, pleasant, and interesting scenery in the immediate vicinity. The Episcopal and Baptist churches, and the town house, are about forty rods south of the churches seen in the engraving. The first cause of there being two societies in this place was owing to the settlement of the Rev. Mr. Whittlesey as pastor, about the year 1740. The Rev. Samuel Andrew (who for a long period was the minister in this town) became through age and many infirmities unable to perform the labor of the ministry; Mr. Whittlesey was invited to preach and settle in the place as colleague pastor; this occasioned a division among the people. Although there was a majority for Mr. Whittlesey, yet there was a strong and respectable minority in opposition to his settlement; it arose on account of his adopting in some measure Arminian sentiments. An ecclesiastical council was held, in which Dr. Trumbull says he was informed "by one of the elders, who was one of the council, that the debate was with so much passion, that fists were doubled on the occasion." All attempts at union having failed, the disaffected part of the society withdrew and erected a house of worship for themselves in 1742, and placed themselves under the presbytery of New Brunswick.

The Episcopal society was formed in January, 1764. The church was raised in 1771, and consecrated by the name of St. George's church, in March, 1775. They also suffered much opposition, and were con-

sidered by many as akin to the church of Rome. But old prejudices have in a measure subsided, and the church at present is in a flourishing state. There is a small but respectable Baptist church in the town, which owes its origin to the Rev. James H. Linsley, of Stratford.

In 1644, Milford united with the New Haven jurisdiction, which then consisted of New Haven, Stamford, Guilford and Southold, L. I. They met with some difficulty in gaining admission, on account of having "formerly taken in as free burgesses, six planters who were not in church fellowship," but were received on condition that these six men should "never be chosen deputies, or into any public trust for the combination, nor be allowed to vote at any time in the election of magistrates, and that none should afterwards be admitted freemen but church members." The town, under this jurisdiction, had two magistrates, and sent two deputies to the general court at New Haven. William Fowler and Edmond Tapp, were the first magistrates, after the union, and John Astwood and John Sherman, first deputies.

In May, 1685, the town received a patent from the general court; afterwards, making further purchases of the Indians, they petitioned for a new one, which might comprehend all their territory. Accordingly the governor and company granted them another, which is dated the 22d day of May, A. D. 1713. It appears by this patent, that at that time there were 235 freeholders in the town.

The Indians, at the settlement of the town, were numerous. They had four considerable villages, viz. one on the side of the Wepawaug river, near the church; one at the point; another about half a mile north of Washington bridge, and another at Turkey Hill. Here they had a strong fortress, with flankers at the four corners, which was designed as a defense against the Mohawks.

At the settlement of the English, the Indians in the center of the place retired to Indian point, lying between East river and the Sound. Here they lived for 20 years. For security against the Indians, the planters enclosed the town plot with palisadoes, so thickly set that a man could not crowd between them. This enclosure was nearly a mile square, and was on both sides of the Wepawaug river. It eventually proved fortunate for the English that this was done. For in the years 1645 and '46, the Indians were hostile and very troublesome, so much so that the planters, for their mutual safety, kept guard night and day. Each soldier stood as sentinel every fifth day, and was relieved at sunset by drum beat. On their "Sabbath and lecture days," they went armed to meeting, and when in the fields, their muskets were kept near at hand.

About this time the Indians set the adjacent country on fire, and it was supposed they meant to burn the town; but the planters were so fortunate as to arrest the progress of the flames at the swamp on the west and north of the settlement, before they reached the palisadoes, and thus saved their buildings. But the fire did much damage; most of the timber was destroyed, and a number of pieces of good natural meadow was so burnt that they became sunken swamps.

The Indians were again troublesome in 1653, and the people were under the apprehension of a sudden and general massacre. They were greatly hindered in their farming avocations, and worn down with incessant watching. In the spring of 1700, so much danger was apprehended from the natives, that two houses were ordered to be fortified, (one on the east side of the river, and one at the west end,) for the security of women and children, the aged and decrepid, in case of surprise. All persons over 16 years of age were ordered forthwith to work until the fortifications were completed. This was a time of general alarm, for 4 or 5 years, throughout the country. But there is nothing on record to show that any English person was ever killed by the Indians in Milford.

About 1648, there was a famous battle fought between the Milford Indians and the Mohawks. The latter had secreted themselves in a swamp, nearly a mile east of the ferry, intending to surprise the Indians in the fort that night. The English accidentally discovering them, notified the Milford Indians, who, setting up the war whoop, soon raised such numbers, that they ventured to attack the invaders. The Mohawks were defeated, and several of them taken. One of their fallen chiefs they buried on a hillock in the swamp. A stout captive was stripped and tied by the Milford Indians in the great meadows, for the musquitoes to eat and torment to death. But he was discovered and relieved by one Thomas Hine.

Many of the Wepawaug Indians eventually went off to the west and joined with the Six Nations, while some few remained about the town; but they have now all disappeared.

In all the wars in which the country has been engaged, Milford has furnished its proportion of money and soldiers. In King Philip's war, and in the two French wars, the town lost a good number of men, who died of sickness in the camp or fell in battle. In the French and Indian war, companies of the British troops quartered in the place during the winters of 1757 and 1758 at the town's expense. The last winter, in a revel, they burnt the town house, upon which the government sent over £50 towards the erection of a new one. In — a number of men from the town accompanied Gen. Putnam in the expedition to Cuba.

At the commencement of the Revolution, the inhabitants were unanimously opposed to the oppressive measures of the British ministry, and opened a subscription "for the relief and support of such poor inhabitants of Boston as were immediate sufferers by the Port Bill."

In 1776, a battery was built at West Point, on the west side of the harbor, for the defense of the town; men were stationed at Burwell's farm, and at the Point, and a Minute Post kept in readiness in case of emergency. The town furnished a full quota of men for the army, who marched under the command of Capt. Samuel Peck. The select men were directed to "furnish guns, bayonets and provisions for such as were called forth for the defense of the LIBERTY OF AMERICA." A premium of £10 was offered per head for men to enlist during the war. This town suffered comparatively little during the war from the incursions of the British. There were no buildings burnt and but one house plundered, (that of Miles Merwin at Pond Point.) But much property was lost by burying, and by exposure to the weather in the woods. The inhabitants contributed liberally for the relief of Fairfield, Danbury and Norwalk. There were but few Tories in the town during these times, and those few were compelled to keep close to their houses. Of the soldiers of the revolution, there are but a few remaining in the town. This town has given to Connecticut two governors, viz. Robert Treat, and Jonathan Law, Esqs., both of whom were eminent statesmen.

Robert Treat and his brother Richard came to New England with Sir Richard Saltonstall, and were among the first settlers of Wethersfield. Robert left that settlement and came to Milford with Mr. Prudden. At the first meeting of the planters, he was chosen to assist in surveying and laying out the township. He was soon chosen one of the five Judges, and in 1661 was elected a magistrate of the colony, in

which office he was continued four years, until he refused to take the oath prescribed by law, he being in favor of the union of the colony with Connecticut. In 1664, the town, by his influence, and that of Mr. Benjamin Fenn, was induced to break off from New Haven colony; and it was by his influence particularly, that the union was so soon effected. He was appointed Major of the Connecticut troops in 1670. In Philip's war, at the attack of Springfield by the Indians in 1675, he marched to its relief, and drove them from the town; and in their assault upon Hadley, he put them completely to flight. The same year, in December, he performed a distinguished part in the destruction of the Indians at fort Narragansett. In 1676, he was elected Deputy Governor, and in 1686, Governor of Connecticut, to which last office he was annually re-elected for fifteen years, till he declined serving. His wife was Jane, only daughter of Edmond Tapp, Esq. Concerning this match there is the following traditional anecdote.—Being in at Mr. Tapp's, he took the girl upon his knee and commenced trotting her. Robert, said she, be still that, I had rather be *Treated* than trotted, upon which he proposed marriage, which was immediately consented to by all concerned. He died July 12th, in the 89th year of his age, and left four sons and four daughters.

Gov. Law was the only son of Jonathan and Sarah Law, (the daughter of George Clark, sen., planter,) and grandson of Richard Law, one of the first settlers of Stamford. He was born August 6, 1674, and was educated at Harvard College, where he graduated in 1695. He commenced the practice of law in his native town in 1698, and acquired great reputation as a counsellor. In 1706, he was made a justice of the peace—in 1710, a justice of the quorum—in 1714, chief judge, and in 1717, he was chosen an assistant, which office he filled until he was chosen deputy governor. In May, 1741, he was elected governor, and annually re-elected, till his death. He died Nov. 6th, 1750, and left 7 sons and a widow, his fifth wife.

The ancestors of Governors John Cotton Smith and Gideon Tomlinson were from Milford, likewise Abraham Clark, of New Jersey, one of the signers of the Declaration of Independence. The early inhabitants of the town took a particular interest in the subject of education. In 1697, it was voted "there should be thirty five pounds allowed out of the town treasury, to maintain a Latin school; the Honorable Governor, and the Rev. Samuel Andrew, to be a committee to attend to the business." This Mr. Andrew was one of the principal projectors, and early patrons of Yale College. Milford has sent out many colonists towards the settlement of other towns. Weantinoque was purchased of the Indians on the 8th of February, 1702-3, by the people of the town, and settled by the name of New Milford. Newark, in New Jersey, Durham in Connecticut, and Talmadge in Ohio, received most of their early settlers from Milford.

There are no mountains, and very little broken land, in the town. The soil is generally good and productive; but the culture is not managed on the scientific principles that might be wished. There is a quarry of beautiful serpentine marble in the east part of the town, which was wrought about eighteen years since, but is now neglected.

The harbor of the town is not deep. It has been gradually filling up since the first settlement, at which time there was water enough to admit a large sea brig up to Fowler's mills. A breakwater has been proposed to be built from Indian point toward the island, by which a capacious harbor would be formed.

Milford Island lies about three fourths of a mile from the shore, and contains about ten acres of land. It was called Poquahaug by the Indians, and was a favorite summer resort of those people. Ansantawae, the sachem, had a "big wigwam" upon it, for his accommodation. After the settlement of the English, it was laid out to George Hubbard, who sold it to Richard Bryan. At a town meeting held on the 17th of March, 1657, Charles Deal, tobacco planter, was granted liberty to

purchase and enjoy the Island for a tobacco plantation, provided he use the buildings for no other use than a tobacco house, and that he do not trade with the Dutch or Indians, or suffer any disorderly resort of seamen or others there. In 1835, it was purchased by John Harris, Esq. of New York, who erected a seat, and fitted it up for a summer residence. Between the Island and shore there is a bar, which is bare half the time. Good clams grow on this bar.

Poconock or Milford point, at the southwest extremity of the town, is somewhat noted. There are a number of huts on the beach, which are occupied by persons engaged in the clam and oyster business. This point was formed and is preserved by the opposite action of the waters of Long Island sound, and of the Housatonic river.

Oyster Huts on Milford Point.

The above shows the appearance of the oyster huts on Milford point. There is a street containing about 15 or 20 huts of this description, covered with sea weed, &c. which are quite novel in their appearance. About 50 or 60 persons, engaged in the oyster business, reside in these habitations during the winter months, and four or five have their families with them.

The rivers in this town are small. The Wepawaug, the largest, takes its rise in Woodbridge, 15 miles from its mouth, and runs through the center of the town. It furnishes a number of good mill seats. The others are the Indian river, Beaver river, the West End brook, and Stubby Plain brook, a branch of the Indian river.

Milford is now on the rise. There are many improvements making in this place, and others in contemplation. The number of inhabitants in the town, when the last census was taken, was 2,256, and has probably since increased to 2,800. There are at present in the town 400 houses, 480 freeholders, and 500 electors.*

* For the preceding account of Milford, the author is indebted almost entirely to Mr. Edward R. Lambert, of that place. Mr. Lambert contemplates publishing a full and complete history of the town of Milford, from the first settlement to the present time. He has already made a considerable number of valuable and interesting collections in reference to this object.

[From the Connecticut Journal, No. 482.]

Milford, Jan. 8, 1777.

Last Wednesday a flag of truce vessel arrived at Milford, from New York, after a tedious passage of several days, having on board upwards of 200 American prisoners, whose rueful countenances too well discover the ill treatment they received while prisoners in New York; twenty of these unfortunate people died on the passage, and twenty have died since they landed at Milford.

The following inscriptions are copied from monuments in the grave yard near the center of the place.

HERE LYETH INTERRED THE BODY OF COL. ROBERT TREAT, ESQ. WHO FAITHFULLY SERVED THIS COLONY IN THE POST OF GOVERNOR, NEAR YE SPACE OF THIRTY YEARS, AND ATT YE AGE OF FOUR SCORE AND EIGHT YEARS, EXCHANGED THIS LIFE FOR A BETTER, IVLY 12TH, ANNO DOMINO 1710.

Here lies ye body of ye Rev. and learned Mr. Samuel Andrew, Pastor of ye Church of Christ in this place for above 50 years. Formerly Fellow of Harvard College, and more lately Rector of Yale College,—a singular ornament and blessing in every capacity and relation,—of unwearied labors, modest, courteous, and beneficent,—never fond of *this* world, earnestly pursuing and recommending a *better*,—greatly esteemed in life, and lamented at death, which was January 24, 1737—8, lacking five days to complete 82 years of life.

Memoriæ Sacrum Reverendi Samuelis Whittlesey, V. D. M. Collegii Yalensis, et Harvardini Honoribus exornati, ejus virtutes, Pietas, et Res gestæ proprio splendore ubiq: enitescunt; ejus labor perennis, fidusq: de sacris per Annos triginta et supra inter incolas Milfordienses, Honorem jure vindicat. Denique ab omnibus terrendis Amicis, officiis, ac honoribus morte abreptus est, Anno Ætatis 56to, die Octobris 22to. et Anno Domini MDCCLXVIII.

Which may be translated in the following manner:

Sacred to the memory of the Reverend Samuel Whittlesey, Master of Arts at Yale and at Harvard; whose virtues, piety and good deeds every where shone with peculiar lustre, and whose unceasing and faithful labors in sacred things, for more than thirty years among the inhabitants of Milford, justly entitle him to honor. He was at length removed by death from all earthly friends, duties and honors, on the 22d October, 1768, in the 56th year of his age.

Here lies the body of Capt. Benjamin Fenn, for many years a ruling elder of the second church in this town, who departed this life January 10th, Anno Domini 1770, aged 80 years.

The truly honorable and pious ROGER NEWTON, Esq. an officer of distinguished note in ye expeditions of 1709 and 1710, for many years one of ye Council, and Colonel of the Second Regiment of Militia—Judge of the Court of Common Pleas 33 years, until he departed this life, January 15th, 1771, in the 87th year of his age.

His mind returned to God, intombed here lies
The part the *Hero* left beneath the skies,
Newton as steel, inflexible from right,
In Faith, in Law, in Equity, in Fight.

The following is copied from an epitaph, in memory of a young woman who died in 1792, aged 24. The impression which her friends meant to convey was doubtless correct, but the words made use of, when applied to a human being, are rather unrefined, according to the taste of the present age.

Molly, tho' pleasant in her day,
Was sudd'nly seiz'd and sent away.
How soon she's ripe, how soon she's rotten,
Laid in the grave and soon forgott'n.

In memory of Doctr. JOHN HERPIN, who was born and educated at *Rocheport* in *France*, practised physic and Surgery in this place 50 years with much reputation and success, and died Nov. 14th, 1765, Æt. 74.

NORTH BRANFORD,

WAS incorporated as a town in 1831. It was formed from the societies of North Branford and Northford, in the town of Branford. It is bounded north by Wallingford, east by Guilford, south by Branford, and west by East Haven and North Haven. It is about five miles long from north to south, and averages upwards of four miles in width. A range of mountains from southwest to northeast passes through the central part of the town. The inhabitants are generally substantial farmers, and property is very equally distributed. The face of the township is generally hilly, but the soil is strong and fertile. There are, it is believed, about 1000 or 1100 inhabitants. There are five houses of worship in this town, three for Congregationalists, and two for Episcopalians.

The society of North Branford, the southern division of the town, was formerly called the *village*. The central part is five miles north of Branford church, and nine from New Haven. The Rev. Jonathan Merrick, the first minister in this parish, was ordained in 1727.

Northford society takes in a small part of Wallingford. The Indian name of the place appears to have been *Paug*. The Congregational church is nine miles from New Haven. The post office is kept about a mile north, and may be considered as the center. The first clergyman was the Rev. Warham Williams, a grandson of the Rev. Mr. Williams of Deerfield, Massachusetts, who was carried captive by the Indians into Canada. The church here was called the third church in Branford. The first house of worship erected in this society is still standing, as is likewise the house of the first clergyman, (Mr. Williams,) which is now occupied by the Rev. Mr. Noyes, for a long period the minister of this parish, and who is considered to be one of the wealthiest clergyman in the state. It is believed that Northford, according to its population, has furnished more young men who have received a liberal education than any other town in the state.

About a mile southeast of the Northford church, on *Tetoket* mountain, there is the appearance of having been, at some remote period, some violent convulsion in nature; the rocks appear to have been rent asunder, and are thrown about in great disorder. Lead is said to have been found near this spot, a mass of it being discovered by a person who was hunting, at the time of the first settlement of the parish: he hung up a pair of buck's horns to designate the spot, but the place could not be found afterwards.

NORTH HAVEN.

NORTH HAVEN was incorporated as a town in October, 1786, being originally a part of the town of New Haven. It is bounded N. by Wallingford, W. by Hamden, E. by Wallingford and North Branford, and S. by East Haven. Its length from north to south is about six

miles, and its medium breadth three. The town lies on both sides of the Wallingford or Quinnipiac river, and comprises the valley, and a part of the bordering hills. The valley is partly rich interval land, and more extensively sand; covered with a thin stratum of loam; light but warm. Near the northern line of the town it is so light as, in two or three places of small extent, to be blown into drifts. The soil of the hills is good, being a reddish loam.

From the vicinity of this town to New Haven, and from its light and warm soil, which is favorable for early vegetation, there are various culinary vegetables, particularly peas, cultivated for the New Haven market. But the most striking feature in the township, is the large and beautiful tract of salt meadows on both sides of the Quinnipiac. These meadows produce large quantities of grass, which is mowed and stacked upon the land, from whence, when the ground is frozen sufficiently solid in the winter, it is removed. Upon the salt marsh the hay is salt; but on those meadows which are protected from the salt water by means of dikes, the grass is fresh and of a better quality. These are called dike marshes or meadows. The making of brick receives considerable attention in this town. Four and a half millions of brick are manufactured annually, and principally sold in New Haven.

The first settler in North Haven appears to have been William Bradley, who had been an officer in Cromwell's army. He lived here soon after the year 1650, on the land belonging to Gov. Eaton, who owned a large tract on the west side of the river. The next settlers were Thomas and Nathaniel Yale, who came here about the year 1660. The settlement of Wallingford, or New Haven village, about the year 1670, encouraged the settlement of North Haven. Jonathan Tuttle began a settlement near the river; Nathaniel Thorpe, Ebenezer Blaklee and John Huniston soon after settled on the eastern bank of the river, near the center of the town. Daniel and Thomas Barnes, Thomas Jacobs, and Moses Brockett, made settlements near the river, on the east side of it, about a mile north of the south line of the town. After this there came into the place families by the names of Clarke, Todd, Ives, Bishop, Cooper, Grannis, and Brockett. The settlement was very slow, and it seems that for nearly forty years some of the first planters attended public worship and buried their dead at New Haven. The women usually went on foot to New Haven, on the Lord's day, attended two long exercises, and returned. In some instances they did this with a child in their arms.—The Indians, (says Dr. Trumbull,) were sometimes very numerous in this place, and gave much alarm to the inhabitants, especially to the women and children. The Indians at Mattabesek (Middletown) were connected with the Indians in this part of the state, and the extent of the river into the southern part of Farmington, and the fine fishing and fowling upon it, formed a connexion with the Farmington Indians. The combination of these circumstances sometimes filled the parish with Indians. At particular times they seemed to swarm upon the river, and the groves and swamps appeared alive with them. Once after the settlement commenced, they made a grand *powwow*, on the road between the corner of the market

place and Mr. John Humiston's; people were in great fear that their fields of corn would be ruined by them, but by the influence of the chief sachem, they were restrained from doing any damage.

North Haven, (central part.)

North Haven was made a parish in 1716, and the next year the General Assembly gave the inhabitants liberty to form into a church; the same year the Rev. James Wetmore was ordained their minister. At this time the limits of the parish extended considerably north and west of the meeting house in Mount Carmel parish in Hamden, and contained about forty families. "Mr. Wetmore was greatly beloved and esteemed by his people; but after he had labored with them for nearly four years, he altered his sentiments, and in September, 1722, declared for Episcopacy. The consequence was a dismissal, soon after, from his pastoral relation. He went to England, and took orders in 1723. He was rector of the church at Rye, where he died in 1660. He was educated at the collegiate school at Saybrook, where he received the degree of Bachelor of Arts, in September, 1714. The Rev. Isaac Stiles succeeded Mr. Wetmore. He was ordained in November, 1724, and died May 14th, 1760, on the same day and nearly the same hour in which his predecessor, Mr. Wetmore, died. Mr. Stiles was succeeded, in 1760, by Dr. Trumbull, the historian of Connecticut. The Episcopalians in this place erected their first church in 1760. From 1762, till about the year 1783, they were under the pastoral care of the Rev. Mr. Andrews of Wallingford."*

The above is a representation of the central part of North Haven; the Episcopal church with a Gothic tower is seen on the left. The first house south, seen in the center of the engraving, is the house where Dr. Trumbull, the historian of Connecticut, resided for more than half a century. The building on the extreme right is the Con-

* Dr. Trumbull's Centennial Sermon.

gregational church, erected in 1739, and finished in 1741. The first meeting house in the town, thirty eight feet by forty, was erected on the same spot, about 1718. The Rev. James Pierpont gave the plat of ground on which it stood, upon condition that the people would erect a house of worship upon it. The drawing of the engraving was made a short time previous to the taking down of the Congregational church. The steeple however was removed before the drawing was taken.

Congregational Church, North Haven.

A handsome Congregational church now stands a few rods westward of the old meeting house. This church, and likewise that of the Episcopal denomination, was erected in 1835; both are built of brick, of which considerable quantities are made in the town. The burying ground is seen in front of the Episcopal church. Dr. Trumbull was buried in this yard, nearly in front of his house. The following is the inscription on his monument.

Here rest the remains of the Rev. Benjamin Trumbull, D. D. who was born at Hebron, Connecticut, A. D. 1735, and died February 2d, A. D. 1820, aged 85. He was graduated at Yale College, A. D. 1757, and ordained pastor in North Haven, A. D. 1760, in which relation he continued till his death; a period of almost sixty years. He composed during his ministry nearly four thousand sermons, and published essays on the Inspiration of the Scriptures, a History of Connecticut, a History of the United States, and other works, for which he was honored by his Alma Mater, and esteemed by his countrymen as an able Divine and an accurate Historian. Firm, humble, and devout, he sustained with dignity all his relations in life, and died a firm and joyful believer in his God and Saviour; anticipating with expressions of praise, the coming of the Lord.

Ezra Stiles, D. D. was a native of this town. He was the son of the Rev. Isaac Stiles, and was born November 29th, 1727. He was graduated at the seminary over which he was destined to preside, in 1746, and in 1749 was chosen tutor, in which station he remained six years. After having preached occasionally, his impaired health, and some doubt respecting the truth of Christianity, induced him to pursue the study of the law. In 1753, he took the attorney's oath at New

Haven, and practiced at the bar till 1755. But having resumed preaching, on the 22d of October in this latter year he was ordained minister of the second Congregational church in Newport, Rhode Island. In March, 1776, the events of the war dispersed his congregation, and induced him to remove to Dighton. He afterwards preached for some time at Portsmouth. In 1777, he was chosen president of Yale College, as successor to Mr. Clap. He was not desirous of this honor, for he loved retirement; but he was persuaded to accept it. He was installed July 8, 1778, and he continued in this station till his death, May 12, 1795, in the sixty eighth year of his age.

Dr. Stiles was one of the most learned men, of whom this country can boast. He had a thorough knowledge of the Hebrew, Greek, and Latin languages, the former of which he learned when he was about forty years of age; he had made considerable progress in the Samaritan, Chaldee, Syriac, and Arabic; on the Persian and Coptic he had bestowed some attention; and the French he read with great facility. He was also well versed in most branches of mathematical knowledge. Next to sacred literature, astronomy was his favorite science. He had read the works of divines in various languages, and very few have had so thorough an acquaintance with the fathers of the Christian church. He possessed an intimate acquaintance with the Rabbinical writings. He was a most impressive and eloquent preacher, for he spoke with that zeal and energy which the deepest interest in the most important subjects cannot fail to inspire. His early discourses were philosophical and moral; but he gradually became a serious and powerful preacher of the momentous truths of the gospel. In the room of labored disquisitions addressed rather to reason than to the conscience and heart, he employed his time in preaching repentance and faith, the great truths respecting our disease and cure, the physician of souls and our remedy in him, the manner in which the sinner is brought home to God in regeneration, justification, sanctification, and eternal glory, the terrors and blessings of the world to come, the influence of the Holy Spirit and the efficacy of the truth in the great change of the character, preparatory for Heaven. The doctrines of the trinity in unity, of the divinity and atonement of Christ, with the capital principles of the great theological system of the doctrines of grace, he believed to have been the uninterrupted faith of eight tenths of Christendom from the ascension of Jesus Christ to the present day. This system, he observed to his flock, I have received from God in the scriptures of truth, and on the review of my ministry I hope you will find, that I have preached the unsearchable riches of Christ. He delighted in preaching the gospel to the poor. Among the members of his church at Newport were seven negroes. These occasionally met in his study, when he instructed them, and falling on their knees together he implored for them and for himself the blessing of that God, with whom all distinction excepting that of Christian excellence is as nothing. In the cause of civil and religious liberty, Dr. Stiles was an enthusiast. He contended, that the right of conscience and private judgment was unalienable; and that no exigencies of the Christian church could render it lawful to erect any body of men into a standing judicatory over the churches. He engaged with zeal in the cause of his country. He thought, that the thirtieth of January, which was observed by the Episcopalians in commemoration of the martyrdom of Charles I, "ought to be celebrated as an anniversary thanksgiving, that one nation on earth had so much fortitude and public justice, as to make a royal tyrant bow to the sovereignty of the people." He was catholic in his sentiments, for his heart was open to receive all who loved the Lord Jesus in sincerity. He was conspicuous for his benevolence, as well as for his learning and piety.

"The following extracts from his diary furnish evidence of his Christian goodness. 'The review of my life astonishes me with a sense of my sins. May I be washed in the blood of Jesus, which cleanseth from all sin. Purify and sanctify me, O blessed Spirit!—I hope I love my Saviour for his divine excellencies, as well as for his love to sinners; I glory in his divine righteousness; and earnestly beseech the God of all grace to endue me with true and real holiness, and to make me like himself. I have earnestly importuned the youth of this university to devote themselves to that divine Jesus, who hath loved them to the death. And praised be God, I have reason to hope that the blessed spirit hath wrought effectually on the hearts of sundry, who have, I think, been brought home to God, and experienced what flesh and blood cannot impart to the human mind. Whether I shall ever get to heaven, and through many tribulations enter into rest, God only knows. This I know, that I am one of the most unworthy of all the works of God.' Though in the first stage of his last sickness

he expressed a wful apprehension of standing at the divine tribunal; yet his hopes of heaven brightened as he approached the grave, and he departed in great calmness and peace.

"He was a man of low stature, and of a small though well proportioned form. His voice was clear and energetic. His countenance, especially in conversation, was expressive of benignity and mildness; but if occasion required, it became the index of majesty and authority. He published a funeral oration in Latin on Governor Law, 1751; a discourse on the Christian union, preached before the Congregational ministers of Rhode Island, 1760; in this work he recommends harmony among differing Christians, and shows an intimate acquaintance with the ecclesiastical affairs of this country; a sermon at the installation of reverend Samuel Hopkins, 1770; a Latin oration on his induction into his office of president, 1778; the United States elevated to glory and honor, an election sermon, preached May 8, 1783, which exhibits the eloquence, and patriotism, and glowing sentiments of liberty, with which the august occasion could not fail to inspire him; a sermon at the ordination of the reverend Henry Channing, at New London, 1787; history of the three judges of King Charles I, Whalley, Goffe, and Dixwell, 12mo. 1795; in this work he discloses very fully his sentiments on civil liberty, and predicts "a republican renovation," in England. He left an unfinished ecclesiastical history of New England, and more than forty volumes of manuscripts. An interesting account of his life was published by his son-in-law, the Rev. Dr. Holmes, in 1798."*

The following is copied from the monument of Mr. Stiles, the father of President Stiles, in the grave yard in the center of the place.

This monument is erected to the memory of the REV. ISAAC STILES, A. M., who was born in Windsor, July 30th, 1697, received a liberal education at Yale College; ordained to the pastoral office in the church of North Haven, November 11th, 1724, where he served in the ministry 36 years, and died May 14th, 1760, aged 63. Having a mind ennobled with sublime and venerable conceptions of the glories of the MOST HIGH, and the perfect order and happiness of the universe; illuminated with Divine views of the economy of that part of it under the mediatorial dominion of JESUS CHRIST. Also being intimately acquainted with the sacred oracles, and having a natural gift of *Elocution*, he preached the gospel with fervor and fidelity.

A friend to pure and undefiled religion, with a charitable benevolence to all mankind. Mors Mili vita Est.

ORANGE.

THIS town lies between New Haven and Milford, being bounded on the north by Derby and Woodbridge, on the east by New Haven, on the south by Long Island sound, and on the west by Milford. It is about 6 miles in length, and about 3½ miles in breadth. The face of the township is hilly, and the soil productive. The inhabitants are generally farmers. It was incorporated by the General Assembly holden at New Haven in May, 1822, and was formed by the union of North Milford, a parish which belonged to Milford, with West Haven, a parish from New Haven. The first town meeting was held at the meeting house in the parish of North Milford, on the second Monday in June, of which meeting Charles H. Pond, Esq. of Milford, was previously appointed moderator by the Legislature. At this meeting Benjamin L. Lambert, Esq. was appointed town clerk.

The committee appointed by the two parishes to obtain the act of incorporation for a town, after having a variety of names under consideration, finally adopted that of *Orange*, in commemoration of the benefits received from William, Prince of Orange, by Connecticut, when a

* Allen's Biographical Dictionary.

colony ; particularly in the restoration of their charter privileges, after the tyranny and usurpation of Sir Edmund Andross.

The central part of West Haven is three and a half miles from the court house in New Haven. The first clergyman in this parish was the Rev. Dr. Samuel Johnson, who was ordained in 1720. "In October, 1722, he professed himself an Episcopalian, and left his people. He was missionary at Stratford many years ; afterwards president of New York College." "The Rev. Jonathan Arnold was the second minister at West Haven, ordained 1725 or 1726. About the year 1734, he declared for Episcopacy. Having officiated as missionary at Derby and West Haven three or four years, he removed to Staten Island. The Rev. Timothy Allen, the third minister of West Haven, was ordained 1738, and dismissed 1742."* The Rev. Nathan Birdseye, the next pastor, was ordained in 1742 : he was succeeded by the Rev. Noah Williston, the fifth pastor, who was ordained in 1760. The *Connecticut Missionary Society*, an institution which has been of great and lasting advantage in a religious and moral point of view, had its origin in this society. A lady of this parish, (Miss Kimberly,) having had four or five dollars presented to her by her brothers, who were seamen, gave it into the hands of her pastor, the Rev. Mr. Williston mentioned above, with a request that he would apply it for the purpose of supplying those that were destitute, with the preached gospel. Mr. Williston soon after attending the General Association, mentioned the gift and the object to his brethren, who, taking the subject into consideration, formed the society above mentioned.

West Haven green, the spot on which the Congregational and Episcopal churches are situated, is said formerly to have been marshy ground, and covered with alder bushes. It is now uncommonly pleasant in its appearance ; and, although the churches are rather antiquated in their appearance, there is an air of neatness and retirement about this spot that is seldom equalled. About a mile south of the green is *Savin Rock*, a place of some resort during the warm season of the year. It was at this place the British forces landed when they invaded New Haven in July, 1779. Adjutant Campbell was killed about one mile and a half north of the churches ; (see page 169.) A white handkerchief, marked with his name, was long preserved as a relic of this officer, and it is believed to be still in existence. He was possessed of an uncommonly fine personal appearance, and his death was much regretted by the enemy ; but in the hurry and confusion of war, he was left behind, and his bloody remains were born to the grave on a sheep rack. Some of our people who were killed, were buried in the vicinity. Their bodies, however, were taken up by their friends, and re-interred in the places where they belonged.

The land of North Milford part of the town was surveyed and laid out in 1687, but was not settled till forty years afterwards. One Richard Bryan was the first who settled in that part of the town, and for many years it was called Bryan's Farm. At a town meeting in

* Dr. Dana's Century Sermon.

Milford, held on the 10th of December, 1750, it was "voted that money should be appropriated to the inhabitants of *Bryan's farm*, for the purpose of setting up a school in winter, it being so well settled that one is deemed necessary."

The inhabitants of North Milford attended meeting in Milford until 1805. They were incorporated as a society by the General Assembly, at their session in October, 1804. The number of petitioners for this incorporation was fifty. Their first regular society meeting was held December 3, 1804. The church was organized on Wednesday, March 13, 1805, and was begun by five persons dismissed from the churches in Milford. Their first pastor, Erastus Scranton, A. M., a native of Madison, was ordained July 4th, 1805. He preached with them for about twenty five years, when he asked dismissal, and removed to Burlington. While he continued with them, the society greatly prospered. The inhabitants of this parish, fourteen years before this, erected a meeting house, thirty six feet by thirty, on the green, where they had preaching in the winter season, by the alternate labors of the ministers of Milford. The present meeting house of this society was raised June 27th, 1810, and dedicated April 17, 1811.

There is a silver mine in this parish, on land owned by John Lambert, Esq., lying on the old country road. It was opened about twenty years ago, by Mr. David Lambert, the father of the present owner, who obtained a considerable quantity of ore, but having a large farm which required his attention, he did not long continue to work it. A valuable copper mine has lately been opened in the same range of rocks, by the New York Mining Company. It is said there are indications of coal in the north part of the town. Asbestos is abundant in the serpentine rocks, which abound in the southern section of the township.

OXFORD.

OXFORD was incorporated as a town in October, 1798, previously to which time, it belonged to the town of Derby. The Rev. Jonathan Lyman appears to have been the first clergyman in the place. He was ordained in October, 1745. It is fourteen miles northwest from New Haven, and forty southwest from Hartford; bounded north by Middlebury and Waterbury, on the southwest by the Housatonic, separating it from Newtown, on the west by Southbury, on the east by Bethany, and on the south by Derby. Its length from northeast to southwest is about eight miles, and its breadth nearly five. The surface of the township is uneven, being diversified with hills and valleys. The prevailing soil is a gravelly loam; the eastern and western parts of the town are generally fertile and productive. The central part, through which the main road passes, is considered to be the poorest land in the town. There are in the town three satinet factories, and an extensive hat manufactory, owned by Messrs. Hunt & Crosby. A number of extensive manufacturing establishments are about being erected on the Naugatuc.

Oxford, (central part.)

The above engraving is a southeastern view of the central part of Oxford. The building with a Gothic tower is the Episcopal church; part of the Congregational church is seen on the extreme right. The elevation seen in the back-ground is called "Governor's hill," so named, it is said, from its being principally owned, many years since, by a Mr. Bunnell, who was considered by his neighbors as a lordly kind of a personage, and had considerable to do with the law, being engaged in many law-suits for the support of his real or imaginary rights. From the important and consequential airs he assumed among his neighbors, he probably received the designation of "Governor."

Quaker Farms is a pleasant part of Oxford. It contains an Episcopal church, which is about two miles from the center of the town. About one mile and a half south from the center is the "*Park*," formerly a place for deer. About eighty or ninety years since, a Mr. Wooster owned and enclosed about one hundred acres of land for the purpose of keeping deer. It is said that he had the exclusive privilege by *law* of restraining any person from hunting deer in the limits of "the *Park*." Upon the outside of part of the enclosure there was a kind of precipice, from which the deer when pursued would sometimes leap into the enclosure, much to the mortification and disappointment of unprivileged hunters.

About one mile south of the central part of the town is a remarkable mineral spring; called "the *Pool*," from the circumstance of its waters being efficacious, and much used for the cure of the salt rheum and other complaints. "Once in a month a yellowish scum will collect upon the surface of the water, which in a few days will run off, and leave the pool perfectly clear. In the coldest weather this spring never freezes; in the dryest season it is as full as at other times."

PROSPECT.

PROSPECT was incorporated as a town in 1827. It was formerly the parish of Columbia, and was formed from the towns of Cheshire and Waterbury. It is bounded north by Waterbury and Cheshire, east by Cheshire, south by Bethany, and west by Waterbury. It averages about five miles in length, and four in breadth. The central part is about seventeen miles from New Haven, and about four west of Cheshire. The township is elevated and commands an extensive *prospect*, from which circumstance its name is derived. The surface of the town is hilly, mountainous, and stony. The inhabitants are principally farmers. There are two houses of worship, one Congregational and one Methodist.

Some three or four years since, the Congregational clergyman and some of the most influential members of the church and society adopted the sentiments of the *Perfectionists*, which caused some excitement in this and some of the neighboring towns. In New Haven county this doctrine appears to have originated with a student belonging to the theological class in Yale College; several of his associates in the institution also embraced the same sentiments, and from them it spread to some extent in several towns in Connecticut. A large proportion, however, of those who embraced the doctrines of the Perfectionists, have since altered their opinions, and have returned to their former belief. The following is believed to be a correct summary of the doctrines and opinions held by the Perfectionists.

They divide mankind into three classes; first, those who are entirely without a preparation of heart for the new birth, *i. e.* the unconverted; second, those who are in a state of preparation, *i. e.* the converted; and third, those who have experienced the new birth, who are the only true children of God. For they say that "conversion is merely repentance towards God,—a mere change of the mind of the *man*." The new birth is a change in his *moral nature*—it gives him the nature of God; mere conversion gives no security of salvation from either sin or hell; but the new birth saves from both. "For he that is born of God *doth not commit sin*, for his seed [the divine nature] remaineth in him and he *cannot sin*." This is the foundation on which they build.

They believe that none are Christians, "who are not entirely freed from sin, and who do not possess the faith, righteousness, liberty and glory of the risen Son of God. They believe that they are infallible, being under the peculiar guidance of the Spirit, and give themselves up to be guided by him in the *way of all truth*, having, as they say, the will of the Lord made known to them by an immediate revelation. They set aside all ordinances and holy days, such as baptism, the sacrament, with the Lord's prayer, and the observance of the Sabbath, &c.; saying that they are but the mere traditions of men, being no better than the forms and ceremonies of the Popish church. Besides, they contend that all days are holy to them, "having entered a Sabbath of eternal rest." They believe they are as secure in their state

of perfection as the angels of God, and that a man once having his feet firmly fixed upon this foundation is eternally secure, and may not give himself any more anxiety about his future destiny. They also believe that "the history which the Bible contains of the church after Christ's ascension, commonly called the primitive church, is a history of the latter-day glory of Judaism, and not the commencement of Christianity, and that Christianity or the kingdom of heaven did not commence until after the destruction of Jerusalem;" and that was the period of Christ's second coming; and the resurrection, (the only one,) of the spiritual man from the power of sin and death, to endless glory and bliss. Therefore they say that the day of judgment is gone by in one sense, and in another is now going on and will be completed at the end of time. In the first view of the day of judgment as already passed, they say that this day, when spoken of in scripture, refers to the destruction of Jerusalem. In the second view of the subject, they contend that this day commences with the life of man, and ends with that life; that immediately after death, the soul receives its final sentence from the judge, and is never to be again summoned to appear before his bar.

"The salvation given to all men in Jesus Christ," say they, "included nothing less than a perfect and eternal salvation from sin; a perfect redemption from the law; a perfect resurrection of the spiritual body; and the standing on the plain of eternity, beyond judgment." They believe that the disciples of Christ, during his ministry in the flesh, were not Christians. "They call no man master, teacher, or chief, and will not be taught of each other, as they are all taught of God." They do not all hold to the same views. In the words of one of their number, "they differ among themselves on almost all points, except the great distinguishing one, viz. *perfection in holiness*,—and these differences they believe generally arise from the fact, that some are in advance of others in their Father's kingdom.

SOUTH BURY.

SOUTH BURY was formerly a part of the town of Woodbury, and was settled about the year 1672. It was incorporated as a distinct town in 1786, and at that period belonged to the county of Litchfield. It is bounded N. by Woodbury and Roxbury, S. W. by the Housatonic river, separating it from Newtown, E. by Middlebury, and S. E. by Oxford. Its average length from east to west is eight miles, and its average breadth about four. The prevailing soil is a sandy loam, generally warm and fertile. The Pomperaug, a considerable mill stream, passes through the center of the town, and it is on the eastern side of this stream, that the principal village is situated: there is a fine tract of level land on its banks, though of small extent, as the ground rises at a short distance on both sides of the river: on the west side, nearly opposite the Congregational church, some traces of coal have been dis-

covered. A shaft was sunk a few years since, to the depth of about 100 feet: some veins of coal were found, but in such small quantities that it was deemed inexpedient to continue the search.

Mitchell's Mansion House, Southbury.

The above engraving is a south view of the Mansion House of M. S. Mitchell, Esq. recently erected, and designed as a house of public entertainment. It is about three quarters of a mile north of the Congregational church. For beauty of situation and superior accommodations, it is not exceeded by any establishment of the kind in any country-village in the State. This edifice stands on the spot where the house of the first minister of the place, Mr. Graham, formerly stood. The first meeting house ever built in the town was situated about 40 or 50 rods south. The central part of the village is 20 miles n. w. from New Haven, and 40 s. w. from Hartford.

The village of South Britain, a parish in this town, is situated about four miles southwest from the central part of the main village of Southbury. It is nearly surrounded by high hills and ledges, and the place viewed from the south has a romantic appearance. It is a thriving settlement, containing upwards of 20 dwelling houses, 2 churches, (1 Congregational and 1 Methodist,) 3 mercantile stores, 1 carpet manufactory and two or three hat manufactories. Some traces of coal have been found, near the foot of a ledge, in the immediate vicinity of the village.

The northern part of Southbury is called *White Oak*. This name was derived from an oak tree which formerly stood about half a mile west from the Congregational church, under which the first persons who explored the town encamped. There are two pieces of this tree remaining, one of which is in possession of Mr. Mitchell, the proprietor of the Mansion House in the village. These pieces were taken from the tree by Shadrach Osborn, Esq. an aged and respectable inhabitant of the town, on which is written by his hand the following :

“This is a piece of the ancient white oak tree, taken from the trunk after it fell down, Aug. 19th, 1808, by Shadrach Osborn.

“The sturdy Oak, the boast of every clime,
Must bow to the relentless hand of time.”

“The tree of which this is a part, stood about 80 rods east of the river, by the old field road, in a corner of the Mitchell land. The settlers of the ancient town of Woodbury encamped under it when they first explored the town. It gave the name of *White Oak* to the northern part of Southbury, and remained in a state of vegetation for a number of years after the limbs were broken off, and the body was in part decayed, and fell down in the year 1808. This piece was taken from the trunk Aug. 19th, the same year, by me.

SHADRACH OSBORN.”

After the destruction of the continental stores at Danbury during the Revolution, and while Mr. Osborn, mentioned above, was commissary, Southbury was made a place of deposit. Six or seven hundred barrels of pork were stored away in a place called *Fox Hollow*, and 50 men under the command of Capt. Parsons, of Derby, were appointed to guard it. A large group of chestnut trees have grown up since on the spot, which is about one mile southeast from the Congregational church. About a mile southwest, one or two hundred barrels of beef were stored, near the river.

The first settlers located themselves back of the ancient burying ground, near the brook. The names of some of the first were Judson; Hinman, Curtis, Minor, Johnson and Strong. John Minor, it is said, was from Massachusetts, and acted as an interpreter with the Indians in the vicinity. In 1727, a great sickness prevailed here, and swept off almost all the old people: it is said to have been a kind of fever, and very fatal.

The following inscriptions are on monuments in the old burying ground.

In trust at best,—here lies the Revd. Mr. JOHN GRAHAM, who departed this life December the 11th, A. D. 1774, in the 81st year of his age and 54th year of his ministry.

ANDREW GRAHAM, M. D. and a descendant of the Duke of Montrose, departed this for another and a better world, in June, 1785, aged 57 years. Out of respect to the memory of an honest man, this marble is placed by his son, John A. Graham, LL. D. New York, 1805. *Ne Oublie.*

WALLINGFORD.

WALLINGFORD originally belonged to New Haven, and before it was incorporated as a town was called New Haven village. The purchase of the town was made by Governor Eaton, Mr. Davenport, and other planters of New Haven, in December, 1638. “The settlement was projected in 1669. A committee was appointed by the town of New Haven, vested with powers to manage the whole affairs of the settlement. This committee held the land in trust, and acted in all the af-

fairs of the town as trustees, until May, 1672, when they resigned their trust to the town.

The Rev. Samuel Street was the first minister of the place. He commenced his labors here in 1672, and continued in the ministry in this town forty two years. The tradition is, that the Rev Mr. Davenport of New Haven, preached the first sermon in Wallingford, at the bottom of the hill on which the town stands, from these words in Isaiah v. 1. "*My beloved hath a vineyard in a very fruitful hill.*" Mr. Street moved here with his family in April, 1673; on the 15th of February, 1675, the town voted, "that there had been consent about establishing a church of Christ in the aforesaid town, and a solemn day set apart and observed by the town unanimously, to seek God's guidance in so great a work; they have now also actually and unanimously concluded, if it be the will of God, that there shall be a church gathered, and *to walk according to the Congregational way*; and have also unanimously left the management of the same in the hands of Mr. Moss, Mr. Samuel Street, Mr. Brocket, Eliasaph Preston, John Hall, sen. John Hall, jun. Thomas Yale, Nehemiah Royce, Nathan Andrews, Benjamin Lewis, Lieutenant Merriman, Sergeant Doolittle, John Beach; that, if it be the will of God to incline their hearts, so many of them as may be a competent number for that work may, in his time, lay the foundation." The church was, without much doubt, formed soon after.

The first settlers assembled in a private dwelling, (the house of Lieut. Nathaniel Merriman,) for religious worship. In 1679, it was agreed to build a house 28 by 24 feet, and ten feet post. In 1681, a further rate was laid to finish the house, which however was not completed. In 1690, an addition of sixteen feet was made to the breadth of it; and the following year "concluded to seal the whole inside from sell to plate."

The inhabitants had repeated apprehensions from the incursions of the Indians. On the breaking out of Philip's war in 1675, Mr. Street's and Lieut. Merriman's houses were ordered to be fortified, August 27th: the whole town engaged in the work till it was completed. Every man also was required to bring arms and ammunition on the Sabbath. The following October, Sergt. Doolittle's house at the lower end of the town, was fortified. Persons were appointed to keep garrison at each of the above places.* In February, 1690, there was an order of the town to fort in the meeting house. "In 1702, the apprehensions from the savages were revived, and the inhabitants brought arms on the Lord's day." In 1690, the number of the inhabitants was 400, families 73. Mr. Street died January, 1717, being 82 years old; the Rev. Samuel Whittelsey, after preaching about a year, was ordained colleague pastor with Mr. Street in 1710. At this time the number of inhabitants was about 700. Mr. Whittelsey died in 1752, having almost completed the 42d year of his ministry. He was considered one of the most eminent preachers in the colony.

Wallingford is bounded north by Meriden, west by Cheshire, east by Durham and Middletown, and south by North Branford and North Ha-

* Dr. Dana's Century Sermon.

Wallingford, (central part.)

ven. Its length from east to west is nearly seven miles, and its breadth about six. The central part of Wallingford is thirteen miles north from New Haven, twenty three south from Hartford, and between eleven and twelve miles southwest from Middletown. The prevailing surface is pleasantly diversified with moderate hills and dales; the eastern extremity of the township is mountainous. The soil is generally excellent, excepting a tract called the Wallingford Plain, consisting of coarse sand, situated on the eastern bank of the Quinnipiac. It is nearly four miles in length, and about three fourths of a mile in breadth. It is the most extensive tract of level land in the state, and one of the most sterile and barren. The town is watered by the Quinnipiac, a valuable mill stream, which passes through the extent of the town, upon which are several mills and manufactories. Yaleville is a little manufacturing village in the northern section of the town, where britannia and tin ware is manufactured to some extent. There is an establishment westward of the main street, on the Quinnipiac, for the manufacture of wood screws, of which there are about 1,000 groce manufactured daily. The principal village of Wallingford is beautifully situated on a fine elevation upwards of a mile east of the river, on two parallel streets extending along the ridge of the hill. The western street, on which the principal part of the village is situated, is upwards of a mile in length.

The above is a representation of the central part of Wallingford street. The view was taken looking north from the residence of Jared P. Whittelsey, Esq. a few rods south of the Congregational church. The building on the left is the Congregational church; a short distance northward is seen the Baptist church, having a few poplars standing before it; the large building on the opposite side of the street, without a steeple or chimney, is now occupied as an Episcopal church. These three churches are all the houses for public worship in the town.

The house now occupied by the Episcopal society was built by a Congregational society in this town, known by the name of "the Wells." This society owes its origin to the controversy which took place respecting the ordination of Dr. Dana, in 1758. After the death of Mr. Whittelsey, in 1752, the first society in Wallingford were destitute of a settled minister for about six years. At length Mr. James Dana, of Cambridge, Massachusetts became a candidate, and gave the majority of the society such satisfaction that they agreed to settle him. Some, however, were not satisfied with regard to his doctrines. A number of persons waited on Mr. Dana in order to ascertain his "sentiments with regard to original sin, the saints' perseverance, free will, and falling from grace." He made them very short answers, and said he should not tell. They asked him how he liked the platform. He said he had never seen it, but supposed if he settled, he should settle upon it. They enquired if he had seen the doctrines of faith which Mr. Whittelsey had used? He told them he had. They enquired how he liked them? In reply he asked them, why they did not ask him how he liked John Bunyan's *Pilgrim's Progress*, and *Æsop's Fables*?

This treatment, and his refusing to give an account of his doctrines, gave much dissatisfaction, and increased the party against him. A complaint was made against him to the consociation, which assembled in Wallingford; the ordaining council met at the same time. Mr. Dana and his adherents denied the jurisdiction of the consociation. The ordaining council, who were in favor of Mr. Dana, separated from the consociation, and ordained him. The consociation adjourned, and invited the neighboring consociation of the southern district of the county of Hartford to unite with them in council. This united council declared Mr. Dana and his church guilty of scandalous contempt, and it voted that "the sentence of non-communication be declared against them." The minor part of the church, who were opposed to Mr. Dana, were owned as a distinct church by the consociation. They were released from taxes to the support of Mr. Dana, by the General Assembly, in 1759, and allowed to worship by themselves. The Rev. Simon Waterman was ordained pastor over them in October, 1761. The people were made a distinct society, by the name of *Wells*, in May, 1763. The number of church members in this society at the ordination of Mr. Waterman was sixty one. "This controversy," says Dr. Trumbull, "divided the town, alienated brethren, and effected divisions in the commonwealth and churches."

At the time of the erection of the Wells meeting house, the parties came to blows, an attempt was made to stop the building, the bell was rung to call the party together, and the inhabitants, for a number of miles round, hastened to the scene of action and joined in the conflict.

Lyman Hall, one of the signers of the Declaration of Independence, was a native of this town. He was graduated at Yale College in 1747. He at first made theology his study and profession; but he afterwards studied medicine, went to Georgia, and established himself as a physi-

cian at Midway. He took an early and decided part in defense of colonial rights, and was chosen a delegate to the general congress in 1775. Dr. Hall was afterwards governor of Georgia. During several of the late years of his life, he resided at his plantation near Savannah; but towards the close of it he removed into one of the upper counties of the state, where he died in 1790.*

EXTRACTS FROM NEWSPAPERS.

From the Connecticut Journal, April 29, 1768.

As I have never burthened the public to read or you to publish any of my productions; I flatter myself the subsequent succinct suggestions will be forgiven. As economy is the watchword of the reign, as candor was of the former, in the courtly and ministerial style, it has crossed the Atlantic, and is in high vogue in America as well as Westminster, the city of the great king. The story is this,—A few days since, a strolling man in soldier's regimental garb, calling himself James McCannon, with a blazing woman, came into my house in early morn, begged for cider, then three mugs deep, as I was informed; after some admonitions given him, my affairs pressing my immediate departure, I left him in the house, on which he soon became very boisterous, attempted to pilfer some things which my domestic discovered; finally carried off a brass save-all, of a stand of candlesticks, (then undiscovered;) what else is at present unknown. This, though trifling in its value, intrinsically, but as an ancient patrimonial legacy of high estimation, not only as a standing evidence of their prudent economy, *but ex vi termini* a memento to economy save-all. And hereby I beg leave to give warning to all families to beware of such strolling pilferers, if they would save all. I beg leave also to ask the public, whether it would not be of public utility, to have task masters in every town to compel them to labor, as they are passing every day in our streets, and will be probably more and more; or some other similar salutary measure.

I ask pardon for one more hint which pops into my head, while my pen is moving, as a supplemental suggestion to economy and save-all. A respectable physician of the city of London, of high renown in the faculty, told the subscriber that he required his servants to save all the rags, not that it was of the least avail to him, but only a specimen of economy—save-all; and withall added, the rags in this city are worth sixty thousand pounds sterling a year. I hope the paper mill manufacturers, will not esteem the foregoing hint burthensome, though the public may what precedes. Gentlemen, if it appear more eligible to save your pains and paper than print this, remember and save all. I am your most humble servant,

Wallingford, 5 o'clock, April 27th.

E. HALL.

From the Connecticut Gazette.

At a meeting of a number of the true sons of liberty in Wallingford, in New Haven county, on the evening of the 13th day of January, 1766, after duly formed by choosing a moderator and a clerk, the following resolves were come into, viz:

Resolved, 1. That the late act of Parliament, called the Stamp Act, is unconstitutional, and intended to enslave the true subjects of America.

Resolved, 2. That we will oppose the same to the last extremity, even to take the field.

Resolved, 3. That we will meet at the Court House in New Haven, on the third Tuesday of February next; and we desire all the sons of liberty in each town in the county would meet then by themselves or representatives; there to consult what is best to be done in order to defend our liberties and properties, and break up the stop to public affairs.

Resolved, 4. That this meeting be adjourned to the first Tuesday of February next, then to choose our representatives to attend the aforesaid meeting.

A true copy, examined,

P. P. CLARK.

* Holmes' Annals.

WATERBURY.

WATERBURY is bounded N. on Plymouth and Watertown, E. on Wolcott and Prospect, S. on Bethany and Oxford, and W. on Middlebury. It is 8 miles from north to south, and 4 from east to west. The town center is 20 miles from New Haven, and 28 from Hartford. With the exception of the alluvial lands upon the streams, the surface of the soil is hilly, rough, and of laborious cultivation. But although nature has been sparing of her gifts to constitute its inhabitants a great agricultural people, she has been profuse in the abundance of her water-falls; and experience has proved that where these two interests are made to bear upon each other, enterprise alone is wanting to produce magnificent results. For thirty years previous to the introduction of manufactures into the community, the population rather decreased. The census of 1800, gave the number of 3,256—in 1810, of 2,784—In 1820, of 2,822—in 1830, of 3,070 exclusive of about 350, which about that time were ceded to Prospect, when the parish of Columbia was added to form that township. The society of Salem yet remains a parish.

The site upon which the borough of Waterbury stands, is situated in a valley which is washed by the Mad river on the east, and the Naugatuc on the west; and in its central part is about a mile in breadth. The main street runs east and west; but since the increase of the manufacturing establishments within the last twelve years, a large share of the new buildings have been erected in their vicinity, which is in the southeast part of the village. On either side of the village, hills gradually rise to a considerable elevation, presenting to the eye the galleries of an amphitheater, the village forming the area. The number of houses is about one hundred and fifty, and the population fifteen hundred; which it is calculated has doubled itself during the last twelve years; most of the factories having been established within that time. Some of the private dwellings may be called splendid, and a majority of them are neat and convenient, with handsome court yards in front. There are four churches in the place; 1 for Congregationalists, 1 for Episcopalians, 1 for Methodists, and 1 for the Baptist society. The last two have been recently built; and are highly creditable to the congregations, considering the weakness of their numbers. The former two, as the societies are more numerous and able, will soon give place to edifices corresponding with the growth and prosperity of the place.

The cut on the following page is a southeastern view of the central part of the village, and shows its appearance from the summit of a gentle elevation, about five or six rods east from the road to New Haven. The Baptist church, with a square tower, is seen in the central part of the engraving; the spire of the Episcopal church appears on the left, that of the Congregational church on the right.

Of the articles manufactured in the village, those of gilt buttons, and the rolling of brass and copper metals for a great variety of uses, constitute the greatest business. There are three factories of this kind upon an extensive scale, two in the village, and one about two miles

Southeastern view of Waterbury, (central part.)

north, connected with which is a gold refinery. There are likewise two factories of gilt buttons, upon a considerable scale, unconnected with rolling mills; one extensive rolling mill, connected with the brass wire and tubing manufacture; two satinet factories, and one woolen factory; besides a great number of minor establishments, in which buttons of various kinds, and other articles, are manufactured to a considerable extent. The number of persons in the village of both sexes, who are employed in the manufacturing establishments, is between six and seven hundred. It is not known precisely what amount is manufactured yearly, but it has been estimated by good judges to exceed a million of dollars, and is upon the increase. The route has been surveyed by a practical engineer, for constructing a canal to bring the Naugatuc on to the bank at the west end of the town, which will, when completed, afford a supply of water power, capable of employing as much or more capital than has been already invested.

In consequence of the favorable reports relative to the interval lands bordering upon the river Naugatuc, in this vicinity, a number of the inhabitants of Farmington, in the autumn of 1673, petitioned the Assembly for a committee to view Mattatuck, (the aboriginal name of Waterbury,) and report upon the expediency of locating a plantation at that place. A committee, consisting of Lieut. Thomas Bull, Lieut. Robert Webster, and Daniel Pratt, was appointed, who reported to the Assembly in May, 1674, that Mattatuck would probably afford sufficient means to sustain a population of thirty families. Upon the reception of this report, a committee of five, consisting of John Talcot, Robert Webster, Nicholas Olmsted, Samuel Steele, and John Wadsworth, were appointed to manage and order the affairs of the settlement. This committee entered immediately upon their duties, and drew up a plan to regulate and establish the settlement, which document consisted of eight articles, bearing date the 30th day of May, 1674, in the following words:

Article I.—Every person that is accepted for an inhabitant shall have eight acres for a home lot.

Article II.—The distribution of meadows shall be proportioned to each person according to estate—no person to have exceeding £100 allotment, excepting two or three allotments, which the committee may make according to their best discretion.

Article III.—Taxes for public charges to be according to meadow allotments, this article to be in force five years—at the end of five years rates to be on polls and estate, according to the law of the colony.

Article IV.—Every person that takes up an allotment, shall, within four years after the date hereof, build a good and fashionable dwelling house, 18 by 16, and 9 feet between joints, with a good chimney.

Article V.—In case any person shall fail of building as aforesaid, he shall forfeit all his allotments at Mattatuck, and all his right and title, buildings only excepted, to be disposed of by the committee to others, who shall be accepted according to the condition of these articles.

Article VI.—All who have allotments, shall personally dwell as inhabitants of Mattatuck, or forfeit as aforesaid.

Article VII.—Each person who has an allotment at Mattatuck, shall dwell there four years from the time he enters upon dwelling there, or forfeit as aforesaid.

Article VIII.—All who shall have allotments shall sign these articles.

The articles were subscribed to by the persons whose names are annexed.

* John Laughton,	£100	John Carrington,	£60
* John Andrews,	100	* William Higason,	70
Thomas Judd,	100	Obadiah Richards,	80

John Warner,	90	* Samuel Judd,	80
Thomas Richason,	50	* William Judd,	100

Note.—The names of those designated by a star,* afterwards declined joining the settlement, and the names of the following individuals were added to the list of subscribers to supply the vacancy, to wit: John Scovil, Benjamin Barnes, John Stanley, jr. Edmund Scott, jr. Joseph Gaylord, John Hopkins, Timothy Stanley, and Thomas Warner.

Thus, the propriety or ownership of the town, was by the committee divided into an indefinite number of shares, leaving it optional with the settler to subscribe for any portion, not exceeding *one hundred pounds*—the committee reserving to themselves the right to make two or three special allotments of one hundred and fifty pounds each. These reserved rights were subsequently appropriated—one of £150 value for the benefit of the ministry, and another of equal amount for the use of schools.

In the summer of 1674, the committee purchased of the native Indians (in trust for the settlement) by deed, bearing date August 21st, for the consideration of divers good causes, and thirty eight pounds, a tract of land at Mattatuck, bordering upon both sides of the Naugatuc river, ten miles long from north to south, and six miles wide from east to west; butting east on Farmington, south on Paugasset, (now Derby,) west on Paugasset, Pomperaug and Potatunk, (now Woodbury and Southbury,) and north on wilderness. The breaking out of what was called King Philip's war, in 1675, and the distresses attendant upon it,

for a time retarded the designs of the settlers; little else being done than exploring the country. After peace was established with the Indians, the subscribers to the articles determined upon settling Mattatuck without delay. Accordingly, in 1677, the State's committee assigned their purchase of the Indians to Thomas Judd, John Stanley, and others, inhabitants of Mattatuck, and in the January following, made regulations about the fences around the meadows on the east side of the river, and ordered the work to be finished by the last of May succeeding. It was at this time that those signers designated in the preceding note declined joining the settlement, and the other individuals were admitted in their stead. The committee likewise extended to the subscribers one year more than the articles originally allowed, in which to erect their dwellings in Mattatuck.

In 1684, the Indian owners of the town, for the consideration of divers good causes, and £9, conveyed to the English proprietors a parcel of land to run eight miles north from Mount Taylor, to extend west to a north and south line eighty rods east of Quassapaug pond, butted north on wilderness, east on Farmington bounds, south on the former grant, and west on the aforementioned north and south line. In December of the same year, a number of Indians conveyed to said proprietors a number of pieces of land lying within the bounds described within the deed of 1674, probably other claimants to the same lands. Thus the ancient limits to the town of Waterbury, as deeded by the Indians, and patented by the State to the proprietors, extended about eighteen miles from north to south, and about ten from east to west—now comprehending the towns of Waterbury, Watertown, and Plymouth, most of Middlebury, half of Wolcott, and a small part of Oxford and Prospect. This extent of territory, which was estimated by a committee of the Assembly as capable of accommodating *thirty* families, now contains a population of about *eight thousand* souls.

In the summer of 1677, the proprietors, without their families, came on to their purchase to lay out the foundation of the future capital of their little colony. The site first pitched upon was on the ridge of a considerable eminence, which ascends from the western bank of the Naugatuc, about a mile from the present location of Waterbury village, and which to this day is called "Town Plot." Streets were laid out, (nearly as they now remain,) and building lots of eight acres each were apportioned to each settler, agreeable to the original articles of agreement. But before any buildings were erected on the spot, considerations both of expedience and safety induced a change from their primitive design. The disastrous events of King Philip's war admonished them of the necessity of maintaining a ready communication with their friends and allies at Farmington, and other eastern settlements; and as the Naugatuc was subject to frequent inundations, this intercourse would consequently be cut off, should they be attacked by a savage foe during flood time. And as the produce from the meadow, which was chiefly to constitute their future means of support, must be attended with great labor and inconvenience in its transportation up so long and steep an ascent, this consideration likewise had no slight influence in turning the

scale in favor of a location in the valley. A few temporary huts were therefore erected for the season, on the east bank of the Naugatuc, near "Sled Hall;" and the following year (1678) streets were laid out, and dwellings erected upon the present site, with a view to a permanent settlement. House lots of from one and a half to four acres were set off to each individual, according to eligibility of situation, and extent of proprietors' rights. In the latter part of the year some of the settlers moved their wives and families into their new habitations. The first English child born in Waterbury was Rebecca, daughter of Thomas and Mary Richardson, April 27, 1679, in a house which stood upon the site of the old "Judd House," well known as a tavern stand for more than half a century, having been kept by Capt. Samuel Judd, previous to the Revolutionary war, until his death, in September, 1825, in the 91st year of his age. The house was destroyed by fire on the 25th day of February, 1833, in which a young man named John N. Tuttle, and two daughters of Mr. Israel Holmes, perished in the flames.* Another house has been erected over the ruins, and is now occupied by Mr. Samuel J. Holmes, an elder brother of the aforementioned—grandson of Captain Judd, and lineal descendant from Thomas Judd, one of the original settlers. The first English male child born in the settlement, was Richard, son of John and Mary Welton, Sept. 27, 1679, in a house nearly opposite the old Judd house, upon the spot where now stands the house of Mr. Giles Ives.

Among their early privations, the settlers suffered greatly for want of a grist mill. Their only resource was by carrying their bread corn to Farmington to be ground, a distance of twenty miles, and through a pathless wilderness. The State's committee, as early as November, 1679, took the subject into consideration, and not only recommended its erection, but granted 30 acres of land to whoever should build and keep up the mill. In 1680, Stephen Hopkins, of Hartford, built a mill on Mill river, (now Mad river,) where a mill has stood to the present time. Some other allotments were afterwards made by the proprietors; but like many grants for public purposes, made with laudable intentions, posterity are prone to disregard.

Antecedent to February, 1681, the concerns of the town were directed by the State's committee, at which time they ordered that the inhabitants might elect their own townsmen constables, haywards, sur-

* To evince the deep sympathy which was felt upon this melancholy occasion, a handsome obelisk monument has been erected over the ashes of the victims, with the following inscriptions:

On the west front—"Beneath this stone rests the remains of John N. Tuttle, who perished February 25, 1833, in an attempt to rescue two children from a burning house. His fellow citizens have erected this monument to his memory."

On the east front—"To the memory of Hannah Ardelia, aged 7, and Olive Margaret, aged 5 years, children of Ardelia C. and Israel Holmes, who were consumed by fire, February 25, 1833.

"The midnight fire was fierce and red,
Sweet babes that wrapt your sleeping bed—
But he who oft with favoring ear
Hath bow'd, your early prayers to hear,
Received beyond this mortal shore,
The sister souls to part no more."

veyors, fence viewers, and other officers. In 1682, the committee further extended to the settlers the power to regulate the impounding of cattle. From that period to 1686, at which date Mattatuck was incorporated under the name of Waterbury, the committee appear to have had little to do with its concerns.

Waterbury was represented for the first time, by Ensign Thomas Judd, in May, 1689. Lieut. John Stanley was chosen the second representative, the May following. At that time the taxable polls of the town, including all males from 16 to 70 years of age, were thirty seven. The town list was £1,893, nor did it increase until 1701.

During the first ten years after their settlement, the inhabitants were deprived from hearing the gospel regularly preached. In 1689, the Rev. Jeremiah Peck, senr. of Greenwich, was unanimously invited by the residents to settle with them in the ministry; and as inducements, they voted him the house and lot which they had already provided for a minister, a propriety of £150, and the full benefit of all the divisions which had been granted therein. A salary of £60 per annum was also voted him, fifty of which was to be paid in provisions and ten in wood. Mr. Peck accepted the call, and continued his official duties until a short period before his death, which occurred in June, 1699, at the age of 77 years. Mr. John Jones officiated for a short time during his decline, and subsequently Mr. John Reed preached occasionally—was invited to settle, but declined. In the latter part of the year 1699, Mr. John Southmayd, of Middletown, was invited to take charge of the congregation, but on account of the Indian disturbances at this period, and the deranged condition of the town, he was not ordained until May, 1705. At the time of the settlement of Mr. Peck, the number of families was thirty, and about one hundred and fifty inhabitants, 7 of whom (males) were members of the church. The number of members had now increased to 12, but the number of inhabitants remained about the same. The salary granted to Mr. Southmayd was £60 a year, fifty payable in provisions and ten in wood, at the following rates; wheat 5*s.*, rye 3*s.*, corn 2*s.* 6*d.* per bushel, and pork 3*d.* per pound; with this proviso, that those who paid in money should have a deduction of one third—this reducing the salary to £40. Rev. Mark Leavenworth, succeeded Mr. Southmayd. He was ordained in 1740, and died in 1797, at the age of 86 years, and in the 58th year of his ministry. When the simplicity of manners which prevailed at that period is taken into consideration, the gloomy circumstances of the country, and the number and abilities of the inhabitants, the salaries of the two first clergymen in Waterbury were much larger than those paid at the present day.

The first house for public worship erected in Waterbury, stood upon the site recently occupied by the Congregational meeting house. It was a small building, and continued without gallery or glazing until 1716, when the sum of £15 was appropriated for its completion. The congregation assembled there until 1726, when the town voted to build a new house, 50 feet by 40. Lieut. John Hopkins, Sergt. John Scovil, Isaac Bronson, deacon Thomas Hickox, and Thomas Clark, were ap-

pointed a committee to superintend its erection. This was indeed a great undertaking; for tradition says that at the time the house was commenced, all the inhabitants of the town, men, women and children, might have been seated upon its sills. By extraordinary exertions funds were raised by donations, contributions, &c. so that the house was in such a state of forwardness that the congregation were seated in 1729—the gallery was finished the following year, which completed an object so dear to the hearts of our worthy forefathers.

Liberal grants in lands were from time to time made by the State's committee, in conjunction with the original proprietors of the town, to provide for the preaching of the gospel and the establishment and maintenance of elementary schools, amply adequate, it is believed, had the property been discreetly managed by their descendants, to have defrayed to this day the salaries of the ministers, and the expenses of the common schools throughout the town. But after the town was cut up into different societies,* a diversity of interests was created; the lands were mostly sold, the payments became the sources of wearisome litigation, and a change of times, added to occasional bankruptcies of debtors, swallowed up the avails, thereby defeating the praiseworthy intentions of our ancestors. As an example of the solicitude entertained by the original settlers upon the subject of education, and which likewise lays open their embarrassed circumstances, the town, in 1698, "*Voted*, to set up a school four months or more, and the committee are to endeavor to get a schoolmaster to teach writing as well as reading."

Until the peace with the French and Indians in 1713, the dwellings of the inhabitants were restricted to the town center; the men going into the meadows and places adjacent to labor during the day, and returning to their families at night. The menacing attitude of the Indians kept the settlement in a perpetual state of alarm. Two or more of the citizens were ordered by the government of the State to act in rotation daily, as scouts to make discoveries and prevent surprise. Sentinels were also placed upon the high grounds in the vicinity to watch for the safety of the people. About the year 1707, a small party of Indians made a descent from the north to make reprisals from the English. Ascending a high hill opposite Mount Taylor to make discoveries, they espied one Jonathan Scott and his two sons in Hancock's Meadow. The old gentleman was seated under an oak tree near the bank of the river, eating his dinner, his sons a little distance from him. The Indians approached the whole unperceived, and took Mr. Scott by surprise; the boys got off out of the way. But by threatening the life of the father unless he recalled his sons, he reluctantly obeyed, when they were all three secured and taken to Canada. Mr. Scott and his eldest son, Jonathan, were afterwards redeemed and returned home; but the youngest became attached to the Indians and refused to return. To prevent Mr. Scott from escaping or offering resistance, they took off his right thumb. Another attack was made by the Indians, in 1710,

* The society of Westbury (now Watertown) was made a separate society in 1739; Northbury (now Plymouth) in 1740; Middlebury, about 1790.

upon the inhabitants of Waterbury and Simsbury, in which an inhabitant of the former by the name of Holt, was killed on Mount Toby, and several people of the latter. As early as April, 1700, the town voted to fortify Ensign Timothy Stanley's house, which stood a little west of the academy; men and boys, with teams—all who were able to work, to go about it the next day. And in June, 1707, the town, considering the troubles and fears arising from the hostile disposition of the enemy, agreed to lay aside cutting bushes till after Michaelmas, and go about finishing and repairing the forts. In 1708, the State gave the town £15 towards aiding in the construction of forts; and the town agreed to build three forts, two at the expense of the State, and one at its own. The houses of Lieut. Timothy Stanley, John Hopkins and Mr. Southmayd were designated for that purpose. They were accordingly fortified by stockades, or timbers set up endwise firmly in the ground, with an opening for a gate, to pass and repass. Frail as was this defense to any enemy but a savage, the inhabitants for years were glad to avail themselves of the nightly protection which these feeble fortifications afforded. These perpetual troubles, and the necessity of a constant system of military discipline, made our forefathers a martial people, and even the humblest of military honors were held in high estimation. The highest military dignitary known among them, was that of lieutenant; but great deference was paid to sergeants—hence the early records abound with titles of that grade. Their descendants may smile at the simplicity of their ancestors, but the same circumstances combined would probably produce precisely the same effects upon their own minds. In times of war, danger and distress, honors are awarded by the people to those whom they think possess ability and integrity, and honors which are conferred with such motives, carry with them something more than empty names. The drum was then an important instrument; it sounded the alarm in time of danger; it summoned the inhabitants to the fortified houses at night, and roused them from their slumbers in the morning. It also gave the signal for firing the woods to increase the food for the cattle, and to call the inhabitants to their devotions upon the Sabbath.

Besides the Indian wars, and the ordinary difficulties which attend all new settlements, the inhabitants were visited by two calamities during the first thirty five years, unparalleled in the subsequent history of the town. In February, 1691, the alluvial lands bordering upon the Naugatuc, upon which was their chief dependence, were almost ruined by a flood. The river, by rains and melting of the snows, rose to a prodigious height, far beyond any instance of the kind since known, washing away the soil in many places, and covering the remainder with gravel and stones to a degree which rendered it unfit for immediate use. The weather had been previously warm, the frost came out of the ground, leaving the arable part an easy prey to the raging element. This untoward misfortune had so depressing an effect upon the inhabitants that many were discouraged, and abandoned their possessions forever. The consequence was, that in 1709, the population varied but little from that of 1691, eighteen years before. The Wads-

worth manuscript says, that in 1694 "Waterbury was a small town, though very compact. It contained twenty five families." In October, 1712, the town was visited by a great and mortal sickness, which raged without abatement, until September, 1713. During its prevalence, the number of well persons was insufficient to provide for and attend the sick, and to bury the dead. About thirty individuals died of the fever, and this out of a population of about two hundred.

To the research of a gentleman who is himself a descendant by both parents from two of the original families, we are indebted for the data which form the basis of the foregoing history of the rise and progress of the town of Waterbury during the first forty years. The population at that period was probably about three hundred. In the notes before us, this antiquarian observes: "During the last thirty years, the inhabitants maintained among them a constantly preached gospel; and although surrounded with difficulties, dangers, and misfortunes, and deprived of all the conveniences and most of the comforts of life, (agreeable to our present ideas,) yet they persevered, and we are now reaping the harvest of their labors. To their honor be it said that our ancestors would not suffer in a comparison drawn between them and their posterity. They were moral, religious, industrious and resolute. Under their circumstances little progress could be made in literature; but they were calculated to elicit more thought, and more exertion, both of body and mind, and those qualities combined make the man."

Samuel Hopkins, D. D. an eminent divine, was born in this town Sept. 17th, 1721. "He lived with his parents, employed in the labors of agriculture, until he entered his fifteenth year; and such was the purity of manners among the youth of this place, that he never heard from any of them a profane expression. After having been placed for a short time under the tuition of the Rev. John Graham of Woodbury, he entered Yale College in September, 1737, and was graduated in 1741. While a member of this institution he made a public profession of religion."

"After he was graduated in September, 1741, he retired to his father's house, and lived a recluse for a number of months, except when he could hold intercourse with persons zealous in religion. In December he went to Northampton, Massachusetts, to pursue the study of divinity with Mr. Edwards, and while with him was led to consider the proper effects and evidences of that renovation of soul, which he believed to be necessary in order to receive the blessings of the gospel, and for the first time became satisfied that he was a Christian. After he was licensed to preach in May, 1742, he still continued at Northampton, engaged in his theological studies, preaching occasionally, without any pecuniary compensation, in the neighboring towns. From December of this year till May, 1743, he preached to a new society in Simsbury, Connecticut. In July he went to Housatonnoc, now Great Barrington, Mass., where he was ordained Dec. 28, 1743. At this time there were only thirty families in the place. Here he continued till Jan. 18, 1769, when he was dismissed by an ecclesiastical council. This event was occasioned by the diminution of his society and the want of support. An Episcopal church had been established in the town in order to escape the tax for the maintenance of a minister of the gospel. Mr. Hopkins was again settled in the ministry at Newport, Rhode Island, April 11, 1770."

"The war of the Revolution interrupted his benevolent labors. In Dec. 1776, when the British took possession of Newport, he left the town, and retired to his family, which he had before sent to Great Barrington. During the summer of 1777 he preached at Newburyport, to a congregation which was thought to be the largest in America.

Its pastor, the Rev. Mr. Parsons, died a short time before. He afterwards labored in the gospel of Jesus Christ in Canterbury and Stamford, Connecticut. In the spring of 1780 he returned to Newport, which had been evacuated by the British in the fall of the preceding year. He found his church and congregation much diminished. The town had been so long in the hands of the enemy, that many, who had removed, had become established in other places, and were thus prevented from returning. The meeting house had been made a barrack for soldiers, and had been much injured, and the bell had been carried away. That portion of his former society, which had remained in the town, had become so impoverished, that he had no prospect of a maintenance. Yet such was his benevolence, that he preached to them a year, supported entirely by a few generous friends, and when he received a pressing invitation to settle at Middleborough, the request of his people induced him to decline it. From this time till his death his maintenance was derived entirely from a weekly contribution and the donations of his friends. But he was contented with his humble circumstances, and in a situation, which would have filled most minds with the greatest anxiety, he cast himself upon the providence of God, and experienced through a course of years many remarkable interpositions in his favor. His wants were always supplied. On the 10th of January, 1799, a paralytic affection deprived him of the use of his limbs, although his mental powers were uninjured. But he afterwards recovered from this attack, so as to be able to preach. He died December 20, 1803, in the eighty third year of his age."

"Dr. Hopkins was a distinguished divine. His mind was discerning, and his application was almost unequalled. He sometimes devoted to his studies eighteen hours in a day. With respect to his views of divine truth, he embraced the Calvinistic doctrines; and it is principally by the consequences which he drew from these doctrines, that his name has been rendered famous. He fully admitted the Calvinistic doctrine of the entire depravity of the human heart and the sinfulness of all the doings of the unregenerate; but his discerning mind perceived the discordance between this doctrine and the preaching of some of the Calvinistic divines, who exhorted the unregenerate as such to perform certain acts as the appointed way to obtain that grace, which should renew their hearts and make them holy. If men before conversion could do nothing that was pleasing to God, he concluded they could do nothing to procure the influences of the Holy Spirit. Instead therefore of exhorting sinners to use the means of grace in order to obtain the divine assistance to enable them to repent, when it was acknowledged that in the use of the means of grace they would be entirely sinful, he thought it a sacred duty, incumbent on the ministers of the gospel, to imitate the preaching of the Lord Jesus, their Master, and to call upon men immediately to repent and yield themselves to the love of God. He thought that religious advantages, if in the use of them the unregenerate were not converted, would but increase guilt, as in this case there would be a greater resistance to the truth. Another sentiment, which is considered as one of the peculiar sentiments of Dr. Hopkins, is that the inability of sinners is moral and not natural; but this is only saying, that their inability consists in disinclination of heart or opposition of will to what is good. Combining the Calvinistic doctrine, that God has foreordained whatsoever comes to pass, with his views of the nature of sin as consisting entirely in the intention or disposition of the mind, he inferred, that it was no impeachment upon the character of the most righteous Disposer of all events to say, not merely that he decreed the existence of sin, but that he exerted his own power to produce it. The design being benevolent, he contended that no more iniquity could be attached to this act, than to the bare permission of sin. This is another of his peculiarities. From his views of the nature of holiness, as consisting in disinterested benevolence, he also inferred, that a Christian should be willing to perish for ever, to be for ever miserable, if it should be necessary for the glory of God and the good of the universe, that he should encounter this destruction. Instead of the Calvinistic doctrine of the strict imputation of Adam's sin and of the righteousness of Christ, he chose rather to adopt the language of scripture in saying, that on account of the first transgression men were made or constituted sinners, and that men are justified on account of the righteousness of Christ, or through the redemption, which there is in him.

"Dr. Hopkins published three sermons, entitled, *Sin through divine interposition an advantage to the universe, and yet this no excuse for sin or encouragement to it*, 1759, the second edition of which was published in Boston in 1773, and another edition about the same time in Edinburgh; an inquiry concerning the promises of the gospel, whether any of them are made to the exercises and doings of persons in an unregenerate state, containing remarks on two sermons by Dr. Mayhew, 1765; a sermon on the divinity of Christ, preached in Boston, 1768; two sermons on Romans vii. 7, and John i. 13, 1768, republished 1793; the true state and character of the unregenerate, stripped of all misrepresentation and disguise, being an answer to the reverend Mr. Mills, 1769; animadversions on Mr. Hart's late dialogue, 1770; an inquiry into the nature

of true holiness, with an appendix in answer to Drs. Hemmenway and Mather, 1773; of this inquiry a second edition was published in 1791; a dialogue showing it to be the duty and interest of the American states to emancipate all their African slaves, 1776; an inquiry concerning the future state of those who die in their sins, 1783; a system of doctrines, contained in divine revelation, explained and defended, to which is added a treatise on the millennium, 2 vols. 8vo. 1793; it is on this system of divinity, that the reputation of the author principally rests; the life of Miss Susannah Anthony, 1796; the life of Mrs. Osborn, 1798; and a volume of sermons either a short time before or soon after his death. He left behind him sketches of his life written by himself, a dialogue on the nature and extent of true Christian submission, and an address to professing Christians, all of which were published by the reverend Dr. West of Stockbridge in 1805.*

Dr. Lemuel Hopkins, a physician and poet, was born in this town June 19th, 1750. "His father was a farmer in easy circumstances, and while he reared all his children to the labor of the field, took care to bestow upon them a good education. Dr. Hopkins is said to have been determined to the study of physic when young, by observing the gradual decline of some of his connexions, who were sinking under a consumption. This inclination to medical pursuits was strengthened by the circumstance of an hereditary predisposition to the same disorder which existed in the family. His education, it seems, had not been classical, and having resolved upon the medical profession, he applied himself to Latin and other preliminary studies, and after proper qualification, placed himself under the care of a physician in Wallingford. He began regular practice in Litchfield, about the year 1776, and was for a short time in the American army as a volunteer. About 1784, he removed to Hartford. Here he passed the rest of his life, devoted to the labors of a physician and man of letters. He fell a victim, we are told, to the exercise of an improper remedy in his own case, occasioned by his dread of a pulmonary complaint. He died on the 14th of April, 1801.

"Dr. Hopkins was a physician of great skill and reputation. His memory was so retentive, that he would quote every writer he had read, whether medical or literary, with the same readiness that a clergyman quotes the Bible. In his labors for scientific purposes, he was indefatigable. The Medical Society of Connecticut is indebted to him as one of its founders. In his person, he was tall, lean, stooping and long-limbed, with large features and light eyes, and this uncouth appearance, added to a great eccentricity of manner, rendered him at first sight a very striking spectacle."†

In his literary character he was eminent among the distinguished writers of the place where the most of his life was spent. Trumbull, Barlow, Humphreys, Dwight, and others, were his associates, and the first two, with Hopkins, wrote the *Anarchiad*. He also had a hand in *The Echo*, *The Political Greenhouse*, and many satirical poems of that description, in which he had for his associates, Richard Alsop, Theodore Dwight, and a number of others. Besides these, there are a few short pieces which were written by him exclusively; among which is his *Epitaph* on a patient killed by a cancer quack.

* Allen's American Biographical Dictionary.

† Kettell's American Poetry.

ON A PATIENT KILLED BY A CANCER QUACK.

Here lies a fool flat on his back,
 The victim of a cancer quack ;
 Who lost his money and his life,
 By plaster, caustic, and by knife.
 The case was this—a pimple rose,
 Southeast a little of his nose ;
 Which daily reddend'd and grew bigger,
 As too much drinking gave it vigor ;
 A score of gossips soon ensure
 Full threescore different modes of cure ;
 But yet the full-fed pimple still
 Defied all petticoated skill ;
 When fortune led him to peruse
 A handbill in the weekly news ;
 Sign'd by six fools of different sorts,
 All cured of cancers made of warts ;
 Who recommend with due submission,
 This cancer-monger as magician ;
 Fear wing'd his flight to find the quack,
 And prove his cancer-curing knack ;
 But on his way he found another,—
 A second advertising brother :
 But as much like him as an owl
 Is unlike every handsome fowl :
 Whose fame had raised him as broad a fog,
 And of the two the greater hog ;
 Who used a still more magic plaster,
 That sweat forsooth, and cured the faster.
 This doctor view'd with mooney eyes
 And scowl'd-up face, the pimple's size ;
 Then christen'd it in solemn answer,
 And cried, "this pimple's name is cancer,
 But courage, friend, I see you're pale,
 My sweating plasters never fail :
 I've sweated hundreds out with ease,
 With roots as long as maple trees ;

And never fail'd in all my trials—
 Behold these samples here in vials !
 Preserved to show my wondrous merits,
 Just as my liver is—in spirits.
 For twenty joes the cure is done—"
 The bargain struck, the plaster on,
 Which gnaw'd the cancer at its leisure,
 And pain'd his face above all measure.
 But still the pimple spread the faster,
 And swell'd like toad that meets drastic.
 Thus foil'd the doctor gravely swore,
 It was a right-rose cancer sore ;
 Then stuck his probe beneath the beard,
 And show'd him where the leaves appear'd ;
 And raised the patient's drooping spirits,
 By praising up the plaster's merits.
 Quoth he, "the roots now scarcely stick—
 I'll fetch her out like crab or tick ;
 And make it rendezvous, next trial,
 With six more plagues in my old vial."
 Then purged him pale with jalap drastic,
 And next applied the infernal caustic.
 But yet, this semblance bright of hell
 Served but to make the patient yell ;
 And, gnawing on with fiery pace,
 Devour'd one broadside of his face—
 "Courage, 'tis done," the doctor cried,
 And quick the incision knife applied :
 That with three cuts made such a hole,
 Out flew the patient's tortured soul !
 Go, readers, gentle, eke and simple,
 If you have wart, or corn, or pimple ;
 To quack infallible apply ;
 Here's room enough for you to lie.
 His skill triumphant still prevails,
 For death's a cure that never fails.

WOLCOTT.

WOLCOTT is a small elevated township, situated in the northern extremity of the county, bounded n. by Plymouth and Bristol, e. by Southington, s. by Cheshire and Waterbury, and w. by Waterbury and Plymouth. It averages about six miles in length, and has an average breadth of about three miles. "The township is hilly and mountainous, and is situated in the vicinity of the commencement of the granitic district, which extends through the western section of the state, and comprises a considerable portion of Litchfield County. About $1\frac{1}{2}$ miles n. e. of the meeting house, there is a hill, which is the most elevated land in this part of the state ; Long Island sound, the mountain east of Somers, and some part of the state of Massachusetts, can be seen from this spot. The soil is a hard, coarse, gravelly loam, and rather sterile : the lands however afford tolerable grazing, but are rough and stony. There are two houses of worship, 1 for Congregationalists, and 1 for Episcopalians. The number of inhabitants in 1810 was 952 ; in 1830, it was reduced to 843.

Wolcott was incorporated as a town in 1796. It was formed from a part of the original town of Farmington and a part of Waterbury. It was from this circumstance that the place was formerly called *Farming-bury*. The first clergyman was the Rev. Alexander Gillet : he was succeeded by the Rev. Israel B. Woodward. Mr. Woodward, though

somewhat eccentric in some part of his conduct, was a person of superior intelligence and esteemed by his parishioners. A thanksgiving sermon of his is recollected, in which he compares the state of Connecticut to the land of Canaan. In one respect, he mentioned, there was a striking similarity; the land of Canaan was rocky, this was very much the case with Connecticut, at least with that part of it in which Wolcott was situated.

WOODBRIDGE.

WOODBRIDGE was incorporated as a town in 1784. It was originally a parish by the name of Amity, which was formed from the towns of New Haven and Milford. It is bounded n. by Bethany, e. by Hamden, s. by New Haven and Orange, and w. by Derby. Its average length is about five miles, and its breadth about four. The soil is a hard gravelly loam, and affords good grazing; and large quantities of butter are made in this town for the New Haven market. The principal stream is the West river, which runs on the west side of the West Rock, a range of mountains on the eastern border of this town. The central part of the town is about six miles from New Haven.

Amity was constituted a parish in 1739. The town was named from the Rev. Benjamin Woodbridge, the first clergyman, who was ordained here in 1742. The house in which he lived is still standing, and is about 100 rods southeast from the Congregational church, now occupied by the widow and children of Mr. Daniel T. Smith. Mr. Woodbridge presented the town with a copy of Whitby's Commentary on the New Testament, in gratitude for the honor done him in naming the town. It is said that Mrs. Woodbridge, his wife, was the first person who introduced the use of tea into the place. This town has a fund of about five thousand dollars, given by Mr. Stephen Sanford, who it appears was a firm friend to the American cause during the Revolution. His will reads thus; "I also give to the society of Amity, in the town of New Haven, for the support of a Presbyterian or Congregational minister, in said society, *he being a friend to this, and the United States of America*, after my wife's estate therein shall be ended," &c.

The regicides, Goffe and Whalley, had a number of places of concealment in the limits of this town, the most noted of which is called the *Lodge* or *Hatchet Harbor*, about seven miles from New Haven. It was situated (says Dr. Stiles, in his history of the Judges) at a spring in a valley. "A little northward of it was an eminence, called the *Fort* to this day, from whence there was an extensive and commanding prospect, and a full view of New Haven harbor to the southeast, seven miles off. From this they could see the vessels passing in and out of the harbor. When they came to this abode is uncertain;—it was in the summer, and they left it and removed to Milford, August, 1661, after having resided in and about New Haven for near half a year, from the 7th of March to the 19th of August, 1661." "On a tract about a mile square, and lying four miles northwest of Sperry's [farm,] there

are four hills or eminences, between which are valleys and intercurrent brooks.....On the northern declivity of one of these hills, issues a small perennial spring, between two trees, a walnut and chestnut, now three and four feet in diameter, and judged to be two hundred years old, standing twenty-two feet apart. This fountain is stoned as if with design, and probably remaining as the Judges left it. Tradition says that when they came to this spring, one of them said, "Would to God we had a hatchet;" and immediately finding a hatchet, left there probably by the Indian hunters, they cut down boughs and built a temporary harbor, from this circumstance called Hatchet Harbor to this day."....."On an eminence west of this, by the side of a ledge of rocks twenty feet high, was built a cave, or convenient lodgment, ten feet long and seven wide, regularly stoned. I find the walls (says Dr. Stiles) now remaining, though somewhat broken down. It was covered with trunks of trees, which remained, though much rotten and decayed, till within forty years ago; indeed I saw some of the rudera, rafters, or broken relics, limbs and trunks of trees, still lying in the cavity. This was undoubtedly their great and principal lodge, and in a very recluse and secreted place. There is a beautiful spring six rods from it.".....About 100 rods north, "on Deacon Peck's farm, lies another hillock or eminence, called to this day, and in the records so early as 1675, 'Providence Hill; between which and Fort Rock's Hill, is a valley and brook. Between these two hills runs the dividing line of the towns of Milford and New Haven. The tradition is, that it acquired its name thus. While the Judges resided at the lodge on the southern hill, they apprehended themselves discovered and pursued, while walking on the tops of the hills,—and the Indians always burned rings or tracts on those summits, to give a clear view for hunting deer. Supposing themselves discovered, they took to the bush, and to deceive their pursuers, ranged a north course between the hills, and giving them a false scent, turned off to the westward, and came round the hill to their old place in security. On account of this deliverance, they called this northwest hill, *Providence Hill*."

During the time they were in the vicinity of New Haven, the Judges had "two other occasional lodgments in the woods; one at the house of Mr. Riggs, newly set up in the wilderness, at *Paugasset* or *Derby*; another between that and *Milford*. They were sometimes at *Totoket* or *Branford*."—"From their lodgments in the woods the Judges removed and took up an asylum in the house of Mr. Tomkins, in the center of *Milford*, thirty or forty rods from the meeting house." It is stated, that there was a house built for them on Tomkins's lot, about twenty feet square, and of two stories. The lower room was built with a stone wall and considered as a store; the room above was built of wood, and was used by the Tomkins family as a working or spinning room. The family used to spin in the room above, ignorant of the Judges being below, where they resided for two years, without going abroad so much as into the orchard.

NEW LONDON COUNTY.

NEW LONDON COUNTY is bounded N. by Windham, Tolland and Hartford Counties, E. by Windham County and the state of Rhode Island, S. by Long Island sound, and W. by the county of Middlesex. Its average length from east to west averages about 26 miles, and it has a medium breadth of about 20 miles. This county possesses superior maritime advantages, having an extensive border on Long Island sound, which affords numerous bays, inlets and harbors. Excepting a small section, principally in the town of Lyme, no portion of the county can be considered as mountainous, but it is generally hilly and elevated, and comprises a small proportion of alluvial. The hills and elevated tracts are considerably rough and stony. The lands in general are not adapted to grain culture, although upon the intervals and other tracts, Indian corn is raised to advantage, and to a considerable extent. The principal agricultural interests depend very much upon grazing. The waters of the county are abundant and valuable. On the south it is washed more than thirty miles by Long Island sound, part of its western border by Connecticut river, and the interior of the county is watered and fertilized by the Thames and its branches. The fishing business is more extensively carried on in this county than in any other section of the state, and is an important branch of industry. The manufacturing business is carried on to a considerable extent in the northern part of the county, and is increasing.

The following is a list of the several towns in the county, with the population in 1830.

New London	4,356	Groton	4,805	N. Stonington	2,840
Norwich	5,179	Lebanon	2,555	Preston	1,935

Population of the county in 1820, 35,943 ; in 1830, 42,295.

 NEW LONDON.

THE first English settlement in New London was made by several persons in 1646. Lots were laid out to them, but it appears that some of the settlers were discouraged and left the place. The next year Mr. Richard Blinman, who had been a clergyman in England, removed from Gloucester to this new settlement: in consequence of which considerable accession was made to the number who had kept their station. In 1648, more than forty families had joined the settlement. Some of the principal persons were John Winthrop, Esq., the Rev. Mr. Blinman, Thomas Minot, Samuel Lathrop, Robert Allyn, and James Avery.

The Indian name of the place was *Nameaug*, alias *Towawog*.* The tract of country now comprised in the limits of New London, Montville, Waterford and Groton, was called Pequot for a number of years, from the name of the harbor and original inhabitants. In March, 1658, the Assembly passed the following act respecting its name.

“Whereas it hath been the commendable practice of the inhabitants of all the colonies of these parts, that as this country hath its denomination from our dear native country of England, and thence is called New England, so that planters, in their first settling of most new plantations, have given names to those plantations of some cities and towns in England, thereby intending to keep up, and leave to posterity the memorial of several places of note there, as Boston, Hartford, Windsor, York, Ipswich, Braintree, Exeter; this court considering, that there hath yet no place in any of the colonies, been named in memory of the city of London, there being a new plantation within this jurisdiction of Connecticut, settled upon that fair river Mohegan, in the Pequot country, being an excellent harbor and a fit and convenient place for future trade, it being also the only place which the English in these parts have possessed by conquest, and that upon a very just war, upon that great and warlike people, the Pequots, that therefore they might thereby leave to posterity the memory of that renowned city of London, from whence we had our transportation, have thought fit, in honor to that famous city, to call the said plantation **NEW LONDON**.” The name of the river was also changed and called **Thames**.†

The town of New London is situated on the west bank of the river Thames. In its territorial limits it is much the smallest of any town in the state, being about four miles in length from north to south, and averaging about three fourths of a mile in breadth. The city of New London is situated 3 miles from Long Island sound; it is the semi-seat of justice for the county, and a port of entry. It is 42 miles southeast from Hartford, 13 miles south of Norwich, and 53 miles east from New Haven. Lon. 4° 0' 48" east from Washington, Lat. 41° 0' 25" north. The city is principally built on a declivity, which descends to the east and south. On the summit of the high ground, back of the most populous part of the city, the observer has a fine prospect of the surrounding country. The city is irregularly laid out, owing to the nature of the ground on which it is built, being much incumbered with granite rocks. The houses are not so handsome in their outward appearance as might be reasonably expected, considering the wealth of the inhabitants. In the course of a few years past, however, a spirit of improvement in this respect has taken place, and many buildings have been erected which are elegant in their appearance. Some of the streets have been straitened and leveled, by blasting the granite rocks with which they were disfigured. These rocks afford an excellent material for the construction of buildings, and it is believed that no city in this country has the advantages of New London, in this particular, where the materials for erecting houses can be found in their streets. The harbor is one of

* Dr. Trumbull.

† Records of Connecticut and New London.

of New London and Groton. A Col. Eyre, who commanded the division at Groton, was wounded, and it is said died on board the fleet the night they embarked. About 15 sail of vessels, with the effects of the inhabitants, retreated up the river on the appearance of the enemy, and were saved, and four others remained in the harbor unhurt. The troops were commanded by that infamous traitor Benedict Arnold, who headed the division which marched up to the town. By this calamity it is judged that more than one hundred families are deprived of their habitations, and most of their all. This neighborhood feel sensibly the loss of so many deserving citizens, and though deceased, cannot but be highly indebted to them for their spirit and bravery in their exertions and manly opposition to the merciless enemies of our country in their last moments."

"The following savage action, committed by the troops who subdued Fort Griswold, on Groton Hill, on Thursday last, ought to be recorded to their eternal infamy. Soon after the surrender of the fort, they loaded a wagon with our wounded men, by order of their officers, and set the wagon off from the top of the hill, which is long and very steep. The wagon went a considerable distance with great force, till it was suddenly stopped by a tree; the shock was so great to those faint and bleeding men, that some of them died instantly. The officers ordered their men to fire on the wagon while it was running."

The buildings burnt at New London in this expedition by the British troops, were 65 dwelling houses containing 97 families, 31 stores, 18 shops, 20 barns, and 9 public and other buildings, among which were the court house, jail and church—in all 143.

"In many instances where houses were situated at a great distance from any stores, and contained nothing but household furniture, they were set on fire, notwithstanding the earnest cries and entreaties of the women and children in them, who were threatened with being burnt in them if they did not instantly leave them. Indeed two houses were bought off for 10*l.* each, of an officer who appeared to be a captain, upon condition, however, that he should not be made known; and where the houses were not burnt they were chiefly plundered of all that could be carried off. At the harbor's mouth, the houses of poor fishermen were stripped of all their furniture of every kind, the poor people having nothing but the clothes they had on."

The following is Arnold's official account of his expedition to New London:

SOUND, off Plumb Island, 8th Sept. 1781.

Sir,—I have the honor to inform your Excellency, that the transports with the detachment of troops under my orders, anchored on the Long Island shore on the 5th instant, at 2 o'clock, P. M. about ten leagues from New London; and having made some necessary arrangements, weighed anchor at 7 o'clock, P. M. and stood for New London with a fair wind. At 1 o'clock the next morning, we arrived off the harbor, when the wind suddenly shifted to the northward, and it was 9 o'clock before the transports could beat in. At 10 o'clock the troops in two divisions; and in four debarkations, were landed, one on each side of the harbor, about three miles from New London; that on the Groton side, consisting of the 40th and 54th reg'ts, and the 3d batt. of New Jersey volunteers, with a detachment of Yagers and Artillery, were under the command of Lieut. Col. Eyre. The division on the New London side consisted of the 35th regiment, the Loyal Americans, the American Legion, Refugees, and a

detachment of 60 Yagers, who were immediately on their landing put in motion; and at 11 o'clock, being within half a mile of Fort Trumbull, which commands New London harbor, I detached Capt. Millett, with four companies of the 38th regiment, to attack the fort, who was joined on his march by Capt. Frink, with one company of the American Legion. At the same time I advanced with the remainder of the division, west of Fort Trumbull, on the road to the town, to attack a redoubt which had kept up a brisk fire upon us for some time; but which the enemy evacuated on our approach. In this work we found six pieces of cannon mounted, and two dismounted. Soon after I had the pleasure to see Capt. Millett march into Fort Trumbull, under a shower of grape shot from a number of cannon which the enemy had turned upon him; and I have the pleasure to inform your Excellency, that by the sudden attack and determined bravery of the troops, the fort was carried with the loss of only four or five men killed and wounded. Capt. Millett had orders to leave one company in Fort Trumbull, to detach one to the redoubt we had taken, and to join me with the other companies. No time on my part was lost in gaining the town of New London. We were opposed by a small body of the enemy, with one field piece, who were so hard pressed that they were obliged to leave the piece, which being iron was spiked and left.

As soon as the enemy were alarmed in the morning, we could perceive they were busily employed in bending sails, and endeavoring to get their privateers and other ships up Norwich river out of our reach; but the wind being small, and the tide against them, they were obliged to anchor again. From information I received before and after my landing, I had reason to believe that Fort Griswold, on Groton side, was very incomplete; and I was assured by friends to Government, after my landing, that there were only twenty or thirty men in the fort, the inhabitants in general being on board their ships, and busy in saving their property.

On taking possession of Fort Trumbull, I found the enemy's ships would escape unless we could possess ourselves of Fort Griswold; I therefore dispatched an officer to Lieut. Col. Eyre with the intelligence I had received, and requested him to make an attack upon the fort as soon as possible; at which time I expected the howitzer was up, and would have been made use of. On my gaining a height of ground in the rear of New London, from which I had a good prospect of Fort Griswold, I found it much more formidable than I expected, or than I had formed an idea of, from the information I had before received; I observed at the same time, that the men who had escaped from Fort Trumbull, had crossed in boats and thrown themselves into Fort Griswold, and a favorable wind springing up about this time, the enemy's ships were escaping up the river notwithstanding the fire from Fort Trumbull, and a six pounder which I had with me. I immediately dispatched a boat with an officer to Lieut. Col. Eyre, to countermand my first order to attack the fort, but the officer arrived at a few minutes too late. Lieut. Col. Eyre had sent Capt. Beckwith with a flag, to demand a surrender of the fort, which was peremptorily refused, and the attack had commenced. After a most obstinate defense of near forty minutes, the fort was carried by the superior bravery and perseverance of the assailants. The attack was judicious and spirited, and reflects the highest honor on the officers of the troops engaged, who seemed to vie with each other in being first in danger. The troops approached on three sides of the work, which was a square with flanks, made a lodgment in the ditch, and under a heavy fire, which they kept up on the works, effected a second lodgment upon the fraizing, which was attended with great difficulty, as only a few pickets could be forced out or broken in a place, and was so high that the soldiers could not ascend without assisting each other. Here the coolness and bravery of the troops were very conspicuous, as the first who ascended the fraize were obliged to silence a nine pounder which enfiladed the place on which they stood, until a sufficient body had collected to enter the works, which was done with fixed bayonets, through the embrasures, where they were opposed with great obstinacy by the garrison with long spears. On this occasion I have to regret the loss of Major Montgomery, who was killed by a spear in entering the enemy's works; also of Ensign Whitlock, of the 40th regiment, who was killed in the attack. Three other officers of the same regiment were wounded; Lieut. Col. Eyre, and three other officers of the 54th regiment, were also wounded; but I have the satisfaction to inform your Excellency, that they are all in a fair way to recover.

Lieutenant Colonel Eyre, who behaved with great gallantry, having received his wound near the works, and Major Montgomery being killed immediately after, the command devolved on Major Bromfield, whose behavior on this occasion does him great honor. Lieut. Col. Buskirk, with the New Jersey volunteers and artillery, being the second debarkation, came up soon after the work was carried, having been retarded by the roughness of the country; I am much obliged to this gentleman for his exertions, although the artillery did not arrive in time.

I have enclosed a return of the killed and wounded, by which your Excellency will observe that our loss, though very considerable, is short of the enemy's, who lost most of their officers, among whom was their commander, Col. Ledyard. Eighty-five men were found dead in Fort Griswold, and sixty wounded, most of them mortally; their loss on the opposite side must have been considerable, but cannot be ascertained. I believe we have about 70 prisoners, besides the wounded who were left paroled.

Ten or twelve ships were burned, among them three or four armed vessels, and one loaded with naval stores; an immense quantity of European and West India goods were found in the stores—among the former the cargo of the *Hannah*, Capt. Watson, from London, lately captured by the enemy. The whole of which was burnt with the stores, which proved to contain a large quantity of powder, unknown to us; the explosion of the powder, and change of wind, soon after the stores were fired, communicated the flames to part of the town, which was, notwithstanding every effort to prevent it, unfortunately destroyed.

Upwards of fifty pieces of iron cannon were destroyed in the different works, (exclusive of the guns of the ships,) a particular return of which I cannot do myself the honor to transmit to your Excellency at this time.

A very considerable magazine of powder, and barracks to contain three hundred men, were found in Fort Griswold, which Capt. Lemoine of the Royal Artillery had my positive directions to destroy; an attempt was made by him, but unfortunately failed. He had my orders to make a second attempt: the reasons why it was not done, Capt. Lemoine will have the honor to explain to your Excellency.

I should be wanting in justice to the gentlemen of the navy, did I omit to acknowledge that upon this expedition I have received every possible aid from them. Captain Beasley has made every exertion to assist our operations, and not only gave up his cabin to the sick and wounded officers, but furnished them with every assistance and refreshment that his ship afforded.

Lord Dalrymple will have the honor to deliver my dispatches; I beg leave to refer your Excellency to his Lordship for the particulars of our operations on the New London side. I feel myself under great obligations to him for his exertions upon the occasion. Captain Beckwith, who was extremely serviceable to me, returns with his Lordship. His spirited conduct in the attack of Fort Griswold does him great honor, being one of the first officers who entered the works. I beg leave to refer your Excellency to him for the particulars of our operations on that side, and to say I have the highest opinion of his abilities as an officer.

I am greatly indebted to Capt. Stapleton, (who acted as Major of Brigade,) for his spirited conduct and assistance; in particular, on the attack upon Fort Trumbull, and his endeavors to prevent plundering, (when the public stores were burnt,) and the destruction of private buildings. The officers and troops in general behaved with the greatest intrepidity and firmness.

I have the honor to be, with the greatest respect,

Your Excellency's most obedient and most humble servant,

B. ARNOLD.

Return of the killed and wounded:—1 Major, 1 Ensign, 2 Sergeants, 44 Rank and File, killed.

1 Lieut. Colonel, 3 Captains, 2 Lieutenants, 2 Ensigns, 8 Sergeants, 2 Drummers, 127 Rank and File, wounded.

Of the wounded officers, one Captain, one Lieutenant, and one Ensign, are since dead.

JOHN STAPLETON.

From the Connecticut Gazette, No. 934, (New London,) October 5, 1781.

Extract of a Letter from Lieut. Colonel Upham, to his Excellency Governor Franklin, dated Fort Franklin, Sept. 13, 1781:

"Immediately on the receipt of yours by Capt. Camp, I made every preparation consistent with the necessary secrecy, to furnish as many Refugees for the proposed expedition as could be spared from the garrison. My first care was to put a supply of provisions on board the vessels. I talked of an expedition and proposed to go myself, nor could I do more until the fleet appeared in sight. Major Hubbel was too unwell to go with me; I therefore left him to take charge of the Fort, and, with as much dispatch as possible, embarked one hundred Loyalists, exclusive of a sufficient number to man the two armed sloops. With these we joined the fleet in season to prevent the least delay. By the enclosed arrangement, you will see we had the honor to be included in the first division, and I have the pleasure to add we were first on shore. We advanced on the right of the whole to a height at a small distance from the shore,

where we were ordered to cover the 38th Regiment from a wood on our right, until the second division came up. We were then ordered to change our position from the right to the left, at the distance of two hundred yards from the main body. This alteration derived its propriety from the circumstance of the Rebels having gone over to the left, from an apprehension of being too much crowded between our troops and the river on their right. Thus arranged we proceeded to the town of New London, constantly skirmishing with rebels, who fled from hill to hill, and stone fences which intersected the country at small distances. Having reached the southerly part of the town, the General requested me to take possession of the hill north of the Meeting House, where the rebels had collected, and which they seemed resolved to hold. We made a circle to the left, and soon gained the ground in contest. Here we had one man killed and one wounded. This height being the outpost, was left to us and the Yagers. Here we remained exposed to a constant fire from the rebels on the neighboring hills, and from the fort on the Groton side, until the last was carried by the British troops.

"We took the same route in our return as in going up, equally exposed though not so much annoyed. Every thing required was cheerfully undertaken, and spiritedly effected, by the party I had the honor to command. A small party from Vanalstine's post joined us, which increased my command to 120. They landed and returned with us, and behaved exceedingly well. The armed vessels Association and Colonel Martin, went close into the shore, and covered the landing on the New London side. At the request of the General, I furnished boats to land forty of the troops on the Groton side. Captains Gardner and Thomas would gladly have gone up to the town, but were not permitted."

The following is from the New London Gazette, January 4, 1782.

"Last Friday died at Groton, Mr. Carey Leeds, of fever, which he took from Mr. Daniel Eldridge, a neighbor and friend of his, that died the 1st instant, who with one hundred and thirty men were landed here on the 3d ult. from New York, in a most deplorable situation; a great part of them have since died, and those of them that have survived, are in such a debilitated state that they will drag out a miserable existence. Numbers in this unhappy town and Groton have lost their lives by taking them in, and great numbers of others have been brought to the gates of death, and still lie in a languishing condition. It is enough to melt the most obdurate heart of any one, (except a Briton,) to see these miserable objects continually landing here from every flag that comes; see them poured out upon desolated wharves, sick and dying, and the few rags they have on covered with vermin and their own excrements. . . . In short, if there is no redress for this intolerable evil, this town and Groton must be depopulated."

After the close of the Revolutionary war in 1783, the General Assembly appointed a committee to estimate the damages sustained by the several towns in the state that had been ravaged by the enemy during the war. The damages sustained by New London were estimated by the committee at \$485,980. To compensate the sufferers in this, and the other towns, the General Assembly, in May, 1793, granted them 500,000 acres of the tract of land reserved by Connecticut, at their cession of lands to the United States, lying south of the western part of Lake Erie, being what are now called "the Fire lands," in the western part of the Western Reserve, in the state of Ohio.

During the late war New London was the theater of hostile indications. A squadron under the command of Commodore Hardy having driven two of our frigates under the command of Commodore Decatur into the harbor, blockaded it for a considerable time. The concentration of a considerable force of the enemy at this place, produced con-

siderable alarm, and a large body of militia, drafted from different parts of the state, were kept here to repel any attack from the enemy. Besides the militia, a considerable body of United States troops were stationed here. The forts were strongly garrisoned, and the British made no attempt upon the place.

About the year 1720, a sect arose in New London, called, from their leader, Rogerenes. The following account of this people is from Dr. Trumbull's History of Connecticut, second volume.

"The Rogerenes were a sort of Quakers, who had their origin and name from one John Rogers of New London. He was a man of unbounded ambition, and wished to be something more than common men. One Case and one Banks, two lewd men, called singing Quakers, coming through the colony singing and dancing, accompanied with a number of women to assist them in their musical exercises; and especially to proclaim how their lips dropped with myrrh and honey, fell in company with John, and at once made a convert of him to their religion. He, in a high degree imbibed their spirit, and ever retained it. Notwithstanding, it was not long after, before he commenced a seventh day Baptist. After maintaining the opinion of this sect for a short time, he returned again to Quakerism. To gratify his pride, and that he might appear as the head of a peculiar sect, he differed in several points from the Quakers. Particularly he maintained that there were three ordinances of religious use, baptism, the Lord's supper, and imposition of hands. To make himself more eminent, as the head of a new sect, he commenced preacher of his peculiar scheme, and without any kind of ordination, administered baptism to his followers. The madness, immodesty, and tumultuous conduct of Rogers and those who followed him, at this day, is hardly conceivable. It seemed to be their study and delight to violate the Sabbath, insult magistrates and ministers, and to trample on all law and authority, human and divine. They would come on the Lord's day, into the most public assemblies nearly or quite naked, and in the time of public worship, behave in a wild and tumultuous manner, crying out, and charging the most venerable ministers with lies and false doctrine. They would labor upon the Lord's day, drive carts by places of public worship, and from town to town, apparently on purpose to disturb Christians and Christian assemblies. They seemed to take pains to violate the laws in the presence of officers, that they might be complained of, and have an opportunity to insult the laws, the courts, and all civil authority.

A particular instance of their conduct on a certain occasion, when Rogers was indicted for a high misdemeanor, may serve as a specimen of their spirit and conduct in general. The crime for which he was indicted, and the manner of his own and his followers' conduct, will appear from the following extract from Pratt's Historical Account of Quakerism.

'It was his manner to rush into the assembly on the Lord's day, in the time of God's worship, in a very boisterous way, and to charge the minister with lies and false doctrine; and to scream, shout, stamp, &c. by which he offered insufferable molestations to the worship and people of God. And this was his manner in the court also, when he pleased, or had a mind to make himself sport, and he would laugh at it when he had done until his sides shook.

'I saw him once brought to court for such a disturbance, committed on the Sabbath. He had contrived the matter so as to be just without the door when he was called to answer; upon which he rushed into court with a prodigious noise; his features and gestures expressed more fury than I ever saw in a distracted person of any sort, and I soberly think, that if a legion of devils had pushed him in headlong, his entrance had not been more horrid and ghastly, nor have seemed more preternatural.

'When he came to the bar, he demanded of the court what their business was with him? The indictment was ordered to be read. To this he pleaded not guilty, after a new mode; for as the clerk read, sometimes at the end of a sentence, and sometimes at the beginning, he would cry out, *That's a cursed lie*; and anon, *That's a devilish lie*; till at length a number of his followers, of both sexes, tuned their pipes, and screamed, roared, shouted and stamped to that degree of noise, that it was impossible to hear the clerk read.'

He professed to be a most holy man, guided in all his conversation by the Holy Ghost, so that, for the course of twenty years, he had lived without the commission of one sin. Yet he was almost constantly committing such gross offenses. He was divorced from an amiable wife for fornication and supposed beastiality. The latter

he often confessed out of court. When he had occasion, he took to his bed a maid whom he had purchased, and after she had borne him two children, he put her away. He suffered a long imprisonment, upon a strong suspicion that he was an accomplice in burning the meeting-house in New London. He once sat upon the gallows upon a conviction of blasphemy. For these and the like instances, he and his followers suffered the penalties of the law; but for his religion, neither he nor his followers suffered any thing, any further than it led them to such misdemeanors as are punishable by the laws of all Christian nations."

Many anecdotes are related concerning this singular people, one of which is the following. Among other violations of law and order by the Rogerenes, they took to themselves wives without complying with the requirements of law and decency. "One day as Gov. Saltonstall was sitting in his room smoking his pipe, a man by the name of Gorton, with a woman, came in, and addressing the Governor, said, 'sir, I have married this woman, and that too, without the authority of your magistrates and ministers.' The Governor turned round, took the pipe out of his mouth, and in a stern voice said, 'Gorton, have you taken this woman for your wife?' Gorton replied, 'yes, I have.' The Governor turned to the woman, and enquired, 'madam, have you taken this man for your husband?' She replied, 'Indeed, sir, I have.' 'Well, then,' said the Governor, 'by authority of, and according to the laws of Connecticut, I pronounce you lawfully wedded, husband and wife.' Gorton was astonished, and after a pause replied, '*Thou art a cunning creature.*'"

It is said to be contrary to the tenets of the Rogerenes to employ physicians, or to use medicines in case of sickness. The following method of preserving a clear conscience in this respect, is related upon good authority. "A number of these people were afflicted with a certain cutaneous disorder, and their principles forbidding them the use of medicines, they were at a loss what to do. After deliberating upon the subject, they came to the conclusion that this disorder, (or whatever else it might be called,) could not come under the head of bodily infirmity. It was determined that the *Itch* might be considered as a noxious animal, which they might innocently destroy. They accordingly made use of the usual remedies found efficacious for this disorder."

A considerable number of the descendants of the Rogerenes still reside in Groton, New London and its vicinity. Many years since, a person by the name of Watrous, one of this sect, wrote and published a book, called "*The Battle Axe.*" Such was the nature of this publication, that he could find no printer who was willing to print it. Determined however that his book should be published, Watrous procured a printing press and types, and printed the work himself. This book is said to be a curiosity, from the nature of the work, and from the typographical execution. So little faith have this people in other denominations of Christians around them, that quite recently they would not suffer any of their people to assist, as carpenters, or otherwise, in the construction of a new church, lately erected in New London.

Jedediah Huntington, a general in the army of the Revolution, although a native of Norwich, was long a resident of New London. He

died in 1818, in his 76th year, having survived every general officer of the Revolution, except Gen. Stark, the hero of Bennington. He was educated at Harvard University, where he was graduated in 1763. He settled in his native town as a merchant, but at the commencement of the Revolution he entered the American army as colonel of a regiment. His intelligence, bravery and fidelity as an officer, secured to him the respect and gratitude of his country, and the attachment and lasting confidence of Washington. He continued in the service through the war, and attained to the rank of a general officer. In 1788, he was appointed treasurer of Connecticut, and was a member of the convention of the state which ratified the federal constitution. On the organization of the general government, he was appointed by Washington collector of the port of New London, the duties of which office he discharged to the entire satisfaction of the public and the government, during a period embracing four successive administrations. General Huntington became a professor of religion when young, and was distinguished for the excellence of his private character. He was one of the first members of the American Board of Commissioners for Foreign Missions, and held the office till his death.

Judge Brainard's Monument.

The Hon. *Jeremiah G. Brainard*, a judge of the superior court, was a resident of this town. He was born at East Haddam, educated at Yale College, and commenced the practice of law in New London in early life. He was esteemed an able and faithful lawyer, a worthy man, and good judge. He died at New London, January 14th, 1830, in the 70th year of his age. His son, *John G. C. Brainard*, was distinguished for his poetic genius. He was educated for the bar, but not finding the success he wished, he went to Hartford in 1822, and took the editorial charge of the *Connecticut Mirror*; he was thus occupied until about a year before his death, when marked by evident symptoms as a victim to the consumption, he returned to the paternal roof, where, sensible of his approaching dissolution, he embraced the Christian hope, and died September 26th, 1828, aged 32 years.

The above is a representation of the monument of Judge Brainard and his son *John G. C. Brainard*. Judge Brainard's monument is con-

structed of granite, and is perhaps one of the best models for a monument that could be devised, combining simplicity with durability. It is situated in the new burying ground, which is on elevated ground, descending towards the city, the central part of which is but a few rods distant. It commands a fine view of the harbor and the surrounding scenery.

Bishop Seabury's Monument.

The following is the inscription on Bishop Seabury's monument.

Here lyeth the body of SAMUEL SEABURY, D. D. Bishop of Connecticut and Rhode Island, who departed from this transitory scene, February 25th, Anno Domini 1796, in the 68th year of his age, and the 12th of his Episcopal consecration.

Ingenious without pride, learned without pedantry, good without severity, he was duly qualified to discharge the duties of the Christian and the Bishop. In the pulpit he enforced Religion; in his conduct he exemplified it. The poor he assisted with his charity; the ignorant he blessed with his instruction. The friend of men, he ever designed their good; the enemy of vice, he ever opposed it. Christian! dost thou aspire to happiness? Seabury has shown the way that leads to it.

The ancient burying ground in New London is situated in the north part of the city, a short distance from the river, on elevated ground, immediately back of the houses. The first meeting house and court house erected in New London were near this spot. Among the inscriptions on the ancient monuments is the following.

"An epitaph on Captaine Richard Lord,* deccased May 17, 1662. *Ætatis svæ 51.*

... BRIGHT STARRE OF OVR CHIVALLRIE LYES HERE
TO THE STATE A COVNSILLOVR FVLL DEARE
AND TO YE TRVTH A FRIEND OF SWEETE CONTENT
TO HARTFORD TOWNE A SILVER ORNAMENT
WHO CAN DENY TO POORE HE WAS RELIEFE
AND IN COMPOSING PAROXYIES HE WAS CHEIFE
TO MARCHANTES AS A PATERNE HE MIGHT STAND
ADVENTRING DANGERS NEW BY SEA AND LAND."

This inscription is on a slab of red sandstone upwards of five feet long and three wide, probably obtained near Middletown and transported here by water; it is now broken in two and nearly imbedded in the earth, in the northern part of the burying ground, near the tomb of the

* In Dr. Trumbull's History of Connecticut, Vol. i. the name of Richard Lord appears as one of the body corporate, to whom king Charles granted the charter of Connecticut. The charter was given April 20, 1662, about a month previous to the death of Capt. Lord. "At a general court in Hartford, March 11th, 1658, a troop of thirty horsemen was established in Connecticut, and Richard Lord was appointed captain. This was the first in the colony."

Winthrop. The lettering on this stone has suffered so much from the hand of time, that it is with difficulty that some parts of it can now be deciphered.

South view of the Hempstead House, New London.

This house is 48 feet in front by 20. It is one of the three ancient houses which still remain. It was built and first occupied by Sir Robert Hempstead, and being entailed property has ever remained in possession of his descendants: it is now in possession of Mr. Joshua Hempstead, the seventh generation from Sir Robert. This house was formerly fortified for defense against the Indians. It is about forty rods west of the present court house. The first vessel that sailed for the West Indies from New London, sailed from the cove within twenty rods of this house.

The first settlement of the town appears to have been commenced on what was called Cape Ann street. The last house built by the first settlers stood on this street; it was taken down about twelve years since: it was about half a mile west of the present court house. The first meeting house in New London was erected very near the present alms house. Gov. Winthrop's residence was at the head of the cove, at the north end of the city.

The first printing press in Connecticut was established in New London, forty five years before printing was executed in any other place in the colony. The first printer was Thomas Short, who came to New London about the year 1709. He printed the Saybrook Platform (which is said to be the first book printed in Connecticut) in 1710, and soon after died. In 1713, there was no printer in the colony; and a great proportion of the laws were only in manuscript. The Assembly determined on revising and printing the laws, and desired the governor and council to procure a printer to settle in the colony. The council obtained Mr. Timothy Green, a descendant of Mr. Samuel Green of Cambridge in Massachusetts, the first printer in North America. The Assembly, for his encouragement, agreed that he should be printer to the governor and company, and that he should have fifty pounds, the salary of

the deputy governor, annually. He was obliged to print the election sermon, the proclamations for fasts and thanksgivings, and the laws which were enacted at the several sessions of the assembly. In 1714, he came into Connecticut, and fixed his residence at New London. He and his descendants were printers to the state till after the Revolutionary war.

The second newspaper printed in Connecticut, the "New London Summary," was commenced at New London, on the 8th of August, 1758, by Timothy Green, and discontinued in consequence of the death of Mr. Green, in 1763. The "Summary" was succeeded Nov. 1st, 1763, by the "New London Gazette," (altered in 1773, to the "Connecticut Gazette,") which is still continued, and is the oldest newspaper in the state. The Gazette is printed and published at the present time by Col. Samuel Green, a descendant from the ancient printers of the colony.

The following copy of a letter from the Hon. John Winthrop, Esq. of New London, to the Rev. Dr. Mather of Boston, is taken from the second volume of Massachusetts Historical Collections.

New London, September 12, 1717.

Sir—Being from home the last post day, when your letter arrived here, I am now to thank you for it, and to make answer to what you demand of me. The observations I made of the prodigious storms of snow, in the doleful winter past, are many. But I shall mention but two at this time, and they are these. That the snow spangles which fell on the earth, appeared in large sexangular forms. *See nivem sex radiatam; et stellas has niveas observavi prout astrologi vulgo aspectum depingunt sextilem.* The other is, that, among the small flock of sheep, that I daily fold in this distant part of the wilderness, (for I am a poor shepherd,) to secure them from the wild rapacious quadrupeds of the forest; after the unusual and unheard of snows, the aforesaid animals from the upland parts of the country, were, in great numbers forced down to the sea side among us, for substance, where they nestled, kenneled and burroughed in the thick swamps of these ample pastures, nightly visiting the pens and yards for their necessity. * * * * The storm continued so long and severe, that multitudes of all sorts of creatures perished in the snow drifts. We lost at the island and farms, above eleven hundred sheep, besides some cattle and horses, interred in the snow. And it was very strange that twenty eight days after the storm, the tenants of Fisher's Island, pulling out the ruins of one hundred sheep out of one snow bank in a valley, (where the snow had drifted over them sixteen feet,) found two of them alive in the drift, which had lain on them all that time, and kept themselves alive by eating the wool off the others, that lay dead by them. As soon as they were taken out of the drift they shed their own fleeces and are now alive and fat; and I saw them at the island the last week, and they are at your service.

The storm had its effect also on the ocean: The sea was in a mighty ferment, and after it was over, vast heaps of the enclosed shells came ashore, in places where there had never been any of the sort before. Neptune with his trident, also, drove in great schools of porpoises, so that the harbor and river seemed to be full of them; but none of these came on shore, but kept a play day among the disturbed waves. As for the golden fleece—the hider and his partner intended to settle in your town after they had made a few more wreck voyages, and have come back undiscovered like trading men, as I was told by my author. And as to my informer, he was always plotting and contriving how to accomplish your business without discovering it to any more; but he was so needy that I believe he had never so much money together to carry him down, and keep him there any time for the purpose; and a few weeks before he died, he was proposing to me for a new trial and discovery of the thing. Sir, what I know about it I have truly, faithfully, and ingeniously communicated to you, and hope, by some means or other, you may in time be the better for it. I thank you for your publications. I have mentioned to my honest neighbor Timothy the reprinting them, without mentioning your name in the matter, encouraging him to the work, by the quick vent of so large a number of the first impression.

I have given a dose of your febrifugium to one of the town, which I hope, has cured him of a malignant fever, and is an excellent remedy *ob dolorem lienis*. I am

indebted for your mentioning my name inter F. R. S.* at Gresham; I am an obscure person, less than the poorest of your servants, and not fit to stand before princes, but am contented to lie hid among the retired philosophers.

I am &c.

JOHN WINTHROP.

To the Rev. Doctor COTTON MATHER.

Answers to several of the queries proposed by the officers of the British government, (1774,) relative to New London.

Answer 1. The latitude of New London, the best harbor in Connecticut, is, by observation, $41^{\circ} 25'$ north, and longitude $4^{\circ} 45'$ west from London, that is, $71^{\circ} 15'$ west from London, by observation of the eclipses of the moon, calculated by Halley's tables.

5. New London, as above, is one of the principal harbors, and opens to the south; and from the light-house at the mouth of the harbor to the town is about three miles, and a breadth of three fourths of a mile and more in some places, from five to six fathoms water, a clear bottom, tough ooze, and entirely secure and commodious one mile above the town for large ships.

7. The principal trade of this government is to the West India Islands, excepting now and then a vessel to Ireland with flax-seed, and to England with lumber and pot ashes, and a few to Gibraltar and Barbary. There are 72 sail of vessels now belonging to this district, amounting to 3,247 tons, in which there are 406 seafaring men employed, besides upwards of twenty sail of coasting vessels, that employ about ninety seamen. On comparing, the trade is on the decrease; for in the year 1763, there were seventy nine sail of vessels belonging to this district, a difference of seven sail.

8. It is impossible to enumerate the various sorts of British manufactures that are here imported; but in general almost every sort is consumed here; which we have principally from New York, and Boston, to the amount, upon a medium, from the best information I can get, of 150,000*l.* or 160,000*l.* sterling per annum.

9. Besides the English islands, (which supply this government with more than its home consumption of rum and sugar,) it has a trade with the French and Dutch West Indies, Gibraltar and Barbary. Those vessels that go to the French and Dutch plantations carry horses, cattle, sheep, hogs, provisions and lumber; those for Gibraltar and Barbary carry flour, lumber, New England rum, and stores for muling, the whole annual amount of which, (I should think,) about 50,000*l.* sterling; for which we receive molasses, cocoa, cotton, and some sugar, and from the Dutch plantations bills of exchange; and the mules from Barbary are generally sold in the West Indies for bills of exchange, the most of which importation and bills goes to New York and Boston to pay for the British goods this government receives from those places.

10. The custom house officers here are attentive to their duty, besides which, this harbor is so situated, that the coming in from the sea is between the east end of Long Island and Block Island, and by the west end of Fisher's Island, where the king's cruisers are generally upon the look out, and very critical in examining the vessels they meet with.

11. The natural produce of this country is timber, iron and copper ore, myrtle wax, &c. The produce and staple commodities are Indian corn, wheat, rye, beef, pork, flax, flax-seed, oats, beans, peas, potatoes, cheese, cider, apples, &c. which articles are carried in the coasting vessels to New York, Boston, Philadelphia, Virginia and Carolina, to what value is very difficult to determine; but I should think to at least 20,000*l.* sterling, which, with the 50,000*l.* sterling in the foreign trade, makes, on this estimation, the annual amount of exportation from this district 70,000*l.* sterling. It is evident the whole falls short of paying for the British manufactures we receive, as many of our traders have failed, and the New Yorkers have taken their landed interest in this colony in payments to a very considerable amount. The chief manufactures are pot and pearl ashes, bar iron, and necessary implements for husbandry, &c.

EXTRACTS FROM NEWSPAPERS.

From the Connecticut Gazette, July 10th, 1762.

We hear from New London, that on Thursday se'nnight died there Mr. Ebenezer Bolles of that town, trader, esteemed a very honest and hospitable man. He has left one child, a daughter, of about seventeen years of age; and an estate of about five thousand pounds lawful money. The occasion of his death was as follows,—a few

* This appointment afterwards took place.

days before, he had been cutting some vines or bushes which were of a nox quality, whereby he was poisoned, and his body swelled to a great degree; but being of the sect called by the name of Rogerenes, who forbid the use of means in sickness, he would neither allow a physician to be near him, nor the most simple medicine administered. Just before he expired, when in great pain, he seemed desirous of some help, but the brethren and sisters of that profession would not allow it, lest he should deny the faith.

New London Gazette, No. 1, Nov. 18th, 1763.

Printed by Timothy Green, at the Printing office, late in the occupation of Mr. Timothy Green deceased. N. B. The business of Copper plate printing and Book binding is performed by said Green.

New London Gazette, No. 161, December 12, 1766.

The paper on which this Gazette is printed, was manufactured at Norwich—a prof that this colony can furnish itself with one very considerable article which has heretofore carried thousands of pounds out of it. This should excite every lover of his country, to promote as much as possible this laudable undertaking, by saving all their linen rags.

New London Gazette, No. 160, Dec. 5, 1766.

We hear from Middletown, that on the 21st inst. the Hartford fleet arrived there, consisting of two sloops and a scow, conveyed by a batteau from Springfield. The fleet was separated in the night of the 18th, by a sudden squall, which took them as they opened a small brook, and occasioned much damage; one man bruised his finger cutting away a thowl pin on board the convoy, but is likely to recover. The convoy was obliged to bear away for Wingham, and by the help of jury masts, reached her port, where she is refitting; and it is thought she will be able to put to sea in a fortnight. One of the fleet struck upon a mud turtle, but happily no lives were lost. The scow came to anchor and rode out the storm. The same day arrived two scows from the other side of the river, with sand, after a fine passage of half an hour, the people all well on board.

New London, Con. Jour. Sept. 27th, 1771.

About three or four years ago a few Mackerel were discovered to be in New London Harbor and River, tho' chiefly very small, which have every year since been increasing, both in size and in quantity:—and such a plenty has there been of those valuable fish the present year, as that from forty to seventy boats have been daily employed below the town in catching them. And by the best computation that can be made about 300 barrels have already been caught in this season, from the first of August to the present time, nearly equal in size to those of Boston Bay. Last Tuesday six barrels of those fish were drawn in a seine at Norwich Landing.

From the Connecticut Gazette, No. 765, July 10, 1778.

About three weeks ago, Mr. Robert Sheffield of Stonington, made his escape from New York, after a short confinement on board a prison ship. After this young gentleman was taken, he with his crew, 10 in number, were put into irons and thrust into the forepeak; on their arrival at New York, they were carried on board a prison ship and to the hatchways, on opening of which tell not of Pandora's box, for that must be compared to this, an alabaster box, in comparison to the opening of these hatches. True there were gratings, but they kept their boat upon them. The steam of the hold was enough to scald the skin, and take away the breath—the stench enough to poison the air all around. On his descending these dreary mansions of woe, and beholding the numerous spectacles of wretchedness and despair, his soul fainted within him. A little epitome of hell—about 350 men confined between deck, of which about one half were Frenchmen: and he informed that there were three more of these vehicles of contagion, which contained the like number of miserable Frenchmen also, who are treated if possible worse than Americans. The heat so intense, (the hot sun shining all day on deck,) that they were all naked, which also served the well to get rid of the vermin, but the sick were eaten up alive. Their sickly countenances and ghastly looks were truly horrible; some swearing and blaspheming; some crying, praying, and wringing their hands, and stalking about like ghosts and apparitions; others delirious and void of reason, raving and storming; some groaning and dying—all panting for breath; some dead and corrupting. The air was so foul at times that a lamp could not be kept burning, by reason of which the boys were not missed till they had been dead 10 days. One person only is admitted on deck at a

time after sun-set, which necessarily occasions much filth to run into the hold, and mingle with the bilge water, which to his certain knowledge had not been pumped out while he continued on board; notwithstanding the decks were leaky, and the prisoners begged for permission to let in fresh water and pump it out again; but all in vain, their hearts are callous and dead to their cries, prayers and entreaties; five or six died every day Mr. Sheffield was on board. He was only six days on board, and three of his people died in that short time. He was sent for on shore to attend as evidence at the Court of Admiralty for condemnation of his vessel, and happily made his escape from the horridest of deaths. He was informed in New York, that the fresh meat sent in to the prisoners by our commissary, was taken by the men of war for their own use. This he can say, that he did not see any on board the ship he was in; but acknowledged that they were well supplied with soft bread from our commissary on shore. But the provision, (be what it will,) is not the complaint. Fresh air and fresh water, God's free gift, is all their cry.

New London, August 18th, 1779.

We hear from Saybrook, that a boat lately returning into Connecticut river, from Long Island, where she had been on an illicit trade, was stopped by the fort at Saybrook, when a quantity of goods were taken out of the boat, and lodged in the custody of one Mr. Tully, an officer of the fort, who stored them in his dwelling house; and on Sunday night, 8th instant, eight men broke into the house with a view of carrying off the goods; on which the officer fired on them, killed two at the first shot, and wounded another with a bayonet. On this the others made off, carrying the wounded man with them.—*A warning to this kind of gentry.*

New London, November 17th, 1781.

Last Saturday evening a flag of truce returned here from New York, and bro't 132 American prisoners, among them are Ebenezer Ledyard, Esq. and Lieut Jabez Stow, on parole, with the remainder of the prisoners who were captivated and carried off from New London and Groton by Benedict Arnold's burning party: But the prisoners are chiefly from the prison ship, and are mostly sick.

Captain Jonathan Budington, jun. late of the Brig Favorite, Mr. George Worthy-lake, and Daniel Shapley, (son of Capt. Adam Shapley,) all of this town, lately died on board the prison ship; and Mr. John Monroe, of this town died on board the flag the night it arrived.

New London, July 1, 1785, (923.)

Tuesday evening was tried before the Court of Common Pleas, now sitting here, a cause brought by a Mrs. Eggleston of Stonington, against one Reuben Rathbun, an exhorter among the people called the Shaking Quakers, for defaming her, by uttering sundry expressions of and concerning her, at a public meeting in Stonington. After a full hearing, the Jury retired, and in about an hour returned with a verdict in favor of the plaintiff for £20 damage, and her cost.

Connecticut Gazette, No. 1787. New London, February 7, 1798.

John Kunkapot, a chief of the tribe of Oneida Indians, arrived here last week. We were informed by him, that he had been on a mission to the Mohegan tribe, being authorized to invite them to sell their lands in Montville, and move among the Oneidas, where they would be received as members of their tribe, without any reward. The Mohegans, excepting one or two who are very old, have determined to remove if they can obtain permission from the Legislature to sell their lands.

The remnant of this once powerful tribe is reduced to about 200 souls. They possess upwards of 5000 acres of land, the most of which is of an excellent quality, and cannot be alienated without permission from the State Legislature.

From the Connecticut Gazette, No. 1504, (New London,) September 6, 1792.

The trade and manufactures of this state, (says a correspondent,) have long struggled under the want of a capital proportioned to the industry and enterprise of its citizens;—that want may now be supplied by means of the banks established at New London and Hartford. Every useful occupation and every industrious citizen may be assisted with money, as circumstances may require and justify: but in order to carry the means of the bank into the fullest effect, their bills must circulate among all ranks of people freely as money: it behoves, therefore, every well wisher to the prosperity of the community, to give credit to the notes of the bank. Although trade may more immediately, and in a more considerable degree, be benefitted by these institutions, yet every other branch of business will come in for a proportionable share; a flourish-

ing commerce dispenses blessings to all within the sphere of its operations, and adds to the value of the landed interests, as well as the articles in which it principally deals. The notes of the banks will be found more convenient for a circulating medium, and may be kept by the owners in greater safety, than hard money, and none need be apprehensive of any deception in them, as the promise on the face of them will be carefully and punctually fulfilled.

New London, Dec. 29, 1797.

On Saturday last, at 1 o'clock, P. M. a smart shock of an earthquake was felt in this city, accompanied with a report that broke upon the ear like the explosion of a heavy cannon at a short distance. The sound and motion continued but a few moments. In the street near the meeting house in Norwich, two fissures, one or two inches wide, and several rods long, were made in the earth, within twenty rods of each other.

New London, Sept. 5, 1798.

At length our city, for so many years remarkable for salubrity of air and the healthiness of its inhabitants, is dressed in shrouds and sackcloth. A deleterious fever has prevailed here for about ten days; the first victim to it was Capt. Elijah Bingham, whose death we mentioned in our last, together with three children—since which there have died twenty-one, sixteen of whom died by the fever. The contagion, if there be any, appears confined to Bank street, from the Market to Golden Hill street; those who have died either lived in, kept store, or were particularly connected in that street.

Yellow Fever in New London.

The following account of the yellow fever in this place, in 1798, is extracted from a pamphlet, written and printed at New London, by Charles Holt, immediately after the fever had subsided.

On the 26th of August, (1798,) the inhabitants of New London were somewhat alarmed by the death of Capt. Elijah Bingham, keeper of the Union Coffee House, after an illness of but two or three days. His funeral was immediately attended, it being Sunday, by the Union Lodge of Free Masons, of which he was a member, and an unusual number of people, whom the solemnity of the ceremony and esteem for the deceased drew together. It was, however, remarked at the time, that if the extreme hot weather continued, it would not be long before the burying ground would be so thronged again: and the remark was too fully verified. Two days after, three persons in the neighborhood died of the same disease, which was soon ascertained to be the dreadful *Yellow Fever*. The citizens now perceived their danger and removed from the infected part; the corporation and civil authority left their posts, and a *health committee*, consisting of John Woodward, John Ingraham, James Baxter, and Ebenezer Holt, Jr. were appointed to attend the burial of the dead, the care of the sick, and relief of the indigent. The sickness rapidly increasing, the next week witnessed no less than twenty five deaths, among whom were some of the most respectable characters belonging to the city or state, and the wife, a son, and a daughter of the late Capt. Bingham, in the vicinity of whose house the contagion was yet principally confined. This very great mortality among so small a number of people, filled the citizens with consternation: the dead were interred with all possible speed, and without the least formality, the hearse being commonly attended only by the sexton and two or three black assistants, one of whom died of the prevailing disease.

Laying out the corpse, ornamenting the coffin and covering it with a pall, &c. were generally dispensed with, every consideration giving way to the important duty of consulting the safety and convenience of the survivors. The country people naturally shunned the pestilential air of the devoted city, and the adjoining towns took measures for preventing our flying inhabitants from spreading the infection.

From this period the progress of the disease was varied according to the favorable or unfavorable changes in the air, the effects of which were visibly perceived on the persons of the sick, and the number of new cases which occurred. That portion of the city where it first appeared being almost entirely abandoned, it gradually extended into most of the compact parts within the distance of an hundred rods; but decreased in the violence of its symptoms and frequency of its attacks, as the season advanced, and by the 14th of October, it had so far abated that the citizens began to return to their dwellings and resume their usual occupations.

The mortality within the aforesaid limits, (viz. one hundred rods north and south from the market,) was equal to that among the same number of inhabitants, in any part of Philadelphia in the same length of time. In Bank street below the market, to the south corner of Golden-hill street, of those who did not remove from the spot, but two persons over twelve years of age escaped the infection. In this space, excluding the buildings which were evacuated and the people who fled, are 15 houses, shops and stores, in which lived or were employed 92 persons, of which 90 had the fever, 33 died, and 2 escaped entirely. The deaths above the market were not in so great proportion. By October 28th, the fever had nearly disappeared after having in about eight weeks cut off 81 persons.

“The weather for some weeks previous to the fever, was uncommonly dry and warm, light breezes and calms had long prevailed, no rain had fallen for two months, vegetation was parched, wells were dried, and the crops within a few miles distance, were cut off. The mercury in Fahrenheit’s thermometer frequently stood in the shade at 96 degrees, and several times at 98, a height never before witnessed here; and sea captains complained that they never felt so much inconvenience from the warmth in the West Indies.”

Dr. Webster, in his history of epidemic and pestilential diseases, (Vol. 1, 338, says, “considerable quantities of salted fish, which lay in certain stores, which had not been well cured with the usual quantity of salt, became fetid and offensive.” This was opened and spread in the street where the disease first appeared. “It is probably true, (says he,) that the bad state of the fish was partly owing to a previous bad state of the air: although it afterwards became a *cause* of a *worse state* of air. What seems to put this beyond doubt, is the unusual number of musketoes, in the adjacent country, and multitudes of flies of uncommon size, exceeding what had been before observed.”

“Early in the sickness all the physicians, but one who was too much indisposed to practice, and another, Dr. Rawson, who was violently attacked with the fever, deserted the city, excepting *Dr. Samuel H.*

P. Lee, to whose lot it fell alone and unassisted, to combat the fury of this dreadful pestilence such was the difficulty in procuring nurses and watchers, that some of our most opulent citizens were seen going from house to house with money in their hands, offering any price for assistance even for a single night in vain."

New London, April 10, 1799.

So long and severe a winter as the one hardly now past, has not been known in the memory of the oldest man living. Its injurious effects have been felt in a particular manner by the inhabitants of some of our neighboring towns. Pinched by the scarcity of fodder and the uncommon coldness of the weather, the cattle have died in abundance. Some farmers lost twenty head in a very short time. In Lyme it is supposed one fourth of the stock perished. Stonington has suffered in an equal degree, and Montville and Colchester considerably, with the prospect of a still further loss.

From the Connecticut Gazette, No. 1869, (New London) Sept. 4, 1799.

This city during the summer now closed, has enjoyed its usual mild and salubrious atmosphere; and in many respects has the season been distinguished from the pestilential summer of 1798. In that summer, from the 28th of July to the 1st of September, the heat was intense; the mercury in Fahrenheit's thermometer, placed in the open air, stood at mid-day from 86° to 93°, with the exception of five days in which it stood at 82°, and one day at 78°, which was its greatest depression. There was only one thunder shower during this period. The earth being parched under excessive droughts, vegetation failed early in August, and many trees shed their leaves. It was noticed that the air was remarkably unelastic, especially in that part of the city where the desolating sickness prevailed. Our usual fresh southwesterly winds left us, and we had only very light winds in the day. Scarcely a day occurred for seven weeks, in which a person might not have carried a lighted candle through the streets. The nights, in gloomy succession, brought a deadly calm, attended with sultry heat. Such a season as that of 1798, is not in the recollection of the oldest citizen.

NORWICH.

NORWICH was first settled in 1660. During the wars between Uncas and the Narragansetts, Uncas was closely besieged in his fort near the Thames, until his provisions became nearly exhausted and he with his men were on the point of perishing by famine or sword. Fortunately he found means of giving intelligence to the scouts who had been sent out from Saybrook fort. By his messengers, he represented the great danger the English would be in, were the Narragansetts suffered to overpower the Mohegans.

"Upon this intelligence, one Thomas Leffingwell, an ensign at Saybrook, an enterprising, bold man, loaded a canoe with beef, corn and peas, and under the cover of night paddled from Saybrook into the Thames, and had the address to get the whole into the fort. The enemy soon perceiving that Uncas was relieved, raised the siege. For this service, Uncas gave Leffingwell a deed of a great part, if not the whole town of Norwich. In June, 1659, Uncas, with his two sons, Owaneke and Attawanhood, by a more formal and authentic deed, made over to said Leffingwell, John Mason, Esq., the Rev. James Fitch and others, consisting of thirty five proprietors, the whole of Norwich, which is about nine miles square. The company at this time gave Uncas and

his sons about £70, as a further compensation, for so large and fine a tract.”*

In the spring of 1660, the Rev. James Fitch, with the principal part of his congregation, removed from Saybrook to Norwich, and began the settlement of the town. Three or four planters joined them from New London, and two or three from the towns of Plymouth and Marshfield, in Massachusetts. In 1663, the general court ordered that the deed should be recorded. The limits were afterwards ascertained, and the town received a patent of the whole. The southern boundary of Norwich did not meet Uncas' deed, the northern boundary of New London, by nearly three miles. This strip of land became a bone of contention between individual whites, and between the English and Mohegans, instigated by some of the disaffected English, in after years. It is now included in the first society in Montville, in the eastern part of what is now called Mohegan.

“In 1697, the Rev. Gurdon Saltonstall, of New London, preached an election sermon at Hartford, and for his reward, the Legislature ceded to him some hundred acres at the west end of this strip. Ancient deeds mention being bounded by, or being a part of the Saltonstall land; and some of the oldest men pretend to point out some of the old bounds, &c. The first English house erected on this strip was in the days of George (?) Winthrop, after the Charter. It was of stone. The site is still visible, as also the well and old pear trees, said to be the descendants of the original stock, but by their antique appearance, they are very original. The house is said to have been the first English house erected on the route, by land, through the wilderness from New London to Wethersfield. It was in the vicinity of Uncas' chief fortress, on Fort Hill, in Mohegan, about one mile and a half westerly. Many wonderful stories are related to this day about what happened to and near this house in days of old.” The tract is now within the limits of Montville.

“The Mohegans were a great defense, and of essential service to the town, for many years. They kept out their scouts and spies, and so constantly watched their enemies, that they gave the earliest notice of their approach, and were a continual defense against them. For this purpose, in times of danger they often moved and pitched their wigwams near the town, and were a great terror to the enemy. Once the hostile Indians came near to the town upon the Sabbath, with a design to make a descent upon it; but viewing it from an eminence, and seeing the Mohegan huts, they were intimidated, and went off without doing the least damage.”

Norwich is now bounded n. by Franklin, e. by the Shetucket and Thames rivers, which separate it from Lisbon and Preston, s. by Montville, and w. by Franklin and Bozrah. The township has an average length from north to south of 7 miles, with a medium breadth of about three miles. The surface of the town is diversified by hills and valleys; the prevailing soil is a dark colored gravelly loam, generally strong and fertile.

* Trumbull's History of Connecticut.

Eastern view of the central part of the town of Norwich.

The above is a representation of the Congregational church, the old Court House and Union Hotel, in the central part of the town of Norwich, about two miles northwest of Norwich city. There are perhaps about 200 houses, situated on a number of pleasant rural streets, within a short distance from the church. This part of Norwich is called *the town*. The old court house is the first building seen on the left of the engraving; it formerly stood on the green, in front of the meeting house. Within a year or two past, the courts have been held at Norwich city, and it is intended to use this building for a high school. Immediately back of the church rises a rocky eminence, from which is a fine prospect of the surrounding scenery. During the Revolutionary war, a powder house stood on the summit of this elevation, which contained a number of tons of gunpowder. The building, which was of wood, was set on fire; the whole quantity of powder exploded at once, and did considerable damage to the houses in the vicinity. The firing of this building was supposed to be the act of some person unfriendly to the American cause; when first discovered, it was about the size of a hat crown. To attempt to put it out was deemed too hazardous an undertaking, until a colored man, induced by the offer of a considerable reward, made the attempt. As he was carrying up water to extinguish the flames, having gone about half way up the hill, the building blew up, leaving scarcely a single vestige to show where it stood; the colored man, however, was entirely unhurt. Westville, (formerly called *Bean Hill*,) is that section of Norwich, lying westward of the center, and is built principally on one street, the central part of which is about one mile westward of the Congregational church in the center. In this part of the town, about two miles west from the Congregational church, on the Yantic, where there is now a woolen factory, was formerly the site for iron works, at which Mr. Elijah Backus, a very ingenious mechanic, manufactured a number of cannon for the Revolutionary army; this he effected by welding together pieces of iron.

Norwich City is situated at the head of navigation of Thames river, at the point of land formed by the junction of the Shetucket and Yantic rivers, whose united waters constitute the Thames. The main part of the city is built on the southern declivity of a high and rocky hill: the houses are built in tiers, rising one above another. The city, as it is approached from the south, presents one of the most beautiful, interesting and romantic prospects in the state. The buildings, which are mostly painted white, appear in full view for a considerable distance down the river; these contrasted with the deep green foliage covering the rocky and elevated banks of the river, give a picturesque variety to the scene, forming on the water a delightful avenue to the city. There are in this city, (or, as it was formerly called, Chelsea or Norwich Landing,) 4 banks, a court house, and town hall. A high school for boys, and a female academy, in which the higher branches of education are taught, have been in operation for a considerable time, and are in flourishing circumstances. About a mile eastward of the Landing, is situated the flourishing village of Greenville, at the eastern extremity of which a dam has been constructed across the Shetucket, which will it is calculated furnish sufficient water power to carry 60,000 spindles: four or five large factories, and perhaps 40 or 50 dwelling houses, are, or are about to be built. Among the factories there is perhaps the most extensive paper mill in the state, owned by the Chelsea Manufacturing Company. There are also two other paper mills near the falls, which do an extensive business; one of which is owned by Mr. A. H. Hubbard, the other by Mr. Russell Hubbard. Large quantities of paper are manufactured for the New York market. The first paper manufactured in Connecticut was made in this town, by Col. Christopher Leffingwell. There are, at and near the falls, 9 or 10 establishments for manufacturing purposes.

Besides these, and those at Greenville, there are some others in other parts of the town. The principal manufactures are those of cotton, paper and woollens. It is believed that in respect to its water privileges, Norwich is considered to be the second town in New England. There are 8 houses of worship in the town—3 for Congregationalists, 2 for Methodists, 1 Episcopal, 1 Baptist, and 1 for Universalists. Norwich City is 13 miles N. of New London, 38 s. e. from Hartford, 38 s. w. from Providence, and 50 N. E. from New Haven. Lat. $41^{\circ} 34'$; long. $4^{\circ} 55'$ east from Washington. The population of Norwich in 1830 was 5,179; of which 3,144 were in the city limits.

The following engraving shows the appearance of some of the principal manufacturing establishments at the falls of the Yantic, at the head of a cove which sets up about one mile from the Thames. Above the cove, "the bed of the river consists of a solid rock, having a perpendicular height of ten or twelve feet, over which the whole body of water falls in an entire sheet upon a bed of rocks below. The river here is compressed into a very narrow channel, the banks consisting of solid rocks, and being bold and elevated. For a distance of 15 or 20 rods, the channel or bed of the river has a gradual descent, and is crooked and covered with pointed rocks. The rock, forming the bed of the river at

S. E. view of the Factories at Yantic Falls, Norwich.

the bottom of the perpendicular falls, is curiously excavated, some of the cavities being five or six feet deep, from the constant pouring of the sheet of water for a succession of ages." At the bottom of the falls there is the broad basin of the cove, where the enraged and agitated element resumes its usual smoothness and placidity, and the whole scenery about these falls is uncommonly beautiful and picturesque. A short distance north of the building represented in the engraving, on an elevated bank, on the northern edge of a grove, is the royal burying ground of the Uncases. It is in contemplation to erect a monument to the memory of Uncas at this place. The foundation stone is already laid. President Jackson in his tour to the New England states, assisted in the ceremony of laying it. A number of the monuments of the royal line of the Uncases are still remaining. The following are copied from those that remain :

"Here lies ye body of Pompi Uncas, son of Benjamin and Ann Uncas, and of ye royal blood, who died May ye first, 1740, in ye 21st year of his age."

"Here lies Sam Uncas, the 2d and beloved son of his father, John Uncas, who was the grandson of Uncas, grand sachem of Mohegan, the darling of his mother, being daughter of said Uncas, grand sachem. He died July 31st, 1741, in the 28th year of his age."

"In memory of Elizabeth Joquib, the daughter of Mahomet, great grand child to ye first Uncas, great sachem of Mohegan, who died July ye 5th, 1750, aged 33 years."

The following inscription is said to have been on a monument formerly standing here in memory of Samuel Uncas :

For beauty, wit, for sterling sense,
 For temper mild, for eloquence,
 For courage bold, for things waureegan,*
 He was the glory of Mohegan—
 Whose death has caused great lamentation
 Both to ye English and ye Indian nation.

* These lines are said to have been written by Dr. Tracy of Norwich. *Waureegan* signifies clothes, household furniture, &c. of a costly description.

“In 1826, a descendant of Uncas, by the name of Ezekiel Mazeon, aged 27, was buried in Norwich in the Indian burying ground. The funeral was attended by the Rev. William Palmer, who made a short but appropriate address to the remnant of the tribe assembled on that occasion. After the funeral rites were performed, Mrs. Goddard, the wife of the Hon. Calvin Goddard, in whose immediate vicinity the burial yard lies, (he being absent,) invited the tribe, a score or two, to partake of a collation.”

In the following year, 1827, (says Dr. Holmes,) a discovery was made of Indian relics, too illustrative of Indian customs to be left unnoticed. A note of Mrs. Huntington, of Norwich, accompanying one of these relics, presented to me this year, (1828,) illustrates the entire subject. “If we admit Indian cemeteries as proofs of local partialities, we should judge that Norwich was a favorite residence of the ancient Mohegan tribe; for their royal burying ground is in the center of the city. In the eastern border of their reserve is a fine stream, called Trading Cove brook, on which is the ‘Shantup burying ground.’ the largest of their nation. On the 16th of October, 1827, the Rev. Mr. Palmer of this city was invited to attend the funeral of an Indian child, which was to be deposited in that spot. In approaching the ground, the relics of two Indians, and also two spoons, were seen lying beside it. Expressing a wish to obtain them, Mr. P. received no immediate answer, until a youth of their company had whispered something in every ear, from the oldest to the youngest. At the close of the exercises, with great formality, the young Indian replied, ‘Your request is granted.’ In answer to the inquiry why *two* skeletons were found in the ground, an old woman replied, it was an Indian and Squaw; and informed him farther, that according to their custom, the bodies were deposited in an upright position, within a circular grave, and a pot of succotash between them, the fragments of which were found. The decayed stump of a large tree covering the relics, indicated the *antiquity* of the grave.”

In the eastern part of this town is a place called *Sachem's Plain*. This spot is rendered memorable by the battle between Uncas and Miantonimoh, the sachem of the Narragansetts. The army of Miantonimoh was routed, he taken prisoner and afterwards executed and buried here. “He was buried on the spot where he was slain. But a few years since a large heap of stones, thrown together by the wandering Indians according to the custom of their country, and as a melancholy mark of the love the Narragansetts had for their fallen chief, lay on his grave; but the despicable cupidity of some people in that vicinity, has removed them to make common stone wall, as it saved them the trouble of gathering stones for that purpose. The spot of his sepulture is, however, yet known.”*

The following account is taken from Dr. Trumbull's History of Connecticut.

* Third volume, third series Massachusetts Historical Collections, p. 135.

"Miantonimoh, without consulting the English, according to agreement, without proclaiming war, or giving Uncas the least information, raised an army of nine hundred or a thousand men, and marched against him. Uncas's spies discovered the army at some distance and gave him intelligence. He was unprepared, but rallying between four and five hundred of his bravest men, he told them they must by no means suffer Miantonimoh to come into their town; but must go and fight him on his way. Having marched three or four miles, the armies met upon a large plain. When they had advanced within fair bow shot of each other, Uncas had recourse to a stratagem, with which he had previously acquainted his warriors. He desired a parley, and both armies halted in the face of each other. Uncas gallantly advancing in the front of his men, addressed Miantonimoh to this effect, "You have a number of stout men with you, and so have I with me. It is a great pity that such brave warriors should be killed in a private quarrel between us only. Come like a man, as you profess to be, and let us fight it out. If you kill me, my men shall be yours; but if I kill you, your men shall be mine." Miantonimoh replied, "My men came to fight, and they shall fight." Uncas falling instantly upon the ground, his men discharged a shower of arrows upon the Narragansetts; and, without a moment's interval, rushing upon them in a furious manner, with their hideous Indian yell, put them immediately to flight. The Mohegans pursued the enemy with the same fury and eagerness with which they commenced the action. The Narragansetts were driven down rocks and precipices, and chased like a doe by the huntsman. Among others Miantonimoh was exceedingly pressed. Some of Uncas's bravest men, who were most light of foot, coming up with him, twitched him back, impeding his flight, and passed him, that Uncas might take him. Uncas was a stout man, and rushing forward, like a lion greedy of his prey, seized him by his shoulder. He knew Uncas, and saw that he was now in the power of the man whom he had hated, and by all means attempted to destroy; but he sat down sullen and spake not a word. Uncas gave the Indian whoop and called up his men, who were behind, to his assistance. The victory was complete. About thirty of the Narragansetts were slain, and a much greater number wounded. Among the latter was a brother of Miantonimoh and two sons of Canonicus, a chief sachem of the Narragansett Indians. The brother of Miantonimoh was not only wounded, but armed with a coat of mail, both which retarded his flight. Two of Miantonimoh's captains, who formerly were Uncas's men, but had treacherously deserted him, discovering his situation, took him, and carried him to Uncas, expecting in this way to reconcile themselves to their sachem. But Uncas and his men slew them. Miantonimoh made no request either for himself or his men; but continued in the same sullen, speechless mood. Uncas therefore demanded of him why he would not speak. Said he, "Had you taken me, I should have besought you for my life." Uncas, for the present, spared his life, though he would not ask it, and returned with great triumph to Mohegan, carrying the Narragansett sachem, as an illustrious trophy of his victory.*

Uncas conducted Miantonimoh to Hartford. Here his mouth was opened, and he plead most earnestly to be left in the custody of the English, probably expecting better treatment from them than from Uncas. He was accordingly kept under guard at Hartford, till the meeting of the commissioners at Boston. After an examination of the case, the commissioners resolved, "that as it was evident that Uncas could not be safe while Miantonimoh lived; but that, either by secret treachery or open force, his life would be continually in danger, he might justly put such a false and bloodthirsty enemy to death." They determined it should be done out of the English jurisdiction. They advised Uncas that no torture or cruelty, but "all mercy and moderation be exercised in the manner of his execution."

"Immediately upon the return of the commissioners of Connecticut and New Haven, Uncas with a competent number of his most trusty

* This account is taken from a manuscript of Mr. Hide of Norwich, from Governor Winthrop's journal, and from the records of the United colonies, in one or other of which, all the facts are ascertained. The manuscript represents Miantonimoh as having 900, and Uncas 600 men. The records of the United colonies represent, that Miantonimoh had 900 or 1000 men, and that Uncas had not half so many. Governor Winthrop's account is essentially the same.

men, was ordered to repair forthwith to Hartford. He was made acquainted with the determination of the commissioners, and receiving his prisoner, marched with him to the spot where he had been taken. At the instant they arrived on the ground, one of Uncas's men, who marched behind Miantonimoh, split his head with a hatchet, killing him at a single stroke. He was probably unacquainted with his fate, and knew not by what means he fell. Uncas cut out a large piece of his shoulder and ate it in savage triumph. He said, 'It was the sweetest meat he ever ate, it made his heart strong.'

"The Mohegans, by the order of Uncas, buried him at the place of his execution, and erected a great heap or pillar upon his grave. This memorable event gave the place the name of Sachem's Plain.† Two Englishmen were sent with Uncas, to witness that the execution was done, and to prevent all torture and cruelty in the manner of its performance. Connecticut and New Haven, agreeably to the direction of the commissioners, sent a party of soldiers to Mohegan, to defend Uncas against any assault which might be made upon him, by the Narragansetts, in consequence of the execution of their sachem."

The following is copied from a monument in the ancient burying ground in Norwich town.

Here lyes inter'd ye remains of Deacn. Christopher Huntington of Norwich, November 1st, 1660, and ye first born of males in ye town. He served near 40 years in ye office of a deacon, and died April ye 24th, 1735, in ye 75th yr. of his age. Memen-to mori.

The following are from the new yard in Norwich city.

Joseph Kinney, son of Newcomb and Sally Kinney, entered the U. S. army a Lieutenant at the commencement of the war with Great Britain, 1812. He was engaged in various skirmishes, besides six sanguinary battles; the last of which was at Lundy's Lane, Bridgewater, July 25th, 1814, where he was killed, commanding the 2d division of the 35th Regiment U. S. Infantry aged 27 years. Buried at Buffalo, N. Y.

In memory of Mrs. Thankful, relict of Capt. Moses Pierce, who died Feb. 3, 1821, aged 92. She was a mother in Israel, and the first member of the Methodist Episcopal church in this city, who like Lydia first heard the preachers, and then received them into her house.

From the Norwich town Records.

WHEREAS Owaneke, the Indian Sachem and Soane of Uncas, hath desired of the town of Norwich a yerll of lande lyinge near Showtucket rivere, the town hath appointed and ordered Thomas Tracy, Thomas Leffingwell and John Post to layout three hundred acres of land, and they have accordingly attended their order, one end of the land abutting westerly upon the land of James Fitch, and the other end easterly abutts upon the commons, and the one side southerly abutts on Queenebaug Rivere, and the other side northerly on the commons, the said men have measured and marked out the said land, and the towne doth give unto Owaneke this land on conditions as followeth:—first, the towne doth freely give unto Owaneke and to his heires but so as y't Owaneke nor any of his heires, have power or any liberty to sell it, or by any other means to allienate to any others, onely if Owaneke hath no natrall heire to succeed him, and the Indians who were his or her heires subjects shall desire to abide and inhabite upon the land, they shall then have such a Sachem placed and set over them as the towne of Norwich and the Showtuck Indians shall agree, and if these par-

† Manuscript of Mr. Hide.

ties cannot agree, the court of Connecticut shall determine who shall be their Sachem, the towne of Norwich, and the said Indians being bound commit it to the—. . . Its further ingaged said court by Owaneko that the lands which the Indians shall . . . by planting of corn or otherwise they must secure themselves by fencing and that if any damage be done by the English of the town of Norwich, the English are not bound to make satisfaction for the said damages. Its further ingaged by Owaneko, that he nor his Indians have any liberty to keep hogs but what they do keep in their own lands, but no liberty to go upon the lands common to the English. Its further ingaged by Owaneko that if any of his subjects, his Indians, do any wrong to the town of Norwich, or any of the inhabitants of the said town, by killing their cattle or trespassing upon them in any such way, or acting as in accordance to the laws of the English judged to be a trespass or wrong, the said Owaneko doth ingage to make legall satisfaction if there be legall prooffe of the said wrong: and that if upon sufficient experience its manifest that the said Owaneko will not be responsible according to wholesome order, but he or his men doe become refractory, and will not reform such notorious disorderly practices specified, nor make satisfaction for the said damages and wrongs, this—Owaneko shall then forfeit the said lands into the hands of the towne of Norwich:—Its further engaged by Owaneko that whereas as he hath received these lands by gift from the town of Norridg, the towne does order y't he shall forbear on the Sabbath day from working, hunting, fishing or any servile labour, and if any of his subject be found guilty of this violation, they shall be lyable to be punished, and to these said and above specified particulars the said Owaneko doth bind and ingagde himself, his heirs, and lawfull successours, this two and twentieth of March, Annd 1669.

OWANEKO,
his mark.

Witnesses—*Mr. James Ffitch, Mr. John Mason, Junior.*

No. 1.

No. 2.

The above is a fac simile of the signatures or marks of Uncas, great sachem of the Moheagans, and of his son Owaneko. They are copied from the ancient Records of the town of Norwich. No. 1, is that of Uncas. No. 2, is that of Owaneko.

Extracts from the Records of Acts and Grants, &c. of the Town of Norwich.

Voted, At a Towne Meeting, July 1st, 1680. Granted to Captain Fitch two hundred acres of Land for his Incouragement to set up a Saw mill, and to have the benefit of the streame and timber at the place, and no others to set up a Saw mill upon the same streame to his Damage.

An Inferioe Court held at Norwich ye 19th of Sept. 1720. Present, R. Bushnell, Justice of ye peace, Saml. ffox, jur. pl pr complaint, Lettes Minor and Hannah Minor Pts. for Illegally or feloniously, about ye 6th of September, inst. take about 30 water milions which is contrary to Law, and is to his damage, as he saith, ye sum of 20s. and prays for Justice. This court having examined the case, consid'r ye evidence dont find matter of fact proved, Do therefore acquit the Dts. and consider ye Plf. pay the charge of presentar.

R. B., *Justice.*

July 26th, 1720.—Samuel Sabin appeareth before R. Bushnell, Justice, and complaineth against himself that the last Sabbath day at night, on the 3—, he and John Olmbis, went on to Wawewas hill to visit their relations, and were late home, did no harm, and he fears may be a transgression of ye Law, and if it be he is very sorry for it, and dont allow himself in unreasonable night walking.

R. B., *Justice of peace.*

At Justices Court held at Norwich, ye 27th of May, 1721, present R. Bushnell, Justice of ye peace. Henry Holland of Plainfield, being presented by the Constable of Plainfield for breach of Law, tittle Peace breaking, by saying on the 25th day of this instant May, in a tumultuous, violent, threatening manner y't he would take head of Jonatt. Tracy off his shoulders. . . . was brought before this court to be dealt

with according to Law, the prisoner pleads not guilty to ye fact—the matter fact being sufficiently prov'd against the said Henry Holland according to ye presentment—this court do therefore consider yt the said Henry Holland shall provide sufficient surety for his peaceable and good behaving until ye next County Court in New London, or if he refuse or committed to the County Goal, there to remain until he be delivered according to cover of law, and to pay the charge of his prosecution.

Cost allowed is in money.

R. B., *Justice of the peace.*

Henry Holland of Plainfield, being presented by ye constable of Plainfield for profane swearing, was brought before this court, pleads not guilty of ye fact, the fact being sufficiently proved against him, this court consider that the said Henry Holland pay a fine for his transgression of ye law to ye county treasurer of this county, the sum of ten shillings, or to sit in ye Stocks two hours, and pay ye charge of prosecution.

Cost allowed 2s. and 2d. money.

R. B., *Justice of Peace.*

Norwich ye 7th day of feb. 1722-3.—Apenanuesuck being drunk was by ye Constable brought before me R. Bushnell, Justice of ye peace to be dealt with so as the law directs.—I do sentence ye sd Apenuchsuck for his transgression of ye Law, to pay a fine of ten shillings, or to be whipt ten Lashes on ye naked body, and to pay the cost of his prosecution, and to continue in ye constable's custody till this sentence be performed. Cost allowed is 6s. and 6d.

R. BUSHNELL, *Justice of ye Peace.*

John Waterman promises to pay 6s. 4d.

Apeannchsuch having accused Samuel Bliss for selling ye sd Indian 2 pots of cider this afternoon. Mr. Samuel Bliss appeared before me ye subscriber, and acknowledged he let sd Indian have some cider, and do therefore sentence ye said Samuel Bliss to pay a fine of twenty shillings for the transgression of ye Law to be disposed of as ye Law directs.

R. BUSHNELL, *Justice.*

febe. ye 7th day, 1722-3.

June 7th, 1662.—Ordered by the Town that if any Indian shall be found drunk in this Towne he shall be forthwith apprehended by him or them that so finds him, and he shall either pay ten shillings or be whipt, the one half of the fine is for those that find him drunk and the other half for the Towne.—Voted.

Norwich, ye 23d day of March, 1722-3.—At a Justices Court, Present R. Bushnell, Justice of the Peace, upon the complaint of Pattria Tayller of New London, Servt. to Thomas Willey, of sa N. London, being freed from her master's cruelty, being very much pinched for want of food and also for want of clothing, both linen and woollens, no shoes and stockings, &c., sd Thomas Willey was summoned to appear before me, Richard Bushnell Justice of the Peace, for examination concerning ye premises, and to be dealt with as the Law directs. The complainant appeared before this court; having heard and considered the case, and finding the complainant in a miserable condition, all ye clothes she had on excepting a Riding hood and a pair of shoes and stockings she had borrowed, all the rest of her cloathing was scarce worth a shilling; they would not cover her nakedness. This Court do therefore consider the complainant shall become bound in 10s. 6d. to recognize, with a sufficient security to prosecute her complaint at ye county court to be holden at New London ye first Tuesday in June next, and to be under ye care of her uncle, Saml. Fox, ye Taxe to pay ye cost. Cost allowed is 19s. 6d.

RICHARD BUSHNELL, *Justice of ye peace.*

We, the Subscribers, being appointed by ye Towne, to search for the Towne Armes and with their Magazines of Amonition and other accotremments of war Injoynd by Law, accordingly went upon that servis, March ye 31st, 1720, and found as followeth: to Monday night, and two pair Snow shoes, at Lieut. Tracy's two Gns, at Samuel Fales' one Gun, and at Lieut. Bushnell's one Gun, and 77 pounds of Led at Lieut. Bachus's, 344 pounds of Bullets at Ens. Leffingwell's, one barrel of powder at Deacon Simon Huntington's, one barrel of powder and 31 pounds of bullets, and 400 flints at Simon Tracy's, one pair of Snoe shoes and 4 pair maugossins. We were also informed yt was formerly lent to Mr. John Leffingwell and Lieut. Bushnell 71 pound of Led, which said Leffingwell was obliged to pay in bullets ye same quantity; all the Led and bullets 523 pound.

JOHN TRACY.

SIMON TRACY.

Know all men by these presents that wee the Inhabitants of the Town of Norwich, having made choice of Hugh Calkins, Ensign Thomas Tracy, Ensign Thomas Leffingwell, Simon Huntington and William Bachus, as a committee, investing them

with full power to contract and bargain with John Elderkin and Samuel Lathrop, concerning the building of a meeting house, the sd committee having agreed with the sd workmen with respect to price and payment, both for in specie, wee the said Inhabitants of Norwich jointly and severally do hereby engage and bind ourselves and our successors to make the several payments according to the obligation of and in specie, and in case any neglect shall be hereof to secure the sd committee from any detriment or damage that may thereby accrue. Acted and Voted, 29th April, 1673.

January the 10th, 1768-9.—Att a Town Meeting, The Inhabitants grant Liberty to the present Townsmen to purchase and procure at their discretion, so many drums, holbards, (and one pair collours,) as is necessary for the Train bands in the Town, and to gather so much of the money now due to the Town, and therewith to pay for the above mentioned things.

EXTRACTS FROM NEWSPAPERS.

Norwich, November 12th, 1773.

The season has been so remarkably mild that about a fortnight since a mess of green peas were pickt at Norwich, produced from seed of this years growth; and at Fairfield, about the same time, near a pint of strawberries were gathered in a field (from vines which had produced a crop at the usual season) equal in color, and of as agreeable a taste and flavor, as those that are gathered in June.—*Connecticut Gazette.*

Norwich, December 15, 1774.

We hear that Mr. Samuel Gager of this town, from a laudable sense of Freedom, and a conscientious regard to justice, has lately liberated three faithful slaves; and as a compensation for their past services, leased them a valuable Farm upon very moderate terms.

We also hear that Mr. Jonathan Avery of this town, has made free an able and industrious negro man, upon the same noble principles.

Norwich, January 1st, 1778.

Last Sabbath there was a contribution in the several parishes in the Town for the non-commissioned Officers and Soldiers in the Continental army that belong here. When there was collected 346 pair of Stockings, 227 pair of Shoes, 118 Shirts, 78 Jackets, 48 pair Breeches, 9 Coats, 22 Rifle frocks, 19 Handkerchiefs, and £258 in money; all of which is forwarded on to the army: Also a quantity of Pork, Cheese, Wheat, Rye, Indian Corn, Sugar, Rice, Flax, Wood, &c. &c., engaged to receive and distribute the same to the needy Families of the Officers and Soldiers. The whole value of this donation, at a low estimate, will exceed £1400.

Norwich, September 12, 1787.

Lately died at his wigwam in Powaug, (New Norwich,) old *Zachariah*, Regent of the Mohegan tribe of Indians, in the 100th year of his age. It is said, that in his younger years he was greatly addicted to drunkenness, but that for near 40 years past he has entirely abstained from the use of all spirituous liquors.

Norwich, December 4th, 1792.

On Thursday evening last, a young man by the name of Cook, aged 19, was instantly killed in this town by the discharge of a swivel. The circumstances as near as we can recollect, were as follows:—In celebration of the day, (being Thanksgiving,) a large number of boys had assembled, and by pillaging dry casks from the stores, wharves, &c. had erected a bonfire on the hill back of the Landing, and to make their rejoicings more sonorous, fired a swivel several times; at last a foolish fondness for a loud report induced them to be pretty lavish of their powder—the explosion burst the swivel into a multitude of pieces, the largest of which, weighing about seven pounds, passed through the body of the deceased, carrying with it his heart, and was afterwards found in the street 30 or 40 rods from the place where it was fired. While the serious lament the unhappy accident, they entertain a hope that good may come of evil, that the savage practice of making bonfires on the evening of Thanksgiving, may be exchanged for some other mode of rejoicing, more consistent with the genuine spirit of Christianity,

BOZRAH.

BOZRAH, formerly New Concord, originally in the bounds of Norwich, was incorporated a town in 1786. Some of the first settlers in this town were of the names of Waterman, Fox, Hough, and Crocker, Fox and Hough located themselves about the center of the place, and Waterman in the eastern part. Its average length is four and a half miles, and its average breadth four. It is bounded n. by Franklin, e. by Norwich, s. by Montville, and w. by Lebanon and Salem. The township is uneven, consisting of hills and valleys; "its geological character is granitic, and the soil is a gravelly loam, which is generally rich, warm, and fertile." There are three houses of worship in the town; 1 Congregational, 1 Baptist, and 1 Methodist. There is also a Baptist meeting house which stands on the dividing line between this town and Colchester. The central part of the town is 14 miles from New London, and 33 from Hartford.

East view of Fitchville, Bozrah.

There are two cotton manufacturing villages in the limits of this town, Bozrahville and Fitchville, both situated on Yantic river. Bozrahville is situated on and near the dividing line between this town and Lebanon, and is about eight miles from Norwich city.

The above is an eastern view of Fitchville, a little more than five miles from the Landing in Norwich city, on the Hartford turnpike. The principal part of the village was built by Nehemiah H. Fitch, Esq. and his brothers in 1832. The Bozrah post office is in this village.

The name of this town, (Bozrah,) is said to be derived from the following occurrence. In ancient times, an aged, plain sort of a man lived where Fitchville is now built: though a respectable inhabitant, he was not very remarkable for quoting scripture correctly. On one occasion,

in quoting from Isaiah the passage "Who is this that cometh from Edom, with dyed garments from Bozrah?" &c. he stated that the *prophet Bozrah* said thus and so. Mistakes of this kind are not easily forgotten: the old gentleman was ever afterwards called the *Prophet*, and the place of his residence *Bozrah*; and when the town was incorporated, it was thought advisable to retain the name by which the place was generally known.

The following account of a remarkable hail storm which took place in this town, in July, 1799, is taken from the Connecticut Journal, copied from the Connecticut Gazette.

Bozrah, Monday, July 15, 1799.

On Monday, July 15th, the inhabitants of the southern part of Lebanon, and of the towns of Bozrah and Franklin adjoining, experienced the most awful and devastating storm of wind, attended with hail and rain, thunder and lightning, probably ever known in our county. About five o'clock, P. M. a dark angry cloud gradually arose from the south; it continued increasing and gathering blackness and rapidity of motion as it rose. In about half an hour after, a cloud of a brass or flame color, seemed to roll up in front of it, like a column of smoke, which presently overspread it, growing brighter and appearing more wild and agitated. At this time an extensive black cloud before unperceived, rose along from the N. W. to S. W. similar to the first, and in a little time formed a junction with it, when they directly shot their united summits high in the air, and the whole hemisphere by six o'clock was covered with almost the darkness of night, emitting sharp forked lightning, followed with heavy thunder. A calm of a few minutes succeeded, while the birds and beasts guided by instinct, fled for refuge, as portending some great calamity. The wind with a distinct roar soon began to blow with great violence, and increased almost to a hurricane: when astonishing to behold, hail stones of a prodigious size, two and three inches in diameter, were driven with almost the force of grape shot, upon every thing in its course; they were at first scattering, but in a moment came thicker and larger, until they fell in a complete shower of ice, so great as to prevent an object from being distinguished at the distance of two or three rods. Directly, scarce an inch of glass was left in the windows next the storm, and in some instances the sashes were broken; shingles were split and beat off the roofs of houses and barns, and vegetation almost wholly laid waste by the fury of the hail; while the wind overturned trees, unroofed, removed, or destroyed barns and fences. Every thing seemed in confusion and uproar, and men and beasts were silent with astonishment. This scene lasted according to different judgments, ten, fifteen, and twenty minutes, though most agree that the greatest discharge of hail fell in a shorter time. When the hail ceased, a shower of rain more abundant if possible, immediately followed; and collecting, ran with violence, swept the hail into large waves, and the ruins into heaps, and bore them away promiscuously to the torrents and low grounds, presenting a most singular and melancholy sight. After an hour had abated, and the sun just setting, broke through the clouds and afforded a prospect dreary and gloomy beyond description. The earth seemed almost desolate and a waste. The poor beasts were objects of the first attention: the cattle were found alive, though sadly bruised and wounded, the backs of cows were bloody, legs of horses cut and swollen! when the smaller animals suffered much more: some pigs of four months old, with sheep, were killed, numbers of geese, turkies, &c. exposed, were beat to death: birds are daily found in large numbers, in the fields and gardens, dead and maimed: buildings and fences are seen bruised to such a degree that they will long remain standing proofs of the violence and size of the hail. * * * * * The horrors of the scene and the ravages of the storm are truly indescribable. Many of the sufferers can only compare them with their ideas of the day of judgment. The hail stones were so large as to be taken for the falling of bricks from the chimney upon the roofs of the houses. After the rain, which must have washed them, they were carefully examined in different places, and found to measure, some four and a half inches by five and a half in circumference, others six inches, some six inches by nearly seven; they are generally compared by spectators to the full size of hen's and geese eggs. Banks of hail five or six inches deep remained on the Saturday and Sunday following, and some measured then three and a half inches round; they were generally more flat than round, with ragged edges. The course of the storm was chiefly from the S. W. to the N. E. though sometimes the hail came from the south, and then again nearly from the west; windows were broken on

three sides of houses. It run much in veins, damaging only some fields, and totally destroying others adjoining. The hail extended nearly four miles in width, where it was dreadful: it grew wider in Franklin, which is to the east, and seemed to spend itself there, ending in rain beyond that place. It was doubtless the same cloud which passed over Litchfield county, &c. scattering its hail through the State, even to the mouth of the Connecticut River, which united with the other in the south, took this direction, and here spread its most distinguishing horrors. 'Tis considered almost miraculous by the people, that amidst all this distress, the lives of men and beasts have been wonderfully preserved. Only two or three men have been knocked down, and one or two children, one of which, 14 years old, was so beaten as to be deprived of reason for two days."

COLCHESTER.

THE settlement of Colchester began about 1701. In 1698 the Legislature enacted that a new plantation should be made at Jeremy's farm. It was determined that it should be bounded southerly on Lyme, westerly on Middletown, and easterly on Norwich and Lebanon. This was most commonly called the plantation at Twenty-mile river, and was originally within the limits of the county of Hartford. Some of the principal planters were the Rev. John Bulkley, Samuel Gilbert, Michael Taintor, Samuel Northam, John Adams, Joseph Pomeroy, and John Loomis.

Colchester is bounded n. by Hebron and Marlborough, w. by Chatham, e. by Lebanon, and s. by East Haddam and Salem. Its average length from east to west is about 9 miles, and its breadth about 4, comprising an area of about 43 square miles. The face of the township is generally uneven, being hilly, and in some places somewhat rough and stony. The prevailing soil is a gravelly loam, tolerably strong and fertile. Iron ore of the best quality has been recently found in this town; the beds apparently are inexhaustible; the best bed is about one mile n. w. of the Congregational church. There are three houses of worship, 2 for Congregationalists and one for Baptists. Westchester society is possessed of a fund sufficient for the support of the ministry, and also a free grammar school for two thirds of the year.

In the first located society, there is a pleasant village of perhaps 40 or 50 houses, having an elevated and healthful situation. The following engraving shows the Congregational church and Bacon Academy, situated on the western side of the open green, in the center of the village. The small one story building with a cupola, seen on the left, is the conference house, used for holding religious meetings. The school for colored children is seen north of the church, under the trees; the hill seen in the distance, is called Bulkley Hill, between which and the village is a deep valley. Bacon Academy is so called from Mr. Pierpont Bacon, its benefactor and founder. It was established in 1800, and possesses \$35,000 in funds. The Academy is built of brick, 75 feet by 34, three stories high, spacious and commodious. It is a free school for the inhabitants of the society, and is open for scholars from abroad upon very accommodating and moderate terms. All the higher branches of an English education are taught, and the institution is accommodated with philosophical apparatus of various kinds. There are usually about 200 scholars,

with four or five instructors. This institution has ever been considered one of the most respectable and flourishing academies in the state. It is 20 miles from New London, 23 from Hartford, 15 from Norwich, and 10 from East Haddam Landing.

Bacon Academy and Congregational Church, Colchester.

John Bulkley, the first minister in this town, was the son of the Rev. Gershom Bulkley. "His mother was the daughter of President Chauncy. He was graduated at Harvard College in 1699, and was ordained December 20, 1703. His death took place in June, 1731.

"Mr. Bulkley was very distinguished as a scholar. While a member of college, he and Mr. Dummer, who was a member of the same class, were considered as preeminent in genius and talents. The palm was given to the latter for quickness, brilliancy, and wit; but Mr. Bulkley was regarded as his superior in solidity of judgment and strength of argument. He carried his researches into the various departments of the law, of medicine, and theology. His son, John Bulkley, who was also eminent for his learning, possessed a high reputation as a physician and lawyer, and when very young was appointed a judge of the superior court of Connecticut.

"Mr. Bulkley was classed by the Rev. Dr. Chauncy, in 1768, among the three most eminent for strength of genius and powers of mind, which New England had produced. The other two were Mr. Jeremiah Dummer and Mr. Thomas Walter. He published an election sermon in 1713, entitled 'the necessity of religion in societies.' In 1724 he published an inquiry into the right of the aboriginal natives to the lands in America. This curious treatise has within a few years been reprinted in the collection of the Historical Society of Massachusetts. The author contends, that the Indians had no just claims to any lands, but such as they had subdued and improved by their own labor, and that the English had a perfect right to occupy all other lands without

compensation to the natives. He published one other tract, entitled 'an impartial account of the late debate at Lyme upon the following points; whether it be the will of God, that the infants of visible believers should be baptised; whether sprinkling be lawful and sufficient; and whether the present way of maintaining ministers by a public rate or tax be lawful,' 1729. In this he gives some account of the rise of the antipedobaptist persuasion."*

The following humorous story, in which Mr. Bulkley, the first minister in this town, was concerned, is from an ancient publication.

"The Rev. Mr. Bulkley of Colchester, Con., was famous in his day as a casuist and sage counselor. A church in his neighborhood had fallen into unhappy divisions and contentions, which they were unable to adjust among themselves. They deputed one of their number to the venerable Bulkley, for his services; with a request that he would send it to them in writing. The matters were taken into serious consideration, and the advice with much deliberation committed to writing. It so happened, that Mr. Bulkley had a farm in an extreme part of the town, upon which he entrusted a tenant; in superscribing the two letters, the one for the church was directed to the tenant, and the one for the tenant to the church. The church was convened to hear the advice which was to settle all their disputes. The moderator read as follows: *You will see to the repair of the fences, that they be built high and strong, and you will take special care of the old black bull.* This mystical advice puzzled the church at first, but an interpreter among the more discerning ones was soon found, who said, Brethren, this is the very advice we most need; the direction to repair the fences is to admonish us to take good heed in the admission and government of our members: we must guard the church by our master's laws, and keep out strange cattle from the fold. And we must in a particular manner set a watchful guard over the *Devil*, the old black bull, who has done so much hurt of late. All perceived the wisdom and fitness of Mr. Bulkley's advice, and resolved to be governed by it. The consequence was, all the animosities subsided, and harmony was restored to the long afflicted church. What the subject of the letter sent to the tenant was, and what good effect it had upon him, the story does not tell."

In this town, Westchester society, is the monument of Col. *Henry Champion*, a native of East Haddam, deputy commissary general of the armies of the United States, in the Revolution, and in that station eminently useful. To this gentleman, Washington, in his distress for provisions at Valley Forge, applied for relief, and the first relief to the starving army, came from his land. He died in 1796.

The following is from the Colchester Town Records; the tradition is, that this thanksgiving was put off on account of there being a deficiency of molasses, an article much used on these occasions.

"At a legal Town meeting held in Colchester, Oct. 29th, 1705. It was voted, that whereas there was a thanksgiving appointed to be held on the first Thursday in November, and our present circumstances being such, that it cannot with convenience be attended on that day; it is therefore voted and agreed by the inhabitants, as aforesaid, (concluding the thing will not be otherwise than well resented,) that the second Thursday of November aforesaid, shall be set apart for that service."

* Allen's Biographical Dictionary.

The following inscriptions are from monuments in the grave yard on the west side of the Congregational church.

The Honble. John Bulkley, Esqr. of Colchester, who for a number of years, was a great honor to an uncommon variety of exalted stations in life. *Morte Subitanea Corripuit Julii 21 A. D. 1753. Anno Ætatis Suae 49.*

Beloved and fear'd for vertue's sake,
Such vertue as the great doth make.

In memory of Jonathan Kilborn Esq. who departed this life Octobr. 14th, A. D. 1785, in the 79 year of his age.

He was a man of invention great,
Above all that lived nigh,
But he could not invent to live,
When God called him to die.

Mr. Kilborn lived about one mile south of the Academy. He was an uncommonly ingenious mechanic, and it is said he was the inventor of the iron screw. It is also stated, that he admitted an Englishman into his shop, who observing his invention, took the proper dimensions, &c. went to England, and claimed to be the original inventor.

FRANKLIN.

THIS town originally belonged to Norwich, and was incorporated as a town in 1786. Its length from north to south is five miles, and its average breadth four miles. It is bounded on the n. e. by Windham and the Shetucket river, which separates it from Lisbon, w. by Lebanon, s. by Bozrah, and s. e. by Norwich. The town is diversified with hills and valleys, and the geological structure and soil are of a granitic character, the latter being generally a gravelly loam. The lands are best adapted to grazing.

The population of the town in 1810 was 1,161; in 1830 it was 1,194. There are 2 houses of worship in the town, 1 for Congregationalists and one for Methodists. Agriculture is the principal business of the inhabitants, who live scattered about on their farms, there being no place which may be considered as a village in the town. There is a woolen factory on Beaver brook, near the Shetucket river, on the eastern border of the town. The central part of Franklin is thirty four miles from Hartford, and about seven miles from Norwich city.

GRISWOLD.

GRISWOLD was originally a part of Preston, and was incorporated as a town in 1815. Its average length is 8 miles, and its breadth about 4. It is bounded n. by Plainfield, w. by Quinnebaug river, separating it from Lisbon, e. by Voluntown, s. by Preston and North Stonington. The surface of the township is uneven; the prevailing soil is a gravelly loam, with some sections of sandy loam. There are some low marsh lands upon the Pochaug river, a sluggish stream, which passes through the central part of the town. There are two Congregational churches in the town, 1 at Jewett's City, the other in the central part of the town. The population in 1810 was 1,520; in 1830, it was 2,212.

dition stone at an elevation of about 130 feet above tide water; the monument itself is one hundred and twenty seven feet in height. The pedestal rises about eighteen or twenty feet, and is twenty three feet square; on the pedestal rises an obelisk square, ninety two feet in height, twenty two feet square at its base, and eleven feet at the top. It is ascended by one hundred and sixty five stone steps inserted into the outer wall, rising in a circular form, their inner ends supported by an iron rail and banister. The monument is constructed of granite, of which there is an abundance in the vicinity. The expense of its erection was eleven thousand dollars; this amount was raised by a lottery, granted by the state for this purpose.

The following is the inscription, on marble, placed over the entrance of the monument.

This Monument
was erected under the patronage of the State of Connecticut, A. D. 1830,
and in the 55th year of the Independence of the U. S. A.
In memory of the brave Patriots,
who fell in the massacre at Fort Griswold, near this spot,
on the 6th of September, A. D. 1781,
when the British, under the command of
the traitor Benedict Arnold,
burnt the towns of New London and Groton, and spread
desolation and woe throughout this region.

On the south side of the pedestal, opposite the fort, is the following inscription.

“Zebulon and Naphtali were a people that jeoparded their lives unto the death, in the high places of the field.”—*Judges, 5 Chap. 18 verse.*

List of men who fell at Fort Griswold, Sept. 6. 1781.

Here follows a list of eighty five names, on a marble tablet.

Groton was the seat of the Pequot power. The royal residence or fort of Sassacus, the chief sachem, was situated on a commanding eminence, a little southeast of Fort Griswold. Here was the principal fort. He had another to the northwest of this, near Mystic river. The Pequot country is described as extending from the Nehantic on the west, to Rhode Island line on the east, including the present towns of Waterford, New London and Montville, west of the Thames; and Groton, Stonington and North Stonington on the east. All the country north of this, including the county of Windham, and part of Tolland county, has been represented as the Mohegan county. Historians have treated the Pequots and Mohegans as two distinct tribes. They appear however to have been parts of the same nation, named from the place of their situation. Uncas was evidently of the royal line of the Pequots, both by his father and mother, and his wife was the daughter of Tatabam, one of the Pequot sachems. Uncas appears to have been a petty sachem under Sassacus, the great prince of the Pequot nation. When the English came to Connecticut, he was in rebellion against Sassacus, and therefore readily joined with the English, to save himself, and be avenged on his adversary.

North view of Pequot Hill, Groton.

The above is a north view of Pequot Hill in Groton, about 8 miles northeast from New London. This spot will ever be memorable, on account of its being the place where the first regular conflict between the English and the natives of New England took place. Here the blow was struck by which the salvation of the infant colony of Connecticut was effected, and the ruin of the haughty, warlike, and powerful Pequot tribe of Indians accomplished. The conquest of the Pequots struck such terror to the Indian tribes in New England, that they had no open war with the colonists for nearly forty years afterwards. The hill represented above is commanding and beautiful, though not steep. The land on which the fort stood is now owned by Roswell Fish, Esq.; his house is seen in the engraving, standing on the summit of the hill; the fort is supposed to have stood a few rods south of his house. Arrows, beads, arrow heads, and other Indian implements, have been found on this spot. This place is about 120 or 130 rods west of Mystic river, and about one mile north of the church in Portersville, which is seen on the left of the engraving.

The following account of the destruction of the Pequots is principally taken from the account written by Capt. Mason, the commander of the expedition, entitled "A Brief History of the Pequot War." &c. published in Boston in 1736. The soldiers from Connecticut, ninety in number, arrived at Saybrook on Wednesday, where they lay wind-bound till Friday, 12th of May, 1637. There was a difference of opinion between Capt. Mason and his officers, whether to sail directly to Pequot (now Thames) river, or go on beyond and land his men at Narragansett. The instructions were to land the men at Pequot river.

"But Capt. Mason, apprehending an exceeding great hazard in so doing, for the reasons fore mentioned, as also some other which I shall forbear to trouble you with, did therefore earnestly desire Mr. Stone that he would commend our condition to the Lord that night, to direct how, and in what manner we should demean ourselves in that Respect; he being our *Chaplin* and lying aboard our *Pink*, the Captain on shoar.

In the morning very early Mr. Stone came ashore to the Captain's chamber, and told him he had done as he desired, and was fully satisfied to sail for Narragansett: our council was then called, and the several reasons alledged: in fine we all agreed with one accord to sail for Narragansett, which the next morning, (May 12th,) we put in execution."

[The little army arrived at Narragansett bay on Saturday towards evening, where they kept the Sabbath. On account of the wind they were not able to go on shore till sunset on Tuesday, when Capt Mason landed and went to the chief sachem's residence and desired a free passage through his country, which was granted. The next day, Wednesday, they arrived at a place called *Nayantic*, eighteen or twenty miles distant, where resided another Narragansett sachem, who lived in a fort. As they would not suffer any of the English to go into their fort, Capt. Mason set a guard around it, and would not suffer any of the Indians to go out and give information to the Pequots of their approach.]

"On Thursday, about eight of the clock in the morning, we marched thence towards *Pequot*, with about five hundred Indians; but through the heat of the weather, and want of provisions, some of our men fainted, and after having marched about twelve miles we came to *Pawcatuck* river, at a Ford where our Indians told us the Pequots did usually fish; there making an *Alta*, we stayed some small time; the Narragansett Indians manifesting great fear, in so much that many of them returned, although they had frequently despised us saying, *That we durst not look upon a Pequot*, but themselves would perform great things; though we had often told them that we came on purpose and were resolved, God assisting, to see the Pequots, and to fight with them before we returned, though we perished. I then enquired of Onkos, (*Uncas*,) what he thought the Indians would do? who said the Narragansetts would all leave us, but as for *himself*, he would never leave us: and so it proved; for which expression, and some other speeches of his, I shall never forget him. Indeed he was a great friend, and did great service."

South view of Porter's Rocks, Groton.

[The above is a southern view of Porter's Rocks, on the shore of Mystic river, in Groton, where Capt. Mason and his little army lay on the night previous to his attacking the Pequot fort, which was about two miles to the southwest. These rocks are situated about half a mile south of the house of Daniel Eldridge, Esq. and about the same distance from the village in Stonington at the head of Mystic. From the top of the ledge, Portersville and the ocean can be seen.]

"And after we had refreshed ourselves with our mean commons, we marched about three miles, and came to a field which had lately been planted with Indian corn: there we made another *Alta*, and called our council, supposing we drew near to the enemy: and being informed by the Indians that the enemy had two forts almost impregnable; but we were not at all discouraged, but rather animated, insomuch that we were resolved to assault both their forts at once. But understanding that one of them was so

remote that we could not come up with it before midnight, though we marched hard: whereat we were much grieved, chiefly because the greatest and bloodiest sachem there resided, whose name was *Sassaous*: We were then constrained, being exceedingly spent in our march with extreme heat and want of necessaries, to accept the nearest."

"We then marching on in a silent manner, the Indians that remained fell all into the rear, who formerly kept the van, (being possessed with great fear;) we continued our march till about one hour in the night: and coming to a *little swamp between two hills*, we pitched our little camp; much wearied with hard travel, keeping great silence, supposing we were very near the fort as our Indians informed us, which proved otherwise. The rocks were our pillows; yet rest was pleasant. The night proved comfortable, being clear and moonlight. We appointed our guards, and placed our sentinels at some distance; who heard the enemy singing at the fort, who continued their strain till midnight, with great exulting and rejoicing as we were afterwards informed. They seeing our *pinnaces* sail by them some days before, concluded we were afraid of them, and durst not come near them, the burthen of their song tending to that purpose."

"In the morning, (Friday, 26th of May,) we awaking and seeing it very light, supposing it had been day, and so we might have lost our opportunity, having purposed to make our assault before day, roused the men with all expedition, and briefly commended ourselves and design to God, thinking immediately to go to the assault. The Indians showed us a path, and told us that it led directly to the fort. We held on our march about two miles, wondering that we came not to the fort, and fearing we might be deluded; but seeing corn newly planted at the foot of a great hill, supposing the fort was not far off, a champion country being round about us; then making a stand, gave the word for some of the Indians to come up; at length *Onkos* and one *Wequosh* appeared. We demanded of them, Where was the fort? They answered on the top of that hill. Then we demanded, Where were the rest of the Indians? They answered behind, exceedingly afraid. We wished them to tell the rest of their fellows, that they should by no means fly but stand at what distance they pleased, and see whether *Englishmen* would now fight or not. Then Captain Underhill came up, who marched in the rear; and commending ourselves to God, we divided our men, there being two entrances into the fort, intending to enter both at once—Captain Mason leading up to that on the northeast side, who approached within one rod, heard a dog bark, and an Indian crying *Owanux! Owanux!* which is Englishmen! Englishmen! We called up our forces with all expedition, gave fire upon them through the pallizado, the Indians being in a dead, indeed their last sleep. Then we wheeling off, fell upon the main entrance, which was blocked up with bushes about breast high, over which the Captain passed, intending to make good the entrance, encouraging the rest to follow. Lieutenant Seeley endeavored to enter; but being somewhat cumbered, stepped back and pulled out the bushes and so entered, and with him about sixteen men. We had formerly concluded to destroy them by the sword and save the plunder."

"Whereupon Captain Mason seeing no Indians, entered a wigwam, where he was beset with many Indians, waiting all opportunities to lay hands on him, but could not prevail. At length *William Heydon*, espying the breach in the wigwam, supposing some English might be there, entered; but in his entrance fell over a dead Indian; but speedily recovering himself, the Indians some fled, others crept under their beds. The Captain going out of the wigwam, saw many Indians in the lane or street; he making towards them, they fled, were pursued to the end of the lane, where they were met by *Edward Pattison*, *Thomas Barber*, with some others; where seven of them were slain as they said. The Captain facing about, marched a slow pace up the lane; he came down, perceiving himself very much out of breath, and coming to the other end, near the place where he first entered, saw two soldiers standing close to the pallizado, with their swords pointed to the ground; the Captain told them that we should never kill them after this manner. The Captain also said, *We must burn them*; and immediately stepping into the wigwam, where he had been before, brought out a fire brand, and putting it into the mats with which they were covered, set the wigwams on fire. Lieutenant *Thomas Bull* and *Nicholas Omsted* beholding, came up; and when it was thoroughly kindled, the Indians ran as men most dreadfully amazed."

"And indeed such a dreadful terror did the Almighty let fall upon their spirits, that they would fly from us and run into the very flames, where many of them perished. And when the fort was thoroughly fired, command was given that all should fall off and surround the fort; which was readily attended by all, only one, *Arthur Smith*, being so wounded that he could not move out of the place, who was happily espied by Lieutenant Bull, and by him rescued. The fire was kindled on the northeast side to the windward; which did swiftly overrun the fort, to the extreme amazement of the enemy, and great rejoicing of ourselves. Some of them climbing to the top of

the palizado: others of them running into the very flames; many of them gathering to the windward, lay pelting at us with their arrows; and we repaid them with our small shot; others of the stoutest issued forth, as we did guess, to the number of forty, who perished by the sword."

"What I have formerly said, is according to my own knowledge, their being sufficient living testimony to every particular. But in reference to Capt. Underhill and his partie's acting in this assault, I can only intimate as we are informed by some of themselves immediately after the fight, that they marched up to the entrance on the southwest side; there they made some pause; a valiant, resolute gentleman, one Mr. *Hedge*, stepping towards the gate, saying, 'If we may not enter, wherefore came we here?' and immediately endeavored to enter; but was opposed by a sturdy Indian, which did impede his entrance; but the Indian being slain by himself and Sergeant Davis, Mr. *Hedge* entered the fort with some others; but the fort being on fire, the smoke and flames were so violent that they were constrained to desert the fort..... Thus were they now at their wit's end, who not many hours before exalted themselves in their great pride, threatening and resolving the utter ruin and destruction of all the English, exulting and rejoicing with songs and dances: but God was above them, who laughed his enemies and the enemies of his people to scorn, making them as a fiery oven. Thus were the stout-hearted spoiled, having slept their last sleep, and none of their men could find their hands. Thus did the Lord judge among the heathen, filling the place with dead bodies! And here we may see the just judgment of God, in sending even the very night before the assault one hundred and fifty men from the other fort, to join with them of that place, who were designed as some of themselves reported to go forth against the English, at that very instant when this heavy stroke came upon them, where they perished with their fellows. So that the mischief they intended to us, came upon their own pate. They were taken in their own snare, and we through mercy escaped. And thus in *little more than one hour's space*, was their impregnable fort with themselves utterly destroyed, to the number of six or seven hundred as some of themselves confessed. There were only seven taken captive, and about seven escaped. Of the English there were two slain outright, and about twenty wounded; some fainted by reason of the sharpness of the weather, it being a cool morning, and the want of such comforts and necessaries as are needful in such a case; especially our *Chirurgion* was much wanting, whom we left with our barks in *Naragansett Bay*, who had orders to remain until the night before our intended assault. And thereupon grew many difficulties; our provision and munition near spent; we in the enemy's country, who did far exceed us in number, being much enraged, all our Indians except *Onkos* deserting us; our pinnaces at a great distance from us, and when they would come we were uncertain. But as we were consulting what course to take, it pleased God to discover our vessels to us before a fair gale of wind, sailing into *Pequot Harbor*, to our great rejoicing."

"We had no sooner discovered our vessels, but immediately came up the enemy from the *other fort*—three hundred or more as we conceived. The Captain led out a file or two of men to skirmish with them, chiefly to try what temper they were of, who put them to a stand; we being much encouraged thereat, presently prepared to march towards our vessels. Four or five of our men were so wounded that they must be carried with the arms of twenty more. We also being faint, were constrained to put four to one man, with the arms of the rest that were wounded to others; so that we had but forty men free. At length we hired several Indians, who eased us of that burthen, in carrying off our wounded men. And marching about one quarter of a mile, the enemy coming up to the place where the fort was, and beholding what was done, stamped and tore the hair from their heads; and after a little space, came mounting down the hill upon us, in a full career, as if they would overrun us: but when they came within shot, the rear faced about, giving fire upon them: some of them being shot, made the rest more wary; yet they held on running to and fro, and shooting their arrows at random. There was at the foot of the hill a small brook, where we rested and refreshed ourselves, having by that time taught them a little more manners than to disturb us. We then marched on towards *Pequot Harbor*, and falling upon several wigwams burnt them, the enemy still following us in the rear, which was to the windward, though to little purpose; yet some of them lay in ambush, behind rocks and trees, often shooting at us, yet through mercy touched not one of us; and as we came to any swamp or thicket, we made some shot to clear the passage. Some of them fell with our shot, and probably more might, but for want of munition; but when any of them fell, our Indians would give a great shout, and then they would take so much courage as to fetch their heads. And thus we continued until we came within two miles of *Pequot Harbor*; where the enemy gathered together and left us, we marching to the top of an hill adjoining the harbor, with our colors flying, having left our drum at the place of our rendezvous the night before; we seeing our vessels there riding at anchor, to our great rejoicing, and came to the water side; we sat down in quiet."

Captain Mason and the Narragansett Indians, continued their march by land to Connecticut river, where they arrived on Saturday about sunset, "being nobly entertained by Lieutenant Gardner with many great guns."

....."And when we had taken order for the safe conduct of the Narragansett Indians, we repaired to the place of our abode; where we were entertained with great triumph and rejoicing, and praising God for his goodness to us, in succeeding our weak endeavors, in crowning us with success, and restoring of us with so little loss. Thus was God seen in the Mount, crushing his proud enemies, and the enemies of his people: they who were erewhile a *terror* to all that were round about them, who resolved to destroy all the English and to root their very name out of this country, should by such weak means, even *seventy-seven*, there being no more at the fort, bring the mischief they plotted, and the violence they offered and exercised, upon their own heads in a moment; burning them up in the fire of his wrath, and dunging the ground with their flesh."

In the addition given by Capt. Mason to his account, "by way of comment," he says, "our commons were very short, there being a general scarcity throughout the Colony of all sorts of provisions, it being upon our first arrival at the place. We had but *one pint of strong liquors* among us in our whole march, but what the wilderness afforded, (the bottle of liquor being in my hand,) and when it was empty the very smelling to the bottle would presently recover such as had fainted away, which happened by the extremity of the heat."....."I still remember a *speech of Mr. Hooker*, at our going abroad, that they 'should be bread for us.' "....."I shall mention two or three special providences that God was pleased to vouchsafe to particular men, viz. two men, being one man's servants, namely *John Dier* and *Thomas Stiles*, were both of them shot in the knots of their handkerchiefs, being about their necks, and received no hurt. Lieutenant *Seeley* was shot in the eyebrow with a flat headed arrow, the point turning downwards; I pulled it out myself. Lieutenant *Bull* had an arrow shot into a hard piece of cheese, having no other defense; which may verify the old saying, 'A little armor would serve if a man knew where to place it.' Many such providences happened; some respecting myself, but since there is none that witness to them, I shall forbear to mention them."

Several circumstances (says Dr. Trumbull) attending this enterprise were much noticed by the soldiers themselves, and especially by all the pious people. It was considered very providential that the army should march nearly forty miles, and a considerable part of it in the enemy's country, and not be discovered, until the moment they were ready to commence the attack. It was judged remarkable, that the vessels should come into the harbor at the very hour they were most needed. The life of Capt. Mason was very singularly preserved. As he entered a wigwam for fire to burn the fort, an Indian was drawing an arrow to the very head and would have killed him immediately, but *Davis*, one of his sergeants, cut the bow-string with his cutlass, and prevented the fatal shot.

"Few enterprises have been achieved with more personal bravery or good conduct. In few have so great a proportion of the effective men of a whole colony, state, or nation, been put to so great and immediate danger. In few have a people been so deeply and immediately interested, as the whole colony of Connecticut was in this, in that uncommon crisis. In these respects even the great armaments and battles of Europe are comparatively of little importance. In this, under the divine conduct, by seventy seven brave men, Connecticut was saved, and the most warlike and terrible nation in New England defeated and ruined.

"There is a remnant of the Pequots still existing. They live in the town of Groton, and amount to forty souls in all, or perhaps a few more or less; but do not vary much from that amount. They have about

1100 acres of poor land reserved to them in Groton, on which they live. They are more mixed than the Moheagans with negro and white blood, yet are a distinct tribe and still retain a hatred to the Moheagans. A short time since, I had an opportunity of seeing most of the tribe together. They are more vicious, and not so decent or so good looking a people as the Moheagans. This however may be owing to their being more mixed with other blood. It is very rare that there are any intermarriages with either of the tribes to each other; they still, as far as circumstances admit, retain their old grudge. The most common name amongst them is *Meazen*: nearly half call themselves by that surname.”*

Northeastern view of Fort Hill, Groton.

Fort Hill is situated four miles east from New London, and is rendered memorable on account of its being the seat of the royal fortress of Sassacus, the haughty chieftain of the Pequots. The building seen on the summit of the hill is the Baptist church; the other building seen to the south is the residence of the Rev. Mr. Burrows, an aged Baptist clergyman, who has resided on this spot from his childhood. The fort of Sassacus is supposed to have stood between the house of Mr. B. and the church. This supposition is strongly confirmed, by the remains of human bones, shells, fish bones and parched corn, being found eighteen inches below the surface. Mr. Burrows states that he found a quantity of *corn in a coal state*, some of which he preserved many years; he also found a pipe of soft stone, with abundance of arrow heads, &c.

“The body of the Pequots,” (says Dr. Trumbull,) “returning from the pursuit of Capt. Mason, repaired to Sassacus, at the royal fortress, and related the doleful story of their misfortunes. They charged them all to his haughtiness and misconduct, and threatened him and his, with

* Communication of Wm. T. Williams, Esq. in 1832. Mass. Hist. Coll. 3d vol. 3d series, p. 134.

immediate destruction. His friends and chief counselors interceded for him; and, at their entreaty, his men spared his life. Then, upon consultation, they concluded that they could not, with safety, remain any longer in the country. They were indeed so panic-struck, that *burning their wigwams and destroying their fort*, they fled and scattered into various parts of the country. Sassacus, Mononotto, and seventy or eighty of their chief counselors and chief warriors took their route towards Hudson river."

The prospect from Mr. Burrows' house is one of the most commanding, beautiful and extensive on the coast. Among the various objects to be viewed from this site, are 15 towns, 4 counties, 3 states, 20 islands, part of the city of New London, the whole of Stonington borough, Fort Griswold and the Monument, and 7 light-houses, with rivers, bays, &c. At the storming of Fort Griswold in the Revolutionary war, the women and children in the vicinity fled to this place, their husbands and fathers having hastened to the fort on the landing of the enemy. From Mr. Burrows' house the firing of each gun could be distinctly seen. It must have been an awful moment with *such* spectators, one of fearful and agonizing suspense, when they saw those whom they held most dear surrounded by an infuriated enemy, amid the "roar of death," engaged in murderous strife: added to this, the conflagration of New London beyond, sending upward majestic columns of smoke and flame, must have rendered this a scene of indescribable interest and fearful sublimity.

LEBANON.

LEBANON is bounded N. by Columbia, E. by Windham and Franklin, W. by Colchester and Hebron, and southeast by Bozrah and Franklin. The average length from northeast to southwest is upwards of 7 miles, and it averages about the same distance in breadth. The surface is uneven, being moderately hilly. The soil is generally a rich, deep, unctuous mould, nearly of a chocolate color, fertile, and well adapted for grass. Agriculture is almost universally the business of the inhabitants. There are three societies in the town, Lebanon, Exeter and Goshen, in each of which there is a Congregational church; there is also a Baptist church in Lebanon, or the first society. The central part of Lebanon, (seen in this view,) is 10 miles N. W. of Norwich city, and 30 S. E. from Hartford.

The following is a south view of the Congregational church,* and other buildings in the vicinity, in the first society in Lebanon. The village

* This building, which is of brick, stands on the site of the old meeting house; at the erection of this house there was a great controversy and division of the society. It appears that the majority of the society wished to have the church erected 300 rods north of its present location, and accordingly it was decided by a vote of about two thirds of the society to take down the old house, and erect a new one at the distance mentioned. The workmen having assembled to take down the old building, the minority, about eighteen in number, resisted the attempt. For this proceeding, they were fined to the extent of the law, as rioters; this was in 1804. This added fuel to

South view of the Congregational Church, Lebanon.

is principally situated on a street about 30 rods broad and upwards of a mile in length. There were formerly more houses on this street than there are at the present time, there having been a tide of emigration kept up from this town since the Revolutionary war. The house, a part of which is seen on the extreme left of the engraving, is the residence of Wm. T. Williams, Esq. a son of the signer of the Declaration of Independence. This house is situated on the spot where Jonathan Trumbull, the patriotic governor of Connecticut, was born. The house in which the Governor resided, was situated on the spot where the first house north of Mr. Williams's now stands. The house of the Governor is still in existence, being removed a few rods north, and is the house seen in the distance, nearest the church.

The following is a representation of Gov. Trumbull's house and the old "*War Office*," so called; this latter building is seen on the left, and is now occupied as a post office; the projection in front is a modern addition. This was the building in which Gov. Trumbull transacted his public business during the Revolution. In those days traveling was generally performed on horseback; the marks of the spurs of the horsemen, expresses, &c. are still seen on the side of the counter on which they sat, while waiting the Governor's orders. The Trumbull house is quite an ancient building. It is the house in which Colonel Trumbull, the painter, was born, and many distinguished personages

the flame; the majority made three attempts before they were able to get the building. At this period party spirit raged to a great extent. Col. Tilden, one of the majority, was removed from the public offices which he held, on account of the part he took in the controversy. The majority erected the present Baptist church, about 300 rods north of the brick church. Baptist clergymen were invited into the place to preach for them, and the Baptist society is now the largest in the place. The Legislature, who favored the views of the minority, granted them a lottery, in order to erect a church. The opposite party were fully of the opinion that the Legislature improperly interfered in the concerns of the society.

"War Office" and Gov. Trumbull's House, Lebanon.

have been within its walls. Gen. Washington, Dr. Franklin, Jefferson, Rochambeau and La Fayette, have all, it is believed, been lodged in this house. The Governor generally had a guard of about half a dozen men to protect his person, as there was some danger at that period of being seized in the night season and carried off to the enemy. Some alarm was caused at one time by a traveler coming into the house, in the garb of a beggar, and insisting upon seeing the Governor, who at that time was unwell. Mrs. Hyde, his housekeeper, not liking his appearance and actions, seizing the shovel and tongs, drove him out of the house, and called the guard, who came to her assistance, but the beggar was no where to be found.

This town rendered most efficient aid to the American cause during the Revolution; upwards of 500 men from this town alone (which then included Columbia and a small part of Hebron) were in the army at one time.—De Lauzun's legion, consisting of about 500 horsemen, wintered here; their encampment was a little west of the church. Rochambeau with five regiments stayed here about three weeks, and while here Gen. Washington arrived, stayed three days, and reviewed the French troops, who were under the most perfect discipline. While the French were here one of their number was shot for desertion. The court martial was held in the guard house, after 9 o'clock at night, and the soldier executed before day. It is supposed that they were fearful, that if Gov. Trumbull came to the knowledge of the soldier's being condemned to death, he would endeavor to save his life.

The town of Lebanon originally consisted of a number of pieces of land, purchased by different persons at different times, but afterwards united into one town. There were four proprietaries; the first was a purchase of five miles in length and three in width, extending from Windham line on the northeast part, southwesterly to the bounds of Hebron and Colchester. This tract was purchased of Owanecho, sachem of the Mohegans. The grant was dated 1698, and is called the five mile purchase. The second propriety was a tract of five miles in length and one in breadth, lying south and adjoining the five mile purchase. It was a grant made by Owanecho to the Rev. Mr. Fitch and the fa-

mous Major John Mason. This grant was made in 1695. The third propriety was called the Clark and Dewey purchase, from the names of the first owners and settlers. This tract was obtained in 1706; it was of a triangular form, leaving a small gore between the five mile purchase and the Windham bounds. This gore was the fourth propriety. It was about half a mile in length, and from ten to two hundred rods in width, and called the Whiting purchase.

These different tracts of land were united by agreement among the planters, about the year 1700. The settlers on the one mile propriety wished, for the convenience of public worship, to join those of the five mile purchase, and it was agreed that the meeting house should be placed on the center line of the two tracts, north and south; other parts of the town also united with them. The first clergyman ordained in the town was the Rev. Joseph Parsons, who was ordained or installed here in November, 1700.

“*Jonathan Trumbull*, governor of Connecticut, was a descendant from the early settlers of New England. Two brothers of the name came from the west of England into the Massachusetts colony. The one fixed at Charlestown, the other at Ipswich. The father of Gov. Trumbull was a substantial farmer, in the town of Lebanon, Conn. When he was a young man he went to this place, and was one of the first settlers, in the year 1700. He emigrated from Westfield in the county of Hampshire, where his father had removed from Ipswich, who was among the most respectable of the yeomanry. The Governor was born at Lebanon, in 1710. In the year 1723, he entered Harvard College. He early discovered fine talents and a most amiable disposition. He was a modest, ingenuous youth, very bashful when he first entered college, owing to his tender years, as well as retired situation; but he was much beloved by his classmates, and when he took his degree, one of the finest scholars, with such accomplishments as qualified him to be useful, as well as to make the most conspicuous figure. He was fond of the study of divinity, and for some years was a preacher of the gospel; he then turned his attention to jurisprudence, and soon became an eminent civilian. It is an observation of Mr. Hutchinson, ‘that many of the first characters in Massachusetts, were at first probationers for the ministry, and afterwards made a figure at the bar, or in the legislative or executive courts of the province.’ We recollect the names of Stoughton, Read, Gridley, and judge Stephen Sewall. That gentleman adds, when persons have been ordained, they ought ‘to have very special reasons to leave the profession for a civil employment.’ We have seen an instance of this in Gov. Saltonstall, where the public was much benefited.

“Gov. Trumbull was employed in many civil offices, all of which he executed with great fidelity, and grew in the esteem of the people as he advanced in years. He was an active man in public life 51 years, 15 of which he was governor of Connecticut colony. When he first went into this office it required a man of prudence, firmness, consistency and ability to manage affairs. A good pilot is necessary for every bark

which sails on the tempestuous sea. In Connecticut the appearance was more tranquil than the neighboring province, but the clouds were gathering which soon darkened the face of the country. Gov. Trumbull saw the storm burst upon Massachusetts in 1775; he lived to see the auspicious day, also, when his country enjoyed the blessings of peace, and the glory of her independence. No man could guide the vessel of state with more care. No man ever loved his country more. During the whole American war, he showed himself the honest and unshaken patriot, the wise and able magistrate. In an excellent speech he made to the General Assembly, October, 1783, he thus expressed himself, 'I have to request the favor of you, gentlemen, and through you of all the freemen of the state, that after May next, I may be excused from any further service in public life, and from this time I may no longer be considered as an object for your suffrages for any public employment. The reasonableness of the request I am persuaded will be questioned by no one. The length of time I have devoted to their service, with my declining state of vigor and activity, will I please myself form for me a sufficient and unfailing excuse with my fellow citizens.'

"This excellent man departed this life on the 17th (?) of August, 1785, at his seat in Lebanon, in the 75th year of his age. His father had lived the same number of years.

"Gov. Trumbull made a great collection of papers, manuscripts, &c. which were presented by the family to the Massachusetts Historical Society; several of them have been printed in the volumes of their collections."*

Jonathan Trumbull, LL. D., a son of the preceding governor, was educated at Harvard College, "where he graduated, having gone through with the usual course of collegiate studies with unusual reputation. In 1775, at the commencement of the Revolutionary war, he was appointed by Congress paymaster in the northern department, and soon after secretary and aid to General Washington. He was for several years a member of the State legislature, and Speaker of the House. In 1790, he was chosen a representative in Congress from this State; and in 1791, he was appointed Speaker of the House of Representatives, in which situation he continued until 1794, when he was elected a Senator in the Senate of the United States. In 1796, he was chosen by the freemen lieutenant governor of the State, and in 1798, governor. He was annually re-elected to this office for eleven years in succession, and until his death, in 1809. He was 69 years of age. Governor Trumbull was a man of handsome talents, of very respectable acquirements, of amiable manners, and was distinguished for his social virtues. The confidence of his fellow citizens, which he so long enjoyed in a very eminent degree, affords the most satisfactory evidence of his talents and virtues."†

Guilford Dudley Young was a native of this town. In the last war with Great Britain, he was a major, and afterwards a colonel in the U. S. army. On the 23d of October, 1812, with a small detachment

* Elliot's Biographical Dictionary.

† Pease and Niles' Gazetteer.

of militia, Major Young surprised a party of the enemy at St. Regis, captured the two captains, 1 lieutenant, 2 sergeants, 35 privates, and brought off one stand of colors, *the first* taken from the enemy during the war. This officer, after the war, entered the Patriot service, under Gen. Mina, and lost his life in the struggle for Mexican independence, in 1817. The Patriots, 269 in number, had possession of a small fort, which was invested by a Royalist force of 3500 men. The supplies of provision and water being cut off, the sufferings of the garrison, and women and children in the fort, became intolerable; many of the soldiers deserted, so that not more than 150 effective men remained. Colonel Young, however, knowing the perfidy of the enemy, determined to defend the fort to the last. After having bravely defeated the enemy in a number of their endeavors to carry the fort by storm, Col. Young was killed by a cannon shot from the battery raised against the fort.

“On the enemy’s last retreat, the Colonel, anxious to observe all their movements, fearlessly exposed his person, by stepping on a large stone on the ramparts; and, while conversing with Dr. Hennessey on the successes of the day, and on the dastardly conduct of the enemy, the last shot that was fired from their battery carried off his head. Colonel Young was an officer whom, next to Mina, the American part of the division had been accustomed to respect and admire. In every action, he had been conspicuous for his daring courage and skill. Mina reposed unbounded confidence in him. In the hour of danger he was collected, gave his orders with precision, and, sword in hand, was always in the hottest of the combat. Honor and firmness marked all his actions. He was generous in the extreme, and endured privations with a cheerfulness superior to that of any other officer in the division. He had been in the United States’ service, as lieutenant colonel of the twenty ninth regiment of infantry. His body was interred by the few Americans who could be spared from duty, with every possible mark of honor and respect; and the general gloom which pervaded the division on this occasion, was the sincerest tribute that could be offered by them to the memory of their brave chief.”*

The Rev. James Fitch, the first minister in Norwich, died at Lebanon, in the 80th year of his age. It appears that there were two brothers, Thomas and James Fitch, or, in the ancient way of writing the name, Fytche, who came from Bocking in the county of Essex, England, to America, in 1638. Thomas settled at Norwalk, and was father of Thomas Fitch, governor of the colony of Connecticut. The Rev. James Fitch married for his first wife a daughter of the Rev. Henry Whitfield, of Guilford. His second wife was Priscilla Mason, daughter of Major John Mason, the celebrated commander of the expedition against the Pequots.† By his two wives he had fourteen children; all except one lived to have families of children. His history and character are given in the inscription on his monument, in the Lebanon burying ground, viz.

* Robinson’s Mexican Revolution.

† Alden’s Collection of Epitaphs, &c. 4th volume.

In hoc Sepulchro depositæ sunt Reliquiæ Viri vere Reverendi D. JACOBI FITCH natus fuit apud Boking, in Comitatu Essexiæ, in Angliâ, Anno Domini 1622, Decem. 24. Qui, postquam Linguis literatis optime instructus fuisset, in Nov-Angliam venit, Ætate 16; et deinde Vitam degit, Hartfordiæ, per Septennium, sub Instructione Virorum celeberrimorum D. HOOKER & D. STONE. Postea Munere pastoralis functus est apud Say-Brook per Annos 14. Illinc cum Ecclesiæ majori Parte Norvicum migravit; et ibi cæteros Vitæ Annos transegit in Opere Evangelico. In Senectute, vero præ Corporis infirmitate necessarie cessavit ab Opere publico; tandemque recessit Liberis, apud Lebanon; ubi Semianno fere exacto obdormivit in Jesu, Anno 1702, Novembris 18, Ætat. 80.

Vir Ingenii Acumine, Pondere Judicii, Prudentia, Charitate, sanctis Laboribus, et omni moda Vitæ sanctitate, Peritia quoque et Vi concionandi nulli secundus.

Which may be rendered into English in the following manner.

In this grave are deposited the remains of that truly reverend man, Mr. JAMES FITCH. He was born at Boking, in the county of Essex, in England, the 24th of December, in the year of our LORD 1622. Who, after he had been most excellently taught the learned languages, came into New England, at the age of sixteen; and then spent seven years under the instruction of those very famous men, Mr. Hooker and Mr. Stone. Afterwards, he discharged the pastoral office, fourteen years at Saybrook. Thence he removed, with the major part of his church, to Norwich; where he spent the other years of his life in the work of the gospel. In his old age, indeed, he was obliged to cease from his public labors, by reason of bodily indisposition; and at length retired to his children at Lebanon; where, after spending nearly half a year, he slept in Jesus, in the year 1702, on the 18th day of November, in the 80th year of his age.

He was a man, as to the smartness of his genius, the solidity of his judgment, his charity, holy labors, and every kind of purity of life, and also as to his skill and energy of preaching, inferior to none.

Tomb of the Trumbull family, Lebanon.

It is believed that no cemetery in this country contains the ashes of more Revolutionary worthies than the above. The remains of two governors, one commissary general, and a signer of the Declaration of Independence, are deposited within its walls. The following inscriptions are on the pedestal standing on the tomb.

Sacred to the memory of Jonathan Trumbull, Esq. who unaided by birth or powerful connexions, but blessed with a noble and virtuous mind, arrived to the highest station in government. His patriotism and firmness during 50 years employment in

public life, and particularly in the very important part he acted in the American Revolution, as Governor of Connecticut; the faithful page of History will record.

Full of years and honors, rich in benevolence, and firm in the faith and hopes of Christianity, he died August 9th, 1785, *Ætatis* 75.

Sacred to the memory of Madam Faith Trumbull, the amiable lady of Gov. Trumbull, born at Duxbury, Mass. A. D. 1718. Happy and beloved in her connubial state, she lived a virtuous, charitable, and Christian life at Lebanon, in Connecticut; and died lamented by numerous friends, A. D. 1780, aged 62 years.

Sacred to the memory of Joseph Trumbull, eldest son of Governor Trumbull, and first Commissary Genl. of the United States of America. A service to whose perpetual cares and fatigues he fell a sacrifice, A. D. 1778, *Æt.* 42. Full soon indeed may his person, his virtues, and even his extensive Benevolence be forgotten by his friends and fellow men. But blessed be God! for the Hope that in his presence he shall be remembered forever.

To the memory of Jonathan Trumbull, Esq. late Governor of the State of Connecticut. He was born March 26th, 1740, and died Aug. 7th, 1809, aged 69 years. His remains were deposited with those of his Father.

This inscription is on a marble monument, standing in front of the tomb.

The remains of the Hono. William Williams are deposited in this Tomb: born April 8th, 1731: died the 2d of Aug. 1811, in the 81st year of his age, a man eminent for his virtues and Piety,—for more than 50 years he was constantly employed in Public Life, and served in many of the most important offices in the gift of his fellow citizens. During the whole period of the Revolutionary war, he was a firm, steady, and ardent friend of his country, and in the darkest times risked his life and wealth in her defense. In 1776 and 1777, he was a member of the American Congress, and as such signed the Declaration of Independence. His public and private virtues, his piety and benevolence, will long endear his memory to his surviving friends,—above all, he was a sincere Christian, and in his last moments placed his hope with humble confidence in his Redeemer. He had the inexpressible satisfaction to look back upon a long, honorable, and well spent life.

Reader,

as thou passest, drop a tear to the memory of the once eminent Academic Instructor *Nathan Tisdale*, a lover of Science. He marked the road to useful knowledge. A friend to his country, he inspired the flame of Patriotism. A lover of liberty and Religion, he taught others to love Liberty and aspire to a happy immortality. Having devoted his whole life from the 18th year of his age, to the duties of his profession, which he followed with distinguished usefulness to Society, he died Jan'y 5th, 1787, in the 56th year of his age.

LEDYARD.

LEDYARD, formerly North Groton, the north part of Groton, was incorporated as a town in 1836. It is about six miles square, bounded N. by Preston, E. by North Stonington and Stonington, S. by Groton, and W. by Thames river, separating it from Montville. The central part of the town is $7\frac{1}{2}$ miles from New London, and $7\frac{1}{2}$ from Norwich. It is estimated that the population is about 2,000. The inhabitants are principally farmers. The principal village in the town, is at Gale's ferry, which may consist of about thirty dwelling houses, and is about 7 miles from New London. A remnant of the Pequot tribe, consisting of about twenty persons, still remain in the northeast section of the town.

This town derived its name from Col. Ledyard, and his relative, John Ledyard, the celebrated traveler, who was a native of Groton, which at

that time included this town within its limits. The following account of his life is from Allen's American Biographical Dictionary.

"*John Ledyard*, a distinguished traveler, was a native of Groton in Connecticut. His father died while he was yet a child, and he was left under the care of a relative in Hartford. Here he enjoyed the advantages of a grammar school. After the death of his patron, when he was eighteen years of age, he was left to follow his own inclinations. With a view to the study of divinity he now passed a short time in Dartmouth College in New Hampshire, where he had an opportunity of learning the manners of the Indians, as there was a number of Indian pupils in the seminary. His acquaintance with the savage character gained in this place, was of no little advantage to him in the future periods of his life. His poverty obliging him to withdraw from the College before he had completed his education, and not having a shilling in his pocket to defray the expense of a journey to Hartford, he built him a canoe, fifty feet in length, and three in breadth, and being generously supplied with some dried venison for his sea stores, he embarked upon the Connecticut, and going down that river, which is in many places rapid, and with which he was totally unacquainted, he arrived safely at Hartford, at the distance of one hundred and forty miles.

"He soon went to New York, and sailed for London in 1771, as a common sailor. When Captain Cook sailed on his third voyage of discovery, Ledyard, who felt an irresistible desire to explore those regions of the globe which were yet undiscovered or imperfectly known, accepted the humble station of corporal of marines, rather than forego an opportunity so inviting to his inquisitive and adventurous spirit. He was a favorite of the illustrious navigator, and was one of the witnesses of his tragical end in 1778. He surprised his friends in America, who had heard nothing of him for ten years, by a visit in 1781. Having offered his services to several merchants to conduct a trading voyage to the northwest coast and meeting with no encouragement, he again embarked for England in 1782. He now resolved to traverse the continent of America from the northwest coast, which Cook had partly explored, to the eastern coast, with which he was already perfectly familiar. Disappointed in his intention of sailing on a voyage of commercial adventure to Nootka sound, he passed the British channel to Ostend, with only ten guineas in his purse, determined to travel over land to Kamschatka, whence the passage is short to the western coast of America. When he came to the gulf of Bothnia, he attempted to cross the ice, that he might reach Kamschatka by the shortest way; but finding that the water was not frozen in the middle, he returned to Stockholm. He then traveled northward into the arctic circle; and passing round the head of the gulf, descended on its eastern side to Petersburg. There his extraordinary appearance attracted general notice. Without stockings or shoes, and too poor to provide himself with either, he was invited to dine with the Portuguese ambassador, who supplied him with twenty guineas on the credit of Sir Joseph Banks. Through his interest, he also obtained permission to accompany a detachment of stores, which was to be sent to Yakutz for the use of Mr. Billings, an Englishman, who was intrusted with the schemes of northern discovery, in which the Empress was then engaged. From Yakutz, which is situated in Siberia, six thousand miles east of Petersburg, he proceeded to Oczakow, or Ochotsk, on the Kamschatkan sea; but as the navigation was completely obstructed by ice, he returned to Yakutz, intending to wait for the conclusion of the winter. Here, in consequence of some unaccountable suspicion, he was seized in the name of the Empress by two Russian soldiers, who conveyed him, in the depth of winter, through the north of Tartary to the frontier of the Polish dominions, assuring him at their departure, that if he returned to Russia, he should certainly be hanged, but if he chose to return to England, they wished him a pleasant journey. Poor, forlorn, and friendless, covered with rags, and exhausted by fatigue, disease and misery, he proceeded to Konigsberg, where the interest of Sir Joseph Banks enabled him to procure the sum of five guineas, by means of which he arrived in England.

"He immediately waited on Sir Joseph, who recommended him to an adventure as perilous as that from which he had just returned. He now was informed of the views

of the association, which had been lately formed for promoting the discovery of the interior parts of Africa, which were then little known. Sparrman, Paterson and Vailant had traveled into Caffraria, and Norden and Bruce had enlarged the acquaintance of Europeans with Egypt, Nubia and Abyssinia. In regard to other parts of this quarter of the globe, its geography, excepting in relation to its coasts, was involved in darkness. Ledyard engaged with enthusiasm in an enterprise which he had already projected for himself: and receiving from Sir Joseph a letter of introduction to one of the members of the committee appointed to direct the business, and promote the object of the association, he went to him without delay. The description which that gentleman has given of his first interview, strongly marks the character of this hardy traveler. 'Before I had learned,' says he, 'from the note the name and business of my visitor, I was struck with the manliness of his person, the breadth of his chest, the openness of his countenance, and the inquietude of his eye. I spread the map of Africa before him, and tracing a line from Cairo to Sennaar, and from thence westward in the latitude and supposed direction of the Niger, I told him that was the route, by which I was anxious that Africa might, if possible be explored. He said, he should think himself singularly fortunate to be entrusted with the adventure. I asked him when he would set out? To-morrow morning, was his answer.'

"From such zeal, decision and intrepidity, the society naturally formed the most sanguine expectations. He sailed from London, June 30, 1788, and in thirty six days, seven of which were spent in Paris, and two at Marseilles, arrived in the city of Alexandria; and having there assumed the dress of an Egyptian traveler, proceeded to Cairo, which he reached on the nineteenth of August. He traveled with peculiar advantages. Endowed with an original and comprehensive genius, he beheld with interest, and described with energy, the scenes and objects around him; and by comparing them with what he had seen in other regions of the globe, he was enabled to give his narrative all the varied effect of contrast and resemblance. His remarks on Lower Egypt, had that country been less generally known, might have ranked with the most valuable of geographical records. They greatly heightened the opinion which his employers already entertained, of his singular qualifications for the task which he had undertaken. Nor was his residence at Cairo altogether useless to the association. By visiting the slave markets, and by conversing with the Jelabs, or traveling merchants of the caravans, he obtained, without any expense, a better idea of the people of Africa, of its trade, of the position of places, the nature of the country, and the manner of traveling, than he could by any other means have acquired; and the communications on these subjects, which he transmitted to England, interesting and instructive as they were, afforded the society the most gratifying proofs of the ardent spirit of enquiry, the unwearied attention, the persevering research, and the laborious, indefatigable, anxious zeal, with which their author pursued the object of his mission.

"He had announced to his employers, that he had received letters of earnest recommendation from the Aga; that the day of his departure was appointed; that his next dispatch would be dated from Sennaar; and the committee expected with impatience the result of his journey. But that journey was never to be performed. The vexation occasioned by repeated delays in the departure of the caravan, brought on a bilious complaint, which being increased at first by incautious treatment, baffled the skill of the most approved physicians of Cairo, and terminated his earthly existence, January 17, 1789.

"The society heard with deep concern the death of a man, whose high sense of honor, magnanimous contempt of danger, and earnest zeal for the extension of knowledge, had been so conspicuously displayed in their service; whose ardor, tempered by calm deliberation, whose daring spirit, seconded by the most prudent caution, and whose impatience of control, united with the power of supporting any fatigue, seemed to have qualified him above all other men, for the very arduous task of traversing the wildest and most dangerous part of the continent of Africa. Despising the accidental distinctions of society, he seemed to regard no man as his superior; but his manners, though unpolished, were not disagreeable. His uncultivated genius was peculiar and capacious. The hardships to which he submitted in the prosecution of his enterprises and in the indulgence of his curiosity, are almost incredible. He was sometimes glad to receive food as in charity to a madman, for that character he had been obliged to assume in order to avoid a heavier calamity. His judgment of the female character is very honorable to the sex. 'I have always remarked,' says he, 'that women in all countries are civil and obliging, tender and humane: that they are ever inclined to be gay and cheerful, timorous and modest; and that they do not hesitate, like men, to perform a generous action. Not haughty, nor arrogant, nor supercilious, they are full of courtesy, and fond of society; more liable in general to err than man, but in general also more virtuous, and performing more good actions, than he. To a woman, whether civilized or savage, I never addressed myself, in the language of decency

and friendship, without receiving a decent and friendly answer. With man it has often been otherwise. In wandering over the barren plains of inhospitable Denmark, through honest Sweden and frozen Lapland, rude and churlish Finland, unprincipled Russia, and the wide spread regions of the wandering Tartar; if hungry, dry, cold, wet, or sick, the women have ever been friendly to me, and uniformly so. And add to this virtue, so worthy the appellation of benevolence, their actions have been performed in so free and kind a manner, that if I was dry, I drank the sweetest draught, and if hungry, I ate the coarsest morsel, with a double relish.”

L I S B O N .

LISBON was formerly included within the limits of Norwich. It was incorporated as a distinct town in 1786. It is a small irregular township, being the point of land between the Quinnebaug and Shetucket rivers, which unite at the southern point of the town. It is bounded north by Windham and Canterbury, westwardly by the Shetucket, separating it from Norwich and Franklin, and eastwardly by the Quinnebaug, dividing it from Griswold and Preston.

The township is uneven and hilly. The prevailing character of the soil is a gravelly loam, occasionally interspersed with a sandy loam, especially in the valleys, and it is considerably fertile and productive. There are small intervals or tracts of alluvial soil upon the borders of the river. The inhabitants are generally farmers, who are mostly in good circumstances. The township is divided into two parishes, Newent and Hanover, having a Congregational church in each place. There is a woolen and silk factory in the society of Hanover, the north part of the town.

Lisbon appears to have remained stationary in regard to the number of its inhabitants, for a considerable period. In 1800 the population was 1,158; in 1810, it was reduced to 1,128. In 1830, the number was 1,161. The central part of the town is seven miles from Norwich, and forty five s. e. from Hartford.

L Y M E .

LYME was first settled about 1664. Its first English name was East Saybrook, being then a part of the town of Saybrook. It was incorporated as a distinct town, by the name of Lyme, in 1667. The Indian name for the eastern part of the town was Nehantic. It is bounded north by East Haddam and Salem, west by Connecticut river, dividing it from Saybrook, east by Waterford and Montville, and south by Long Island sound. The township comprises an area of about 80 square miles, being 10 miles long from north to south, and 8 broad.

“From Nehantic river, four miles westward, a tract extending from the Sound to the northern boundary of Lyme and New London was reserved for the Indians, when those townships were incorporated. Some time afterward, the inhabitants of both united in a petition to the Legislature, to include these lands within their limits. The Legislature granted the petition, without determining upon the dividing line. New

London proposed to take three miles in width, and leave one to Lyme. Lyme made a similar proposal to New London. The distance to the seat of government was fifty miles. The journey lay through a wilderness inhabited by savages, and crossed by numerous streams, over which no bridges were erected. The land, though now of considerable value, was then regarded as a trifling object. The expense of appointing agents to manage the cause before the Legislature was considerable, and the hazard of the journey not small. In this situation, the inhabitants of both townships agreed to settle their respective titles to the land in controversy, by a combat between two champions to be chosen by each for that purpose. New London selected two men by the names of Picket and Latimer. Lyme committed its cause to two others, named Griswold and Ely. On a day mutually appointed, the champions appeared in the field, and fought with their fists, till victory declared in favor of each of the Lyme combatants. Lyme then quietly took possession of the controverted tract, and has held it undisputed to the present day.”*

West view of Lyme.

The above shows the appearance of the Congregational church in Lyme, and the buildings in the vicinity. The village is situated on a plain, about half a mile or more back from Connecticut river, on a street running parallel to it. The elevated ground seen in the distance is one of the Church Hills, so called probably from the circumstance of the first church having been built near the summit of one of these elevations, upwards of half a mile eastward of the present church. This part of Lyme is 15 miles from New London, and 40 from Hartford. There are 6 houses of worship, 4 Congregational, and 2 Baptist. There are 4 post offices in the town, viz. Lyme, Hamburg, North Lyme, and East Lyme. There are 1 cotton and 2 woolen factories.

* Dr. Dwight's Travels, Vol. 2.

The surface of the town is strikingly diversified. About one half of it is level, or moderately hilly, comprising the borders of the Sound, its bays and inlets, the large tracts of salt marsh, the numerous and extensive intervals on the rivers and other sections. The other division of the township is stony and mountainous. Near the mouth of Four mile river, several distinct ridges commence, consisting of a succession of hills, which range northwardly, and become more elevated as they extend into the interior. Within this town, north of Eight mile river, near the Connecticut river, commences one of the branches of granitic mountains, which extends northwardly through the state into Massachusetts, and constitutes the height of land which divides the waters that run westwardly into the Connecticut, from those that run into the Thames and other streams. The bodies of salt marsh and meadows upon the rivers are extensive and productive, the former affording large quantities of salt hay, and the latter producing fresh hay, grain, &c. The hilly and mountainous parts of the town do not admit of a general cultivation of grain, but afford good grazing.

South view of the Gov. Griswold House, in Lyme.

The above is a representation of the house erected by Roger Griswold, the last governor of the name, now in possession of Mr. Matthew Griswold. Being near the sea shore, it commands an extensive and delightful prospect of the Sound. It is about three miles s. e. of the Congregational church in Lyme, in Black Hall, a place which ever has been in the possession of the Griswold family, since the first settlement of Lyme. Matthew Griswold, the ancestor of the present Griswolds, appears to have been one of the first settlers of Lyme; he had also three brothers, who came over from England, Thomas, John, and George. Thomas settled at Windsor, John at Wethersfield, and George at Saybrook. The following was extracted from a manuscript in the family Bible of Judge Griswold. "Matthew first went to Windsor, married Annah Wolcott, daughter of the first Henry Wolcott, and was

by trade a stone cutter; he made a stone table now standing over the grave of his father-in-law, the letters of which were cut deep, are now wholly obliterated.* Before Major Fenwick left Saybrook, he, (Fenwick,) committed all his public as well as his private concerns to said Matthew Griswold. Matthew Griswold was the first Commissioner, or Justice of the Peace, in Saybrook. The town of Saybrook formerly contained the lands now lying in Lyme. Soon after the settlement of all the concerns of said Fenwick, Matthew Griswold removed to Black Hall, lying on the east side of Connecticut river, in the town of Lyme, (that being named after the native town of said Griswold, viz. *Lyme Regis*.) Black Hall took its name from the circumstance of said Griswold's building a log hut on his farm in Lyme, where he had an old negro, who used to sleep there before any white person had dared to spend a night on the east side of Connecticut river, for fear of the Indians. It was called the *Black's Hall*, and from that took the name of *Black Hall*. Near the door of said Griswold's he dug a well; two other houses have been built since the first, and the said well is now used, and ever has been used, by some of his descendants."

"*Matthew Griswold*, the first governor of that name, descended from a reputable family, and was born in Lyme, March 25th, 1714. As he was not favored with a public education, he spent his earliest days in the more retired walks in life. But possessing naturally a strong and inquisitive mind, accompanied with a desire to be useful to mankind, at the age of about twenty five he commenced the study of the law, and by his intense application, without the aid of an instructor, acquired that knowledge of the science of the law which was necessary to enter on his professional employment, and was soon admitted to the bar. In his profession he soon distinguished himself, as an able, upright, and faithful advocate. He served many years as counselor, and also as king's attorney, with integrity and reputation. On the 11th of November, 1743, he married Miss Ursula Wolcott, daughter of the Hon. Roger Wolcott, formerly governor of Connecticut. In the year 1751, he was first elected a representative to the General Assembly, and was chosen a number of years successively. In 1755, he was put into nomination for, and in 1759 was elected into the council of the state. In 1766, he was appointed one of the judges of the superior court, and in 1769 was elected lieutenant governor, with which office was connected that of chief justice of the State. In 1784, he was chosen governor, and in 1786 he retired from public life, until the adoption of the Constitution of the United States, by the convention of this state, in 1788, when he was called to officiate as president of that body. In all these various offices, he distinguished himself as a faithful servant of the public.

"But if we descend to the more private walks of life, and view his character as a private citizen, we shall find the social sweetly blended with the christian virtues. He possessed a benevolent disposition, which rendered his deportment truly engaging, in all the domestic relations.

* This must be a mistake, or the letters must have been re-cut, as they are very distinct;—see account of Windsor, p. 132.

“Having a frank and an open heart, he was sincere in all his professions of friendship, and consequently enjoyed the confidence and esteem of a numerous and extensive acquaintance. He was truly hospitable, and abounded in acts of charity. The children of want he never sent empty from his door, but guided by a real sympathy, he fed the hungry, clothed the naked, and relieved the distressed. He died April 28th, 1799, in the 85th year of his age.

“*Roger Griswold*, the second governor of that name, was the son of the former governor. He was born at Lyme, May 21, 1762, and educated at Yale College, where he graduated in 1780. In 1783, he commenced the practice of the law, and soon became extensively engaged in professional business, and acquired a high reputation as a profound lawyer and advocate. In 1789, when he was but thirty two years of age, he was removed from a lucrative and extensive practice to the councils of the nation, being elected a representative from this State to the Congress of the United States.

“In 1801, at the close of President Adams’ administration, he was nominated to be secretary of war, but declined to accept the office. In 1807, he was appointed a judge of the superior court; and in 1809, he was elected lieutenant governor, which office he held until the spring of 1811, when the freemen elected him governor. This period, embracing the first five months after the declaration of the late war with Great Britain, was one of peculiar excitement and difficulty, and during which he was subject to an occasional severe indisposition.

“He was a member of Congress for ten years, embracing a part of the administration of Washington, the whole of that of the elder Adams, and a part of that of Jefferson. This was a very important and interesting period, not only from the political events of this country, but from the great convulsions which agitated all Europe; and it was during this period, while in Congress, that Roger Griswold was most distinguished. During a considerable part of this time, he ranked among the first of his party, and was equally distinguished for his powerful talents in debate, and the independence and decision of his conduct. He remained but a short time on the bench of the superior court, and still shorter in the seat of chief magistrate.

“Few men in Connecticut have been more distinguished as lawyers and statesmen than Roger Griswold; and few have been more universally esteemed and beloved. He lived in a critical and eventful period of our political existence, and pre-eminently ‘acted well his part,’ deserving and receiving the highest honors his native state could confer upon him. He died at Norwich, in October, 1812, and his remains were conveyed to Lyme for interment. An eulogy upon his character was delivered before both houses of the legislature, at New Haven, by Hon. David Daggett.”*

The following is from a monument in a kind of family burying ground, in the vicinity of Black Hall.

This monument is erected to the memory of his Excellency Roger Griswold, LL. D. late Governor of this State. He was born at Lyme, May 25th, 1762, and died at

Norwich, Oct. 12th, 1819. He was the son of his Excellency Matthew Griswold, who had been Chief Justice of the Superior Court, Lieut. Governor and Governor. His mother was daughter of Roger Wolcott, Esq. of Windsor, who was for many years Governor of this State. Gov. Griswold graduated at Yale College in 1780, and in 1783 entered upon the profession of law. At the age of 34, he was elected into the Council of the United States. In 1807 he was appointed a Judge of the Superior Court. In 1809 he was appointed Lieutenant Governor, and in 1811 was elected Governor. Upon all these eminent stations he conferred dignity and honor, not less conspicuous by honorable parentage and elevated rank in society, than by personal merit, talents and virtues. He was respected in the University, as an elegant and classical scholar. Quick discernment, sound reasoning, legal science, manly eloquence, raised him to the first eminence at the bar. Distinguished in the national councils among the illustrious statesmen of the age—revered for his inflexible integrity and pre-eminent talents, his political course was highly honorable. His friends viewed him with virtuous pride, his native state with honest triumph. His fame and honors were the just rewards of noble actions, and of a life devoted to his country. He was endeared to his family by fidelity and affection, to his neighbors by frankness and benevolence. His memory is embalmed in the hearts of surviving relatives and of a grateful people. When this monument shall have decayed, his name will be enrolled with honor among the great, the wise, and the good.

The following are from monuments in the grave yard east from the church in South Lyme.

Sacred to the memory of Mr. John McCurdy, the younger, who died 21st Decemr. 1790, in the 24th year of his age.

Fond man, the vision of a moment made,
 Dream of a dream and shadow of a shade,
 This truth how certain, when this life is o'er,
 Man dies to live, and lives to die no more.

The following singular inscription is on Deacon Marvin's monument.

This Deacon aged 68: Is freed on earth from serving
 May for a crown no longer wait: Lyme's Captain RENOLD MARVIN.

On the foot stone,

R. M. Oct. 18, 1737.

Deacon Marvin appears to have been remarkable for his eccentricity in almost all his transactions in life. His courtship, it is said, was as follows:—Having one day mounted his horse, with only a sheep-skin for a saddle, he rode in front of the house where Sarah or Betty Lee lived, and without dismounting, requested Betty to come to him; on her coming, he told her that the Lord had sent him there to marry her. Without much hesitation, she replied, the Lord's will be done. During his whole life, he professed to be governed much by divine communications that were made to him. Once he said, that the Lord had directed him to distribute his cows among his poor neighbors. After the distribution had been going on for some time, a certain man, fearing that none might fall to himself, went to the deacon, and told him that he had received a communication from the Lord, saying that the Lord had directed him to the deacon for a cow. Well, says the deacon, you shall receive it. What cow did the Lord say should be given you, a new milch or farrow? A new milch cow, was the reply. Well, says the deacon, your communication could not be from the Lord, for I have already given away all my new milch cows. He was, it is said, the greatest land proprietor of any man in the vicinity, and of regular standing in the church, being remarkably exemplary. He was also a military captain, as stated in his epitaph.

Lyme, March 17, 1774.

Yesterday, one William Lamson, of Martha's Vineyard, came to this town with a bag of tea, (about 100 wt.) on horseback, which he was peddling about the country. It appeared that he was about business which he supposed would render him obnoxious to the people, which gave reason to suspect that he had some of the detestable tea lately landed at Cape Cod; and upon examination it appeared to the satisfaction of all present, to be part of that very tea, (though he declared that he purchased it of two gentlemen in Newport; one of them 'tis said is a custom house officer, and the other Captain of the fort.) Whereupon a number of the sons of liberty assembled in the evening, kindled a fire, and committed its contents to the flames, where it was all consumed and the ashes buried on the spot, in testimony of their utter abhorrence of all tea subject to a duty for the purpose of raising a revenue in America—a laudable example for our brethren in Connecticut.—*Conn. Jour. March 25, 1774.*

Lyme, Dec. 6, 1781.

Last Friday, a guard under the command of Ensign Andrew Griswold, stationed at Lyme, discovered a whale boat in a fresh pond near Black Point; and suspecting it came from Long Island, they set a guard of five men over the boat; and the night after four others of the guard with Ensign Griswold, went towards the house of the noted Elisha Beckwith; one of the party named Noah Lester, advanced faster than the rest, and was challenged by Beckwith's wife, who was near the house; this alarmed ten men who were in the house, well armed, and they immediately seized upon and made prisoner of Lester, and carried him into the house. Soon after the other four of the guard came to the house, (not knowing Lester was a prisoner,) and went directly in; where they discovered the ten persons in arms: a scuffle immediately ensued between them; and after some time the guard secured six of the party, among whom was Elisha Beckwith: the other four made their escape into the woods, but they all except one were taken the next day. They came in the above boat from Long Island, and were under the command of Thomas Smith, formerly of Middletown, who had a Captain's commission under the British king. Elisha Beckwith went off with the enemy the 6th Sept. last, when they made their descent on this place. The above culprits are secured in Norwich gaol.

MONTVILLE.

MONTVILLE originally belonged to New London. It was incorporated as a distinct town in 1786. It is bounded north by Bozrah and Norwich, west by Salem and Lyme, east by the river Thames, and south by Waterford. Its length from east to west is about eight miles, and its breadth averages about five miles. This township is embraced within the granitic district, bordering on the sea coast, and is uneven, being hilly and stony. The soil is a coarse, dry, gravelly loam, considerably strong and fertile, affording good grazing.

The road from New London to Norwich passes through this town; it is a turnpike, and is said to be the first which was ever made in the United States. "The former road was perfectly fitted to force upon the public mind the utility of turnpike roads. As New London is the port of entry for Norwich, the merchants of Norwich must often visit it upon business; and the convenience of dispatch in cases of business I need not explain. Yet few persons formerly attempted to go from one of these places to the other, and return the same day. Pleasure carriages on this road were scarcely used at all. The new road is smooth and good; and the journey is now easily performed in little more than two hours. These towns, therefore, may be regarded as having been brought nearer to each other more than half a day's journey."

There are 2 post offices in this town, the Montville and Uncasville post offices. Uncasville post office is in the southern section of the town. The central part of the town is about 8 miles from New London. Chesterfield is a parish in the southeastern section of the town. There are 3 cotton, 2 woolen factories, and an oil mill, in the limits of the town. There are five houses for public worship within the limits of the township, 2 for Congregationalists, 2 for Baptists, and one in the Mohegan reservation; a tract of land reserved by the state for the maintenance of this tribe of Indians, a remnant of which still remain in this town, "on the land of their fathers."

It appears from the most authentic information which can now be obtained, that, at the time of the first settlement of Connecticut, Uncas, the Mohegan sagamore, had under him between four and five hundred warriors. Allowing the proportion of the warriors to the whole number of inhabitants to have been as three to ten, the Mohegan tribe must have consisted of nearly 1700 people.

The Pequot and Mohegan country lay to the south and east of the Nehantic, (in Lyme,) from Connecticut river to the Rhode Island line on the east, and extended northward to near the northern boundary of the state. This tract was nearly thirty miles square, and included the counties of New London, Windham, and the principal part of the county of Tolland. Historians, (says Dr. Holmes,) have treated the Pequots and Mohegans as two different tribes; and have described the Pequot country as lying principally within the three towns of New London, Groton, and Stonington. All the tract north and east, as has been described, they have represented as the Mohegan country. Most if not all the towns in this tract hold their lands by virtue of deeds from Uncas, or his successors, the Mohegan sachems. Dr. Trumbull, however, thinks it doubtful whether the Mohegans were a distinct nation from the Pequots. "They appear to have been a part of the same nation, named from the place of their situation. Uncas was a Pequot by birth, and of the royal line, both by his father and mother; and his wife was a daughter of Tatobam, one of the Pequot sachems. He appears to have been a captain, or petty sachem, under *Sassacus*, the great prince of the nation. When the English first came into Connecticut, he was in a state of rebellion against him, in consequence of some misunderstanding between them; and his power and influence among the Indians were inconsiderable. Having revolted from his tribe, he was expelled his country.

"In 1637, when the English conquered the Pequots, Uncas readily joined them to save himself, and be avenged on his warlike adversary. After this period, Uncas was the most powerful sachem in the state. Part of the miserable remnant of the Pequots fell to the lot of the Mohegans, and became subject to the government of Uncas. He seems, however, to have swayed the scepter with a heavy hand; for the Pequots withdrew themselves from his dominion, and the commissioners found it necessary to fine him, and repeatedly to admonish him for his tyranny. He was however a brave warrior, and formidable to his enemies; on the murder of one of his principal Indians, by some of the men of Sequassen, a sachem on Connecticut river, he demanded satisfaction of him. It was refused. Uncas and Sequassen fought. Sequassen was overcome. Uncas killed a number of his men, and burned his wigwams. Sequassen appears to have been a sachem under the influence of Miantonimoh, the chief sachem of the Narragansetts. After the destruction of the Pequots, Miantonimoh attempted

to set up as a kind of universal sachem over all the Indians in New England. The old grudge and hatred which had subsisted between him and the Pequots, he now transferred to Uncas and the Mohegans. Without any regard to the league made between him, the English, and the Mohegans, at Hartford, in 1638, when the Pequots were divided between him and Uncas, he practiced murder and war against him. After the defeat of Sequassen, Miantonimoh, with 900 or 1000 men, marched against Uncas. These hostile chiefs met on *Sachem's Plain*, in the east part of the town of Norwich; Miantonimoh was defeated, taken prisoner, and some time after was put to death. Uncas appears to have pushed his conquests, in different directions, beyond Connecticut river. About 1654, he had a quarrel with Arrhamamet, sachem of Mus-sanco, or Massacoe, (Simsbury,) which brought on a war. Uncas sent one of his warriors to take and burn an out wigwam in the night, kill and burn, and leave the marks of the Mohawks. His orders were executed. Arrhamamet, supposing the Mohawks had done the mischief, went in search of them to the northwest. Uncas gained time to equip his men, and afterwards subjugated Arrhamamet. Podunk, near Hartford, was ever afterwards tributary to Uncas.*

On the conquest of the Pequots, the Mohegans claimed most of the Peqnot country as their hereditary right; they also laid claim to the Wabbequasset territory by virtue of conquest. This last named territory was conquered from the Nipmuck Indians, whose principal seat was about the great ponds in Oxford, in Massachusetts, but their territory extended southward into Connecticut, more than twenty miles. This was called the Wabbequasset and *Whelstone country*. The original Mohegan country was surveyed in 1705, and a map of it drawn. The occasion of this survey was a claim, brought forward in 1704, by Owaneco, the son of Uncas, to certain lands in Connecticut. The Masons and others preferred a petition and complaint to Queen Anne, in favor of the Mohegan Indians. The Masons claimed the lands purchased by their ancestor, deputy governor John Mason, in virtue of a deed given to him by Uncas in 1659, while he acted as agent of the colony; and denied the legality of his surrender of them to the colony, in the General Assembly, the next year. They insisted that it respected nothing more than the jurisdiction right, and that the title to the soil was vested in their family as guardians and overseers of the Indians. This celebrated "*Mohegan case*" was kept in agitation for nearly twenty years. It was always, on a legal hearing, determined in favor of the colony. The final decision was by king George III. in council, just before the Revolutionary war.

Uncas appeared at the first very unfriendly to the Christian religion. The commissioners of the colonies endeavored to reclaim him. In 1672, they wrote a letter to him "to incourage him to attend on the ministry." Whatever effect this letter may have had on his outward deportment it seems not to have reached his heart. In 1674, the Rev. Mr. Fitch, of Norwich, mentioned him as manifesting some respect to the Christian ministry, but with an entire distrust of his sincerity. About two years afterwards, however, a providential event made such an impression on the mind of this pagan chieftain, as gave this pious minister some hopes of his real conversion to Christianity. "In the summer of 1676, there was a great drought in New England, which was extremely severe at Mohegan, and in the neighboring country. In August the corn dried up; the fruit and leaves fell off as in autumn; and some trees appeared to be dead. The Indians came from Mohegan to Norwich, and lamented that they had no rain, and that their powwows could get none in their way of worship; they desired Mr. Fitch that he would seek God for rain. He appointed a fast day for that purpose. The day proved clear, but at sunset, at the close of the service, some clouds arose. The next day was cloudy. Uncas went to the house of Mr. Fitch, with many Indians, and lamented the great want of rain. If God shall send you rain, said Mr. Fitch, will you not attribute it to your powwows? He answered, no; for we have done our

* President Stiles' Itinerary.

utmost but all in vain. If you will declare it before all these Indians, replied the minister, you shall see what God will do for us; remarking at the same time, their repeated and unfailling reception of rain, in answer to fasting and prayer. Uncas then 'made a great speech' to the Indians, confessing that if God should then send rain, it could not be ascribed to their powwowing, but must be acknowledged to be an answer to the Englishman's prayer. On that very day the clouds became more extended; and the day following, there was such a copious rain, that their river rose more than two feet in height."* Whether Uncas died in the faith of Christianity, cannot now be ascertained. It is agreeable however to find him acknowledging the God *who is above*, and paying homage to the religion of his Son. "The same year (1676) Oneco, a son of Uncas, commanded a party of Mohegans, in an expedition with Captains Dennison and Avery, against the Narragansetts."

Ben or Benjamin Uncas appears to have been the last of the Mohegans dignified with the title of king. He died suddenly, in May, 1769. He was buried about half a mile south of the present Mohegan chapel. His son, Isaiah Uncas, was a pupil in Dr. Wheelock's school, at Lebanon. He is represented as a corpulent person, of dull intellectual parts, as was his father before him. "Isaiah died about one year after his father, and the royal line became extinct. The body of king Ben was dug up, and was carried with that of his son, and buried at Norwich."†

Although there seems to have been considerable pains taken to induce the Mohegans to embrace the gospel, yet these efforts appear to have been attended with but little or no success till about the year 1644, when the zealous Mr. Davenport at that time directed his efforts towards their conversion. He is said to have been very successful. To the converts gained at this time, Dr. Trumbull probably refers, when he says, "some few of the Mohegans have professed Christianity, and have been, many years since, admitted to full communion in the north church in New London.

About the year 1786, a few Indians went from Mohegan, with Mr. Sampson Occum, the celebrated minister, to the country of the Oneidas. A considerable number of their brethren emigrated to that country, at the same time, from Farmington, Stonington, Groton, and Nehantic, in the eastern part of Lyme; and from Charlestown, in Rhode Island. The inducement to this removal, was a tract of excellent wild land given to them by the Oneidas. These emigrants, being most of the scanty remnant of the Muhhekaneok Indians, formerly called "the seven tribes on the sea coast," constitute what are called "the Brotherton Indians," whose entire number, in 1791, was 250, and in 1796, 150 only. On their first emigration, they were under the pastoral care of the Rev. Mr. Occum.‡

The Mohegan reservation consists of about 2700 acres. It was holden by them in common till the year 1790, when it was divided to

* Hubbard's Indian Wars.

† The above information was obtained at Mohegan, in 1834, of Lydia Fowler, an Indian woman, 79 years of age, the oldest person belonging to the tribe.

‡ Holmes' Memoir of the Mohegans.

each family by the legislature of Connecticut. The Mohegans are under the care of guardians, or overseers, appointed by the Legislature. A part of the lands are occupied by the Indians themselves, and a part by white tenants, of which there are as many as Mohegans living on the reservation. The rents go into a common fund, from which the Mohegans derive individually a small sum annually.

In 1774, when a census of the inhabitants of Connecticut was taken, there were in the colony 1,363 Indians. The number in the township of New London was stated to be 206. Mohegan was then included in the limits of that town. At the same time there were in Stonington 237; in Groton 186; in Lyme 104; in Norwich 61; and in Preston 30; in all, 824. Most of these may be considered as descended from those who once owed some kind of allegiance to Uncas. Dr. Holmes, who visited Mohegan in 1803, says that "there were not more than 80 persons of this tribe remaining, and that John Cooper, the richest man in the tribe, possessing a yoke of oxen and two cows, was then their religious teacher." Four years after they were reduced in number to sixty nine, these being for the most part aged persons, widows, and fatherless children.

Within the course of a few years past, an effort has been made to elevate and rescue the remnant of this tribe from extinction. A small house for divine worship has been erected, and also a house for a teacher; towards erecting this last building the United States government appropriated 500 dollars; they have also allowed, recently, 400 dollars annually for the support of a teacher. The school, consisting of upwards of 20 scholars, at this time is under the care of Mr. Anson Gleason, who also officiates as a religious teacher at the Mohegan Chapel. Mr. Gleason commenced his labors among this people in 1832, and it is firmly believed that his efforts to promote the welfare of this people will be attended with lasting and beneficial effects. Mr. Gleason says, "that he can say for a certainty, that the native children are as apt to learn as any children he ever taught, and bid fair for intelligent men and women." He also says, "This tribe had well nigh run out by indulging in the use of ardent spirits; but of late there is a change for the better, a number of reformatations having taken place. Most of the youth are opposed to strong drink, and are members of the temperance reform. The greater part of the working men follow the whale trade, and come home only now and then. . . . We are on the increase, and hope in the course of a few years, through the mercy of God, to rise in point of virtue and respectability."

The Mohegan church is between three and four miles from Norwich city, a few rods east of the public road from Norwich to New London. It is beautifully situated on an eminence commanding a fair view of Norwich at the north, and New London at the south. It was built in 1831, at an expense of between six and seven hundred dollars, contributed for the purpose mostly by benevolent ladies in the cities of Norwich, Hartford and New London. This house is designed for the use of the Mohegans, and the white inhabitants who reside on the reservation. The Mohegan school house is 40 or 50 rods south of the chapel, at the foot of the hill, near by which is the house for the teacher.

FAIRFIELD COUNTY.

FAIRFIELD COUNTY is bounded N. by Litchfield County, N. E. and E. by the Housatonic river, which separates it from the county of New Haven, on the S. E. and S. by Long Island Sound, and W. by the state of New York. The county is of a triangular form, and has an average length from east to west of about 30 miles, and a mean breadth from north to south of about 21 miles. It extends about 40 miles on Long Island sound, and abounds with bays, points, and harbors, affording many interesting and beautiful landscapes. Proceeding from the Sound into the interior, there is a very gradual rise to the most elevated sections of the county, which overlook the intervening tract. The face of the country is generally agreeably diversified with hills and valleys. The soil, which in general is a primitive gravelly loam, is, with few exceptions, strong and fertile, and this county may be considered as a rich farming district, containing abundant natural resources of agricultural wealth. Manufactures of various kinds receive considerable attention in some parts of the county, and the business is increasing.

The following is a list of the several towns in the county, with their population in 1830.

Fairfield, . . . 4,222	Monroe, . . . 1,522	Sherman, . . . 947
Danbury, . . . 4,311	New Canaan, . . . 1,830	Stamford, . . . 3,707
Bridgeport, . . . 2,800	New Fairfield, . . . 939	Stratford, . . . 1,814
Brookfield, . . . 1,255	Newtown, . . . 3,096	Trumbull, . . . 1,242
Darien, . . . 1,212	Norwalk, . . . 3,792	Weston, . . . 2,997
Greenwich, . . . 3,801	Reading, . . . 1,686	Westport, . . . —
Huntington, . . . 1,371	Ridgefield, . . . 2,305	Wilton, . . . 2,097

Population of the county in 1820, 42,739; in 1830, 46,950.

FAIRFIELD.

FAIRFIELD was discovered by the pursuit of the Pequots, in 1637. Mr. Ludlow, who went with the troops to the Sasco, the great swamp in this town, was so well pleased with the fine tract of land in the vicinity, that he soon projected a settlement. In 1639, he, with a number of others, began a plantation at Unquowa, the Indian name of the place. At first there were but eight or ten families. These, it appears, removed from Windsor with Mr. Ludlow,* the principal planter. They were shortly after joined by another company from Watertown. A third company removed into the plantation from Concord; so that the

* Mr. Ludlow came from the west of England, with Warham and his company. In 1634, he was chosen deputy governor of Massachusetts colony; the next year he came into Connecticut, and was twice elected deputy governor of the colony, and was compiler of the first Connecticut code, printed at Cambridge in 1692. He removed with his family to Virginia, in 1654. Being town clerk of Fairfield, he carried off their records and other public writings.

inhabitants soon became numerous, and formed themselves into a township under the jurisdiction of the colony of Connecticut. The first adventurers purchased a large tract of the natives, and soon after Connecticut obtained charter privileges, the General Assembly gave them a patent. The purchase comprised the parishes of Fairfield, Greenfield, Green's Farms, and that part of Stratfield lying within the town of Fairfield, all the town of Weston, and a considerable part of Reading.

"Having obtained this patent, the proprietors soon after divided the territory purchased into lots, which run from near the shore of the Sound, back about ten miles, reserving suitable highways, running parallel to, and at right angles with these lots, the course of which was north, 28 degrees west. These highways were laid entirely straight for ten miles, but have since been altered in many places."

"As but a small part of this extensive tract of land had been occupied, previously to the time when Sir Edmund Andross made his appearance in Connecticut, the inhabitants of this town adopted this plan of dividing their purchase, to prevent their wild lands back from being taken from them; supposing, that as they were actually in the occupation of the front of their lots, they might be considered as possessing the whole, so far as to render it private property, and not subject to the disposal of the British government. The lots were of different widths; some being about ten rods wide, while others were fifty rods in width. Each proprietor had set to him a lot, the width of which was probably regulated by the amount of the money paid by such proprietor; and in the measuring of these lots, regard was had to inches, which shows a precise arithmetical calculation. Each of these lots has to this day been called by the name of the first proprietor, although a very considerable proportion of them are owned by persons of different names. Nearly in the center of this town was reserved a tract, one mile in extent, which was not divided, and was called the mile of common. Greenfield Hill is within the limits of this tract."

Fairfield is bounded northerly by Weston, northeasterly by Bridgeport, westerly by Westport, and southerly by Long Island sound. It has a mean length of upwards of six miles from northeast to southwest, and a breadth of six miles. It is a rich agricultural township, and in general in a high state of cultivation. The original growth of timber was, at an early period, from a common but lamentable improvidence, entirely destroyed, so that the forests now existing are of recent growth, and comprise but little timber fit for building. Wood and timber, therefore, command a high price. The surface of the town is undulating, presenting an agreeable succession of moderate eminences and gentle declivities. Upon the Sound are some tracts of salt marsh; proceeding back, the surface has a gradual elevation; but no portion of the town is mountainous, and it is in general free from stone.

Black Rock harbor, about $1\frac{1}{2}$ miles from Fairfield court house, is, with the exception of New London, one of the best harbors in the Sound, being safe and commodious, and having 19 feet of water at summer tides, below what is called the middle ground. There is a lighthouse on Fairweather's Island, which forms the easterly chop of the

harbor. Vessels can enter and depart from this harbor at any time of the tide. During the last war with Great Britain, a small fort was erected on an eminence commanding the entrance of the harbor, in which the state of Connecticut maintained a small body of militia a short time as a garrison. This fort was useful, in protecting the coasting trade in the Sound from the cruisers of the enemy.

About two or three miles from Fairfield, in a northern direction, is a precipice about 70 feet in height, being the termination of a granitic ridge. This precipice is called *Samp Mortar Rock*, from the circumstance of there being on its summit an excavation in the form of a mortar, and of sufficient dimensions to contain upwards of half a bushel of corn or other grain. The tradition is, that it was used by the native Indians for the purpose of pounding their corn. In the valley south of the rock is believed to have been the site of a large Indian village and burying ground. The rock above mentioned, has sometimes been called *Owen's Rock*, from the circumstance of a man by the name of Owen, who had lost his way, walking off this precipice in a dark night. His body was found the next morning. Dr. Dwight, who was at that time the minister at Greenfield, preached his funeral sermon.

Fairfield is divided into three parishes, Fairfield, Green's Farms, and Greenfield. Fairfield, the ancient village, is situated upon the great stage road to New York, 4 miles from Bridgeport, 21 from New Haven, and 58 from New York. It is built principally upon one street, and round an interesting green or square. The village consists of about 100 dwelling houses, a court house and jail, a Congregational church, and an academy. It is the shire town of the county. Half of the courts, however, sit at Danbury, about twenty miles distant.

This place was laid in ashes, by Gov. Tryon, in 1779, during the Revolutionary war. Eighty five dwellings were consumed in Fairfield, two churches, an elegant court house, fifty five barns, fifteen stores, fifteen shops, &c. The distress occasioned by this event was extreme. The following graphic description of the burning of Fairfield is from Dr. Dwight's Travels, volume 3d, page 512.

"On the 7th July, 1779, Gov. Tryon, with the army which I have already mentioned, sailed from New Haven to Fairfield: and the next morning disembarked upon the beach. A few militia assembled to oppose them; and in a desultory, scattered manner, fought with great intrepidity through most of the day. They killed some; took several prisoners; and wounded more. But the expedition was so sudden and unexpected, that the efforts, made in this manner, were necessarily fruitless. The town was plundered; a great part of the houses, together with the two churches, the court house, jail, and school houses, were burnt. The barns had been just filled with wheat, and other produce. The inhabitants, therefore, were turned out into the world, almost literally destitute.

"Mrs. Burr, the wife of Thaddeus Burr, Esq. high sheriff of the county, resolved to continue in the mansion house of the family, and make an attempt to save it from the conflagration. The house stood at a sufficient distance from other buildings. Mrs. Burr was adorned with all the qualities, which gave distinction to her sex; possessed of fine accomplishments, and a dignity of character, scarcely rivalled; and probably had never known what it was to be treated with disrespect, or even with inattention. She made a personal application to Gov. Tryon, in terms, which, from a lady of her high respectability, could hardly have failed of a satisfactory answer from any person, who claimed the title of a gentleman. The answer which she actually received, was, however, rude and brutal; and spoke the want, not only of politeness and humanity, but even of vulgar civility. The house was sentenced to the flames,

and was speedily set on fire. An attempt was made, in the mean time, by some of the soldiery, to rob her of a valuable watch, with rich furniture : for Gov. Tryon refused to protect her, as well as to preserve the house. The watch had been already conveyed out of their reach ; but the house, filled with every thing which contributes either to comfort or elegance of living, was laid in ashes.

“ While the town was in flames, a thunder storm overspread the heavens, just as night came on. The conflagration of near two hundred houses illumined the earth, the skirts of the clouds, and the waves of the Sound, with an union of gloom and grandeur, at once inexpressibly awful and magnificent. The sky speedily was hung with the deepest darkness, wherever the clouds were not tinged by the melancholy lustre of the flames. At intervals, the lightnings blazed with a livid and terrible splendor. The thunder rolled above. Beneath, the roaring of the fires filled up the intervals, with a deep and hollow sound, which seemed to be the protracted murmur of the thunder, reverberated from one end of heaven to the other. Add to this convulsion of the elements, and these dreadful effects of vindictive and wanton devastation, the trembling of the earth ; the sharp sound of muskets, occasionally discharged ; the groans, here and there, of the wounded and dying ; and the shouts of triumph : then place before your eyes crowds of the miserable sufferers, mingled with bodies of the militia, and from the neighboring hills taking a farewell prospect of their property and their dwellings, their happiness and their hopes : and you will form a just but imperfect picture of the burning of Fairfield. It needed no great effort of imagination to believe, that the final day had arrived ; and that amid this funereal darkness, the morning would speedily dawn, to which no night would ever succeed ; the graves yield up their inhabitants ; and the trial commence, at which was to be finally settled the destiny of man.

“ The apology made by Gov. Tryon for this Indian effort, was conveyed in the following sentence. ‘ The village was burnt, to resent the fire of the rebels from their houses, and to mask our retreat.’ This declaration unequivocally proves, that the rebels were troublesome to their invaders ; and at the same time is to be considered as the best apology, which they were able to make. But it contains a palpable falsehood, intended to justify conduct which admits of no excuse, and rejects with disdain every attempt at palliation. Why did this body of men land at Fairfield at all ? There were here no stores ; no fortress ; no enemy ; except such as were to be found in every village throughout the United States. It was undoubtedly the original object of the expedition to set fire to this town, and the apology was created after the work was done. It was perfectly unnecessary to mask the retreat. The townsmen, and the little collection of farmers, assembled to aid them, had no power to disturb it. No British officer, no British soldier, would confess, that in these circumstances he felt the least anxiety concerning any molestation from such opposers.

“ The injuries done to a single family, were an immense overbalance for all the good acquired in this expedition, either by the individuals engaged in it, or the nation in whose service they acted. Particularly, that highly respectable pair, Mr. and Mrs. Burr, in the loss of the mansion of their ancestors, and the treasures with which it had been stored through a long succession of years ; where the elegant hospitality, which had reigned in it ; the refined enjoyments, which were daily felt, and daily distributed to the friend, and the stranger ; the works of charity, which were there multiplied ; and the rational piety, which was at once the animating and controlling principle ; diffused a brilliancy, marked even by the passing eye ; lost more than the whole British nation gained by this devastation.

“ The next morning the troops re-embarked ; and, proceeding to Green’s Farms, set fire to the church, and consumed it ; together with fifteen dwelling houses, eleven barns, and several stores. Among the houses was that of the Rev. Dr. Ripley, the respectable clergyman of this parish. Here, also, was another proof, that burning was the object of the expedition. The number of dwelling houses consumed in Fairfield was eighty five ; of barns, fifty five ; of stores, fifteen ; of shops, fifteen ; &c.”

The building seen in the center of the print is the court house ; the church is on the right, and the jail on the left. All these buildings are erected on the very same foundations on which similar buildings stood in 1779, when Tryon laid them in ashes. The church is built precisely in the same form as the one burnt, it being the wish of the elderly people, that the house should have the same appearance as formerly ; the same fact is believed to be true of the form of the court house and jail. The stone steps of the church remain in their former

East view of the Court House, Church and Jail, Fairfield.

position, though somewhat broken by the falling of timbers, &c. at the time the house was burnt. Taking these facts into consideration, it may be fairly presumed, that this place, the green, houses, &c. have the same appearance as they did in 1779. At the time of the burning of the town, there were five hundred barrels of rice, which had been smuggled, stored in the cellar of the court house; it was all destroyed by the fire. As a British officer was coming out of this cellar, a 24 lb. shot came so near him, that he barely saved himself by springing upwards, and the ball passed between his legs. The house of Mr. Burr, mentioned by Dr. Dwight, was about ten rods distant from the jail, on the eastern side of the road. Mr. Jones' house, one of the handsomest in the place, is built upon its foundations. One of the Hessians who was killed, was buried at the western side of the church.

Western view of the Buckley house, Fairfield.

This building is one of the oldest in the town, having stood one hundred and fifty years, and has been used as a tavern ever since the year 1740, till within one or two years past. It stands on the eastern side

of the green, fronting the church, which is about thirty rods distant. When this house was erected, it was necessary to clear away the forest trees. It was built by Mr. Buckley, and has ever remained in possession of his descendants of that name to the present time. There has been however two modern additions; one is seen at the south end, the other on the west side of the house. At the time of the invasion of the British, a 24 pound shot, which was fired from Black Rock, entered the chimney. In the entrance at the door, are still to be seen the marks of twenty seven bullets, on the stair-way. The heat was so great during the conflagration, that all the window glass in front of this house were broken. This house was Tryon's head-quarters while in the place; he lodged in the chamber in the south part of the house, shewn in the engraving by the letter *a*. It was also the head-quarters of Col. Talmadge, who arrived from White Plains the day after Tryon left. His army encamped before the house, and their tents covered the green. Soon after the army had departed, Capt. Sturges, who commanded a company of militia, came into the street, placed a field piece in front of where the church now stands, and pointing it at the Buckley house, informed Mrs. Buckley that he would allow her a short time to clear the house, and unless she left it, would blow her to atoms. Mrs. Buckley found means to let Gen. Silliman (who lived about two miles distant) know her situation. He immediately came, and found about 150 men by the cannon. He ordered them to disperse, and unless they obeyed him, he would put them under guard. This threat had the desired effect.

The naval officer who had charge of the fleet, which conveyed the British forces under Tryon to this place, and acted as pilot, was brother to Mrs. Buckley. Before Tryon landed his forces, he requested that the house of his sister might be saved, and its inmates protected. Tryon, after his arrival, informed Mrs. Buckley that if she wished any other houses spared, it should be done; accordingly the four neighboring houses were saved by her means. Tryon having occasion to leave the house for a short time, a Hessian soldier, taking advantage of his absence, came into the house, and seeing a gold ring on the finger of Mrs. Buckley, demanded it of her, with the threat that if she refused he would cut off her finger: she refusing, he seized her hand, and tore off the ring with such violence that part of the flesh was stripped from her finger. When Tryon returned, being informed of this transaction, he ordered the Hessian to be severely punished.

The British landed in the morning, and stayed during the day and night. The town was fired very early next morning. As they left the place, the Hessians remained behind and set fire to the buildings. It seems to have been the policy of the British commanders, to employ this part of their forces to perform all acts of a barbarous and savage kind, which they wished to inflict. The inhabitants generally fled, but not expecting to have their houses burnt, left most of their furniture. There was but little opposition, there being but few militia and no regular troops in the vicinity, at the time of the landing. Among the barbarous transactions of the enemy was the following, which was related by Capt. Levi Burr, an eye witness, who was then a lad, ten years of age.

A shot was fired from one of the houses, which killed a British soldier; his comrades rushed into the house, seized the man who they supposed had fired the shot, wrapped him up in a sheet, which had been dipped in rum, and set it on fire. An aged colored man, it is said, also suffered death in the same manner.

The following elegy on the burning of Fairfield was written by Col. Humphreys, in 1779, on the spot where the town stood.

Ye smoking ruins, marks of hostile ire,
Ye ashes warm, which drink the tears that flow,
Ye desolated plains my voice inspire,
And give soft music to the song of woe.
How pleasant, Fairfield, on th' enraptur'd sight,
Rose thy tall spires, and op'd thy social halls!
How oft my bosom beat with pure delight
At yonder spot where stand thy darkened walls!
But there the voice of mirth resounds no more.
A silent sadness thro' the streets prevails;
The distant main alone is heard to roar,
And hollow chimneys hum with sudden gales—
Save where scorch'd elms th' untimely foliage
shed,
Which rustling, hovers round the faded green—
Save where, at twilight, mourners frequent tread,
Mid recent graves, o'er desolation's scene.
How chang'd the blissful prospect when compar'd
These glooms funereal, with thy former bloom,
Thy hospitable rights when Tryon shar'd
Long ere he sealed thy melancholy doom.
That impious wretch with coward voice decreed
Defenceless domes and hallowed fanes to dust;
Beheld, with sneering smile, the wounded bleed,
And spur'd his hands to rapine, blood, and lust.
Vain was the widow's, vain the orphan's cry,
To touch his feelings, or to soothe his rage—
Vain the fair drop that rol'd from beauty's eye,
Vain the dumb grief of supplicating age.
Could Tryon hope to quench the patriot flame,
Or make his deeds survive in glory's page?
Could Britons seek of savages the same;
Or deem it conquest, thus the war to wage?

Yes, Britons scorn the councils of the skies,
Extend wide havoc, spurn th' insulted foes;
Th' insulted foes to tenfold vengeance rise,
Resistance growing as the danger grows.
Red in their wounds, and pointing to the plain,
The visionary shapes before me stand—
The thunder bursts, the battle burns again,
And kindling fires encrimson all the strand.
Long dusky wreaths of smoke, reluctant driv'n,
In black'ning volumes o'er the landscape bend;
Here the broad splendor blazes high to heav'n,
There ember'd streams in purple pomp ascend.
In fiery eddies, round the tott'ring walls,
Emitting sparks, the lighter fragments fly;
With frightful crash the burning mansion falls,
The works of years in glowing embers lie.
Tryon, behold thy sanguine flames aspire,
Clouds ting'd with dies intolerably bright.
Behold, well pleas'd the village wrapt in fire,
Let one wide ruin glut thy ravish'd sight!
Ere fades the grateful scene, indulge thine eye,
See age and sickness, tremulously slow
Creep from the flames. See babes in torture die,
And mothers swoon in agonies of woe.
Go, gaze enraptur'd with the mother's tear,
The infant's terror, and the captive's pain.
Where no bold bands can check thy curst career;
Mix fire with blood on each unguarded plain!
These be thy triumphs! thy thy boasted fame!
Daughters of mem'ry raise the deathless song!
Repeat thro' endless years his hated name,
Embalm his crimes, and teach the world our
wrongs.

Southport is situated at the mouth of Mill river, and is a flourishing village, about two miles s. w. of Fairfield court house. Ten years since it contained only about twenty buildings; at this time there are from 60 to 70 dwelling houses, 8 stores, an academy, post office, a bank, and an Episcopal church. Forty years since there were but eight buildings in this place, and but one sloop owned, which run to Boston; now more shipping is owned in this place in proportion to its size, than in any other place between New York and Boston. It has the advantage of a considerably extensive and fertile back country. The produce from Greenfield, and the country adjacent, is brought here, to be shipped for New York and the southern ports. The harbor is small, but of sufficient depth to float vessels of about 100 tons burthen. It has an advantage over most other harbors on the coast, in its being rarely frozen sufficiently to obstruct navigation. Ten thousand dollars have been granted by the U. S. government for the improvement of the harbor, and an extensive breakwater was erected at its entrance, in 1831. Immediately opposite the village there are very extensive flats, which sometimes are overflowed by freshets.

One of the most prominent objects in the following view, is the Episcopal church, which stands on elevated ground; the small spire on the left stands on the Academy, near which is seen the Southport Bank, with pillars in front. The building in the distance on the extreme right is a

South view of the Borough of Southport, Fairfield.

flour mill, situated on the New York turnpike, about one fourth of a mile from the village. The spire of the Episcopal church in Fairfield, is seen above the mill. Immediately back of the village is the celebrated Pequot swamp,* where this once powerful and warlike tribe of savages, in July, 1637, made their last stand against the forces of Connecticut and Massachusetts, under the command of Capt. Mason. In this, their last conflict with the English, the Pequots received their final overthrow, and their existence as a distinct tribe was annihilated. Dr. Dwight, in his poem entitled "Greenfield Hill," says, after the Pequot fort at Mystic was destroyed by Capt. Mason, a large body of the Pequots found refuge in this swamp. "One of their number loitering behind the rest, was discovered by the English troops, then commanded by Capt. Stoughton, of Massachusetts; and was compelled to disclose their retreat. One hundred of them, it is said, surrendered. The rest, bravely resolving to live and die together, were attacked and chiefly destroyed." The following is extracted from the fourth part of the poem. This part is entitled, "The Destruction of the Pequots."

"Amid a circling marsh, expanded wide,
To a lone hill the Pequots wound their way;
And none, but Heaven, the mansion had deserted,
Close-tangled, wild, impervious to the day;
But one poor wanderer, loitering long astray,
Wilder'd in labyrinths of pathless wood,
In a tall tree embower'd obscurely lay:
Straight summon'd down, the trembling suppliant show'd
Where lurk'd his vanished friends, within their drear abode."

* A new road was made two or three years since through the Pequot swamp, passing over some remains of an Indian fort, which it appears formerly stood on an elevated piece of ground in the midst of the swamp. In order to lower the ground where the fort stood, (the surface of the ground being frozen,) an excavation was made, in doing which the earth above fell, and one man was instantly killed.

Academy and Congregational Church on Greenfield Hill, Fairfield.

The building on the right is the Congregational church, in which President Dwight, of Yale College, preached a number of years. He resided a few rods south of the church, in a house which he built, now the mansion of Isaac Bronson, Esq., a gentleman of great wealth and respectability. The Academy* is seen on the left; it is a small building, about the ordinary size of a school-house. It was established and its reputation maintained by Dr. Dwight for twelve years. It is still a respectable seminary, where young ladies are taught the higher branches of female education. On the extreme left is seen the spire of the Congregational church in Fairfield, about three miles distant, beyond which the Sound and Long Island appear. This place is most justly celebrated for the prospect which is obtained from the belfry of the church. No other spot in Connecticut can show such a commanding, extensive, and beautiful prospect. Seventeen churches can be seen, viz. two in Fairfield, three in Bridgeport, two in Stratford, two in Milford, two on Long Island, and one in each of the following places, viz. New Canaan, Reading, Northfield, Green's Farms, Southport, and Canaan. Five light-

* This academic school and its preceptor, (Dr. Dwight,) are thus referred to in the poem "Greenfield Hill."

"Where yonder humble spire salutes the eye,
 Its vane slow turning in the liquid sky,
 Where, in light gambols, healthy striplings sport,
 Ambitious learning builds his outer court;
 A grave preceptor, there, her usher stands,
 And rules, without a rod, her little bands,
 Some half-grown sprigs of learning graced his brow;
 Little he knew, though much he wish'd to know,
 Enchanted hung o'er Virgil's honey'd lay,
 And smil'd, to see desipient Horace play;
 Glean'd scraps of Greek; and, curious, trac'd afar,
 Through Pope's clear glass, the bright Mæonian star,
 Yet oft his students at his wisdom star'd,
 For many a student to his side repair'd,
 Surprised they heard him Dilworth's knots untie,
 And tell, what lands beyond the Atlantic lie."

houses are also seen from this place, viz. one on Norwalk Island, Eaton's Neck, Black Rock, Stratford Point, and New Pasture light. In a clear day, the East Rock near New Haven is distinctly seen. The society or parish of Greenfield is about four miles square, and contains about 1200 inhabitants. It is believed that some of the best farmers in the state are in this place and its vicinity; they live scattered about on their farms. The average amount of land improved by each farmer is about 150 acres of fine soil, the average price of which is about one hundred dollars per acre.

Dr. Dwight, while the minister of Greenfield, wrote the poem entitled Greenfield Hill. "On this height," he says, "the writer is supposed to stand. The first object there offering itself to his view, is the Landscape; which is accordingly made the governing subject of the first part of the poem. The following is an extract.

"Heavens, what a matchless group of beauties rare
Southward expands! where crown'd with yon tall oak,
Round-hill the circling land and sea o'erlooks;
Or, smoothly sloping, Grover's beauteous rise,
Spreads its green sides, and lifts its single tree,
Glad mark for seamen; or, with ruder face,
Orchards, and fields, and groves, and houses rare,
And scatter'd cedars, Mill-hill meets the eye:
Or where, beyond, with every beauty clad,
More distant heights in vernal pride ascend.
On either side, a long, continued range,
In all the charms of rural nature dress'd
Slopes gently to the main. Ere Tryon sunk
To infamy unfathom'd, thro' yon groves
Once glisten'd Norwalk's white-ascending spires,
And soon, if Heaven permit, shall shine again.
Here, sky-encircled, Stratford's churches beam;
And Stratfield's turrets greet the roving eye.
In clear, full view, with every varied charm
That forms the finish'd landscape, blending soft
In matchless union, Fairfield and Green's Farms
Give lustre to the day. Here, crown'd with pines
And skirting groves, with creeks and havens fair
Embellish'd, fed with many a beauteous stream,
Prince of the waves, and ocean's favorite child,
Far westward fading in confusion blue,
And eastward stretch'd beyond the human ken,
And mingled with the sky; there Longa's Sound
Glorious expands."

The following is from the 3d volume of the Massachusetts Historical Collections; it is entitled "A letter from the Rev. Andrew Eliot, to Rev. John Eliot, of Boston; concerning the burning of Fairfield, in July, 1779."

Fairfield, July 15, 1779.

Dear Brother,—I sit down to write you some account of the sad and awful scenes which have been exhibited in this once pleasant and delightful town, now, alas! a heap of ruins, a sad spectacle of desolation and woe.

It was in the beginning of wheat harvest, a season of extraordinary labor and festivity; a season which promised the greatest plenty that has been known for many years, if within the memory of man. Never did our fields bear so ponderous a load, never were our prospects, with regard to sustenance, so bright.

The British fleet and army, with the American refugees that had possessed and plundered New Haven, set sail from that distressed place on the 6th instant.

About four o'clock the next morning, the approach of the fleet was announced by the firing of a gun from a small fort we have on Grover's hill, contiguous to the Sound. They seemed however to be passing by. And about seven o'clock we, with pleasure, beheld them all to the westward of us, steering, as we thought to New York. A very thick fog came on, which entirely deprived us of the sight of them till between the hours of nine and ten, when the mist clearing away, we beheld the whole fleet under our western shore, and some of them close in with Kensie's Point. They presently came to anchor, and lay till about four in the afternoon, when they began to land their troops a little to the east of Kensie's Point, at a place called the Pines. From thence the troops marched along the beach until they came to a lane opposite the center of the town, through which they proceeded, and in about an hour paraded in their divisions on the green, between the meeting house and court house. From thence they detached their guards, and dividing into small parties, proceeded to their infernal business. Their commanding officers were Sir George Collier by sea, Generals Tryon and Garth by land. The approach of the fleet was so sudden, that but few men could be collected, though the alarm guns were fired immediately on the dissipation of the fog. There was no thought of opposing their landing, as our force was nothing to theirs. Our little party, however, posted themselves so as to annoy them to the best advantage, expecting they would land at the Point. When our people found them landing on the left and marching in the rear to take possession of the town, they immediately retreated to the court house; and as the enemy advanced from the beach lane, they gave them such a warm reception with a field piece, which threw both round and grape shot, and with their musketry, as quite disconcerted them for some time. The column, however, quickly recovered its solidity, and advancing rapidly, forced our small body to retreat to the heights, back of the town, where they were joined by numbers coming in from the country. The enemy were likewise galled very much, as they turned from the beach to the lane, by the cannon which played from Grover's hill.

The town was almost cleared of inhabitants. A few women, some of whom were of the most respectable families and characters, tarried with a view of saving their property. They imagined their sex and character would avail to such a purpose. They put some confidence in the generosity of an enemy, who were once famed for generosity and politeness; and thought that kind treatment and submissive behavior would secure them against harsh treatment and rough usage. Alas! they were miserably mistaken, and bitterly repented their confidence and presumption.

The Hessians were first let loose for rapine and plunder. They entered houses, attacked the persons of whig and tory indiscriminately; breaking open desks, trunks, closets, and taking away every thing of value. They robbed women of their buckles, rings, bonnets, aprons, and handkerchiefs. They abused them with the foulest and most profane language, threatened their lives without the least regard to the most earnest cries and entreaties. Looking glasses, china, and all kinds of furniture were soon dashed to pieces.

Another party that came on were the American refugees, who, in revenge for their confiscated estates, carried on the same direful business. They were not, however, so abusive to the women as the former, but appeared very furious against the town and country. The Britons, by what I could learn, were the least inveterate: some of the officers seemed to pity the misfortunes of the country, but in excuse said, that they had no other way to gain their authority over us. Individuals among the British troops, were, however exceedingly abusive, especially to women. Some were forced to submit to the most indelicate and rough treatment, in defense of their virtue, and now bear the bruises of horrid conflict.

About an hour before sunset, the conflagration began at the house of Mr. Isaac Jennings, which was consumed, with the neighboring buildings. In the evening, the house of Elijah Abel, Esq. sheriff of the county, was consumed with a few others. In the night several buildings in the main street. Gen. Tryon was in various parts of the town plot; with the good women begging and entreating him to spare their houses. Mr. Sayre, the Church of England missionary, a gentleman firmly and zealously engaged in the British interest, and who has suffered considerably in their cause, joined with them in these entreaties; he begged the general to spare the town, but was denied. He then begged that some few houses might be spared as a shelter for those who could provide habitations no where else; this was denied also. At length Mr. Tryon consented to save the buildings of Mr. Burr and the writer of this epistle. Both had been plundered ere this. He said, likewise, that the houses for public worship should be spared. He was far from being in a good temper, during the whole affair. General Garth, at the other end of the town, treated the inhabitants with as much humanity, as his errand would admit.

At sunrise some considerable part of the town was standing: but in about two hours the flames became general. The burning parties carried on their business with

horrible alacrity, headed by one or two persons who were born and bred in the neighboring towns. All the town, from the bridge by Colonel Gold's to the Mill river, a few houses excepted, was a heap of ruin.

About eight o'clock, the enemy sounded a retreat. We had some satisfaction, amidst our sorrow and distress, to see that the meeting house and a few other buildings remained. But the rear guard, consisting of a banditti, the vilest that was ever let loose among men, set fire to every thing which General Tryon had left, the large and elegant meeting house, the minister's houses, Mr. Burr's, and several other houses which had received protection. They tore the protection to pieces, damned Tryon, abused the women most shamefully, and then ran off in a most disgraceful manner. Happily, our people came in and extinguished the flames in several houses; so that we are not entirely destitute.

The rear guard, which behaved in so scandalous a manner, were chiefly German troops, called Yaugers. They carry a small rifle gun, and fight in a skulking manner, like our Indians. They may be properly called sons of plunder and devastation.

Our people on the heights, back of the town, were joined by numbers, but not equal to the numbers of the enemy. They were skirmishing all the evening, part of the night, and the next morning. The enemy were several times disconcerted and driven from their outposts. Had they continued longer in town, it must have been fatal to them; for the militia were collecting from all parts.

Our fort yet stands. The enemy sent a row galley to silence it, and there was constant firing between them all night. One or two attempts were made to take it by parties of troops, but it was most bravely and obstinately defended by Lieut. Isaac Jarvis of this town, who had but twenty three men besides himself.

The militia followed these bloody incendiaries to the place of embarkation, and galled them considerably. The embarkation took place about twelve o'clock, and they set sail for Long Island about two or three in the afternoon.

Many were killed on both sides. The number cannot be ascertained. They carried off some prisoners, but no person of distinction.

One particular I would mention. After Tryon had begun to burn, he sent out the proclamation which you have in the Hartford paper. In the midst of hostilities, while the flames were raging and bullets flying, who should come out with the flag, but Mr. Sayre! A spirited answer was sent in; and the people were so enraged that hostilities should be going on in the time of negotiation; and that Mr. Sayre should be the bearer of such an insulting proclamation, and at such a time, that the said gentleman was obliged to quit the town when the enemy left it. His whole family were obliged to go with him, leaving the greatest part of their substance behind, which became fuel for the flames, indiscriminately scattered by the rear guard. The reply which general Tryon made to Mr. Sayre, when he asked to go with him was, "You may go on board the ships, sir, but I cannot promise you any help or assistance."

The Church of England building was consumed, but by whom, or at what time, I am unable to say.

Unconnected with them, unsolicited on my part, through the intercession of Mr. Sayre, my house and property received a protection in General Tryon's own handwriting. A sentinel was placed there some part of the time. But sad experience convinces me to how little purpose all this was. My property was plundered, my house and furniture all consumed, though a lady was so kind as to show them the protection, which like others, was torn in pieces by the Yaugers.

Our friend, Joseph Bertram, was shot through the breast; old Mr. Solomon Sturgis, an Irish servant of Mr. Penfield, and a negro man belonging to Mr. Lewis, were put to death by the bayonet.

The distress of this poor people is inexpressible. A most pleasant and delightful town in flames! What a scene did the 8th of July present.

But I must forbear!—Every thing I have written you may depend upon as a fact: my pen has not been guided by prejudice, whatever my feelings are; and should you publish the letter, every reader may be assured that there is not the least deviation from what actually took place upon this melancholy occasion.

Yours, &c.

ANDREW ELIOT.

EXTRACTS FROM NEWSPAPERS.

From the Connecticut Journal, Feb. 26, 1768.

Last Friday, pursuant to the sentence of the Superior Court, then sitting at Fairfield, Archibald Fippeny, Lewis Bennet, John Mallett, and Nathaniel Bunnell, were crop't, and branded with the letter C on their Foreheads, for counterfeiting the lawful money bills of this colony, New York bills, dollars, &c. Several others were try'd at the same court, on suspicion of being accomplices with them in the same crimes, but

the evidence not being sufficient to convict them, they were discharged. Seth Porter and —— Sturges, not chusing to be try'd forfeited their bonds for appearance, the former one thousand pounds, and the other five hundred.

They were in partnership with that gang who are taken up at New York, as mentioned under the New York head.

From the Connecticut Journal, July 5th, 1771.

We hear from Fairfield, that on the 12th ult. a number of men, at low water, walked out to get clams, upon the Beach in that harbor, where they continued so long that they were surrounded by the tide, and in wading ashore several of them were in imminent danger of losing their lives; however, they all escaped except one David Keeler of Ridgefield, who being a good swimmer, attempted the passage with a bag of clams fastened to the waistband of his breeches, when in crossing a hole of deep water he sunk, and was drowned before any assistance could be given him. His body was found within three hours, and several experiments tried to restore him to life, but in vain. It is remarkable that the same day 12 months, and about the same hour of the day, lieut. Abraham Camp of that town was drowned in attempting to swim a horse across the same deep hole, and soon after one Benjamin Whitney was drowned in or near the same place.

The following letter is copied from the town Records of Fairfield.

Boston, November 24, 1774.

Gentlemen,—The testimony which the patriotic inhabitants of the town of Fairfield have given of their attachment to the common and glorious cause of Liberty, by the liberal donation of seven hundred and fifty bushels of grain, by Capt. Thorp, has afforded much comfort as well as seasonable relief to their friends in Boston, who are now suffering under the cruel rod of tyranny and oppression. The sympathy of our friends is a great support under our trials, notwithstanding the greatness and severity of them, and we trust, through the favor of our God, we shall be enabled to persevere in our opposition to the enemies of America, and so answer the hopes and expectations of our friends, of whose generous donations we trust we shall ever retain a grateful sense.

We are particularly obliged by the assurances you give us, "that you are not insensible of our sufferings, and the hope you express, that you shall consider yourselves bound to afford us such succor and relief, as your circumstances and our wants may demand."

May a kind providence bountifully reward your liberality and kindness, and the blessings of Him that was ready to perish, come down and rest on the heads of the generous inhabitants of the town of Fairfield.

We hope the inclosed account of the manner in which the committee are distributing the donations of our friends and benefactors, in whose cause (as well as our own) this town is suffering, will meet with your approbation, as it will afford great satisfaction to your obliged friend, and humble servants.

HENRY HILL,

By order of the Committee of Donations.

634 Bushels of Rye.

116 Bushels of Wheat.

750 Bushels.

Received 3 pair Shoes of Capt. Thorp.

To Mr. JON. STURGES and others, Committee for collecting donations in the town of Fairfield, Connecticut.

The following inscriptions are from monuments in the burying ground a short distance eastward from the court house in Fairfield.

In memory of the Rev. NOAH HOBART, A. M. ordained pastor of the first Church of Christ in Fairfield, Feb. 7th, 1732. In which station he served God and his generation with Fidelity, and Usefulness, until December 6th, 1773, when he was taken from the approaching troubles to receive the Mercy of God thro' CHRIST. "Remember them who have spoken unto you the word of God, whose Faith follow."

GOLD SELLECK SILLIMAN, Attorney at Law, Justice of the Peace, and during the late War, Colonel of Horse, and Brigadier General of Militia; died July 21st, 1790,

aged 58 years. Having discharged these and other public offices with reputation and dignity, and in private life shone the affectionate Husband, tender Parent, exemplary Christian, and Man of fervent Piety.

In the Episcopal Church, Mill Plain, Fairfield, within the altar, and immediately fronting the desk, on a beautiful marble tablet, is the following inscription.

Under the Altar at which he served more than forty years, are the remains of the Rev. PHILLO SHELTON, A. M. rector of Trinity Church, Fairfield. Born at Huntington, May 5th, 1751. Graduated at Yale College, Sept. 9th, 1778: Admitted Aug. 3d, 1785, to the Holy order of Deacons, by the Right Reverend Samuel Seabury, D. D. (first American Bishop) and Sept. 18th, 1785, by the same prelate, to the Holy order of Priests, being the first Clergyman Episcopally ordained in the United States. Died February 27th, 1825.

DANBURY.

THE original Indian name of Danbury was *Pahquioque*. The first settlement in the town was begun in the summer of 1684. The settlers came that year and begun some improvements in buildings, sowing grain, &c. Some of the families continued through the winter, others did not move till the spring following. It may therefore be said that the first permanent settlement was made in the spring of the year 1685, by eight families.* The names of the men were Thomas Taylor, Francis Bushnel, Thomas Barnum, John Hoyt, James Benedict, Samuel Benedict, James Beebe, and Judah Gregory. They settled near together, at the south end of the town street. They all came from Norwalk, except James Beebe, who was from Stratford: one of the first settlers after the first eight families, was Dr. Samuel Wood, an able physician, born and educated in England; Josiah Starr from Long Island, Joseph Mygatt from Hartford, and the families of Picket, Knapp, and Wildman, were all ancient settlers of the town. The town was surveyed in February, 1693, by John Platt and Samuel Hayes, of Norwalk: the survey bill declares the length to be 8 miles from north to south, and the breadth 6. The lands were purchased of the Indian proprietors.

“The time when a church was first organized in town, cannot be exactly determined; it was probably at the ordination of the first minister. The first minister in this town was the Rev. Seth Shove, a very pious and worthy man, who was very successful in his exertions for the promotion of peace, virtue and true religion: so that the general peace and union in his time, are proverbial to this day. He was ordained in the year 1696, and died October 3d, 1735, aged 68. The town was destitute of a settled minister but a short time. In a few months the church and people in great harmony invited Mr. Ebenezer White to settle with them in the ministry. He was accordingly ordained, March 10th, 1736. Universal harmony prevailed between the people and their minister, for more than 25 years. The people of this town were considered by all the neighboring towns, as eminent for morality and religion, for regularity of conduct, and for constant attendance on the institutions of christianity. It is supposed on good grounds, that the first meeting house was built prior to Mr. Shove's ordination; its dimensions were about 40 feet in length and 30 in breadth. It is remarkable, that after the frame was raised, every person that belonged to the town was present, and set on the sills at once. The second meeting house was built about the year 1719; its dimensions were 50 feet in length and 35 in breadth. In 1745, an addition of 15 feet was made to the whole front of the house. About the year 1762, religious controversy began in this town, and was carried to a great extent for many years. It is presumed,

* Robbins' Century Sermon, 1801.

that in no town in the state, has there been more religious contention than in this. It is hoped the flame is now mostly buried, never to break forth again. At the time above mentioned, Mr. White, having altered his sentiments and preaching, in several particulars, some uneasiness arose among his people. The efforts of several ecclesiastical councils to heal the division proving ineffectual, it finally issued in the dismissal of Mr. White from his pastoral charge, March, 1764. A major part of the members of Mr. White's church, joined with him in denying the jurisdiction of ecclesiastical councils, and renouncing the form of church government established by the churches in this state. The remaining part, who signified their adherence to the ecclesiastical government, were established and acknowledged by the two consociations of Fairfield county, convened in council, as the first church in Danbury. Soon after this, Mr. White and his adherents separated from the church and society, and formed a separate church: they were generally denominated 'Mr. White's adherents.' In October, 1770, a number of the inhabitants of the town, individually named in the act, principally those who composed this separate church, were incorporated a society by name of 'New Danbury.' Prior to this, they built a good meeting house, its dimensions about 50 feet by 40, in the year 1768, which was consumed in the general conflagration of the town. In the same year, Mr. Ebenezer Russel White was ordained a colleague with his father, over that church."—*Robbins' Century Sermon.*

Southeastern view of the Borough of Danbury.

Danbury is bounded n. by New Fairfield, e. by Brookfield and Newtown, w. by Ridgefield, and s. by Reading. Its length is about $8\frac{1}{2}$ miles, and its breadth more than 6. It has a fertile soil, pleasantly diversified with hills and valleys, and some moderate ridges, running in a northerly and southerly direction. By an act of the General Assembly in May, 1784, this town was made a half-shire of the county of Fairfield. From that time to the present, the courts have set alternately in Fairfield and Danbury.

The above shows the appearance of the borough of Danbury, as it is seen from the south, upon the Norwalk road. The main street, on which the borough is principally built, is one mile and a quarter in extent, thickly settled on both sides for that distance. The village is situated in a narrow but pleasant valley: a gentle eminence rises immediately westward of the main street, called Deer hill; a much smaller one rises eastward, called the Town hill. The village contains six houses of worship; 1 Congregational, 1 Episcopal, 1 Baptist, 1 Methodist, 1 Univer-

salist, and 1 Sandemanian. The Baptist church is seen in the engraving on the extreme left, situated on Deer Hill. The Episcopal church is at the south end of the village, and is one of the most prominent buildings in the view. This building is one of the oldest in the town; it was built in 1763, and is one of the few which escaped the general conflagration by the British troops in 1777. The next spire seen eastward of this, is that of the Universalist church, near which is seen that of the court house: the Congregational church is seen in the distance, on the extreme right. The village is 22 miles north from Norwalk, 36 from New Haven, 36 from Litchfield, 55 from Hartford, 65 N. E. from the city of New York, and 5 miles from the New York state line. The borough contains nearly 200 dwelling houses, besides numerous other buildings; 9 mercantile stores, 1 printing office, an academy, &c. In the first society of Danbury, there are 24 hatting shops or factories. Two hundred and eighty nine persons are employed, who manufacture 134,000 hats annually, the estimated value of which is £402,000.

South view of the central part of the Borough of Danbury.

It is in contemplation to construct a rail road to Norwalk, or some other place in that vicinity; the route is quite feasible, and it is believed will add much to the prosperity of Danbury.

The above is a southern view of the central part of the borough of Danbury, as seen from Deer hill, the elevated ground which rises immediately westward of the street. The building a little to the left of the central part of the engraving, having the most elevated spire, is the Universalist church, the first building to the left of which is the Academy. The jail is the first building to the right of the church, back of which is seen the ancient burying ground of Danbury, in which are the graves of Gen. Wooster and Mr. Sandeman. The court house is seen on the opposite side of the street, with a cupola; back of the court house is seen a gentle elevation, called Town hill.

In the latter part of the year 1776, the commissioners of the American army chose Danbury for a place of deposit for military stores. A large quantity having been collected, Gov. Tryon, with a detachment

of 2,000 men from New York, sailed to Compo Point in Fairfield, and proceeded directly to Danbury, to destroy the continental stores. There were in the town a small number of continental troops, but without arms; they with the inhabitants generally withdrew from the town as the enemy approached. The enemy entered the town on Saturday the 26th of April, 1777, at about three o'clock in the afternoon. They soon began those cruelties and excesses which characterize an unprincipled and exasperated enemy, upon the inhabitants who remained in the town, excepting the persons and property of the tories. The enemy, fearful that their retreat might be cut off, rallied early in the morning of the 27th, set fire to several stores and buildings, and immediately marched out of town. "Nineteen dwelling houses, the meeting house of the New Danbury society, and twenty two stores and barns, with all their contents were consumed. The quantity of continental stores which were consumed, cannot now be accurately ascertained: accounts vary considerably. From the best information which can be obtained, there were about 3,000 barrels of pork, more than 1,000 barrels of flour, several hundred barrels of beef, 1,600 tents, 2,000 bushels of grain, besides many other valuable articles, such as rum, wine, rice, army carriages, &c."*

The following is an account of the private losses sustained by individuals in the town of Danbury, in consequence of the enemy's incursion in that place; according to an estimate made thereof by a committee appointed to appraise the same; with the names of those who were principal losers.

	£.	s.	d.		£.	s.	d.
Mr. John McLean, . . .	2492	10	7	Joseph Wildman, . . .	417	8	4
Capt. Ezra Starr, . . .	2296	0	0	Dr. John Wood, . . .	394	3	4
Capt. Daniel Taylor, . . .	984	0	2	Mathew Benedict, Jun. . .	334	11	0
Col. Joseph P. Cook, . . .	953	9	6	Rev. Ebenezer White, . . .	327	11	0
Major Eli Maggatt, . . .	116	2	2	Jonah Benedict, . . .	309	9	8
Capt. James Clark, . . .	822	16	6	Mathew Benedict, . . .	265	4	8
Major Taylor, . . .	700	16	2	Jabez Rockwell, . . .	237	16	2
Comfort Hoyt, Jun. . .	651	15	1	Zadock Benedict, . . .	169	17	0
Thaddeus Benedict, Esq. . .	521	19	6	Benjamin Sperry, . . .	169	16	3
David Wood, . . .	433	1	0				

Which with a number of smaller losses ascertained by said committee, amount in the whole to £15,862, 9s. 7d. lawful money, lost by individuals in consequence of that town being made the repository of public stores. There is therefore the greatest reason that the public should not only grant speedy relief to the sufferers, (many of whom are reduced to extreme want,) but also that they should have the public faith pledged for the amount of those losses; which were estimated not according to the exorbitant prices at the present time, but in most instances as the articles cost before this war commenced.

Col. Cook appears to have been in the command at Danbury, at the time it was burnt. Receiving some notice of the landing or approach of the enemy, he immediately dispatched a messenger by the name of Lambert Lockwood, with a letter to Gen. Silliman, informing him that there was no ammunition in the place, and requesting orders. The messenger, before he was aware of it, came up with the British troops in the vicinity of Reading church, about 8 miles below Danbury; he attempted to flee, but was fired upon, wounded, and taken prisoner.

Tryon, it appears, had, a few years previous, broke down his carriage while passing through Norwalk. Mr. Lockwood, being then a clerk in a store in that place, rendered Tryon some assistance, and being recognized by him, on account of his services on that occasion, Tryon, on his leaving Danbury, intended to give him a furlough; while he was writing it, one of Tryon's officers came in, exclaiming, "the d—d rebels are upon us, we must be off;" Tryon threw down his pen, and left his prisoner to take care of himself.

As the British were entering Danbury, a Mr. Hamilton, who had a roll of cloth in some building near the Episcopal church, was determined at much hazard to secure it; he accordingly went to the place where it was, took it, and being on horseback rode off. The enemy's light horsemen followed hard after, exclaiming, we'll have you, old daddy! we'll have you! Not yet! replied the old gentleman. The light horsemen rode up and endeavored to cut him down, but the old gentleman's cloth began to unroll and fly out behind; this so frightened their horses, that they could not get within striking distance; they however chased him through nearly the whole extent of the street. Mr. Hamilton turning a short corner near the north end of the street, the horsemen gave up the pursuit. Three or four men in or near Capt. Starr's house, which was situated on the west side of the street, about 40 rods above the present court house, had the temerity to fire upon the enemy; the light horsemen rode up and cut them down, threw their bodies into the house, and set it on fire. The present Episcopal church was filled up to the galleries with barrels of pork and flour; these were rolled out into the street by the enemy and burnt. It is said that it was over one's shoes in the street near by, with pork fat, after the conflagration.

The following account of the expedition of the British to Danbury, &c. in April, 1777, is from the Connecticut Journal.

"On Friday, the 25th instant, twenty six sail of the enemy's ships appeared off Norwalk Islands, standing in for Cedar Point, where they anchored at 4 o'clock, P. M. and soon began landing troops; by 10 o'clock they had landed two brigades, consisting of upwards of two thousand men, and marched immediately for Danbury, where they arrived the next day at 2 o'clock, P. M.

"The handful of continental troops there were obliged to evacuate the town, having previously secured a part of the stores, provisions, &c. The enemy on their arrival began burning and destroying the stores, houses, provisions, &c.

"On the appearance of the enemy, the country was alarmed. Early the next morning, Brigadier General Silliman, with about five hundred militia, (all that were collected,) pursued the enemy; at Reading, he was joined by Major General Wooster, and Brigadier General Arnold. The heavy rain all the afternoon, retarded the march of our troops so much that they did not reach Bethel, (a village two miles from Danbury,) till 11 o'clock at night, much fatigued, and their arms rendered useless by being wet. It was thought prudent to refresh the men, and attack the enemy on their return. Early the next morning, (which proved rainy,) the whole were in motion, two hundred men remained with Gen. Wooster, and about four hundred were detached under General Arnold and General Silliman, on the road leading to Norwalk. At 9 o'clock, A. M. intelligence was received that the enemy had taken the road leading to Norwalk, of which General Wooster was advised, and pursued them, with whom he came up about 11 o'clock, when a smart skirmishing ensued, in which General Wooster, who behaved with great intrepidity, unfortunately received a wound by a musket ball, thro' the groin, which it is feared will prove mortal. Gen. Arnold, by a forced march across the country, reached Ridgefield at 11 o'clock, and having posted his

small party, (being joined by about 100 men,) of 500 men, waited the approach of the enemy, who were soon discovered advancing in a column with three field pieces in front, and three in rear, and large flank guards of near two hundred men in each. At noon they began discharging their artillery, and were soon within musket shot, (then a smart action ensued between the whole, which continued about an hour, in which our men behaved with great spirit, but being overpowered by numbers, were obliged to give way, though not until the enemy were raising a small breastwork, thrown across the way, at which Gen. Arnold had taken post with about 200 men, (the rest of our small body were posted on the flanks,) who acted with great spirit; the general had his horse shot under him, when the enemy were within about ten yards of him, but luckily received no hurt; recovering himself, he drew his pistol and shot the soldier, who was advancing with his fixed bayonet. He then ordered his troops to retreat through a shower of small and grape shot. In the action the enemy suffered very considerably, leaving about thirty dead and wounded on the ground, beside a number unknown buried. Here we had the misfortune of losing Lieut. Col. Gold, one subaltern, and several privates killed and wounded. It was found impossible to rally our troops, and Gen. Arnold ordered a stand to be made at Saugatuck bridge, where it was expected the enemy would pass.

"At 9 o'clock A. M. the 28th, about 500 men were collected at Saugatuck bridge, including part of the companies of Col. Lamb's battalion of artillery, with three field pieces, under command of Lieut. Col. Oswald, a field piece with part of the artillery company from Fairfield, sixty continental troops, and three companies of volunteers from New Haven, with whom Generals Arnold and Silliman took post about two miles above the bridge. Soon after the enemy appeared in sight, their rear was attacked by Col. Huntington (commanding a party of about 500 men,) who sent to Gen. Arnold for instructions, and for some officers to assist him. Gen. Silliman was ordered to his assistance; the enemy finding our troops advantageously posted made a halt, and after some little time, wheeled off to the left and forded Saugatuck river, three miles above the bridge. Gen. Arnold observing this motion, ordered the whole to march directly for the bridge, in order to attack the enemy in the flank, Gen. Silliman at the same time to attack their rear: the enemy, by running full speed, had passed the bridge on Fairfield side with their main body, before our troops could cross it. Gen. Silliman finding it impossible to overtake the enemy on their route, proceeded to the bridge, where the whole were formed; they marched in two columns, with two field pieces on the right, the other on the left of the enemy, when a smart skirmishing, and firing of field pieces ensued, which continued about three hours. The enemy having gained the high hill of Compo, several attempts were made to dislodge them, but without effect. The enemy landed a number of fresh troops to cover their embarkation, which they effected a little before sunset, weighed anchor immediately, and stood across the Sound, for Huntington on Long Island. Our loss cannot be exactly ascertained, no return being made. It is judged to be about sixty killed and wounded. Among the killed are 1 Lieut. Colonel, 1 Captain, 4 Subalterns, and Doct. David Atwater, of this town, whose death is greatly lamented by his acquaintance. Among the number wounded, are Col. John Lamb, (of artillery,) Arnah Bradley and Timothy Gorham, volunteers from New Haven, though not mortally.

"The enemy's loss is judged to be more than double our number, and about 20 prisoners. The enemy on this occasion behaved with their usual barbarity, wantonly and cruelly murdering the wounded prisoners who fell into their hands, and plundering the inhabitants, burning and destroying every thing in their way. The enemy, the day before they left Fairfield, were joined by ten sail, chiefly small vessels."

During the Revolution, a hospital for the American army was kept for some time at Danbury. Two buildings, each about 60 feet in length, were built for that purpose; they were situated about three fourths of a mile northwest from the court house, on land now owned by Samuel Wildman, Esq. Mr. Wildman lived in Danbury at the time it was burnt, and from him many of the foregoing particulars are derived. Many of the sick were brought from White Plains; about 200 soldiers were buried near the hospital. A large proportion of the sick were soldiers from the south, who were not used to the rigors of a northern climate.

"In 1775, a dysentery raged in all parts of the town. The number of deaths in the town, during the year, was about 130, of which 82

were in the limits of the first society. Says Mr. Baldwin, in his Thanksgiving sermon of that year, 'no less than 62 have been swept away from within the limits of the society in less than eleven weeks, the summer past; and not far from 50 in other parts of the town. Much the greater part of this number were children.' A remarkable fact occurred that year. A military company of about 100 men was raised in the town, and ordered to the northern army on Lake Champlain. When they went, it was viewed by their friends as next to a final departure. At the conclusion of the campaign, they all returned safely, and found that great numbers of their friends had sunk in death. The disorder had subsided before their return."

Sandemanian Church, Danbury.

The above is a north view of the Sandemanian church, situated near the northern part of the village of Danbury. It is a small, unostentatious building, placed a little back of the other buildings on the main street, and very much resembles a common school house. It is believed to be the only house of worship now used by that denomination in this country.

In 1764, Mr. Robert Sandeman, a native of Perth, in Scotland, a man of learning, and superior abilities, who had some correspondence with Mr. White, and some other ministers in this country, came from his native land, landed at Boston, and came to Danbury near the close of the year. After tarrying several weeks, he returned to Boston, where he soon organized a church. He returned to Danbury and gathered a church, in July, 1763. "The principal doctrines which he taught were similar to those of Calvin and Athanasius, which have been received in all ages of the Christian church. His distinguishing tenet was, that faith is a mere intellectual belief: his favorite expression was, '*a bare belief of the bare truth.*' He maintained that his church was the only true church, then arisen from the ruins of Antichrist, his reign being near a close. The use of means, for mankind in a natural state, he

pretty much exploded." Mr. Sandeman died in 1771. The next year his church moved to New Haven. There it appears they were in a flourishing condition for three or four years. The house in which they assembled for worship is still standing in Gregson street. When the Revolutionary war broke out, the Sandemanians, who were royalists, became objects of suspicion. They were brought before the civil authority on several occasions, and at one time were imprisoned. These proceedings had the effect to break up their church in this place; nearly, if not quite all their people moved away. "In July, 1774, several persons who had been members of that church, together with a number who belonged to the society at New Danbury, united and formed a new Sandemanian church. That continued and increased for many years, till March, 1798, when they divided into two churches."

The following is from a recent account given of the Sandemanians in this place. "They meet on the Sabbath, and the Thursday afternoon of each week, to exhort and to explain the sacred word. Their church is provided with a large circular table, which occupies nearly half of the area of the building, at which the several members seat themselves, each one provided with a copy of the scriptures, and as they individually feel disposed, they read and comment thereon, the females excepted. They appear to worship by themselves, the congregation not partaking therein, being but indifferent spectators of the proceedings. They also add to their former exercises prayer and singing; and after which, they assemble at one or the other of the brothers' or sisters' houses, where they partake of a feast. . . . There are probably, at present, about twenty primitive followers, of strict morals and chaste deportment, even to a proverb. It appears that none have joined them latterly. This sect, like most others, have had divisions among them, one party of which now go by the name of the *Osbornites*, from Mr. Levi Osborn, their present teacher. These are very few in number, reduced by deaths, and from the circumstance of none uniting with them. The other party go by the name of *Baptist Sandamanians*, from their belief in and practice of baptism. The Osbornites appear to have been the most numerous of the two classes, having had formerly a considerable number of members, consisting of some respectable people of influence." There are said to be but about 400 persons of this denomination in the world, 40 of whom are in the United States. Those of this belief in Great Britain, are known by the name of *Glassites*.

The following is copied from the monument of Mr. Sandeman, in the burying ground opposite the court house.

Here lies, until the resurrection, the body of ROBERT SANDEMAN, a native of Perth, North Britain, Who in the face of continual opposition from all sorts of men long boldly contended for the ancient Faith, that the bare work of Jesus Christ, without a deed or thought on the part of man, is sufficient to present the chief of sinners spotless before God. To declare this blessed Truth, as testified in the Holy Scriptures, He left his country, he left his Friends, and after much patient suffering, finished his labors at Danbury, April 2, 1771, Æ. 53 years.

Deign'd Christ to come so nigh to us,
As not to count it shame,
To call us Brethren, should we blush
At aught that bears his name?

Nay, let us boast in his reproach,
And glory in his Cross;
When he appears one smile from him;
Would far o'erpay our loss.

Major General Wooster, who was mortally wounded at Ridgefield, in an action with the enemy after they had left Danbury, was brought to Danbury, where he expired. He was buried, it is stated, at the distance of twenty feet, in a northeast course, from the grave of Mr. Sandeman.

The following inscription is from the monument, in this yard, of Mr. Shove, the first minister in Danbury.

Here lyes buried ye body of ye Revd. Mr. Seth Shove, ye Pious and Faithful Pastor of ye Church in Danbury 39 years, who died Oct. 3d, Anno Domini 1735, Ætatis suæ 68.

Congregational Church in Bethel, Danbury.

The flourishing village of Bethel, in the town of Danbury, is situated about three miles southeast from Danbury. The view shows the appearance of the Congregational church, and some other buildings in the vicinity. This church was erected in 1760, being the first meeting house erected here; the Rev. Noah Wetmore was the first minister; he was regularly dismissed from his pastoral charge in 1784.

Bethel was incorporated as a society in October, 1759. There are at this time, (1835,) about fifty dwelling houses in the village; the leading branches of manufacturing business, at present, are hat and comb making. An Episcopal church, about fifty rods s. w. of the Congregational church, has been erected the present year, besides many other buildings. There are in Bethel, 15 hating shops or factories, which employ, (including females,) 200 persons; they manufacture about 125,000 hats annually, which are valued, at wholesale prices, at about \$200,000. There are about 12 principal comb manufacturers, who employ about 180 persons in the business. The "Hatter's circular Dye Kettle and Wheel," was invented in Danbury in 1823, by Mr. Joel Taylor. It is a most important invention for hatters, and has come into general use both in this country and Europe.

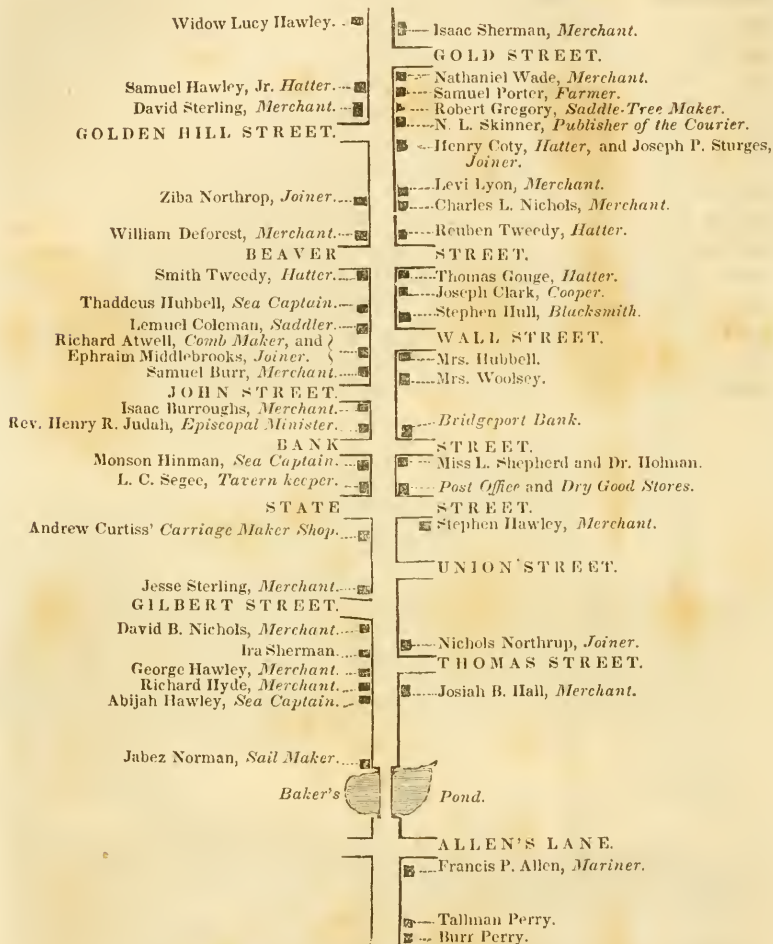

The British troops, in their expedition to Danbury, passed through this village; the following incident is said to have occurred here at that time. As the British were descending the hill, a short distance from the village, on the old Reading road, one of the inhabitants of the town, Mr. Luther Holcomb, rode his horse up to the summit of an eminence in front of the enemy. Although entirely alone, Mr. Holcomb, (judging from the words he used,) evidently intended to make an impression. Waving his hat or sword, and turning his face as though he was addressing an army behind him, he exclaimed in a voice of thunder, "*Halt the whole Universe! break off by kingdoms!*" This, it must be confessed, was a formidable force to encounter. The British army came to a halt, their cannon were brought forward and made to bear upon their supposed opponents, and flanking parties sent out to make discoveries. Mr. Holcomb, on the point of being surrounded, and deeming "discretion the better part of valor," thought it advisable to make good his retreat in a rapid manner towards Danbury.

 BRIDGEPORT.

East view of Bridgeport, (1834.)

BRIDGEPORT was incorporated as a town in 1821. It was formerly that part of the parish of Stratfield lying in the town of Stratford. It is of a triangular shape, averaging 4 miles in length from north to south, and over two miles in breadth, containing perhaps about ten square miles. It is bounded n. by Trumbull, e. by Stratford, s. by the waters of Long Island sound, and w. by Fairfield. The township is generally level, and has a strong and fertile soil.

A PLAN OF MAIN STREET, BRIDGEPORT, SHOWING THE BUILDINGS AND OCCUPANTS IN 1824.

The above plan was taken from a map of Bridgeport, surveyed by Mr. H. L. Barnum, and published in 1824. It is now accompanied by some additions and corrections by Isaac Sherman, Esq. the present town clerk of Bridgeport.

The city of Bridgeport was incorporated in 1836. It is mostly built on the west side of an arm of the sea, 17 miles s. w. from New Haven, 62 miles from New York, and 4 from Fairfield. The harbor extends about three miles inland to the head of tide water, where it meets Pequannock river, a considerable mill stream. The average width of the harbor, at high water, is eighty rods. At low water most of it is bare, leaving a channel about a dozen rods wide; common tides rise seven feet, spring tides nine. The depth of water on the bar, at high water, is about thirteen feet; within the bar the water is much deeper, having a muddy bottom. The bridge across the harbor is about one mile and

Drawn by H. Gardner, March 1831.

EASTERN VIEW OF BRIDGEPORT, CONN.

a half from its mouth, seventy five rods in length, built on trestles, with a draw for vessels to proceed above. The surface on which the town is principally built, is a plain about 12 feet above high water mark. There is however a rise called Golden hill,* commencing about 100 rods northwest of the center of the present buildings, which, after a gradual ascent of about 20 rods, in which the perpendicular elevation is 50 feet, presents a surface of half a mile square, forming a delightful situation for an upper town: from this elevation is a fine prospect of the Sound and surrounding scenery. Though situated within three miles of Stratford, and four of Fairfield, both among the earliest settlements in the state, at the close of the Revolutionary war there were but 10 or 12 houses on the site where Bridgeport is now built. In 1790, there were but 110 inhabitants; in 1830, there were upwards of 1,800 in the borough. The number of inhabitants at this time, (1837,) in the city, is 3,416.

South view of the Churches in Bridgeport.

The original name of the village, (now city,) was Newfield, which in 1800 was incorporated as a borough, and called Bridgeport. There are five churches in the limits of the city; 1 Episcopal, erected in 1801, now (1837) used by the Baptists; 2 Congregational—the first Congregational church was erected in 1803, by the society formerly worshipping in Stratfield, the other in 1830; the Methodist church, erected in 1822; and the present Episcopal church, now building. The ancient meeting house of the parish of Stratfield stood about one mile and a half northwest of the central part of the city, on the line road between Fairfield and Bridgeport; it was taken down a year or two since.

The above is a representation of the churches in this place, all standing in a direct line. The nearest building in the view, which is seen on

* This hill is partly a rocky eminence. In the stone is found ising-glass of a gold color, hence the name Golden hill. A numerous tribe of Indians formerly lived on this hill, and were called "the Golden hill tribe." Their skeletons are frequently dug up on the banks of the Pequonnoc river.

the right, is the second Congregational church; the next north is the Baptist, (formerly the Episcopal church;) the next building is the first Congregational church; the new Episcopal church is the next; the Methodist church is seen in the distance on the right, and is without a spire: Golden hill rises immediately beyond this building.

The first newspaper printed in the village was in 1795, and edited by Lazarus Beach. The first bridge was erected across the harbor in 1783. There are two banks in this place, the Bridgeport and Connecticut banks, the former incorporated in 1806, the latter in 1831. The number of inhabitants within the limits of the town, at this time, is estimated at upwards of four thousand. A daily line of steamboats, to ply between Bridgeport and New York, was established in July, 1834.

Among the principal articles manufactured in this place, are saddlery and carriages. The whale fishery, of late, has received considerable attention. Bridgeport, at this time, is rapidly increasing in wealth and population. A charter was granted in 1836 for a rail road, called the "Housatonic Rail Road," following the valley of the Housatonic, about eighty five miles, to West Stockbridge, Mass.

From the Connecticut Journal, Dec. 15, 1779.

On the 4th ult. about 25 volunteers, under the command of Captains Lockwood, Hawley, Jones, and Lieutenants Jackson and Bishop, set off from Newfield harbor on an expedition to Long Island, to fetch off Thomas Jones, Esq., one of the judges of their Supreme Court, and a warm Loyalist; they crossed the Sound that evening, arrived at Stony Brook near Smith Town, and then marched to Fort Nick, (said Jones' place of residence,) where they arrived the 6th, about 9 o'clock in the evening, being 52 miles, and after surprising the house, took said Jones prisoner; in consequence of which an alarm arose; which obliged our men to retreat, traveling 50 miles the same night, and secreting themselves the next day; (by which time the enemy's light horse were near,) the following evening they retreated to their boats, having taken two prisoners more, crossed the Sound and arrived safe at Black Rock, in Fairfield, on the 8th; except six men, who being in the rear, were taken by the light horse.

The object of the above expedition appears to have been the capture of some person of sufficient rank to exchange for Gen. Silliman, who was captured by the enemy a short time previous. The following is from the 3d vol. of Dwight's Travels.

In 1779, Major General Silliman was appointed by the governor and council of safety, superintendent of the coast of the county of Fairfield. In the month of May, Sir Henry Clinton directed a small company of refugees to cross the Sound in a whale boat from Lloyd's Neck, and if possible to take him a prisoner. One of them was an inhabitant of Newtown named Glover, a carpenter, who had been employed by General Silliman not long before; and having been some time at the house was perfectly acquainted with the safest and easiest modes of access to it. The crew consisted of nine. One was left in the boat. Eight came to the house about midnight. The family were awakened by a violent assault upon the door. General Silliman sprang out of bed, seized a musket, and ran to the door. As he passed by the window he saw the men, and at once comprehended their design. He then attempted to fire his musket; but it only flashed. At that instant the assailants broke through the window and laid their hands upon him, exclaiming that he was their prisoner, and that he must go with them. At his request they permitted him to dress himself, and having plundered him of a fuscé, a pair of pistols, a sword and some other articles of no great value, proceeded with expedition to the shore. They reached it about two o'clock, and immediately embarked for Long Island. As they approached the shore of Lloyd's Neck, Colonel Simcoe, the commanding officer, who was waiting for them exclaimed, 'Have you got him,' They answered Yes, 'Have you lost any men,' No, 'That is well, your Sillimans are not worth a man, nor your Washingtons.' General Silliman's eldest son was taken with him. The prisoners were ordered to the guard-house. The General asked the

Adjutant whether this was the manner they treated prisoners of his rank. The Adjutant replied, 'We do not consider you in the same light as we should a continental General.' How, said General Silliman, will you view me when an exchange shall be proposed! 'I understand you,' said the Adjutant, and withdrew. These questions probably preserved General Silliman from the indignity of being confined in a guard-house. Soon after, he and his son were conducted in a carriage to New York, under an escort of Dragoons. On his arrival a numerous body of people gathered to see him. A gentleman who was a friend to him, advised him to withdraw lest he should be insulted, and very kindly conducted him to good lodgings. Here he remained for some time and was at length ordered to Flatbush.

At that time there was no prisoner in the possession of the Americans, whom the British would accept in exchange for General Silliman; and after some consideration, it was determined to procure one. The person pitched upon was the Hon. Mr. Jones, one of the justices of the Supreme Court of the province of New York. Capt. Daniel Hawley of Newfield (now Bridgeport,) undertook to accomplish the design. Having selected a proper crew, he proceeded in a whale boat to Long Island, and having landed his men, concealed his boat in some bushes near the shore. Of the place where they landed I am ignorant; but it is said to have been at least fifty miles from the place of their destination. The house of Judge Jones stood, and probably now stands, on the north side of Hempstead plain, in a solitude rather pleasant, and certainly very favorable to their enterprise. The Americans arrived about nine o'clock in the evening. There was a ball in the house, and the noise of music and dancing prevented the approach of the adventurers from being heard. Captain Hawley knocked at the door, and perceiving that nobody heard him, forced it, and found Judge Jones standing in the entry. He instantly told him he was his prisoner, and immediately conducted him off, together with a young gentleman whose name was Hewlett. A guard of soldiers were posted at a small distance from their road. When they came near the spot, Judge Jones hemmed very loud, and was forbidden by Captain Hawley to repeat the sound. He however did repeat it, but, being told by his conductor that another repetition would be followed by fatal consequences, he desisted. On their way they were obliged to lodge in a forest through the day. The third night they reached their boat, and proceeded immediately to Newfield.

Mrs. Silliman, hearing of Judge Jones' arrival, sent him an invitation to breakfast. He came. During several days while he was at her house, she took all the measures in her power to make his situation agreeable. But although few ladies could contribute more effectually to such a purpose, the Judge was distant, reserved and sullen. From this place he was ordered to Middletown.

It was a long time before the British would consent to an exchange; but in the month of May, 1780, they agreed that if one Washburn, a refugee of a notoriously bad character, could be included in the exchange as a kind of make-weight, they would release General Silliman for Judge Jones, and his son for Mr. Hewlett. The vessel which conveyed him met another, employed to transport General Silliman to his own house, on the Sound. The two gentlemen having dined together, proceeded immediately to the respective places of their destination. The General's return was welcomed with demonstrations of joy by all the surrounding country.

BROOKFIELD.

BROOKFIELD was incorporated as a town in 1788; it was formed from parts of New Milford, Danbury and Newtown. It was formerly called the society of Newbury. The Rev. Thomas Brooks was the first minister in the place, and was ordained Sept. 28th, 1758, a church being gathered at the same time. Brookfield is said to have been named from the first minister. The town is bounded *n.* by New Milford, *n. e.* by the Housatonic river, *s. e.* by Newtown, *w.* by Danbury and New Fairfield. The township is equivalent to about 17 square miles, containing about 11,000 acres. The surface is diversified with hills and valleys, and the soil is generally a dry, hard, gravelly loam, particularly upon the hills; the lands generally are well adapted to a grain culture. In some sections of the town there is limestone, and several beds of marble.

Northern view of Brookfield, (central part.)

The above is a representation of the central part of Brookfield. There are about 20 dwelling houses at this place ; 2 churches, 1 Congregational and 1 Episcopal, and a town house. The Congregational church is the first building on the right with a spire ; the Episcopal church is the next building seen eastward, with four windows on the north side. The town house is seen on the east side of the street, with a small spire. These buildings stand on elevated ground, on the summit of a rocky ridge running north and south. About one mile and a half to the northwest there are iron works, and some other manufacturing business is carried on, with a village about the size of the one at the town center. There has been lead discovered about 40 rods south of the Episcopal church. The central part of the town is about six miles n. e. from Danbury, and twenty four from Fairfield.

D A R I E N .

THIS is a small township, formerly the parish of Middlesex, in the town of Stamford. It is bounded n. by New Canaan, e. by Norwalk, w. by Stamford, and s. by Long Island sound. It was incorporated as a town in 1820. The soil is generally a rich gravelly loam, fertile, and well adapted to tillage and grazing.

The following is a representation of the Congregational church in Darien, 5 miles southwest of Norwalk. It stands a few rods to the left, as you pass the main road to Stamford : this church was erected in 1740. During the Revolutionary war, a considerable number of persons disaffected to the American cause resided in this vicinity. On Sunday, the 22d day of July, 1781, a party of British troops, consisting chiefly of refugees, surrounded this church and took the congregation prisoners. The Rev. Moses Mather, D. D. was at this time pastor of the church,

Southwestern view of the Congregational Church, Darien.

a divine distinguished for his piety, learning, and most exemplary life. It was the intention of the refugees, or tories, to have taken the congregation prisoners during the morning services, but some members of the congregation who were peculiarly obnoxious to them, not attending church in the forenoon, they kept concealed till the afternoon services commenced. While the congregation were singing the first time, the refugees, commanded by a Capt. Frost, sprung over the fence and suddenly surrounded the house. Two or three young men, who happened to discover them in season, jumped out of the windows and effected their escape. Two guns were fired at them by the refugees, who did not think it prudent to fire any more, as the firing of three guns would have been the signal of alarm agreed upon by the inhabitants of this place, to give notice of any invasion of the enemy. The men of the congregation were taken out of the church, tied two and two, and Dr. Mather was placed at their head. The refugees then took about forty horses belonging to the congregation, mounted them, and marched their prisoners to the shore; and thence conveyed them to Lloyd's Neck on Long Island. From this place they were soon after marched to New York, and confined in prison.

Some of the congregation who were taken off, never returned; these probably perished in prison, others were paroled, and some returned after having suffered severely by the small pox. A writer in one of the British publications of the day, in giving an account of this expedition, made himself merry in describing the outcry which the women and children made at the time the men were taken prisoners, as though it were nothing to have husbands, fathers, and brothers, separated from them by an armed enemy, and taken off to a distant prison. The son of Dr. Mather was more fortunate than the rest; as the refugees entered the church, he sprung under the seat, and the women sitting before him, their clothes hid him from observation.

“Dr. Mather having been taken into New York, was confined in the Provost prison. Here his food was stinted, and wretched to a degree not easily imaginable. His lodging corresponded with his food. His company, to a considerable extent, was made up of mere rabble; and their conversation, from which he could not retreat, composed of profaneness and ribaldry. Here also he was insulted daily by the provost marshal, whose name was Cunningham, a wretch, remembered in this country only with detestation. This wretch, with other kinds of abuse, took a particular satisfaction in announcing, from time to time, to Dr. Mather, that on that day, the morrow, or some other time at a little distance, he was to be executed.”

“But Dr. Mather was not without his friends; friends, however, who knew nothing of him, except his character. A lady of distinction,* having learned his circumstances, and having obtained the necessary permission, sent to him clothes and food, and comforts, with a very liberal hand.”—Dr. Mather died Sept. 21st, 1806, venerated by all who knew him, in the 88th year of his age. He was educated at Yale College, of which he was a fellow thirteen years.

From the Connecticut Journal, Sept. 9th, 1779.

The Rev. Mr. Mather of Stamford, and two of his sons, are lately returned from captivity at New York. Mr. Mather was taken from his own house about five weeks since, with four of his sons, by a gang of eight tories, five of whom had been his parishoners. The other two sons are not exchanged.

July 26, 1781.

Sunday last, in the afternoon, a party of the enemy surprised the congregation of the parish of Middlesex, between Norwalk and Stamford, while attending divine service in the meeting house, and made prisoners of about forty, including the Rev. Mr. Mather, minister of the parish. The surprise was so complete that only 4 or 5 escaped, one of them a son of Mr. Mather, who was slightly wounded in the leg, as he was running off. They were carried to the water side and put on board two armed vessels, which at that instant came to, supposed by previous appointment. The enemy also took away a number of horses, with saddles, &c. A few of the inhabitants collected, who exchanged some shot with the enemy, and one or two were seen to fall, but whether mortally wounded is not known: one prisoner was taken.

The enemy's party consisted of about 40, who came over the night before from Lloyd's Neck, in seven boats, which they carried into a thick swamp near the meeting house, where they concealed themselves, until they rushed out and surprised the congregation as above. This is the second time that Mr. Mather has been a prisoner with the enemy.

The following is extracted from a “Poetical Relation of the capture of the Congregation at Middlesex . . . with an Account of their sufferings, &c. while in captivity, by Peter St. John.”

“Now to relate 'tis my intent,
A sad and tragical event.
On what I write you may rely
As I've the history lying by.
July the twenty-second day,
Where christians met to sing and pray,
In seventeen hundred eighty-one,
An horrid action was begun;
While to the Lord they sing and pray,
The tories who in ambush lay,
Beset the house with brazen face,

At Middlesex it was the place.
A guard was placed the house before,
Likewise behind and at each door.
Then void of shame, those men of sin,
The sacred temple enter'd in.
The reverend MATHER clos'd his book,
How did the congregation look?
The reverend priest, that man of God,
Severely felt the smarting rod,
Not by a whip do I pretend,
But by abuses from those friends.

* According to the information obtained in Darien, this lady was the mother of Washington Irving, the American poet.

How must he feel to see his sheep,
 Thus worried whilst they silence keep.
 Those demons plundered what they could,
 Either in silver or in gold.
 The silver buckles which we use
 Both at the knees and on the shoes,
 These caittifs took them in their rage,
 Had no respect to sex or age.
 And as they all were searching round,
 They several silver watches found.
 They who were placed as guards without,
 Like raging devils rang'd about,
 Took forty horses to the shore,
 Not many either less or more,
 With bridles, saddles, pillions on,
 In a few minutes all was done.
 The men which hence they took away,
 Upon this sacred awful day
 Was forty-eight, besides two more
 They chanced to find upon the shore.
 When to the shore they were convey'd,
 The orders given they obey'd.
 On board the shipping they were sent,
 But greatly feared the sad event,
 As well they might, because they knew,
 Their captors were the devil's crew.
 They hoisted sail, the sound they cross'd,
 And near Lloyd's-Neck they anchored first.
 Then every man must tell his name,
 A list they took and kept the same,
 Now twenty four of fifty men,
 Were ordered home again:
 The twenty-six who stay'd behind,
 Most cruelly they were confin'd,
 On board the brig were ordered quick,
 And were confined beneath the deck;
 A nasty hole with filth besmear'd,
 But 'twas no more than what they fear'd.

* * * * *
 But to return whence I left off,
 They at our misery make a scoff,
 Like raving devils tore about,
 Swearing they'd tear our vitals out;
 That they'd no quarter ever give,
 Nor let a curs'd rebel live;

But would their joints in pieces cut,
 Then round the deck like devils strut.
 Oh, human nature, how depriv'd!
 Can any mortal e're be sav'd?
 So void of good, and full of evil,
 And wholly bent to serve the devil.
 July the four and twentieth day,
 We all were sent to Oyster-Bay.

* * * * *
 We to the ferry came at last,
 View'd by spectators as we past:
 The gazing rabble, Tory throng,
 Would curse us as we past along.
 In boats the ferry soon we past,
 And at New York arrived at last.
 As thro' the streets we past along,
 Ten thousand curses round us rung;
 But some would laugh and some would snear,
 And some would grin, and some would lear.
 A mixed mob, a medley crew,
 I guess as e'er the devil knew.
 To the provost we were then hal'd,
 Though we of war were prisoners call'd;
 Our Irons now were ordered off,
 The standers by would swear and scoff.
 But O what company we found;
 With great surpris we look'd around!
 I must conclude that in this place,
 We found the worst of Adam's race;
 Thieves, murderers, and pick-pockets too,
 And every thing that's bad they'd do:
 One of our men found to his cost,
 Three pounds York money he had lost;
 His pockets pick'd, I guess before
 We had been there one single hour.

* * * * *
 Full eighteen days or something more,
 We fairly were exchang'd before,
 Of the exchange they let us know,
 Or from that place of bondage go,
 That of the number twenty-five,
 But just nineteen were left alive;
 Four days before December's gone,
 In seventeen hundred eighty-one."

GREENWICH.

THE settlement of Greenwich was begun, after it had been purchased of the Indians, in 1640, under the Dutch government at New York, then New Amsterdam. In 1665, it was incorporated by Gov. Stuyvesant. It was, however, originally purchased for the colony of New Haven, by Robert Feaks and Daniel Patrick. But the purchasers violated their engagements to that colony, and together with the few inhabitants, placed themselves under the government of New Amsterdam. The settlement went on heavily, until the people returned to the jurisdiction of Connecticut, then including the colony of New Haven. The Indians were hostile to the Dutch, and were not very favorably inclined towards the inhabitants. "The war between the Dutch and Indians continuing," says Dr. Trumbull, "a great and general battle was fought between them, in that part of Horse neck commonly known by the name of Strickland's plain. The action was long and severe, both parties fighting with much obstinacy. The Dutch with much difficulty kept the field, and the Indians withdrew. Great numbers were slain on both sides, and the graves of the dead, for a century or more, appeared like a number of small hills." This battle took place in 1646.

Greenwich is bounded on the north and west by the county of Westchester in the state of New York, on the east by Stamford, and on the south by Long Island sound. Its average length is $8\frac{1}{2}$ miles, and its breadth nearly six. The town is divided into three parishes, West Greenwich on the west, Greenwich on the east, and Stanwich, a part of which is taken from Stamford, on the north. West Greenwich is often called *Horse neck*, from a peninsula on the sound, formerly used as a pasture for horses. This parish is the largest, richest, and most populous part of the town. The township is hilly, and broken, and ledgy, in many places. After passing Byram river, the boundary between Connecticut and New York, the road passes through a tract of country unusually wild and savage in its aspect, large masses of rocks being scattered about in great disorder. But the grounds at a short distance, both above and below the road, are smoother, and the soil is of the best quality, and fitted for every production of the climate. There are several small streams which discharge their waters into the Sound on the southern border of the town, of which Byram river and Miannus creek are the largest. There are also several landing places. *Sawpitts* landing is on the New York side of Byram river, where the steamboats stop to land and receive passengers.

Putnam's Hill is situated in West Greenwich, about five miles west from Stamford, on the main road to New York. This place is celebrated for the daring exploit of Gen. Putnam, who descended this precipice when pursued by the British dragoons. The place is considerably altered in its appearance since the Revolutionary war, by a road being blasted through the rocks at the summit of the hill, and continued by a causeway to the valley below. A small Episcopal church formerly stood on the brow of the hill, a few feet south of where the road is now cut through; and the road passed north by the house* seen in the engraving, and after proceeding to a considerable distance, bent again with a sharp angle to the south. The members of the congregation who lived below the hill, in order to save the tedious circuit of going round in the road, when walking to the church, placed stepping stones, in number about seventy, at suitable distances, so that foot passengers could ascend the precipice, directly up to the church. On the left of the print is seen a range of small trees, extending from the bottom to the top of the hill; these trees now occupy the place where the steps or stairs were situated, few or no traces of which now remain.

On the approach of Gov. Tryon to this place, with a force of about fifteen hundred men, Gen. Putnam planted two iron field pieces by the meeting house, without horses or drag ropes. Having fired his cannon several times, Putnam perceiving the dragoons, (supported by the infantry,) about to charge, ordered his men, about one hundred and fifty in number, to provide for their safety, and secured his own by plunging down the precipice at full trot. The dragoons, who were but a sword's length from him, stopped short; for the declivity was so abrupt that

* This house was standing during the Revolutionary war, and is now occupied by one of the physicians of the place. The Congregational church is about 80 rods west. A new Episcopal church has been recently erected, which is still nearer.

Southeastern view of Putnam's Hill, Greenwich.

they dared not follow, and before they could gain the valley, by going round the brow of the hill in the ordinary way, he was far beyond their reach. One shot, however, of the many fired at him, went through his hat as he was passing down the hill. It has been generally stated, that Putnam rode directly down the steps; but those who saw him pass down the hill, say that he took a zigzag course, commencing at the barn seen in the engraving, north of the house, and continuing south till he reached the steps, the lower ones of which he might have descended. This course would be sufficiently hazardous, and it is believed but very few men could be found who would dare make the attempt.

The following is Gen. Putman's official account of the skirmish at Horse Neck.

Camp at Reading, March 2d, 1779.

"A detachment from the enemy at King's bridge, consisting of the 17th, 44th, and 57th British regiments, one of the Hessians, and two of new levies, marched from their lines for Horse neck on the evening of the 25th ult., with an intention of surprising the troops at that place, and destroying the salt works.

"A captain and thirty men were sent from our advanced lines from Horse neck, who discovered the enemy at New Rochelle, in advance. They retired before them undiscovered, as far as Rye neck, where it growing light, the enemy observed and attacked them. They defended themselves as well as possible, and made their way good to Sawpitts, where they took advantage of a commanding piece of ground and made some little stand, but the superior force of the enemy obliged them to retire over Byram bridge, which they took up, and by that means had an opportunity of reaching Horse neck in safety.

"As I was there myself to see the situation of the guards, I had the troops formed on a hill by the meeting house, ready to receive the enemy as they advanced. They

came on briskly, and I soon discovered that their design was to turn our flanks and possess themselves of a defile in our rear, which would effectually prevent our retreat. I therefore ordered parties out on both flanks, with directions to give me information of their approach, that we might retire in season. In the mean time a column advanced up the main road, where the remainder of the troops (amounting only to about sixty,) were posted. We discharged some old field pieces which were there, a few times, and gave them a small fire of musketry, but without any considerable effect; the superior force of the enemy soon obliged our small detachment to abandon the place.

"I therefore directed the troops to retire and form on a hill a little distance from Horse neck, while I proceeded to Stanford and collected a body of militia and a few continental troops which were there, with which I returned immediately, and found that the enemy, (after plundering the inhabitants of the principal part of their effects, and destroying a few salt works, a small sloop and store,) were on their return. The officer commanding the continental troops stationed at Horse neck, mistook my orders, and went much farther than I intended, so that he could not come up with them to any advantage. I however ordered the few troops that came from Stanford to pursue them, thinking they might have an opportunity to pick up some stragglers. In this I was not mistaken, as your Excellency will see by the enclosed list of prisoners. Besides these, eight or nine more were taken and sent off, so that I cannot tell to which particular regiments they belonged, one ammunition and one baggage wagon were taken. In the former there were about two hundred rounds of canister, grape and round shot, suited to three pounders, some slow matches, and about two hundred tubes; the latter was filled with plunder, which I had the satisfaction of restoring to the inhabitants from whom it was taken. As I have not yet got a return, I cannot tell exactly the number we lost, though I don't think more than ten soldiers, and about that number of inhabitants, but a few of which were in arms.

List of prisoners taken at Horse neck, the 26th ult.—17th Regiment, 15 privates; 44th do. 5 privates, 57th do. 3 privates, Loyal American Regiment 5, Emmerick corps 8. First battalion of Artillery 1, Pioneers, 1.—Total 38.

N. B. Seven deserters from Emmerick's corps.

The following account of Gen. Tryon's expedition to Horse neck, 1779, is from the New Haven Journal.

"Extracts from two letters from Fairfield county, dated March 1st.

"The enemy have made an excursion within four miles of Stamford, by the best accounts of about 1400 or 1500, under the command of Gov. Tryon; they reached Horse neck on Friday morning about 9 o'clock; at Stamford they were not alarmed till 10 o'clock, notwithstanding the enemy were discovered at 9 o'clock the preceding evening by a small guard of continental troops at East Chester, under the command of Capt. Titus Watson, who were obliged to give way, though they fought on their retreat, and some of them were wounded and taken prisoners. Capt. Watson was closely pursued by a light horseman, whom he had the good fortune to kill, and by the made his escape. Gen. Putnam was accidentally at Stamford, but the continental troops were too much scattered to be collected in season to oppose the enemy. About 200 militia and a few continental troops, fell in with the enemy's rear, just as they were leaving Horse neck, about the middle of the afternoon, who killed 8 or 10 of them, and took about fifty prisoners, who had made too free with the strong liquor they had plundered. They destroyed a small salt work, and burnt a schooner which lay at Mianas creek. They plundered the inhabitants of every thing they could lay their hands on, broke windows, &c. and many families are strip'd of every thing but the clothes they had on; even the house where Gov. Tryon had his head quarters was not spared. They retreated to Rye on Friday evening, and next day to King's bridge. Their retreat was so precipitate, that they left behind two wagons loaded with plunder. We had not a man killed."

New Haven, January 28th, 1778.

On the 25th ult. Lieut. Barber, of Groton, in company with another officer, walked out a few miles from our camp near the Sawpitts, and on their return a party of Tories concealed, rose and fired on them with buck shot, when Lieut. Barber was shot through the body, and died immediately.

HUNTINGTON.

HUNTINGTON was incorporated as a town in 1789 ; and at that time included two parishes, Ripton and New Stratford. Since the formation of Monroe, Ripton constitutes the town of Huntington. It is bounded northwest by Monroe, east by the Housatonic, separating it from Derby and Orange, south by Stratford, and west by Trumbull. It averages about five miles in length and breadth. The surface is uneven, being diversified with hills and valleys ; the soil is generally fertile, being adapted to a grain culture. Agriculture is the principal business of the inhabitants.

S. view of the Episcopal and Congregational Churches, Huntington.

The above is a south view of the Episcopal and Congregational churches, in the central part of the town. The Episcopal church is seen on the right, and the Congregational church, recently erected, is seen on the left. The Rev. Jedediah Mills appears to have been the first minister in this place ; he was ordained in February, 1724. The first meeting house was erected on Fanton hill, an elevation 80 rods or more northeast of the churches represented in the engraving. The ancient burying ground is near the place. The second Congregational church stood about 25 rods N. E. of the present building, which is the third. The first Episcopal church was erected in 1740. The church or society was under the care of Dr. Johnson until the year 1755, when the Rev. Christopher Newton was appointed their missionary. About 20 years since the Episcopal church, which stood on the foundations of the present building, was burnt down. It was set on fire by a gun, which was discharged at some doves on the building. This place is four miles west from Derby Landing, and twelve from Fairfield.

MONROE,

WAS incorporated as a town in 1823. It was formerly the parish of New Stratford, in the town of Huntington. It is bounded north by Newtown, east by the Housatonic, south by Huntington and Trumbull, and west by Weston. The town is about six miles in length from east to west, and four and a half in breadth. The surface of the township is uneven, and in many parts stony and rough. The soil is good, and generally adapted to grazing. Orchards flourish well, and there is generally a profusion of the common fruits of the country. Agriculture is the principal business of the inhabitants.

South view of the central part of Monroe.

There are two post offices in this town, one at the center, and one called the Stepney post office, in the western part of the town, about 11 miles north of Bridgeport. The principal part of the mechanical business of Monroe is performed in this vicinity.

In the central part of the town, there is a small village, consisting of a dozen or more dwelling houses, two churches, one Congregational and 1 Episcopal, and an Academy or classical school. These buildings are situated around a small, open square or green. The building seen in the central part of the engraving, on the north side of the square, is the Congregational church; the first building seen east of the church is the Academy; part of the Episcopal church is seen on the left. The classical school mentioned above was commenced in 1828, by Mr. Samuel Beardslee, a graduate of Yale College, and has been sustained by a respectable number of pupils, from various places. This place is on an elevated situation, and the air is generally pure and salubrious. The township abounds in good springs of water, and is considered unusually healthy. There are 4 houses of worship; 1 Congregational, 1 Episcopal, 1 Baptist, and 1 Methodist.

Monroe is much celebrated for its extensive deposit of minerals. More than fifteen years since, a shaft was sunk a few feet, on the farm of Mr. Ephraim Lane. This revealed a rich variety of interesting mineral substances. Among them were tungsten, tellurium, native bismuth, native silver, magnetic and common iron pyrites, copper pyrites, galena, blende, tourmaline, &c. It is greatly to be desired, that this locality should be farther explored. Four miles south of this spot, is a vein of fluor spar, about two feet in width.

"The vein is much penetrated by quartz, mica, feldspar and talc, but it has been hitherto examined only on the surface. It is principally massive, and its structure foliated or coarsely granular, but it presents well defined cubical crystals. Its colors vary from white to deep violet and purple, and are principally various shades of the two latter. But the most interesting circumstance relating to it, is its splendid phosphorescence. The light emitted when it is thrown, in a dark place, upon a hot shovel, is the purest emerald green; pieces of an inch in diameter become in a few seconds fully illuminated, and the light is so strong and enduring, that when carried into a room lighted by candles, or by the diffuse (not direct) light of the sun, they still continue distinctly luminous, and the light dies away very gradually as the mineral cools."

Mr. Lane has also discovered on his land a locality of beryls, some of which are very large. Native sulphur has been found, near the surface of the earth.

NEW CANAAN.

NEW CANAAN was incorporated as a town in 1801. This town was formerly Canaan parish, lying in the townships of Norwalk and Stamford, incorporated as a parish in 1731. The first society meeting was held July 1st, 1731. The next year there were 47 members of the society—30 on the Norwalk side, and 17 on the Stamford side. Ponus street was annexed to North Stamford in May, 1788. The Rev. John Eells of Milford, was the first minister; he was ordained in June, 1733; he resigned his pastoral charge in 1741. He died in New Canaan in 1785, in his 85th year. The Rev. Robert Silliman, the next pastor, was ordained in 1742, and continued in the ministry in this place till 1771. William Drummond, born and educated in Scotland, and ordained there by the presbytery of Ochterarder, in the synod of Perth and Sterling, was installed pastor in this place in 1772. He was dismissed and deposed from the ministry in 1777. The Rev. Justus Mitchell, of Woodbury, was ordained here in 1783; he died suddenly in 1806.

New Canaan is bounded n. by the state of New York, w. by Stamford, s. by Stamford and Norwalk, and e. by Wilton. It is 6 miles in length, and 4 in breadth. The surface of the township is mountainous, containing spines or ridges, composed of rock and stone, which extend from north to south through the town. The soil is a hard gravelly loam, being stony, but tolerably well timbered, and generally good for cultivation. The manufacture of shoes and leather is the principal manufacturing business done in the town, the yearly value of which is estimated at 400,000 dollars.

East view of the central part of New Canaan.

The above is an eastern view of the central part of New Canaan. The building on the extreme right, with a square tower, is the Episcopal church, recently erected; the building seen standing nearest to it, is the town house. The Congregational church, with a spire, is seen on the left. This building was erected in 1752, and is the second house of worship; the first stood a little south. The Methodist church is about half a mile south of this place. The building with a small steeple or tower, in the central part of the engraving, is the New Canaan Academy, established in 1815. This respectable institution is now under the superintendence of Mr. Silas Davenport, who is both principal and proprietor. It stands on an elevated and commanding situation, having a fine prospect of Long Island sound and the intervening country. This place is 5 miles n. w. from Norwalk, 37 from New Haven, and 50 from New York. About two miles north of the Congregational church, in a tract of woods, was a place of resort for all the Indians in the vicinity. There are three excavations out of the solid rock, the largest of which will contain about 8 gallons, and another about 5; the third will contain about 1 quart. These cavities are on the side of a rock, one above another, the largest being at the top. Pestles, stone axes, and other Indian implements, have been found about this spot; the rocks bear the appearance of fire. The cavities above mentioned were doubtless formed by the Indians, for the purpose of pounding or grinding their corn.

The following inscription is from a monument in the old grave yard, seen in front of the Congregational church.

In memory of the Rev. Justus Mitchell, A. M., V. D. M., pastor of the church of Christ in New Canaan, who died suddenly in the hour of sleep, 24th Sept. A. D. 1806, in the 52d year of his age, and 25th of his ministry. In his death was lost to his consort an affectionate and beloved husband; to his children a kind revered parent, coun-

seller and guide; to his flock a faithful, learned and venerated pastor; to the Church of Christ a bright ornament and example; to the poor a liberal benefactor; to the disconsolate a comforter and friend.

In doctrine uncorrupt, in language plain,
 And plain in manner, decent, solemn, chaste,
 Affectionate in look, and much impress'd,
 By him the violated law spoke out
 Its thunders; and by him in strains as sweet
 As angels use, the gospel whisper'd peace.

NEW FAIRFIELD.

NEW FAIRFIELD was granted by the General Assembly in 1707, to a number of the inhabitants of Fairfield. The town was originally fourteen miles in extent from north to south. The first settlement appears to have been in the year 1730, in that part of the town called the lower seven miles. Several circumstances retarded the settlement of the town, for nearly thirty years after it was granted by the legislature. The Indians in this part of the colony were judged to be less friendly than usual, and there were reports of a designed attack from a large body of French and Indians from Canada. The line between Connecticut and New York was not settled till 1731. The grant by Connecticut of the tract called the Oblong, to New York, as a compensation for lands settled on the Sound, disappointed the proprietors, and narrowed the township several miles, as to its western *extent*. It was incorporated as a town in 1740. The first minister in the present township was the Rev. Benajah Case, who was ordained in 1742.

New Fairfield is now but about five miles in extent from north to south, with an average breadth of about four and a half miles. It is bounded n. by Sherman, w. by the state of New York, e. by New Milford, and s. by Danbury. The township is broken, having several granite ridges extending through it; the soil is hard and gravelly. It is watered by Rocky river, a mill stream which runs in a northerly direction, and discharges itself into the Housatonic. The central part of the town is 64 miles southwest from Hartford, and 7 miles north of Danbury.

NEWTOWN.

THE ancient Indian name of this township was *Pohtatuck*, being the name of a stream which intersects the town. In 1708, the General Assembly made a grant of the tract of country comprising the township, and incorporated it as a town the same year, by the name of Newtown. The principal seat of the Indians in this town appears to have been at the mouth of the Pohtatuck, a mill stream which enters the Housatonic.

The township is rather irregular in its form, being nearly a triangle in its shape. Its length from northwest to southeast averages about eight miles, with an average breadth of more than six. It is bounded n. w. by Brookfield, n. e. and e. by the Housatonic river, which se-

parates it from Southbury, w. by Danbury and Reading, and s. w. by Monroe. The surface of the town is hilly ; many of the eminences are extensive and continuous. The soil is principally a gravelly loam, with some sections of sandy loam, generally fertile and productive. It is well adapted to the culture of grain, and is also favorable for fruit, there being many valuable orchards in the town. There are 5 churches in the town ; 2 Episcopal, 1 Congregational, 1 Baptist, and 1 Methodist.

South view of Newtown.

The borough of Newtown is situated on the southern termination of a ridge of elevated land. After ascending the hill, from the south, there is a broad and level street, about eighty rods in extent. The borough is mostly built on this street : there are about 40 or 50 dwelling houses, 3 churches, 1 Congregational, 1 Episcopal, and 1 Methodist ; and 4 mercantile stores. This place is 10 miles from Danbury, 25 from New Haven, and 22 from Fairfield. The above engraving shows the appearance of the village as it is entered from the south. The Episcopal and Congregational churches are seen at the south end of the principal street, near the southern descent of the hill. The houses are not distinctly seen, on account of the trees standing before them.

The flourishing village of *Sandy Hook* is situated about $1\frac{1}{2}$ miles n. e. of the central part of Newtown, at the foot of a rocky eminence or bluff, from the top of which is a fine prospect of the surrounding country. A fine mill stream (the Pohtatuck) runs in a northerly course through the village, at the base of the bluff, which rises almost perpendicularly to the height of one hundred and sixty feet. Near Mr. Sanford's cotton factory, at the northern extremity of the village, some traces of coal have been discovered. The village contained in 1834, 1 cotton, 1 hat, 1 comb and 2 woolen factories. There was

also 1 machine shop, and 1 establishment for working brass. The village contained about 50 families in 1834 ; it is at the present time rapidly increasing.

The following inscriptions are from monuments in the burying ground, nearly a mile south of the village of Newtown.

Here lyeth interred the earthly remains of the Rev. John Beach, A. M. late missionary from ye venerable society for the propagation of the gospel in foreign parts, who exchanged this life for Immortality on the 19th day of March, 1782, in the 82d year of his age and 51st year of his ministry.

The sweet remembrance of the just
Shall flourish when he sleeps in dust.

Reader let this Tablet abide.

The following inscriptions are from five monuments which stand near each other, separated in some measure from other monuments in the yard.

In memory of Anna, wife of Amos Shepard, died in 1824, aged 63.

Behold the orient star appearing,
Harbinger of endless day ;
Hark ! a voice the darkness cheering,
Calls my fleeting soul away.

Elam Shepard died Jan. 1st, 1826, aged 25 years.

Soon my cries shall cease to grieve thee,
Soon my trembling heart find rest,
Kinder arms than thine receive me,
Softer pillow than thy breast.

Albert Shepard died at Bridgeport, Feb. 5th, 1826, aged 32.

Yet to leave thee sorrowing rends me,
Though again his voice I hear,

Rise, may every grace attend thee,
Rise and seek to meet me there.

Sylvia Ann, wife of Henry Judson, who died Feb. 6th, 1826, aged 23.

O happy, happy place
Where saints and angels meet,
Where we shall see each other's face
And all our burthen greet.

William T. Shepard died March 26th, 1826, aged 27 years.

Through this calm and holy dawning,
Silent glides my parting breath,
To an everlasting morning,
Gently close my eyes in death.

NORWALK.

THE eastern and middle parts of Norwalk appear to have been purchased of the natives about the year 1640 ;* yet, for ten years, there were but a few scattering inhabitants within its limits. In 1649, upon the petition of Nathán Ely and Richard Olmstead, the Court gave liberty for its settlement, and ordained that it should be a town by the name of Norwalk. At this period, the inhabitants consisted of about twenty

* Norwalk originally included part of the present towns of New Canaan and Westport. In the ancient records, the bounds are stated to be "from Norwalk river to Sauhatuck river, from sea, Indian one day walk into the country." For this tract the following articles were given, viz. "8 fathom wampum, 6 coats, 10 hatchets, 10 hoes, 10 knives, 10 seizers, 10 juseharps, 10 fathom tobacco, 3 kettles, 3 hands-about, and 10 looking glasses." The following articles were given to the Indians for the tract, "from Norwalk river to Five mile river, from sea, Indian one day in country," viz. "10 fathom wampum, 3 hatchets, 3 hoes when ships come, 6 glasses, 12 tobacco pipes, 3 knives, 10 drillers, 10 needles." The name of Norwalk is derived from the above bargain, viz. the northern bounds of the lands purchased were to extend from the sea one day's "north walk" into the country.

families. About four years after, the General Court vested them with town privileges.

The town is bounded northwest by New Canaan and Wilton, west by Darien, east by Westport, and south by Long Island sound. Its length from north to south is about five miles; its breadth may average about four. The soil is excellent. The surface of the town is uneven, being pleasantly diversified with hills and valleys. On the border of the Sound the hills are generally moderate, and in the interior more elevated.

South view of the Borough of Norwalk.

“The valley which lies along Norwalk river, and in which the town is built, is beautiful. Few richer prospects of the same extent can be found, than that which is presented from the neighboring eminences of this ground; the town built in its bosom, with its cheerful spires; the river flowing through the middle; the farms on the bordering hills; the rich plain that skirts the Sound, and a train of islands fronting the mouth of the river, and extending eastward five or six miles; together with an unlimited view of the Sound, and the Long Island shore.”

Norwalk contains two considerable and flourishing villages, Norwalk borough, and the village of Old Well. Norwalk borough, (constituted as such in 1836,) is a village of upwards of 100 houses, 26 mercantile stores, 2 churches, 1 Congregational and 1 Episcopal, 1 bank, (the Fairfield County bank,) and 1 extensive pottery. There are two newspapers printed in the borough. Norwalk is a place of considerable activity and business, being a commercial depot and market for the northern part of the county; a considerable proportion of the staple products being brought here for sale, or to be freighted for New York. This place is 32 miles from New Haven, 48 N. E. from New York, and 22 south of Danbury.

The village is built on both sides of a small river or creek, which is much contracted in width at the bridge which connects the two parts of the village, and the buildings on each side of the stream are so near each other, that the passage of the river from the north is not readily perceived at a short distance. Vessels drawing six feet of water can get up to the bridge, in the most compact part of the village. On the extreme right of the engraving is seen a small conical hill or elevation, on which are a number of poplars, perhaps 10 or 15 rods east of the road which passes on the east side of the creek. This elevation is called *Grummon's Hill*; it is celebrated as being the head-quarters of Gov. Tryon, who, seated in a chair on its summit, beheld the conflagration of this place in 1779, it is believed, with pleasure. The building before which a flag-staff is standing, is the old town house, north-east from which are seen the spires of the Congregational and Episcopal churches.

Southern view of Norwalk Town House.

The above is a representation of the new town house, which is constructed of brick, erected in 1836. The old town house was pulled down in July, 1835. It had been long in a ruinous state, and much disfigured the appearance of the place. Some persons in the town, who took upon themselves the responsibility of regulating things of this nature about the town, being impatient of the "law's delay," took advantage of the darkness of night, pulled down the obnoxious building, and piled up the rubbish by the side of the road.

On the 11th of July, 1779, Norwalk was burnt by the British and Tories, under Gov. Tryon. Eighty dwelling houses, 2 churches, 87 barns, 17 shops, 4 mills, and 5 vessels, were consumed. The loss of property sustained by the inhabitants, was estimated by a committee, appointed by the General Assembly for the purpose, at \$116,238 66. The following account of the burning of this place was obtained from Mr. Betts, an aged and respectable inhabitant of this town, who was an eye witness to most of the facts related:—

Gov. Tryon and Brigadier General Garth having laid Fairfield in ashes, crossed the Sound to Huntington bay, where they remained till

the 11th of July. They then sailed over to Norwalk, and landed in the night, between 8 and 9 o'clock, on the plain which lies on the east side of the river. On learning this fact, the inhabitants generally fled, during the night; many of them went to Belden's hill, about five miles distant. Next morning, between 7 and 8 o'clock, Tryon arrived at *Grummon's hill*, which he made his head-quarters. Little opposition was made to the British troops, excepting by a company of continental soldiers, about fifty in number, commanded by Captain Stephen Betts, who was soon, however, obliged to flee from the overwhelming force of Tryon, with the loss of four of his men killed. These men were buried in a lot in the northwestern part of the place, then owned by Mrs. Cannon. The first building was burnt about sunrise; it stood near where the steamboat wharf is now constructed. Both the churches in the place, one the Congregational, the other the Episcopal, were consumed. The Congregational church was seventy feet by fifty three, and three stories in height, and had just been put in good repair; it was situated thirty or forty rods south of Grummon's hill. The Episcopal church stood on the same foundation on which the present church is built. The present building is built in the same form of the one burnt.

Six houses only were left undestroyed by the enemy; four on the east, and two on the west side of the river. One of these was saved by the intercession of a maiden lady, who personally applied to Tryon, in order to save the house. The argument which she made use of was, "that the owner of the house was a friend to his majesty king George." The other five houses were probably spared from the same considerations. The British began their retreat about noon; the Episcopal clergyman, and several other persons disaffected to the American cause, went off with them.

The flourishing village of Old Well* is situated about 1½ miles south of the central part of Norwalk borough, on the west side of the creek, Norwalk river being so called up as far as the bridge. The view shows the appearance of the village from the eastern side of the creek, on the elevated bank which rises above the flats, opposite the village. There are at present in the village 6 or 7 hat factories, 3 potteries, and a carriage making establishment. This is the principal landing place for steamboats, for Norwalk and the vicinity, there being a daily line from and to New York. A boat leaves Norwalk bridge every other day for New York. There are two churches in Old Well, a Congregational in the center, and a Methodist in the northern part of the place.

There is a cotton factory, and a factory for manufacturing carpets, in the town. This establishment, called the "Patent Carpet Company," was commenced in 1834. Their carpeting, of which they manufacture at this time about 200 yards daily, is made *without* spinning or weaving, being made of felting, the material of which hats are composed. Messrs. Arnold & Bishop are the proprietors of this establishment, which promises to be one of much importance.

* This place, it is believed, received its name from an *old well*, from which, in ancient times, vessels engaged in the West India trade, took their supplies of water.

Eastern view of the village of Old Well, Norwalk.

The following is Capt. Betts' account of the skirmish with the enemy at Norwalk, (in the secretary of state's office, Hartford.)

Fairfield county, Norwalk, July 26th, 1779.

Captain Stephen Betts, of Col. Butler's Reg. in ye continental service personally appeared and made solemn oath, That on ye 11th instant, while ye enemy invaded Norwalk, he with about fifty continental troops and some militia, engaged a superior number of ye enemy, which obliged them to give way to an unequal force. As they retreated, John Waters, a continental soldier, fell into ye enemy's hands, delivered up his arms, and begged for life; but ye enemy notwithstanding assaulted him with bayonet, which they stabbed him in sundry places, and then one of them presented his piece and aimed, as the Captain supposed, at his body, but missing that, ye ball shattered his arm, whereupon finding no quarter, he made a strong effort to escape, which he happily effected. Soon after ye above accident, John Rich, another continental soldier, was shot so as to fall, and as the enemy were nigh, and crowded fast upon our people, he desired Capt. Betts to leave him, as they could not take him without the greatest hazard. Capt. Betts saw Rich no more, but says Capt. Eels of Col. Wyllis' Reg. told him he saw him after ye enemy had retreated, about two hours after Capt. Betts saw him. He was then dead, and ye top of his skull torn off, supposed to be blown off by a musquet to dispatch him; and further saith not. Before me,

THADDEUS BETTS, Justice of the Peace.

The following is from Gen. Tryon's official account, published in the London Gazette, relative to the burning of Norwalk.

"Wanting some supplies, we crossed the Sound to Huntingdon, and there continued till the 11th, and repassing that day, anchored five miles from the bay of Norwalk. The sun being nearly set before the 54th, the Landgrave's regiment, and the Jagers were in the boats, it was near nine in the evening when I landed them in the Cow pasture, a peninsula on the east side of the harbor, within a mile and a half of the bridge, which formed the communication between the east and west parts of the village, nearly equally divided by a salt creek.

The king's American regiment being unable to join us before three next morning, we lay that night on our arms. In our march at the first dawn of the day, the 54th led the column, and soon fell in with the rebel outpost, and driving the enemy with great alacrity and spirit, dispossessed them of *Drummond hill*, and the heights at that end of the village, east and commanding the bridge.

It being now but 4 o'clock in the morning, and the rebels having taken post within random cannon shot upon the hills on the north, I resolved to halt until the second division, landed at the *Old Wells*, had advanced and formed the junction.

Gen. Garth's division passed the bridge by 9, and at my desire proceeded to the north end of the village, from whence, especially from the houses, there had been a fire for five hours, upon our advance guards.

The fuziliers, supported by the light infantry of the guards, began the attack, and soon cleared the quarters, pushing the main body and 100 cavalry from the northern heights, and taking one piece of their cannon.

After many salt pans were destroyed, whale boats carried on board the fleet, and the magazines, stores, and vessels set in flames, with the greater part of the dwelling houses, the advanced corps were drawn back, and the troops retired in two columns to the place of our first debarkation, and, unassaulted, took ship and returned to Huntington bay."

The loss of the British forces at Norwalk, according to Tryon's official account, was 20 killed, 96 wounded, and 32 missing.

From the Wyllis Manuscripts.

Names of the freemen of Norwalk, taken October 13th, 1669.

— Handforde,	Matthew Marvin, sen.	Mark Sention,	Samuel Sention,
Lieut. Olmstede,	Matthew Marvin, jun.	Samuel Haies,	Robert Steward,
Richard Homes,	Thomas Fitch,	Henry Whitney,	Thomas Fitch, jr.
Thomas Benedict,	— Richards,	John Haille,	— Sention,
John Benton,	George Abbot,	Thomas Betts,	Charley Comstock,
Joseph Ffenn,	— Haile,	Eph. Lockwood,	Thomas Seamer,
Daniel Kelloge,	Mark Sention, sen.	John Platt,	Thomas Benedict, jr.

Fourteen names illegible and omitted.

The following is copied from the inscription on the monument of Gov. Fitch, in Norwalk. According to information recently received from Norwalk, from three grandchildren of the Governor, viz. Mrs. Belden, (now over 70 years of age,) Mrs. Fitch, Mrs. Raymond, all intelligent and respectable ladies, there were three brothers who came to this country, viz. Elijah, who settled in Norwich, Hooker in Stamford, and Samuel in Norwalk, who was the father of the Governor.

The Hon'ble THOMAS FITCH, Esq. GOV. of the colony of Connecticut. Eminent and distinguished among mortals for great abilities, large acquirements and a virtuous character; a clear, strong, sedate mind; an accurate extensive acquaintance with law, and civil government; a happy talent of presiding; close application, and strict fidelity in the discharge of important truths; no less than for his employments, by the voice of the people, in the chief offices of state, and at the head of the colony. Having served his generation, by the will of God, fell asleep, July 18th, Ann. Domini, 1774, in the 75th year of his age.

READING.

READING was incorporated in May, 1767. The township is said to have derived its name from Col. John Read,* one of its early and principal settlers. It is bounded north by Danbury, east by Newtown and Weston, south by Weston, and west by Ridgefield. Its length averages from east to west nearly 6½ miles, its breadth about 5 miles. The face of the township is characteristically diversified with hills and

* His monument is in a small burying ground a little west of the town house. He died in 1786, aged 85. He had a park of 10 or 15 acres, in which he kept deer, upwards of a mile north of the town house.

valleys, with a soil generally good. Agriculture is almost exclusively the business of the inhabitants, who live scattered about on their farms. The two principal roads through the town pass, one through the western part, the other through the eastern part. There are four houses of worship, 1 Episcopal, 1 Methodist, 1 Congregational, and 1 Baptist. The Episcopal church is situated in the eastern part of the town, on what is called Reading ridge. Perhaps the most compactly settled part is in the vicinity of this church, which is 15 miles N. W. from Bridgeport, and $8\frac{1}{2}$ miles from Danbury court house. The town house, Methodist and Congregational churches, are on a cross road, upwards of two miles westerly from the Episcopal church.

House in Reading, (formerly Gen. Putnam's Quarters.)

During the Revolutionary war, in the winter of 1779, in order to cover the country adjoining the *Sound*, and to support the garrison at West Point in case of an attack, Maj. Gen. Putnam was stationed in Reading. The engraving above is a representation of the house used for his head-quarters. It is situated on the Norwalk and Danbury road, about 15 miles north of Norwalk, and 3 west from the Congregational church. Putnam had under his orders Gen. Poor's brigade of New Hampshire, the two brigades of Connecticut, the corps of infantry commanded by Hazen, and that of cavalry by Sheldon.

"The troops, who had been badly fed, badly clothed, and worse paid, by brooding over their grievances in the leisure and inactivity of winter-quarters, began to think them intolerable. The Connecticut brigades formed a design of marching to Hartford, where the General Assembly was then in session, and of demanding redress at the point of the bayonet. Word having been brought to General Putnam, that the second brigade was under arms for this purpose, he mounted his horse, galloped to the cantonment, and thus addressed them: 'My brave lads, whither are you going? Do you intend to desert your officers, and to invite the enemy to follow you into the country? Whose cause have you been fighting and suffering so long in—is it not your own? Have you no property, no parents, wives or children? You have behaved like men so far—all the world is full of your praises—and posterity will stand astonished at your deeds: but not if you spoil all at last. Don't you consider how much the

country is distressed by the war, and that your officers have not been better paid than yourselves? But we all expect better times, and that the country will do us ample justice. Let us all stand by one another, then, and fight it out like brave soldiers. Think what a shame it would be for Connecticut men to run away from their officers.* After the several regiments had received the General, as he rode along the line, *with drums beating, and presented arms*, the sergeants who had then the command, brought the men to *an order*, in which position they continued while he was speaking. When he had done, he directed the acting major of brigade to give the word for them to shoulder, march to their regimental parades, and lodge arms; all which they executed with promptitude and apparent good humor. One soldier, only, who had been the most active, was confined in the quarter-guard; from whence, at night, he attempted to make his escape. But the sentinel, who had also been in the mutiny, shot him dead on the spot, and thus the affair subsided."

While the troops lay at Reading, two executions took place; one was a soldier, who was shot for desertion—the other was a Mr. Jones, of Ridgefield, a royalist, who was hung as a spy; both suffered on the same day. These executions took place on Gallows Hill, a mile or more from Putnam's head-quarters. The scene which took place at the execution of these men, is described as shocking and bloody. The man on whom the duty of hangman devolved left the camp, and on the day of execution could not be found. A couple of boys, about the age of twelve years, were ordered by Gen. Putnam to perform the duties of the absconding hangman. The gallows was about twenty feet from the ground. Jones was compelled to ascend the ladder, and the rope around his neck was attached to the cross beam. Gen. Putnam then ordered Jones to jump from the ladder. "No, Gen. Putnam," said Jones, "I am innocent of the crime laid to my charge; I shall not do it." Putnam then ordered the boys before mentioned to turn the ladder over. These boys were deeply affected with the trying scene; they cried and sobbed loudly, and earnestly entreated to be excused from doing any thing on this distressing occasion. Putnam, drawing his sword, ordered them forward, and compelled them at the sword's point to obey his orders. The soldier that was shot for desertion, was but a youth of 16 or 17 years of age. Three balls were shot through his breast; he fell on his face, but immediately turned over on his back; a soldier then advanced, and putting the muzzle of his gun near the convulsive body of the youth, discharged its contents into his forehead. The body was then taken up and put into a coffin; the soldiers had fired their pieces so near that they set the boy's clothes on fire, which continued burning. An officer with a drawn sword stood by, while every soldier of the three brigades, who were out on the occasion, was ordered to march by and look at the mangled remains.* The bones of this young man were dug up a few years since for anatomical purposes. They were known to be his from the fracture of the skull; the bones however were of little or no use, for on exposure to the air they soon fell to pieces.

* The particulars of the execution of these two persons, were derived from an aged inhabitant of Reading, who was present on the occasion, and stood but a few feet from Jones when he was executed.

Joel Barlow, LL. D. was a native of this town. The following biographical sketch of his life is from Pease and Niles' Gazetteer of Connecticut :

"He was born in or about the year 1755. His father, who was an independent farmer, but in moderate circumstances, died whilst he was a youth, leaving him a small patrimony, scarcely sufficient to defray the expenses of a liberal education, which he had contemplated. Having been placed in Dartmouth College in 1774, he was soon after removed from thence to Yale College, at New Haven, where he graduated in 1778. The class into which he entered was remarkable for the great promise of talent which many of its members disclosed, among whom Barlow always ranked conspicuous. The late Asa Spalding and Uriah Tracy, his Excellency Oliver Wolcott, Alexander Wolcott, Abraham Bishop and Josiah Meigs, were members of this class. He passed through the usual course of academic studies with great reputation, and at the public commencement in 1778, delivered or recited an original poem, which was the first time he had appeared before the public in his poetical character. This effusion of his muse was soon after printed, and has been preserved in a collection entitled 'American Poems.' Previously to this period, and whilst Barlow was in college, the Revolutionary war commenced, and the natural ardor and enthusiasm of his mind, stimulated by the pervading spirit of liberty which characterized the times, led him to take a deep interest in a contest in which both the cause of civil liberty and the dearest interests of his country were so intimately concerned. During the early period of the war, the militia of Connecticut constituted an important part of the army. Barlow had four brothers in the service; and more than once during vacations, he armed himself with a musket, and joined them in the 'bloody strife,' as a volunteer. It is said he was in the battle at White Plains.

"Upon his leaving college, he commenced the study of law; but, at the urgent solicitation and recommendation of some of his friends, he was induced to abandon this situation, and to qualify himself for, and accept the appointment of chaplain to the army. Whilst in this situation, he wrote several poetical effusions, strongly marked with patriotic and liberal sentiments, and calculated to encourage and animate the army, in various hardships, privations and difficulties with which they had to contend. And whilst in the army, he conceived, planned, and in part composed, the celebrated poem which he afterwards published, entitled the 'Vision of Columbus,' and which was subsequently enlarged into his great national poem, the 'Columbiad.' In 1781, he took the degree of A. M. at New Haven, on which occasion he delivered a poem, entitled the 'Prospect of Peace,' which was principally embodied in the Vision of Columbus. About the same time, he married Miss Baldwin, of New Haven, a sister of Abraham Baldwin, for many years a distinguished member of Congress from Georgia. After the peace in 1783, Barlow being out of employment, resolved to resume the study of law, for which purpose he removed to Hartford, with the expectation, probably, of making it his residence for life. Whilst in this situation, to aid him in his finances, he, in connection with Elisha Babcock, established a weekly newspaper, called the 'American Mercury.'

"In 1787, whilst engaged in this business, he published his 'Vision of Columbus,' a patriotic and popular poem. It was dedicated to Louis XVI. and met with very flattering success, being reprinted in London within a few months; it has since gone through a second edition in America, and one in Paris. About this period, in pursuance of the request of the General Association of the clergy of this State, he undertook the revision of Dr. Watts' version of the Psalms. His edition was published in 1786, and comprised several devotional pieces of his own composing.

"About the time of these publications, he disposed of his interest in the paper to Mr. Babcock, and opened a bookstore, the principal object of which was to effect the sale of his poem and edition of the Psalms. About this time, the Anarchiad was published at this place, in which Mr. Barlow is said to have taken a conspicuous part. On the 4th of July, 1787, and whilst the Convention which framed the Constitution of the United States was in session at Philadelphia, he delivered an oration to the Connecticut Cincinnati. Not being satisfied with his prospects in his profession, the next year he embarked for England, as the agent of a land company, called the Ohio Company, from whence he soon proceeded to France. Whilst in France the Revolution commenced, which led Barlow to an intimate acquaintance with most of the leaders of the Republican party, and particularly with those which were afterwards denominated *Girondists*. His philanthropy and enthusiasm in the cause of liberty led him to enter warmly into their plans, which received the support of his genius and political intelligence and experience. In 1791, he returned to England, and near the close of that year, published his 'Advice to Privileged Orders,' a work of solid merit, exposing in a forcible manner, the abuses and evils of the feudal governments

of Europe. In 1792, he published a small poem, entitled the 'Conspiracy of Kings.' From these publications, being of a political nature, and from his intimacy with the leaders of opposition, or friends of reform, in England, he had become very obnoxious to the ministerial party. Near the close of the year 1792, he returned to France, as one of a committee of the London Constitutional Society, with an address from the society to the National Convention. He was received in France with great respect: and, soon after his arrival, had conferred upon him the rights of a French citizen. The year following, he was employed, in connection with a deputation of the National Convention, to assist in organizing the territory of Savoy, as a department of the Republic. Whilst at Chamberry, in this territory, he wrote a political address to the people of Piedmont. In this place he amused himself in writing a mock didactic poem, called 'Hasty Pudding.' From Savoy he returned to Paris, where he resided for about three years. During this period, he translated Volney's Ruins; being shocked at the atrocities of the Revolution, he withdrew from political affairs.

"In 1795, he was appointed by President Washington consul at Algiers, with powers to negotiate a treaty with the Dey, and to redeem all American prisoners held in slavery by any of the Barbary powers. He immediately set out upon this mission, and, crossing through Spain, arrived at Algiers, where he soon succeeded in negotiating a treaty with the Dey, although surrounded with numerous difficulties. Early the succeeding year, he negotiated a similar treaty with Tripoli, and liberated all the American prisoners held in captivity. In 1797, he resigned his consulship and returned to Paris; and having engaged in some commercial pursuits or speculations, was very successful, and accumulated a handsome fortune. In the rupture which took place between France and the United States, Barlow exerted his influence and talents to promote an amicable adjustment; for which end he addressed a letter to the people of the United States, upon the measures of the party then in power. This was soon followed by another, which was more abstract, and examined, in that clear and forcible manner peculiar to its author, various political topics, and particularly certain established principles of maritime law and the rights of neutrals. His views were novel and bold, and founded upon the principles of abstract right, which he regarded as the only true policy. In 1805, after an absence of seventeen years from his native country, Barlow resolved upon revisiting the scenes of his youth. He accordingly sold his real estate in France, which he had regarded as his adopted country, as long as it continued the country of liberty. After visiting different parts of the country, he purchased him a delightful situation in the vicinity of Georgetown, within the limits of the district of Columbia. Whilst in this situation, he enjoyed the society, friendship and esteem of Mr. Jefferson, then President of the United States; and of the other important functionaries, and characters of distinction, who were residents, or engaged in public employments at the seat of government. In 1806, he published a prospectus of a national institution, or university: to establish which, a bill was introduced into the Senate; it met with considerable opposition; was referred to a select committee, who never reported, and thus this great national object ended. He now devoted his attention to the revision and improvement of his favorite poem; and in 1808, the Columbiad made its appearance, in the most magnificent volume which ever issued from an American press. The high price of this edition prevented its circulation; and the subsequent year, it was reprinted in two volumes. The same year, it was republished in London, in an elegant royal 8vo. The Columbiad has been attacked in the severest manner, by critics of every rank; but Barlow, relying upon the solid merits of the poem, and the impartial reward of posterity, either treated them with neglect or contempt. The Columbiad is an epic poem, abounding in philosophical discussion, and in enlarged political and national views. It was expanded from the Vision of Columbus, which it comprises, and is the offspring of the labor of half a life. It is a great national work, and cannot fail of going down to posterity, to the latest generation. The name of Barlow will long be known and revered, when all those who have attempted to asperse it will be forgotten. After the publication of his Columbiad, he was employed in collecting materials for a general history of the United States, a work which he had long meditated; but whilst thus occupied, in 1811, he was appointed minister plenipotentiary to the French government; whereupon he soon embarked again for France, clothed with authority and distinguished honors. He applied himself with great diligence to the duties of his new station, and made every exertion to effect the negotiation of a treaty of commerce, and indemnity for spoliation. In October, 1812, he was invited to a conference with the Emperor at Wilna. He immediately set off upon this mission, and traveled day and night, exposed to the severe weather of a northern climate; subject to great fatigue, and accommodations at the public inns being the most wretched, scarcely being able to obtain a wholesome meal, his constitution was unable to withstand these severe trials; he sunk into a state of debility, from which he never recovered. He died December 22d, 1812, at Zarnawica, an obscure village of Poland, in the neighborhood of Cra-

cow. America has produced few men, more justly deserving of immortality than Barlow; and none, it is believed, who have made their title to it more sure. He lived in an eventful period, and acted a conspicuous part in both hemispheres; and as a poet, a man of science, a politician, a philosopher and philanthropist, his name will long be revered by the friends of civil liberty and of science, throughout the civilized world."

RIDGEFIELD.

THE tract of land now Ridgefield, was called by the Indians *Caudatowa*, a word signifying *high land*, from its elevated situation affording a prospect of Long Island for forty miles. In 1708, John Belden, Samuel Keeler, Matthew Seymour, Matthias St. John, and other inhabitants of Norwalk, to the number of twenty five, purchased a large tract between that town and Danbury. The purchase was made of Catoonah, the chief sachem, and other Indians. The deed is dated the 30th of September, 1708, and at the ensuing session of the General Assembly, it was incorporated as a town, by the name of Ridgefield.

This township is of an oblong shape, about 13 miles in length from north to south, with an average breadth of about three miles. It is bounded north by New Fairfield, west by the state of New York, east by Danbury and Reading, and south by Wilton. The face of the township is characterized by a succession of ridges and valleys, running northerly and southerly towards Long Island sound. On some of these ridges the observer has a fine prospect of the Sound, although situated at a distance of fourteen miles; likewise the East and West Rocks, in New Haven, and the Highlands on the Hudson. The soil of the township is good for grain and grass. There are two societies or parishes, Ridgefield and Ridgebury. Ridgebury comprises the north part of the town. In the first society, (Ridgefield,) there is a pleasant village on one street, within the limits of about a mile, of about 60 dwelling houses, 3 churches, 1 Congregational, 1 Episcopal, and 1 Methodist. There is an extensive carriage factory in the village; also one for manufacturing cabinet furniture. There are some beds of limestone in the town. Ridgebury society is a very long but narrow tract of land, gradually diminishing in width to the north, the extreme end of which is but about half a mile in width. The Rev. Samuel Camp, the first minister in Ridgebury, was ordained in January, 1769, the church being organized at the same time.

The place represented in the view on the next page is perhaps 80 rods north of the Episcopal church in Ridgefield, at the north end of the village, on the road to Danbury. It was at this spot that the Americans, under Gen. Arnold, made a stand against the British forces, as they came down from Danbury. The house standing on the right, and fronting the south, is upwards of one hundred years old. At the settlement of the town, the proprietors gave Mr. Stebbins, the ancestor of the late Mr. Stebbins, who occupied the house, half an acre of land, in order to induce him to build upon it. This house has remained in possession of the family ever since.

View in Ridgefield.

In order to stop the advance of the British, a barricade was thrown across the street from Mr. Stebbins' house, extending to the place where the house opposite is now built. The place where Gen. Arnold's horse was shot, and where he killed the British soldier who was advancing towards him, is seen on the left of the engraving; the man and boy are seen standing on the precise spot. Many of the dead and wounded were carried into the house of Mr. Stebbins, and the floors were literally covered with blood; a number of the wounded died in the house. Fifteen of the British and fifteen Americans were buried near the first house now standing south of Mr. Stebbins'. Gen. Wooster received his mortal wound about one mile and a half north, and Col. Gould was killed about eighty rods east of the house; his body was carried to Fairfield. The British encamped over night on the high ground, nearly a mile south of the Congregational church, and when they left the place in the morning, they fired a house near by, which was supposed to be a signal for their shipping, lying on the coast near the Norwalk islands.

Sarah Bishop, the hermitess, resided just over the boundary line of Ridgefield, in the state of New York. She lived on Long Island at the time of the Revolutionary war. Her father's house was burnt by the British, and she was cruelly treated by a British officer. She then left society and wandered among the mountains near this part of the state; she found a kind of cave near Ridgefield, where she resided till about the time of her death, which took place in 1810. She sometimes came down to Ridgefield to attend public worship on the Sabbath. It is said that the wild animals were so accustomed to see her, that they were not afraid of her presence. The following account of a visit to this hermitess, is taken from a newspaper printed at Poughkeepsie, in 1804.

"Yesterday I went in the company of two Capt. Smiths of this town, (N. Y.) to the mountain, to visit the hermitage. As you pass the southern and elevated ridge of the mountain, and begin to descend the southern steep, you meet with a perpendicular descent of a rock, in the front of which is this cave. At the foot of this rock is a gentle descent of rich and fertile ground, extending about ten rods, when it instantly forms a frightful precipice, descending half a mile to the pond called Long Pond. In the front of the rock, on the north, where the cave is, and level with the ground, there appears a large frustum of the rock, of a double fathom in size, thrown out by some unknown convulsion of nature, and lying in the front of the cavity from which it was rent, partly enclosing the mouth, and forming a room: the rock is left entire above, and forms the roof of this humble mansion. This cavity is the habitation of the hermitess, in which she has passed the best of her years, excluded from all society; she keeps no domestic animal, not even fowl, cat, or dog. Her little plantation, consisting of half an acre, is cleared of its wood, and reduced to grass, where she has raised a few peach trees, and yearly plants, a few hills of beans, cucumbers, and potatoes; the whole is surrounded with a luxuriant grape vine, which overspreads the surrounding wood, and is very productive. On the opposite side of this little tenement, is a fine fountain of excellent water; at this fountain we found the wonderful woman, whose appearance it is a little difficult to describe: indeed, like nature in its first state, she was without form. Her dress appeared little else than one confused and shapeless mass of rags, patched together without any order, which obscured all human shape, excepting her head, which was clothed with a luxuriance of lank grey hair depending on every side, as time had formed it, without any covering or ornament. When she discovered our approach, she exhibited the appearance of a wild and timid animal; she started and hastened to her cave, which she entered, and barricaded the entrance with old shells, pulled from the decayed trees. We approached this humble habitation, and after some conversation with its inmate, obtained liberty to remove the palliades and look in; for we were not able to enter, the room being only sufficient to accommodate one person. We saw no utensil, either for labor or cookery, save an old pewter basin and a gourd shell, no bed but the solid rock, unless it were a few old rags, scattered here and there; no bed clothes of any kind, not the least appearance of food or fire. She had, indeed, a place in one corner of her cell, where a fire had at some time been kindled, but it did not appear there had been one for some months. To confirm this, a gentleman says he passed her cell five or six days after the great fall of snow in the beginning of March, that she had no fire then, and had not been out of her cave since the snow had fallen. How she subsists during the severe season, is yet a mystery; she says she eats but little flesh of any kind; in the summer she lives on berries, nuts, and roots. We conversed with her for some time, found her to be of a sound mind, a religious turn of thought, and entirely happy in her situation; of this she has given repeated proofs by refusing to quit this dreary abode. She keeps a Bible with her, and says she takes much satisfaction, and spent much time in reading it."

SHERMAN.

SHERMAN, originally the north part of New Fairfield, was incorporated as a town in 1802. It is bounded north by Kent, west by the state of New York, east by New Milford, and south by New Fairfield. It exceeds nine miles in length from north to south, and has an average breadth of only between two and three miles. "Its surface is uneven, being characterized by elevated and lofty hills, and deep and extensive valleys. The soil is various, according to the local situation of the lands, but is generally a gravelly loam. The hills, which are not suffered to remain for the growth of timber, afford grazing; and the vales (most of which are warm and fertile,) are well adapted to the cultivation of wheat, rye, and Indian corn, considerable quantities of which are annually raised. Iron ore, to some extent, has been discovered in this town. The central part of the town is 60 miles s. w. from Hartford, and about 13 miles north of Danbury.

The population of the town in 1810 was 949; in 1830 it was 947.

STAMFORD.

THE Indian name of Stamford was *Rippowams*. It was purchased of the Indians by Capt. Nathaniel Turner, agent for New Haven, of *Ponus*, sagamore of *Toquamshe*, and of *Wascussue*, sagamore of *Shipan*. A reservation of planting ground was made for the Indians. Turner gave for the purchase "twelve coats, twelve hoes, twelve hatchets, twelve knives, two kettles, and four fathom of white wampum." A part or the whole of this tract was purchased of New Haven by some of the inhabitants of Wethersfield, for thirty pounds sterling. The purchasers agreed to join the New Haven colony, in their form of government. Twenty men agreed to settle here by the last of November, 1641; but before the end of the year, there were thirty or forty families established. "The inhabitants were, however, frequently alarmed by the threatenings of invasion, both from the Indians and the Dutch; and for a considerable time were at great expense in fortifying and guarding themselves; and once, in 1653, their troubles became so great, that they were on the point of a revolt, but were quieted by the prudent measures of the colony."

Stamford is bounded on the northwest by the state of New York, on the west by Greenwich, on the east by Darien and New Canaan, and on the south by Long Island sound. Its mean length from north to south is upwards of nine and a half miles, and its average breadth between three and four. This is a pleasant and fertile township, rich in the resources of agricultural opulence, abounding in the means of subsistence, with the advantages of a ready and convenient market. The surface of the town is undulating, exhibiting a pleasant diversity of moderate hills and valleys. The soil is a rich gravelly loam, adapted both to tillage and grazing.

The view of Stamford, (see the next page,) was taken from a rocky eminence to the southwest, which rises almost immediately from the mill stream seen in the engraving, passing to the south. The iron foundery, which is very extensive, is seen on the left. The spire seen near the center of the print is that of the Congregational church; that seen on the extreme right is that of the Episcopal church. Besides these churches, there are two others in the borough, one for the Baptists, the other for the Methodists. Between the Congregational and Episcopal church, is seen the mast of a sloop. A canal from the sea was excavated to this point in 1834. This canal is 180 rods in length, thirty feet in width, and seven in depth; the expense of its construction, including three buildings for stores, was 7,000 dollars. There are in the limits of the borough 10 or 12 stores, 1 iron foundery, one rolling mill, one wire factory, and two large boot and shoe manufactories; a bank, with a capital of 100,000 dollars, chartered in 1834. The post office in this place is a distributing office. It is 8 miles westward of Norwalk, 8 from Sawpitts, and 5 from Horseneck church in Greenwich. The number of inhabitants in the borough is about seven hundred.

Southwestern view of the Borough of Stamford.

The harbor at the mouth of Mill river has, at ordinary tides, upwards of eight feet of water. There are two uncommonly interesting spots bordering the harbor; that on the western side is called the South Field, a rich and beautiful farm; the other is Shipan Point. This is an elegant and fertile piece of ground. The surface slopes in every direction, and is encircled by a collection of fine scenery.

The Hon. *Abraham Davenport*, for a long period one of the Councillors of the colony, and afterwards of the state of Connecticut, was a resident of this town. He was the son of the Rev. John Davenport, the second minister of Stamford, and grandson of the Rev. John Davenport, the father of New Haven colony. He was distinguished for a vigorous understanding, uncommon firmness of mind, and Christian integrity of character. Two instances (says Dr. Dwight) of Colonel Davenport's firmness of mind deserve to be mentioned.

"The 19th of May, 1780, was a remarkable dark day. Candles were lighted in many houses; the birds were silent and disappeared, and the fowls retired to roost. The legislature of Connecticut was then in session at Hartford. A very general opinion prevailed, that the day of judgment was at hand. The House of Representatives, being unable to transact their business, adjourned. A proposal to adjourn the Council was under consideration. When the opinion of Colonel Davenport was asked, he answered, 'I am against an adjournment. The day of judgment is either approaching, or it is not. If it is not, there is no cause for an adjournment: if it is, I choose to be found doing my duty. I wish therefore that candles may be brought.'

"The other instance took place at Danbury, at the Court of Common Pleas, of which he was chief justice. This venerable man, after he was struck with death, heard a considerable part of a trial, gave the charge to the jury, and took notice of an article in the testimony which had escaped the attention of the counsel on both sides. He then retired from the bench, and was soon after found dead in his bed."

[From the *Connecticut Courant*, No. 1596.]

Hartford, May 24th, 1798.

As a report unfavorable to the citizens of Stamford has for some days past been in circulation, we publish the following extract of a letter from a respectable gentleman

in that town, to a member of the legislature, now in session in this city, dated the 18th inst., in order that the public may have a true statement of the nefarious business.

"The present ferment in Stamford, caused by some unlucky boys firing a cannon, and making a bonfire, in North Stamford, I suppose will reach Hartford; and that, perhaps in an aggravated point of light. The truth of the matter is this: some young chaps, on fast-day morning, collected, and burnt the President in effigy, as some say; but as the fracas took place about sunrise, no one can tell what was burnt: the perpetrations, however, were committed by persons not inhabitants of Stamford."

The ancient burying ground in Stamford was formerly in the center of the place. The monuments are now removed to a yard northward of the village. The following is copied from a tabular monument, one of those that were removed.

The REV. JOHN DAVENPORT, departed this life on the 5th February, A. D. 1730-1, and in the 36th of his ministry.

Wisdom
his URN

Religion, while he dwelt below,
Its sacred influence on him shed;
Learning and Grace adorned his brow,
And round their balmy odors spread.
Unfading honors shall his tomb surround,
To guard and wait the Prophet's sleeping clay,
Till the last trumpet raise him from the ground,
To join the triumphs of th' important Day.

STRAFORD.

THE original Indian name of Stratford was Cupheag. It was purchased by Mr. Fairchild in 1639, and settlements were commenced at the same time. Mr. Fairchild came directly from England, and was the first person vested with civil authority in the town. The first principal persons in the town were John and William Eustice, and Samuel Hawley, who were from Roxbury, and Joseph Judson and Timothy Wilcoxson, who were from Concord, Massachusetts. A few years from the commencement of the settlement, Mr. John Birdsey removed from Milford, and became a man of eminence, both in the town and church. There were also several of the chief planters from Boston, and a number by the name of Welles, from Wethersfield. "Mr. Adam Blackman, who had been Episcopally ordained in England, and

a preacher of some note, first at Leicester and afterwards at Derbyshire, was their minister, and one of the first planters. It is said that he was followed by a number of the faithful, into this country, to whom he was so dear that they said unto him, in the language of Ruth, 'Intreat us not to leave thee, for whither thou goest we will go; thy people shall be our people, and thy God our God.'"

The first settlers appear to have located themselves about 150 rods south of the Episcopal church, the first chimney being erected near this spot; it was taken down about two years since. The first burying ground was near this spot. Mr. William Judson, one of the first settlers, came into Stratford in 1638. He lived at the southwest corner of Meeting-house hill or green, in a house constructed of stone. Mr. Abner Judson, his descendant, lives on the same spot, in a house which has stood 113 years, and is still in good repair.

The whole township, which formerly was quite extensive, was purchased of the natives. The purchase was however not completed till 1672. There was a reservation of good lands for the improvement of the Indians, at Pughquonnuck or Pequannock, Golden hill, and at a place called Coram, in Huntington.

Stratford is now much circumscribed in limits. Its average length is about six miles from north to south, and its breadth from east to west is between two and three miles. It is bounded north by Huntington, west by Trumbull and Bridgeport, east by the Housatonic, dividing it from Milford, and south by Long Island sound. The central part of the town is 13 miles s. w. from New Haven. The township is mostly level and free from stone, and there is a very rich alluvial tract of meadows on the river and harbor. The principal street in the town is one mile in length, running north and south, parallel to the Housatonic; it is level, pleasant, and ornamented with shade trees. On this street, and others, in the immediate vicinity, there are about 200 dwelling houses, and four houses for public worship, viz. 1 Congregational, 1 Episcopal, 1 Methodist, 1 Baptist, and 1 Universalist now erecting. The latitude of the place, as determined by the Rev. James H. Linsley, is $41^{\circ} 11' 7''$; longitude, $73^{\circ} 8' 45''$.

The following is a southwest view of the Episcopal church and the Academy, situated in the central part of the village. This church was erected more than 90 years since, and is the oldest Episcopal church now standing in the state. The Academy is seen on the right of the print, in the distance. It stands on a gentle elevation of ground, called Meeting-house hill,* and is surrounded by a row of poplars. The Episcopal society in this town is the oldest in the state. The following account of its establishment is from Dr. Trumbull's History of Connecticut.

"During the term of about seventy years from the settlement of Connecticut, the Congregational had been the only mode of worship, in the colony. But the society for propagating the gospel in foreign parts, in 1704, fixed the Reverend Mr. Muirson as a missionary at Rye. Some of the people at Stratford had been educated in the

* The Congregational church stood on this elevation till it was struck by lightning, and burnt down.

Southwest view of the Episcopal Church, Stratford.

church of England mode of worship and administering of the ordinances, and others were not pleased with the rigid doctrines and discipline of the New England churches, and they made an earnest application to Mr. Muirson to make a visit at Stratford, and preach and baptize among them. About the year 1706, upon their invitation, he came to Stratford, accompanied with Colonel Heathcote, a gentleman zealously engaged in promoting the Episcopal church. The ministers and people, in that and the adjacent towns, it seems, were alarmed at his coming, and took pains to prevent their neighbors and families from hearing him. However the novelty of the affair, and other circumstances, brought together a considerable assembly: and Mr. Muirson baptized five and twenty persons, principally adults. This was the first step towards introducing the church worship into this colony. In April, 1707, he made another visit to Stratford. Colonel Heathcote was pleased to honor him with his company, as he had done before. He preached, at this time, at Fairfield as well as Stratford; and in both towns baptized a number of children and adult persons. Both the magistrates and ministers opposed the introduction of Episcopacy, and advised the people not to attend the preaching of the church missionaries; but the opposition only increased the zeal of the church people. Mr. Muirson, after this, made several journeys to Connecticut, and itinerated among the people. But there was no missionary, from the society, fixed in Connecticut, until the year 1722, when Mr. Pigot was appointed missionary at Stratford. The churchmen at first, in that town, consisted of about fifteen families, among whom were a few husbandmen, but much the greatest number were tradesmen, who had been born in England, and came and settled there. Some of their neighbors joined them, so that Mr. Pigot had twenty communicants, and about a hundred and fifty hearers. In 1723, CHRIST Church in Stratford was founded, and the Rev. Mr. Johnson, afterwards Dr. Johnson, was appointed to succeed Mr. Pigot."

"The Rev. Dr. Johnson," says Dr. Dwight, "may be considered as the father of Episcopacy in Connecticut, and perhaps, as the most distinguished clergyman of that description, who has been settled within its limits. This gentleman was born at Guilford in 1696; was educated at Yale College, and received the degree of A. B. in 1714. In 1716 he was chosen tutor, and continued in that office three years. In 1720, he was ordained minister, at the Presbyterian church in West Haven. In 1723, he was Episcopally ordained in London; and was afterwards settled at Stratford. In 1754, he was chosen president of King's College in the city of New York, and continued in this office

for nine years. In 1763, he resigned the presidency, and returning to Stratford, resumed the charge of his congregation. He died in 1772, at the age of seventy six. Dr. Johnson was a man of talents and learning, of dignified manners and high reputation. He published a Hebrew grammar, a compendium of logic, and another of ethics. The University of Oxford conferred on him the degree of Doctor of Divinity. His life was written by Dr. Chandler, the Episcopal minister of Elizabethtown."

The following is the inscription on his monument in the Episcopal burying ground, a few rods northeast of the church.

M. S. Samuelis Johnson, D. D. Collegii Regalis Novi Eboraci PRÆSIDIS primi et hujus Ecclesiæ nuper Rectoris. Natus Die 14to. Octob. 1696, Obit. 6to. Jan. 1772.

If decent *dignity* and modest mein,
 The cheerful *heart*, and countenance serene;
 If pure *religion* and unsullied truth,
 His *age's* solace, and his search in youth;
 If *piety* in all the paths he trod,
 Still rising vigorous to his LORD and GOD;
 If charity thro' all the race he ran,
 Still willing well, and doing good to man;
 If LEARNING, free from pedantry and pride;
 If FAITH and virtue, walking side by side;
 If well to mark his being's aim and end,
 To *shine* thro' life a HUSBAND, FATHER, FRIEND;
 If *these* ambition in thy soul can raise,
 Excite thy reverence or demand thy praise;
 Reader, ere yet thou quit this earthly scene,
 Revere his name, and be what he has been.

MYLES COOPER.

The house in which Dr. Johnson resided is still standing, about 40 rods northwest of the Episcopal church. Mr. Winslow succeeded Dr. Johnson in the ministry, then Mr. Kneeland, who was succeeded by Mr. Sayre. The Rev. Ashbel Baldwin was the next minister: he commenced his labors here in 1792, and continued rector of this church thirty nine years. Mr. Baldwin, who is still living, was born in Litchfield, in 1757, and was educated at Yale College. He was ordained deacon at Middletown, August 3d, 1785, by Bishop Seabury. He, with four others, were ordained at the same time, being the first Protestant Episcopal ordination in this country.

Gen. *David Wooster* was a native of this town, and was born in 1711. He was a brave and good officer, an ardent patriot, and in his various public and private relations, sustained a character distinguished for integrity, benevolence, and virtue. He was mortally wounded in a skirmish with the British troops, at the time of their incursion to Danbury, in 1777. The following notice of Gen. Wooster, is from the Connecticut Journal of May 14th, 1777.

"Major General Wooster was born in Stratford, in this state, on the 2d of March, A. D. 1710—11; was educated at Yale College, where he was graduated in the year 1738. Soon after the Spanish war broke out in 1739, he was employed, first as lieutenant, and then as captain, of the armed vessel built by this colony for a Guarda Coasta. After this, he engaged in the military service of this country, and was a captain in Col. Burr's regiment, in the expedition against Louisburg, in 1745. After the reduction of that place, he was sent to France, with a part of the prisoners taken there, and from thence went to England, where he received the honor of a captaincy on the

establishment, in Sir William Pepperell's regiment. During the peace which soon followed, he received his half pay, and was chiefly employed in his private affairs. When the war with France was renewed in 1755, he was soon thought of as a gentleman qualified for a higher sphere of command, and served his country as colonel, and commandant of a brigade to the end of the war.

"From the first rise of the present controversy with Great Britain, in 1764, though his interest as a half pay officer, might have apologized for him, if he had observed a perfect neutrality; yet so fully convinced was he of the ruinous measures of the British court, and so jealous was he for his country's rights, that regardless of his private interests, he took an open and decisive part, and avowedly espoused the cause of America, and persisted in that line of conduct to the day of his death. As soon as hostilities were commenced in the Lexington battle, the General Assembly of this colony set about raising an army, and Col. Wooster, from his approved abilities, well known courage, and great experience, was appointed to the chief command. The same summer he was appointed brigadier general in the continental service. Honored with these commissions, he first commanded the troops sent to guard New York, where it was expected that a part of the British army which came over in 1775 would land. In the latter part of that campaign, he, with his troops, went into Canada, and assisted much in the reduction of St. John's, Montreal, &c. and after Gen. Montgomery's death, had the chief command in that province. He returned home in the summer of 1776, and not long after was appointed first major general of the militia of this state. He had been out the whole of the last winter, at the head of a body of men raised by this state for its own security, and was but lately returned; when on Saturday, the 26th ult. he received the news that the enemy, in a large body, had landed at Compo. He immediately set off for Fairfield, leaving orders for the militia to be mustered and sent forward as fast as possible. When he arrived at Fairfield, finding Gen. Silliman had marched in pursuit of the enemy with the troops then collected, he followed on with all expedition, and at Reading overtook Gen. Silliman, with the small body of militia with him, of which he of course took the command, and proceeded that same evening to the village of Bethel. Here it was determined to divide the troops, and part were sent off under Generals Arnold and Silliman, the rest remained with General Wooster, and them he led by the route of Danbury, in pursuit of the enemy, whom he overtook on the Sabbath, about 4 o'clock, near Ridgefield. Observing a part of the enemy who seemed to be detached from the main body, he determined to attack them, though the number of his men was less than two hundred; he accordingly led them on himself with great spirit and resolution, ordering them to follow him. But being unexperienced militia, and the enemy having several field pieces, our men, after doing considerable execution, were broken and gave way. The General was rallying them to renew the attack, when he received the fatal wound. A musket ball, from the distance of 50 rods, took him obliquely in the back, broke his back bone, lodged within him, and never could be found. He was removed from the field, had his wound dressed by Doct. Turner, and was then conveyed back to Danbury, where all possible care was taken of him. The surgeons were from the first sensible of the danger of the case, and informed the General of their apprehensions, which he heard with the greatest composure.

"The danger soon became more apparent, his whole lower parts became insensible, and a mortification, it is thought, began very early. However, he lived till Friday, the 2d of May, and then with great composure and resignation, expired. It was designed to bring his remains to New Haven, to be interred here, but this was found impossible, and therefore they were interred at Danbury."

TRUMBULL.

TRUMBULL, formerly North Stratford, originally belonged to Stratford. It was incorporated as a town in 1798. It is bounded north by Monroe, east by Huntington and Stratford, south by Bridgeport, and west by Weston. Its average length is about five miles, and its breadth may average four and a half miles. The central part of the town is about five miles north from the city of Bridgeport.

The township is uneven, diversified with hills and valleys, and the prevailing character of the soil is a gravelly loam, which is considerably

productive. The lands are tolerably well adapted to the culture of grass, and to grazing. The township is centrally intersected by the Pequannock, a small stream, which discharges its waters into Bridgeport harbor. There are 4 houses of worship in the town, 2 Episcopal, 1 Congregational, and 1 Methodist. The inhabitants are generally farmers. The population in 1810 was 1,241; in 1830, it was 1,242.

In the north part of Trumbull, there is an elevated hill, called *Tam-tashua Hill*: it is the first land seen from the ocean when on this part of the coast.

[From the Connecticut Journal, No. 517.] North Stratford, Aug. 28th, 1777.

On the 25th instant died in this place, Mrs. Hannah Henman, aged 99 years. She was a person of good understanding, strict religion, solid piety, and maintained a firm and unshaken hope in the merits of Christ to the end. And what is remarkable concerning her exit out of the world, she died the very day, on which she was 99 years of age, of which she had a premonition near 20 years before her death, in a dream or vision; a venerable comely person, whom she afterwards used to call her guardian angel, and whom she had seen once before, appeared to her, and asked her age; she told him: upon which he replied, you will not live to an hundred years, but almost; you will live to be 99, and then die. She often mentioned this to her friends and neighbors, and was so confidently persuaded of the truth of it, that she would frequently count upon it how many years she had to live. And there are scores of persons now living in the parish, who have often heard her say, that she should die at 99, on her birth day, old style. About a fortnight before her decease, she enquired of her son, landlord John Henman, at whose house she died, the day of the month; and again repeated to the family that she had just so many days to live, which accordingly happened on her very birth day, as it is called. The great age this person arrived to, together with those circumstances respecting the time of her death, are so very extraordinary, that it was thought proper to communicate them to the public.

WESTON.

WESTON, originally the parishes of Norfield and North Fairfield in the town of Fairfield, was incorporated as a town in 1787. The town appears to have been first settled in 1738. It is bounded n. by Reading, e. by Trumbull and Monroe, s. by Fairfield and Westport, and w. by Wilton. It averages upwards of 8 miles in length from east to west, and 5 in breadth. The surface of the township is uneven and hilly, and the soil a gravelly loam. Agriculture is the principal business of the inhabitants.

The following is a southwestern view of the Congregational church, (erected in 1835,) and the Academy, which is possessed of a fund that renders it a free school. For this the town is indebted to Mr. Samuel Staples, who also gave a number of acres of land in the vicinity for the benefit of the school. This place is the eastern part of Weston, nine miles from Bridgeport. There are 5 houses of worship in the town, 2 Congregational, 1 Baptist, 1 Episcopal, and 1 Methodist. The first Methodist church built in New England was erected in this town. The first Methodist society in New England was formed by the Rev. Jesse Lee, Sept. 26th, 1789, it is believed at Bridgeport. The church mentioned above, was known by the name of "Lee's Chapel."

Congregational Church and the Academy, Weston.

From the Connecticut Journal, December 24th, 1807.

Remarkable Phenomenon.—On Monday the 14th inst., at about the break of day, or a little after, the weather being moderate, calm, and the atmosphere somewhat cloudy and foggy, a *meteor* or *fire ball*, passing from a northern point, dislodged over the western part of this State, with a tremendous report. At the same time several pieces of stony substance fell to the earth in Fairfield county. One mass was driven against a rock and dashed in small pieces, a peck of which remained on the spot. About three miles distant, in the town of Weston, another large piece fell upon the earth, of which a mass of about thirty pounds weight remains entire, and was exhibited the same day at town meeting. A small mass has been sent to Yale College, and examined by a number of gentlemen. It was immediately perceived by Professor Silliman to contain a metal, and on presenting it to a magnet a powerful attraction proved it to be iron. This is, we believe, the first instance in the United States, in which the substance of this species of meteor has been found on the earth, though it has often been found in Europe. Fortunately the facts respecting this wonderful phenomenon, are capable of being ascertained and verified by precision, and an investigation will, we understand, be commenced for the purpose. We request gentlemen who may have observed it in distant parts of the State, to favor the public with their observations. It is desirable to ascertain the course or direction of the meteor; the point of compass in which it appeared in different places; the general appearance and velocity; the manner of its explosion, and the time between the explosion and the report.

WESTPORT.

WESTPORT was incorporated as a town in 1835. It was formed from the towns of Fairfield, Norwalk and Weston. Saugatuck river passes through this town from north to south, dividing it into two nearly equal parts. The soil is generally of an excellent quality. The township is bounded n. by Weston and Wilton, e. by Fairfield, s. by the waters of Long Island sound, and w. by Norwalk. It is about five miles in length from north to south, and averages about three and a half miles in width. The population at this time is estimated to be 1,800.

View in Westport, (central part.)

The above shows the appearance of the central part of Westport, as it is seen 10 or 12 rods east from the bridge over the Saugatuck river. The village is built on both sides of the river, and was formerly called *Saugatuck*. It is connected by the bridge seen in the engraving, which is about 40 rods in length, and between two and three miles from the sea. The building seen in the distance with a tower, on a rocky eminence, is the Episcopal church, recently erected. The Congregational church is on the elevated ground on the eastern side of the Saugatuck; the two churches are about half a mile apart. There is a Methodist church about two miles above the bridge. These three are all the churches which are in the town. There are in Westport two carriage and two or three cotton factories. Shoes, hats, and other articles, are manufactured to some extent. There are 10 or 12 mercantile stores in the place. Saugatuck river is navigable for sloops and schooners as far as the village. At common tides there are about 7 feet of water by the bridge. This place is $6\frac{1}{2}$ miles west from Fairfield, $3\frac{1}{2}$ from Norwalk, 21 from Danbury, and $27\frac{1}{2}$ from New Haven.

In 1786, there were but five houses on both sides of the river, in the limits of the present village, of which only two now remain. In consequence of having the surplus money distributed properly, a committee was recently appointed to ascertain how many persons were in the limits of what is now Westport, when the census of 1830 was taken. It was found that 814 were in Fairfield, 725 from Norwalk, and 167 from Weston, making in the whole 1,706 persons.

About two and a half miles south of the village of Westport, is a smooth and beautiful elevation, called *Compo*. It was at this place that the British troops landed in April, 1777, when on their expedition to Danbury. They also returned to this place when they embarked on board of their shipping. Seven or eight men were killed in the vicinity of the Congregational church in Westport. "When the British

reached Compo," says Dr. Dwight, "they were hard pressed by the Americans; and probably would not have escaped from complete destruction, but by the following expedient, said to have been proposed by Sir William Erskine. They landed a body of marines, and moving them into the van of their army, charged the Americans with so much vigor, that they were driven from the ground. The British then embarked in their boats, with the utmost expedition, and reached their ships in safety, but so fatigued with their march, that many of the soldiers fell, it was said, upon the decks of the vessels, and there lay for a considerable time immovable and torpid. The Americans, also, were most of them exceedingly weary. The marines being fresh, took the place of their exhausted countrymen, and were an overmatch for the fatigued Americans." *Ball Mountain*, a conical eminence, covered with large trees from its base to its summit, is situated a little south of the village, and is a striking feature in the landscape.

WILTON.

WILTON was incorporated as a town in 1802. It was previously a society in the town of Norwalk, organized as such in 1726. The town is about $6\frac{1}{2}$ miles in length, and 4 in breadth; bounded n. by Ridgefield, e. by Reading and Weston, s. by Norwalk, and w. by New Canaan and Salem in the state of New York. The surface of the township is broken, there being two ridges running northerly and southerly through the town. The soil is a gravelly loam, considerably productive, and best adapted to a grain culture. The lands are also well adapted for fruits of various kinds. Agriculture is the principal business of the inhabitants. There is a satinet factory in the town. There are four churches, 1 Episcopal, 1 Congregational, and 2 Methodist. The central part of the town is seven miles north of Norwalk.

Wilton Academy is a classical school of high repute. The students are generally from the different states of the Union. It was instituted about the year 1818, by Hawley Olmstead, Esq., and is still under his direction. The number of students is limited at about forty.—Professor Stuart, of the Andover Theological Seminary, is a native of this town.

A silver mine has been discovered in this town. It was worked by some Englishmen during the Revolutionary war. After having worked in the mine for some time, they suddenly absconded, and took off their treasure with them. Since this period the mine has been neglected.

WINDHAM COUNTY.

WINDHAM COUNTY is bounded N. by Worcester County in Massachusetts, E. by the state of Rhode Island, S. by New London County, and W. by Tolland County. It averages about 26 miles in length from north to south, and is about 19 miles in width. This county is uniformly hilly, yet no part of it is mountainous or very elevated. The prevailing soil is a primitive gravelly loam. The greatest portion of the county is stony and considerably rough, and the lands generally best adapted for grazing, and many sections afford some of the richest dairy farms in the State. The Quinnebaug and Shetucket, with their branches, intersect this county, and afford many valuable water privileges for mills and manufacturing purposes. The valley of the Quinnebaug river comprises the best land in the county. The inhabitants of this county are more extensively engaged in the manufacturing business than in any other county in the State. Cotton and woolen goods are the principal articles manufactured. Windham County originally belonged to the counties of Hartford and New London. It was incorporated as a county in May, 1726.

The following is a list of the several towns in the county, with their population in 1830.

Brooklyn, . 1,415	Killingly, . 3,257	Thompson, . 3,380
Ashford, . 2,661	Pomfret, . 1,978	Voluntown, . 1,304
Canterbury, 1,880	Plainfield, . 2,289	Windham, . 2,812
Chaplin, . 807	Sterling, . 1,240	Woodstock, . 2,917
Hampton, . 1,101		

Population of the county in 1820, 31,684; in 1830, 27,077.

BROOKLYN.

THE TOWN of Brooklyn was incorporated in the year 1786, previous to which period it was included within the limits of Pomfret and Canterbury. The boundary line between these two towns, ran about half a mile south of the present village of Brooklyn, extending from the Quinnebaug river in the east, to a small stream nearly a mile east of the village of Hampton, which was then called Kennedy or Windham village.

“ In the year 1703, Richard Adams, Esq. then residing in that part of Norwich which now constitutes the town of Lisbon, purchased of James Fitch 3,000 acres of land, lying in the south part of Pomfret, where the village of Brooklyn now stands. This land he divided into five narrow lots, which he deeded to his five sons. The first lot was bounded south by the line between the two towns, extending in length from Quinnebaug river on the east, to land owned by Daniel Cady,

about a mile west of the village. Directly north of this was situated a tract of land owned by a Mr. John Blackwell, comprising 5,750 acres, who willed it to his son John. It was afterwards sold to Governor Belcher of Massachusetts, who divided it into farms and sold them to different individuals, among whom was the well known Gen. Putman. This tract of land went by the name "*Mortlake*;" it extended further west than the Adams purchase. A beautiful stream, which rises in the western part of this tract, received its name from the proprietor, viz. "Blackwell's;" it empties into the Quinnebaug. In the year 1747, the inhabitants of Mortlake sent a petition to the General Assembly, to be made a town. But the petition was slighted, and it was then resolved that it should be afterwards called Pomfret. In the north part of Canterbury, (that part of it which is now included within the limits of Brooklyn,) the land was owned by Edward Spalding; on the west of the Adams and north of the Spalding purchase, the land was owned by Daniel Cady. All of these tracts together were called the "*Two Additions*." There was, at that period, no particular village. In the year 1724, Daniel Cady deeded to the Two Additions 1 acre of land for a burying ground; it lies nearly half a mile south of the village of Brooklyn.

"In the year 1731, the first society meeting was holden, and in the succeeding year the first Ecclesiastical society was formed, having the same limits with the present town of Brooklyn. From 1732 till 1754, this society went by the title of Mortlake; it was then changed to Brooklyn, and was called Brooklyn society until 1786, when it was made a town. The first church was built in 1734, about 10 rods northwest of the site of the present one; the second was built in 1771. The first minister was ordained in 1735, whose name was Rev. Ephriam Avery. He died in 1754, and was succeeded by the memorable Dr. Whitney, who continued his ministerial duties until 1824, during a period of 68 years. The society divided in 1817; and in 1820 a chapel was built by the Congregationalists: the Unitarians held the old church. The court house was removed from Windham to Brooklyn in 1820. The principal streams in Brooklyn are the Quinnebaug river and Blackwell's brook. The hills are the Gray Mare, which is situated about one fourth of mile north west of Brooklyn; (it derives its name from the circumstance of an old mare and colt having been caught among the ledges, and confined there until the colt had eaten off the old mare's mane;) and Tetnuck hill, which is situated in the south part of the town. On the southeast side of this hill, there is quite a celebrated cave, called *Lyon's Den*; it derives its name from this circumstance, viz. during the Revolutionary war, a man by the name of Lyon deserted his post, and concealed himself in this cave until the pursuit was over. There is a mineral spring in the northeast part of the town, which is often resorted to in the summer season for medical purposes."

Brooklyn is bounded n. by Pomfret, e. by the Quinnebaug, separating it from Killingly and Plainfield, s. by Canterbury, and w. by Hampton. The town is nearly six miles in length from north to south,

and five in breadth. It is uneven, consisting of hills and valleys, and somewhat stony; but it is fertile, and admirably adapted to grazing. The dairy business, and the raising of sheep and swine, are the leading agricultural interests of the town. There is a cotton factory in the town, on the Quinnebaug, near the village of Danielsonville in Killingly.

North view of Brooklyn, (central part.)

The above is a northern view of the central part of the village of Brooklyn. The village consists of about 40 or 50 dwelling houses, 3 houses for public worship, a court house, and 4 or 5 mercantile stores; it is about 20 miles from Norwich, 40 from Hartford, and 30 from Providence. The building which is seen on the right is the court house. The Unitarian church is seen in the central part of the engraving. The Congregational church, recently erected, is seen farther to the south. The Baptist church is the small building with a steeple, seen a little west of the Unitarian church. The Brooklyn bank is the building seen on the extreme left, under the trees. A few paces north of this, and opposite the Unitarian church, was the residence of Gen. Putnam: the house in which he lived has been taken down within three or four years past. The field in which he was plowing when he first heard of the Lexington battle, is in full view, about 100 rods distant. He left his plow in the middle of the field, unyoked his team, and without waiting to change his clothes, mounted his horse and set out for the theater of war. His first place of residence in these parts, was about two miles north, where he had a farm; at the time of his noted wolf exploit, his house here was very near the boundary line between Brooklyn and Pomfret. Gen. Putnam, in the decline of life, publicly professed the religion of the gospel, and in the opinion of the respectable clergyman of Brooklyn, the Rev. Dr. Whitney, died hopefully a Christian. "During the gayest and most thoughtless period of his life," says Dr. Dwight, "he regarded religion with profound reverence, and read the scriptures with the deepest attention."

The Episcopal church in this town is situated about $1\frac{1}{2}$ miles east of the court house. This was the first church erected, and for a long period the only church for that denomination in this county. It was erected before the Revolutionary war, by Mr. Godfrey Malbone, a gentleman from Rhode Island, who had been educated at Oxford, England. He married a lady from the south, who for part of her patrimony brought 50 or 60 slaves on to the large estate on which he resided in this town. The state of Connecticut, after the Revolution, having abolished slavery within her borders, Mr. Malbone's servants became dispersed, and a great proportion of the colored people in this part of the state are their descendants.

Gen. Putnam's Monument.

The above is a representation of the monument in the grave yard south of the village of Brooklyn. The following is the inscription on the marble slab forming the top :—

" This Monument is erected to the memory of the Honorable ISRAEL PUTNAM, ESQ., Major General in the Armies of the United States of America ; who was born at Salem, in the Province of Massachusetts, on the 7th day of January, 1718 ; and died at Brooklyn, in the state of Connecticut, on the 29th day of May, A. D. 1790.—Passenger, if thou art a Soldier, go not away till thou hast dropped a tear over the dust of a Hero, who, ever tenderly attentive to the lives and happiness of his men, dared to lead where any one dared to follow. If thou art a Patriot, remember with gratitude how much thou and thy country owe to the disinterested and gallant exertions of the Patriot who sleeps beneath this marble. If thou art an honest, generous and worthy man, render a sincere and cheerful tribute of respect to a man whose generosity was singular ; whose honesty was proverbial ; and who, with a slender education, with small advantages, and without powerful friends, raised himself to universal esteem, and to offices of eminent distinction, by personal worth, and by the diligent services of a useful life."

The following sketch of the life of General Putnam, is from Allen's American Biographical Dictionary :—

" *Israel Putnam*, a major general in the army of the United States, was born at Salem, Massachusetts, January 7, 1718. His mind was vigorous, but it was never cultivated by education. When he for the first time went to Boston, he was insulted for his rusticity by a boy of twice his size. After bearing his sarcasms until his good nature was exhausted, he attacked and vanquished the unmannerly fellow, to the great diversion of a crowd of spectators. In running, leaping and wrestling, he almost always bore away the prize. In 1739 he removed to Pomfret in Connecticut, where he cultivated a considerable tract of land. * * * During the French war, he was appointed to command a company of the first troops which were raised in Connecticut, in 1755. He rendered much service to the army in the neighborhood of Crown Point. In 1756, while near Ticonderoga, he was repeatedly in the most imminent danger. He escaped in an adventure of one night, with twelve bullet holes in his blanket. In August, he was sent out with several hundred men to watch the motions of the enemy. Being ambuscaded by a party of equal numbers, a general but irregular action took place.

Putnam had discharged his fusee several times, but at length it missed fire while its muzzle was presented to the breast of a savage. The warrior with his lifted hatchet and a tremendous war whoop, compelled him to surrender, and then bound him to a tree. In the course of the action the parties changed their position, so as to bring this tree directly between them. The balls flew by him incessantly; many struck the tree, and some passed through his clothes. The enemy now gained possession of the ground, but being afterwards driven from the field, they carried their prisoner with them. At night he was stripped, and a fire was kindled to roast him alive; but a French officer saved him. The next day he arrived at Ticonderoga, and thence he was carried to Montreal. About the year 1759 he was exchanged through the ingenuity of his fellow prisoner, Colonel Schuyler. When peace took place he returned to his farm. He was plowing in his field in 1775, when he heard the news of the battle of Lexington. He immediately unyoked his team, left his plow on the spot, and without changing his clothes set off for Cambridge. He soon went back to Connecticut, levied a regiment, and repaired again to the camp. In a little time he was promoted to the rank of major general. In the battle of Bunker's hill he exhibited his usual intrepidity. He directed the men to reserve their fire, till the enemy was very near, reminded them of their skill, and told them to take good aim. They did so, and the execution was terrible. After the retreat he made a stand at Winter hill, and drove back the enemy under cover of their ships. When the army was organized by General Washington at Cambridge, Putnam was appointed to command the reserve. In August, 1776, he was stationed at Brooklyn, on Long Island. After the defeat of our army on the 27th of that month, he went to New York, and was very serviceable in the city and neighborhood. In October or November, he was sent to Philadelphia, to fortify that city. In January, 1777, he was directed to take post at Princeton, where he continued until spring. At this place a sick prisoner, a captain, requested that a friend in the British army at Brunswick might be sent for to assist him in making his will. Putnam was perplexed. He had but fifty men under his command, and he did not wish to have his weakness known; yet he was unwilling to deny the request. He however sent a flag of truce, and directed the officer to be brought in the night. In the evening, lights were placed in all the college windows, and in every apartment of the vacant houses throughout the town. The officer on his return reported that Gen. Putnam's army could not consist of less than four or five thousand men. In the spring, he was appointed to the command of a separate army in the highlands of New York. One Palmer, a lieutenant in the tory new levies, was detected in the camp: Governor Tryon reclaimed him as a British officer, threatening vengeance if he was not restored. Gen. Putnam wrote the following pithy reply: 'Sir, Nathan Palmer, a lieutenant in your king's service, was taken in my camp as a spy; he was tried as a spy; he was condemned as a spy; and he shall be hanged as a spy. P. S. Afternoon. He is hanged.' At the loss of Fort Montgomery, the commander in chief determined to build another fortification, and he directed Putnam to fix upon the spot. To him belongs the praise of having chosen West Point. The campaign of 1779, which was principally spent in strengthening the works at this place, finished the military career of Putnam. A paralytic affection impaired the activity of his body, and he passed the remainder of his days in retirement, retaining his relish for enjoyment, his love of pleasantries, his strength of memory, and all the faculties of his mind."

ASHFORD.

"THE settlement of the lands granted by the royal charter, was an object constantly kept in view by the legislature, and which they were anxiously engaged to effect. They selected convenient tracts of lands, and laid them out in townships, and gave all proper encouragements to adventurers who were willing to encounter the hardships and dangers of new settlements. As there was a good tract of land lying west of Pomfret, and north of Mansfield, adjoining Crystal Pond, they in 1706, granted a township, six (?) miles square, by the name of Ashford. The settlement of the town, however, did not commence till 1710, when two families moved on to the lands. In about four years, the inhabitants were so increased, that upon their petition, in 1714, the Assembly vest-

ed them with the privileges of a distinct town. Their first minister was the Rev. James Hale, ordained Nov. 26th, 1718."

Ashford is bounded n. by Union and Woodstock, e. by Pomfret, w. by Willington, and s. by Hampton, Chaplin and Mansfield. The south part of the town is about 9 miles long, and the west part about 8 in width. The surface of the land is hilly and stony, the soil being hard and gravelly, yet considerably fertile, and well adapted to grazing. There are three societies in the town, Ashford, Westford and Eastford; 8 houses for public worship, 3 for Congregationalists, 4 for Baptists, and 1 for Methodists. Agriculture is the principal business of the inhabitants. There are 3 woolen factories and 1 cotton factory in the town.

Southwestern view of Ashford, (central part.)

The above is a southwestern view of the Congregational church, Academy, and the two public houses, in the central part of Ashford. This place is 31 miles from Hartford, 39 from Providence, and 65 from Boston. The ancient Congregational church stood nearly on the spot where the church seen in the engraving is situated.

The following tradition has been handed down from father to son in Ashford: it is said to have taken place on this spot, and is illustrative of the manners and customs of ancient times:—

“A concourse of people were assembled on the hill in front of the meeting house, to witness the punishment of a man who had been convicted of neglecting to go to meeting on the Sabbath for a period of three months. According to the existing law for such delinquency, the culprit was to be publicly whipped at the post. Just as the whip was about to be applied, a stranger on horseback appeared, rode up to the crowd of spectators, and enquired for what purpose they were assembled. Being informed of the state of the case, the strange gentleman rose upright in his stirrups, and with emphasis addressed the astonished multitude as follows: “You men of Ashford, serve God as if the D...l

was in you! Do you think you can *whip* the grace of God into men? Christ will have none but volunteers." The people stared, while the speaker, probably not caring to be arraigned for contempt of court, put spurs to his horse, and was soon out of sight; nor was he ever more seen or heard of by the good people of Ashford."

The following, which is descriptive of the scenery, &c., of Ashford, is furnished by a native of the place:—

"The traveler, on arriving at Ashford, is greeted by no imposing spectacle. From the distant hill, as he approaches, he sees no ancient towers, nor, as he enters the center of the old town, does he meet with walled environs and a grated entry. Even in Spartan days, or in feudal times, the virtue and the hospitality which characterize such inhabitants, would have dispensed with walls and bulwarks. The simple view of a meeting house, an academy, two taverns, a cluster of neat dwellings, and surrounding scenery not particularly attractive, leaves no enduring impression upon the mind of the indifferent sojourner, who, after a night's repose, or a well prepared meal, tenders a sincere farewell to his obliging host, and resumes his seat in the post coach. But he who would enjoy the native attractions of the place, must be at leisure, and not wholly disinterested. Some strong tie, like that of consanguinity, should be thrown around him. In fine, he must be a good pedestrian. If he have these prerequisites, he may leave the turnpike and traverse a northern section of the township, where he shall find a region worthy to have been the nursery of the eagle spirit of a KNOWLTON. He shall stroll complacently among the pines which embower the rocky upland, and his eye shall dilate upon the landscape, as viewed from the topmost shelf of the storm-beaten crag. He shall turn from this species of scenery, to another not less enchanting. He shall leave the mountain for the plain, and make his way through the thickly wooded valley, where also wanders the murmuring rivulet, which is destined, ere its waters reach the sea, to bear a navy upon its bosom. Among these solitudes, he may perchance identify the 'banks and braes' among which, while a stripling, he angled for dace and trout. And here, where the shade of the overspreading beech falls upon the stream, if a corresponding shade of melancholy fall upon his heart, as memory recurs to his early friends and associates, that shade shall be but momentary. For when he shall arrive at the skirt of the wood, he may hear the careless whistle of the industrious farmer, and be cheered by the smile and merry song of his more than Roman daughters."

Col. *Thomas Knowlton*, who fell in the battle near Haerlem Heights, in September, 1776, was a native of this town. He was an intrepid soldier, a true patriot, and a worthy citizen. He was among the first who rallied around the standard of independence. He distinguished himself at the battle of Bunker Hill. The day after the retreat of the Americans from Long Island, being followed by the enemy, Gen. Washington detached a force under Col. Knowlton to oppose them, who charged them with great intrepidity, gained considerable advantage, and raised the depressed spirits of the army. He fell mortally wounded, at the head of his men, during the heat of the action. Gen. Washington, in his orders the day after he fell, styled him "the gallant and brave Colonel Knowlton, who would have been an honor to any country."

The following inscriptions are from monuments in the yard on the north side of the church represented in the engraving:—

ISAIAH, IV. 3.

Memento Mori.—Here lies the remains of ye Rev. Mr. James Hale, the first Pastor of ye Church of Christ in Ashford, and husband of Madam Sarah Hale. He left Earth for Heaven, as we trust, in ye 58th year of his age, November ye 22, 1742.

[On the foot stone.]

Here lies a Friend of Christ and of his People's . . . ye Rev. Mr. James Hale. Let all that loved the man these lines present, Follow his Faith in Christ and of all sin repent.

The Rev. Enoch Pond, and Mrs. Peggy Pond his wife. Mr. Pond died Aug. 6th, 1807, Æ. 50. Mrs. Pond died Jan. 24th, 1800, Æ. 40.—Generous in temper, correct in science, and liberal in sentiment, the Gentleman, the Scholar, and the Minister of the Sanctuary, appeared with advantage in Mr. Pond. The Church and first society in Ashford were favored with his Gospel Ministry 18 years.

☞ In yonder sacred house he spent his breath,
Now silent, senseless, here he lies in death.
Those lips again shall speak, and then declare
A dread AMEN to truths they published there.

Amiable in manners, kind in affection, and devout in Religion, Mrs. Pond enjoyed the friendship and confidence of a numerous acquaintance.

She lived a life of usefulness below,
She lives we trust a life of glory now.

CANTERBURY.

CANTERBURY originally belonged to Windham, afterwards to Plainfield. The General Assembly, in 1703, enacted that the town of Plainfield should be divided, and that the inhabitants on the west side of the river should be a distinct town by the name of Canterbury. "It seems, that the settlement of this tract commenced about the year 1690. The principal settlers from Connecticut, were Major James Fitch and Mr. Solomon Tracy, from Norwich; Mr. Tixball Ellsworth and Mr. Samuel Ashley, from Hartford; but much the greatest number were from Newtown, Woburn, Dorchester, Barnstable and Medfield, in Massachusetts. Among these were John, Richard, and Joseph Woodward, William, Obadiah and Joseph Johnson, Josiah and Samuel Cleveland, Elisha Pain, Paul Davenport, and Henry Adams."*

Canterbury is bounded N. by Brooklyn, W. by Windham, E. by Plainfield, and S. by Lisbon and Plainfield. It is eight miles long, and about four and a half broad. The surface of the town is uneven, though it can scarcely be called hilly, and some sections are level. The soil is a gravelly loam, and generally fertile and productive. The town is watered by the Quinnebaug, which is here a large and beautiful stream. It annually overflows its banks, and fertilizes the fine tract of alluvial soil upon its borders. These natural meadows are very fertile, and afford the largest crops, and at the same time are cultivated with the greatest facility. The town is divided into two societies, Canterbury, and Westminster, which embraces the western section of the town. In each society there is a Congregational church: there is also a Baptist church in the north part of the town. There are three cotton factories, two of which are in Packersville, a small manufacturing village, partly in the limits of this town, and partly in the limits of Plainfield, near the eastern bank of the Quinnebaug.

The principal village in Canterbury is pleasantly situated, on elevated ground, about half a mile west of the Quinnebaug. The engraving shows a south view of the Congregational church, the green, and some of the houses in the vicinity; from this spot the ground descends on every side except to the west. This place is 15 miles from Nor-

* Dr. Trumbull.

wich, 6 south of Brooklyn, 33 from Providence, and 40 from Hartford. On the left of the engraving is seen the house formerly occupied as a school by Miss Prudence Crandall, for colored girls, which at the time it was kept caused considerable excitement in this vicinity.

South view of the central part of Canterbury.

In November, 1831, Miss Crandall, who had gained a high reputation as a female instructress, proposed to some of the leading individuals in Canterbury, to open a "boarding school" in their village, for the education of young ladies. Her proposal was very favorably received, and by the patronage of the inhabitants the school was immediately opened, and continued rising in respectability.

In September, 1832, a respectable pious colored girl, a resident in Canterbury, and a member of the Congregational church, wishing to qualify herself to become a teacher among persons of her own color, requested admission into Miss Crandall's school. Miss C. at first hesitated, but at length, on a repetition of the request, urged with more earnestness than before, "she was admitted as one of her pupils." It was however soon intimated to Miss C. that unless she removed this scholar, the school would be greatly injured. Miss Crandall, who appears to have been governed in this affair by what she conceived to be her religious duty, in opposition to "public opinion," retained her colored pupil. In her view it appeared unjust and oppressive to expel a worthy scholar, who was guilty of no crime, merely on account of color. According to her view, the precepts of Christianity inculcated the duties of justice and benevolence to all, without respect to persons, and a spirit ready to make sacrifices for the good of others. After consulting with a number of people in different places, who professed to be friends of the improvement and education of colored persons, and also considering the deep prejudices existing against an unfortunate and injured race, the difficulties which those of them who are desirous of an

education lie under, in not being admitted to the higher seminaries of learning, Miss C. determined to open a school for their benefit, and accordingly dismissed her white scholars, and gave public notice that on the 1st of April her school would be opened for "young ladies and little misses of color."

The people of Canterbury, considering that this school would have a tendency to draw a despised class of persons to their village, and possessing their share of the feelings so common against the race, endeavored to break up the school. For this purpose they appointed a number of committees to wait on Miss C. in order to dissuade her from the design. All their attempts were unsuccessful. At this period, there being no law in Connecticut to prevent the education of colored persons coming from other states, a petition was drawn up, signed by a considerable number of petitioners, and sent to the Legislature, who granted the prayer of the petitioners, by passing an act prohibiting the instruction of colored persons from other states, in any schools except the common free schools and incorporated academies, without the consent of the town in which such schools should be situated. The passage of this law, (May, 1833,) was celebrated in Canterbury by ringing the bell and firing of cannon. About six weeks after the passage of the law, a suit was commenced against Miss C. which resulted in her confinement in the county jail at Brooklyn about a day, when bonds were given for her appearance before the County Court. The case came finally before the Superior Court, where the constitutionality of the law which Miss C. had broken, was argued. The counsel on the part of Miss C. contended that the law was unconstitutional, for the constitution of the United States declares, "The citizens of each state shall be entitled to all privileges and immunities of citizens in the several states." The judge on this case decided that colored persons were not citizens.

"From the commencement of her school for colored girls, Miss C. was subjected to a variety of insults and injuries, which, if not approved and countenanced by the more respectable inhabitants, were at least suffered to pass with an impunity that would have hardly attended them, had any other person been the injured party." Miss Crandall continued her school till after the decision above referred to, when she became united in marriage with a Baptist clergyman, and soon after the school was discontinued.

Jonathan Carver, a celebrated traveler, was (it is believed) a native of this town. The following is from Allen's American Biographical Dictionary.

"JONATHAN CARVER, an enterprising traveler, was a native of Connecticut, and was born in 1732. He lost his father, who was a justice of the peace, when he was only five years of age. He was intended for the profession of medicine, which he quitted for a military life. In the French war he commanded an independent company of provincials, in the expedition carried on across the lakes against Canada. He served with reputation till the peace of 1763. After this he formed the resolution of exploring the most interior parts of North America, and of even penetrating to the Pacific Ocean, over that broad part of the continent, which lies between the forty third and the forty sixth degrees of north latitude. As the English had come in pos-

session of a vast territory by the conquest of Canada, he wished to render this acquisition profitable to his country, while he gratified his taste for adventures. He believed, that the French had intentionally kept other nations ignorant of the interior parts of North America. He hoped to facilitate the discovery of a northwest passage, or of a communication between Hudson's bay and the Pacific Ocean. If he could effect the establishment of a post on the Straits of Annian, he supposed he should thus open a channel for conveying intelligence to China and the English settlements in the East Indies with greater expedition, than by a tedious voyage by the cape of Good Hope, or the straits of Magellan.

"With these views he set out from Boston, in 1766, and in September of that year arrived at Michillimakinac, the most interior English post. He applied to the governor, Mr. Rogers, to furnish him with a proper assortment of goods, as a present for the Indians living in the tract, which he intended to pursue. Receiving a supply in part, it was promised that the remainder should be sent to him, when he reached the falls of St. Anthony in the river Mississippi. In consequence of the failure of the goods, he found it necessary to return to la Prairie la Chien in the spring of 1767. Being thus retarded in his progress westward, he determined to direct his course northward, that by finding a communication between the Mississippi and Lake Superior, he might meet the traders at the grand portage at the northwest side of the lake. Of them he intended to purchase the goods, which he needed, and then to pursue his journey by the way of the lakes La Pluye, Dubois, and Ouinipique to the heads of the river west. He reached lake Superior before the traders had returned to Michillimakinac, but they could not furnish him with goods. Thus disappointed a second time, he continued some months on the north and east borders of Lake Superior, exploring the bays and rivers, which empty themselves into the large body of water, and carefully observing the natural productions of the country, and the customs and manners of the inhabitants. He arrived at Boston in October, 1768, having been absent on this expedition two years and five months, and during that time traveled near seven thousand miles.

"As soon as he had properly digested his journal and charts, he went to England to publish them. On his arrival, he presented a petition to his majesty in council for a reimbursement of the sums, which he had expended in the service of government. This was referred to the lords commissioners of trade and plantations, by whom he was examined in regard to his discoveries. Having obtained permission to publish his papers, he disposed of them to a bookseller. When they were almost ready for press, an order was issued from the council board, requiring him to deliver into the plantation office all his charts and journals, with every paper relating to the discoveries, which he had made. In order to obey this command he was obliged to purchase them from the bookseller. It was not until ten years after, that he published an account of his travels. Being disappointed in his hopes of preferment, he became clerk of the lottery. As he sold his name to a historical compilation, which was published in 1779, in folio, entitled the "New Universal Traveler," containing an account of all the empires, kingdoms, and states in the known world, he was abandoned by those, whose duty it was to support him, and he died in want of common necessaries of life in 1780, aged forty eight years.

"Captain Carver published a tract on the culture of tobacco; and travels through the interior parts of North America in the years 1766, 1767, and 1768, London, Svo. 1778. An edition of this work was published at Boston in 1797."

The following are copied from monuments in the grave yard north of the Congregational church.

Here lyes ye body of ye Reverend and Pious and Learned Mr. *Samuel Eastabrook*, ye 3d son of ye Reverend Mr. Joseph Eastabrook, late pastor of ye church in Concord, who was ye first pastor of ye church in Cantarbury, who departed this life to ye euerlasting mercy of God, June 23d, 1727, in the 53d year of his age.

In the memory of Col. *Aaron Cleveland*, who died in a fit of apoplexy, 14th April, A. D. 1785. Born 7th of Decr. 1727; on the 17th of June, A. D. 1782, when in the bloom of health and prime of life, was struck with the numb palsy; from that time to his death, had upwards of sixty fits of the palsy and apoplexy. He was employed in sundry honorable offices both civil and military.

Calm and composed my soul her journey takes,
No guilt that troubles, and no heart that aches.
Adieu! thou Sun, all bright like her arise,
Adieu! dear friends, and all that's good and wise.

Here lies the body of Maj. James Fitch, Esq., son of ye Reverend Mr. James Fitch, pastor, first of Saybrook, then of Norwich. He was born at Saybrook, 1647. He was very useful in his military and in his magistracy to which he was chosen, served successively to ye great acception and advantage of his country, being a gentleman of good parts, and very forward to promote ye civil and religious interests of it. Died Nov. 10, 1727, aged 80 years.

CHAPLIN.

CHAPLIN was incorporated as a town in 1822. It was formed from the towns of Mansfield, Hampton, and a small section of the town of Windham. It is bounded n. by Ashford, e. by Hampton and Windham, s. by Windham and Mansfield, and w. by Mansfield. The principal part of the township, however, was included in the limits of Mansfield, being a parish in that town, by the name of Chaplin. This parish was formed in October, 1809, and received its name from Deacon Benjamin Chaplin, who left a donation for the benefit of the society. The township is five miles and a half in length from north to south, and averages about three and a half in width, containing about nineteen square miles.

The town is intersected by the Nachaug, which passes through it from the northeast to the southwest. The inhabitants are principally farmers. There is but one house of worship in the town, which is for Congregationalists. A paper mill, on the Nachaug, has been recently erected, near the center of the town. The central part of the town is about ten miles west from Brooklyn.

HAMPTON.

HAMPTON was incorporated as a town in 1786. It was mostly formed from the second society of Windham, which was formed as a society in 1720, and was called *Kennedy* or *Windham village*. The place appears to have been so named from a Mr. Kennedy, who with his family were the first settlers in the society. They located themselves about two miles south of the Congregational church. It is believed that the first settlers came into this town about the year 1708. John Clark, the fourth settler, located himself nearly two miles northwest from the center; Nathaniel Flint, one mile and a half to the southeast; William and John Durkee, and George Martin, near the center; Nathaniel Kingsbury located himself about three miles to the northwest. Daniel Denison, two miles north; James Utley, two miles and a half, and Ebenezer Griffin, one mile and a half to the northeast. Benjamin Bedlock, John Preston and John Holt, were also among the first settlers. The first meeting house lasted till 1754, when it was removed and a new one erected, which is the church now standing.

“The Congregational church in Hampton was organized June 5th 1723, consisting of 17 members, the descendants of many of which are yet inhabitants of the town. Upon the same day, Rev. William Bil-

lings was ordained their pastor. He died May 22d, 1733, aged 36 years. His successor, Rev. Samuel Mosely, was ordained May 15th, 1734, and died July 26, 1791, in the 83d year of his age, and 57th of his ministry. Rev. Ludovicus Weld, the next pastor, was ordained Oct. 27th, 1792, and at his request, in consequence of ill health, was dismissed March 2d, 1824." The present pastor, Rev. Daniel G. Sprague, from whom the above statement was obtained, was installed May 26th, 1824.

Hampton is bounded n. by Ashford and Pomfret, e. by Pomfret, Brooklyn and Canterbury, s. by Canterbury and Windham, and w. by Windham and Chaplin. Its length from north to south is about six miles, its breadth, upwards of three, containing about $21\frac{1}{2}$ square miles.

The surface of the town is uneven, being considerably hilly. The soil is a gravelly loam, considerably strong and fertile, and is well adapted for grazing. Agriculture is the principal business of the inhabitants. There is, in the south part of the town, 1 woolen and 1 cotton factory, and in the center there is an establishment for the manufacture of spectacles, carried on by Mr. Joseph S. Curtiss, who manufactures at present between 2,000 and 3,000 pairs yearly.

The principal and central village in the town is situated on the summit of a considerably elevated hill, 35 miles from Hartford and 6 from Brooklyn. It consists of upwards of thirty dwelling houses, 5 stores, a town house, and a Congregational church, on a single street, of perhaps about half a mile in extent. There are two other houses of worship in the town, one for Baptists, in the northeast part, and one (a small building, for Christ-ians) in the western part. There are two post offices in the limits of the town, one at the center and the other at Howard's valley. The first mail opened in Hampton was on Jan. 31st, 1820.

About twenty years since, a sect of reformers, calling themselves *Christ-ians*, caused considerable excitement in this and some of the adjoining towns. They had a house of worship in this town, called the Goshen meeting house, (from a neighborhood by that name,) about two miles westerly from the center of the town. They appear to have been rather extravagant in their manner of conducting their meetings: it is stated that they were so noisy as to be heard at the distance of two miles. It is also stated, that in order to humble themselves, and become *literally* like little children, they have been known to crawl or creep on the floor, roll over one another, &c. In some instances they would so far neglect their worldly business as to leave their cows un milked, &c. A Mr. Smith and Mr. Varnum,* ap-

* A correspondent from Hampton states, that the first *Christ-ians* came to Hampton in 1816: they were also called *Smithites*, from one Elias Smith, who appears to have been one of the founders of this sect. "Varnum pretended to have special revelations from God, that such and such persons must give him some particular article, or a sum of money. In one instance, he went to a man who was then a justice of the peace, and told him that it was revealed to him, that he must give him his horse. The justice, thinking this rather a hard requisition, as he had already given him considerable in this way, asked if one half would not do, as the horse was a valuable one. Varnum reluctantly consented, on the ground that the revelation went for the whole; he however promised the owner of the horse, that he would pay him back one half its value. Varnum took the horse and went off, but never fulfilled his promise." Var-

pear to have been their principal preachers, or leaders. Varnum induced some of the people, over whom he had great influence, to move with him to Ohio, and there establish a pure and holy church, and enjoy a kind of Paradise on earth. The people, however, that went with him, were generally miserably disappointed; Varnum turned Shaker, and advised those over whom he had influence to follow his example, which was to some extent followed.

KILLINGLY.

KILLINGLY was first settled about the year 1700.* An act was passed in 1708, granting the inhabitants the privileges and immunities of a township, which then included in its limits the town of Thompson. The land was purchased of the colony, and the grant was signed by Gov. Salstonstall at New Haven, Oct. 13th, 1709.

Among the early settlers, whose descendants inhabit the same spot, were Messrs. Joseph Cady, James Danielson, Sampson Howe, and Ephraim Warren. The first white person buried here, was a female of Mr. Cady's family, great grandmother to Mr. Nell Alexander, an aged man still living. The precise year of her death is forgotten. Her grave is still to be seen; but as it always happens in early settlements, the graves of that period were left without any inscription. The oldest date to be found is 1720, and marks the time of burial of an individual of the same family.

The first settlers were all athletic men, and inured to hardships; yet they made but little improvement, on account of the roughness of the soil and the depredations of the Indians. The aborigines of this part of the country, were a branch of the *Nipmuck* tribe, who were acknowledged to be less fierce and warlike than the Pequots: but though the lives of the settlers were not often endangered, yet they suffered great annoyance from their savage neighbors, who, being deprived of most of their game by the progress of the settlement, thought themselves justified in requiring the balance in the form of provisions, which the whites dared not refuse, notwithstanding the daily calls of their red friends. These sons of the forest sometimes traveled in companies of fifty or sixty, we are credibly informed, and took up their quarters at one house! They seldom showed violence to the inmates to obtain admission, yet they often employed artifice with wonderful success. For after they had been kept over night, eight or nine more would be found the next morning, whom they had contrived to conceal with their *Papposes*, thus making their number apparently smaller than it really was, in order to gain admission more readily. While the whites and Indians in this manner had constant communication, and were on friendly terms with each other, they used to engage in favorite sports, by which they tested their comparative strength and agility. In this respect the whites were in no degree inferior to the red men. The savage is capable of enduring great hardships, but his strength is not great in proportion to his power of endurance. Indeed in most of the contests, the well clad and civilized European showed himself far superior to the almost naked and wild American, even in respect to bodily vigor. As an example we introduce only the two following circumstances.

Mr. Cady, soon after his arrival, was one day mowing brush at the foot of Mashentuck hill, when an Indian came from an adjoining wood, and expressed an earnest desire to try the skill of a white man at wrestling. Cady, without hesitating, dropped

num induced his followers, both male and female, old and young, to make a full confession of all their sins in public, without regard to any of the generally received opinions of propriety or decency.

* For the following account of Killingly, its history, traditions, &c. the author is indebted to Asa G. Alexander, A. B. of East Killingly.

his sythe and grappled with his savage friend, who struggled long and hard to throw him down. But the former knowing that by a display of strength and skill he might render the Indians less prone to hostility, was determined not to be worsted in this encounter: he made a desperate effort, and finally succeeded in flinging his antagonist. But unexpectedly the head of the Indian struck upon the sharp points of the stubs of the brush just mown, which, on account of the violence of the fall, perforated the skull and killed him instantly.

Subsequently to this, in 1720, Mr. Jacob Spalding, who had emigrated in 1715 with the first settlers to the south parish, had a similar adventure. The particulars are related by his descendants of the fourth generation as follows:

"Jacob one day purchased of an Indian a deer skin, for which he paid him a *tenor bill*. The latter, somewhat intoxicated, forgot soon after that he had received it, and asked for the money a second time. Jacob of course paid no attention to such an unwarrantable demand, and the Indian went away muttering revenge. The next day while shingling a barn, Jacob saw him returning with two companions. He leaped from the roof, met them, and was again asked to pay the price of the deer skin. He refused to comply, till one of the company, who appeared to be the sachem of his tribe, said he had come to see 'fair play,' and avowed it to be honorable for two Indians to contend with one white man. Jacob therefore imagined he would have a rather difficult task to accomplish, but plucking up courage, he exerted himself to the utmost, and on the very first encounter, *laid them both* upon the ground and gave them a 'sound drubbing.' The other, who was looking on, was not at all disposed to assist his brethren, and gave them no other encouragement than 'Poor dogs, poor dogs! me hope he kill you both!' However, Jacob after 'pounding them' a short time, suffered them to escape. But the next day he saw them coming again, and the individual who imagined himself his creditor, bearing a rifle, which he was in the act of loading. But in thrusting his hand into his pocket to find the ball, he drew out the identical *bill* which he had received two days before! Conscience-struck, he said to Jacob, who was coming to meet him, 'Me believe now, Jacob, you paid me de *tenor bill*!' After this confession, Jacob addressed the person who had come to see 'fair play.' 'You,' said he, 'that have come to see fair play, what do you advise us to do with him?' 'Tie him to de tree and whip him,' was the reply, which was done accordingly. And here a circumstance occurred, which shows to what extent the Indians carried their principle of honor. The individual in question, after this humiliating treatment, became so dejected that he fled from his tribe, and was never heard of afterwards."

Many of these Indians embraced Christianity, and became partially civilized. The celebrated Sampson Occum, of the Mohegan tribe, preached among them a few times. But the continual wars they had with other tribes, made it impossible to persuade them all to conform to the precepts of the Gospel. As already intimated, the aborigines of this quarter were less fierce and warlike than the Pequots; yet the settlers were not entirely unprotected in case of any sudden emergency, which had some influence in keeping their savage neighbors at peace. Two forts were built at the north parish, and another at Danielsonville, the ruins of which latter are still visible.

On one occasion only were the whites in danger. A warlike tribe came from the country south of Killingly, with the intention of murdering the whole white population. They arrived at a plain a quarter of a mile north of Alexander's Lake, and encamped beneath an old white oak tree. But the settlers being apprised of their arrival, were busy in preparation for defense. One of them in the mean time sallied forth alone to the spot where the red men were assembled. At the same moment the sachem was seen climbing the oak to reconnoitre the country. He had scarcely time to look, when he felt the bullet of the above mentioned settler, who knowing him to be the chief, had deliberately raised his musket and given him a fatal wound. Though the individual who did this bold act was *alone*, yet the Indians, fearing that more lay concealed, and being without a leader, gave up the expedition. The same day troops arrived from Massachusetts, and encamped over night on the plain which the Indians had abandoned. The next day they proceeded in pursuit of the enemy, after having buried one of their number who had died of sickness.

Though the Indians of this quarter did not greatly annoy the whites, yet they had frequent quarrels with other tribes. To illustrate this we will relate a remarkable event which is received from tradition.

The Narragansetts residing near Stonington by the sea shore, invited the Nipmucks about Danielsonville, to "come down" and attend a feast of "shell fish." The invitation was accepted, the latter partook of the fish, were highly pleased, and in return invited the former to "come up" and attend a feast of "lamprey eels," which was to be ready after the lapse of two moons. The Nipmucks returned home and immediately busied themselves in catching fish for the occasion. At the appointed time, a considerable portion of the *men* belonging to the Narragansett tribe, leaving their squaws at home to cultivate the ground and prepare food for those of the warriors left behind to guard their possessions, proceeded on a journey of thirty miles through a wilderness, to share the hospitality of their friends in Killingly. They arrived in safety and found the feast all prepared. Both parties seated themselves on logs. The squaws were then ordered to bring forward the fish, in the kettles in which they had been cooked. A convenient supply was then provided for each of the guests, who perceiving that they were cooked without dressing, were disgusted and refused to partake. As it was too late to remedy the matter, there was a pause. Ashamed and vexed to think they had spent so much trouble in inviting the Narragansetts to travel a distance of thirty miles to attend a feast which they could not relish, the Nipmucks proceeded to "hard words," which their guests retorted with too much spirit to be borne. The Nipmucks seized their weapons and attacked their guests, who were unarmed. Many *Nipmucks* fell: but of the Narragansetts all perished but *two*, who crossed the Quinnebaug and fled to their tribe, bearing the news of the massacre.

Not long after, the remaining portion of the tribe came up, armed with their bows and arrows, to avenge the slaughter of their countrymen. Their march was on the western side of the Quinnebaug in Brooklyn, till they arrived about half a mile below Danielsonville, where the Nipmucks were seen encamped on the east side in Killingly. The latter saw them coming, and hastened to give them battle: being warmly received, however, they dug a trench in the sandy soil on the bank of the river, and repelled the Narragansetts, who being unable to cross, entrenched themselves in the same manner on the opposite side. Both parties being greatly exasperated, continued fighting three days. The surviving Narragansetts at the end of the third day retreated, and left the Nipmucks to bury their dead. The entrenchments are still visible, as well as the skeletons of the Indians who perished. Both those who were slain at the massacre, and those who fell in battle, were buried in pits, which were filled with bodies almost to the surface of the ground. The space thus occupied is about a quarter of an acre. Many of their bones have been dug up and carried away by the curious. The tradition adds, that on account of the wickedness of this transaction, the earth around this spot was blasted by a curse, so that to this day not a blade of grass will grow over the bodies of those murdered Narragansetts!

By such petty contests and the treachery of the whites, the Indians of this part of the country gradually disappeared. Within fifteen years an aged and pious female, named Martha, the last lineal descendant of the tribe residing here, has gone to repose in the burial place of her fathers, and no red people have been seen here since, except occasionally in small bands for the purpose of fishing. Thus much of the Indians. We might entertain our readers with stories of witches, goblins and hobgoblins, if we had nothing of more consequence to place before them. There are however two remarkable circumstances, probably connected with natural phenomena, which we will relate. The first, which we gather from the lips of aged individuals still living, is as follows:

"The autumn before the American Revolution, the people of this town, who had long been expecting hostilities to commence, were one day alarmed by what they took to be the continued discharge of cannon and small arms to the northeast, in the direction of Boston. The noise continued all day and night, with scarcely any intermission. The sounds heard, it is said, exactly resembled those of musketry and field pieces. First would be heard a loud report and then smaller ones, "slam bang, slam bang," to use the language of those who relate the circumstance. The impression

that the British were coming was so strong, that most of the inhabitants mustered in a body to await orders for marching to Boston. In a few days, however, contrary to expectation, they learned that no battle had taken place, and that no discharge of cannon or small arms had been made between this town and Boston. Whether the sounds proceeded from the explosion of meteors or not, we are unable to say; but the persons who heard them, considered them as forerunners of the war, which actually began six months from that time.

The second circumstance was told us by an aged and respected man, Mr. Nell Alexander, who remembers it perfectly well, as also the remarkable sounds alluded to above. We give it in his own words:

"In the American Revolution, just before the surrender of Lord Cornwallis, I was returning from a visit to Providence, R. I. I had arrived in Killingly, and was within four miles of my residence at Alexander's Lake. It was a bright and clear night, without any moon. I think it was half past ten, when I accidentally looked up and saw a most brilliant sight. A very little south of the zenith, extending east and west in the sky, lay an arch composed of mounted cannon, with their muzzles pointed towards the south. Their color was that of the Aurora Borealis. I viewed them a long while and attempted to number them, but being in a wood, I was unable to discern those which lay near the horizon. I then hurried on to overtake a friend, whose attention I wished to direct to the phenomenon. My horse being fatigued, however, I did not reach him till the remarkable sight had disappeared. I related the event to every person I saw for a long period afterwards, but could find no one who had seen it besides myself, until I happened one day to be on a visit to my uncle, Mr. Levens, who is no longer living. In the course of conversation, without knowing that I had seen it, he related precisely the same circumstances which I have just related myself. He was in Killingly at the time, and but a few miles from the place where I was. He informed me that he took the trouble of counting the cannon, and as he was in a convenient situation for the purpose, he doubted not that he had numbered them all. The whole number was 64. They were removed at a small distance from each other, well mounted and in a regular line."

The first meeting house erected in Killingly, stood on a plain a quarter of a mile south of the present building at the north parish. It was subsequently removed to the spot on Breakneck hill, given to the town as a burial ground by Mr. Eliezer Warren. Afterwards it occupied the ground where the town house now stands, at the "Center," at which place one of its pastors was Mr. Burroughs, father of the celebrated rogue. The present building, which stands at the north parish, is placed on the highest ground in Killingly, in view of Thompson and Pomfret meeting houses; it is very neatly constructed, and was erected in 1818. It belongs to the Congregational denomination. The first pastor of the Congregational church in this town was the Rev. John Fisk. It contained at its organization, Oct. 19th, 1715, eleven members. Besides this church, two others were subsequently organized, one at Westfield, and another at the south parish, both of the same denomination with the one already mentioned.

A curious fact is related of one of the first pastors of the north parish church, who was accustomed to keep credit of the presents made him by his parishioners. In reading the credits for one week, it was found they consisted of four lines, making an harmonious complot with perfect rhyme and measure. It is curious, as illustrating the state of things in those days, and certainly deserves to be snatched from oblivion. We give it in the form current at the present day.

"Nell Alexander	-	-	-	a few little fishes
David Copp	-	-	-	a goose
Sampson Howe	-	-	-	a junk of beef
J. Dean	-	-	-	a pair of shoes!"

As connected with this denomination, one individual pastor of the north parish church deserves particular notice.

The Rev. ELISHA ATKINS, who was ordained pastor of this church in 1783, is still living, at the advanced age of 86 years. This individual's name deserves remembrance, inasmuch as he has spent a long life in unwearied diligence in the service of God and his country. He graduated at Yale College in 1773, and immediately entered upon his studies for the ministry. When the Revolution broke out, he entered the U. S. army, and served during the war as chaplain; was present at the taking of Burgoyne, and witnessed various other important occurrences where the division which he joined was engaged. He commenced his ministry here, as already intimated, at the close of the American Revolution, and remained constant in his duties of pastor till within about four years of the present time. Since then, his strength failing, he has officiated only occasionally. In spite of his advanced age, he even now possesses considerable energy both of body and mind, and a health for which he is indebted to the severe exercise taken in youth. He is universally beloved by the members of his church.

The Baptist meeting house was erected in 1807, and placed under the pastoral care of Elder Cooper. The old building still stands on Chesnut hill. The new one, which is just completed, (1836,) stands about a mile south of the old one, at that part of the hill where it is in full view of the villages along "Pleasant Valley."

Killingly contains an area of 57½ square miles. The surface of the country is much broken. The principal streams are the Quinnebaug or Assawoggo Quinnebaug, the Five Mile, which joins the Quinnebaug at Danielsonville, and the White-stone brook, which empties into the Five Mile. These are all excellent mill streams. The White-stone brook has its origin in Killingly pond, formerly called Mashentuck pond, a piece of water partly in Connecticut and partly in Rhode Island, which has lately been increased by building a dam at the outlet, in order to allow the water to accumulate in wet weather. In this manner it has become one of the most valuable streams possessed by any manufacturing company in the state. The other streams are the Quanduck and Kies branch, the latter issuing from a pretty piece of water, surrounded by forests, and called the Quinnebaug pond.

The most delightful portion of Killingly, in respect to scenery, is around a small sheet of water, with an outlet to the Quinnebaug, lying in the western part of the town, formerly known to the Indians as Lake Mashapaug, but now called Alexander's Lake. It received its present appellation from an individual of the name of Nell Alexander, who settled at that spot in 1720, and was himself proprietor of a great portion of the town. As this person gained his wealth in a manner which illustrates the antiquity of the propensity of the inhabitants of this state to the once honored, yet now despised employment of *peddling*, we will trouble you with a short notice of his history. He came from Scotland, with a great number of other emigrants, in a ship which was to land them at Boston. Just before leaving the ship he discovered a *gold ring* upon deck, for which he could find no owner. Thus fortunately provided, after his arrival he pawned the gold ring for small articles of trade, which he peddled in Boston and Roxbury. He was very prosperous, and finally became able to redeem the author of his success, and pursue his business without embarrassment. After a few years of constant activity, he acquired sufficient property to purchase a plantation of 3,500 acres in Killingly. The gold ring was transmitted as a sort of *talisman*, to *his only son Nell*, who transferred it to *his only son Nell*; who is now living at an advanced age, and has already placed it in the hands of *his grandson Nell*; and so it will doubtless

continue from *Nell to Nell*, agreeably to the request of the *first Nell*, until the "last knell of the race is tolled!"

In order to view the scenery to advantage, the observer should station himself on an eminence north of the lake in question. The eye first meets a broadly extended surface of water, with a beautiful margin of sand and pebbles, skirted by woods of tall trees. A little further south appears a part of the lake smaller than the first, containing a beautiful little island, called Loon's island, frequented by all kinds of birds of passage at different seasons of the year. Eagles not unfrequently alight here in their passage north and south. The fullest extent of the lake is one mile. Its form is very accurately represented in the annexed sketch. Want of space will not allow us to be very minute in describing it. Its beauties seem to have struck even the rude early settlers with admiration. We have been favored with the remains of a poem, written in a moment of inspiration. It was discovered in an old garret, and bears upon it the marks of time. We could recover only the following fragment, not remarkable for preserving very correct rhyme and measure, yet valuable as affording a specimen of the quaint style of those times.

" Betweene Five Mile and Quinebaug,
Which sounding through rockye Vales loud and hoarse,
From every Hill and Meadow Bog
Receive Supplies, and onward bende theire Course ;
Enclosed around by Groves and various Trees,
With Shore of Sand and Skye of Blue,
With Water gently ruffled by the Breeze,
Lake Mashapaug douthe meete oure View !"

* * * * *

To account for the origin of this lake, a singular tradition has been handed down to us by the aborigines. It is as follows :

" In ancient times, when the red men of this quarter had long enjoyed prosperity, that is, when they had found plenty of game in the woods, and fish in the ponds and rivers, they at length fixed a time for a general powwow, a sort of festival for eating, drinking, smoking, singing and dancing. The spot chosen for this purpose was a sandy hill, or mountain, covered with tall pines, occupying the situation where the lake now lies. The powwow lasted four days in succession, and was to continue longer had not the Great Spirit, enraged at the licentiousness which prevailed there, resolved to punish them. Accordingly, while the red people in immense numbers were capering about upon the summit of the mountain, it suddenly "gave way" beneath them, and sunk to a great depth, when the water from below rushed up and covered them all except *one good old squaw*, who occupied one of the peaks, which now bears the name of Loon's Island. Whether the tradition is entitled to credit or not we will do it justice by affirming that in a clear day, when there is no wind and the surface of the lake is smooth, the huge trunks and leafless branches of *gigantic pines* may be occasionally seen in the deepest part of the water, some of them reaching almost to the surface, in such huge and fantastic forms as to cause the beholder to startle!

As regards the other portions of the scenery there is nothing remarkable. The hills are still covered with forests ; but the vales, through which flow the principal rivers, are lined with factory villages. The population of the town is now about 4,000. The ancient forests are fast yielding to the axe of the farmer, who supplies the villages with wood. The game in the woods, and fish in the ponds and rivers, are not as plenty as formerly, to the regret of the old inhabitants, who look upon factories and other improvements as an evil. The soil is hard, but productive under proper cultivation. The animals reared upon it are robust and healthy. The same may be said of the inhabitants. This town, however, has possessed no very distinguished men "who have gone off the stage."

Yet it were injustice not to mention the name of one no longer living, who became celebrated in the chase. I mean Mr. Prosper Leffingwell, a respected resident of this place, who, though he followed the humble occupation of hunting, yet became so expert, and enjoyed a reputation so widely extended, that I might deeply wound the feelings of all his now aged companions in the same profession, who revere him as a superior spirit, were I to omit to notice him in speaking of this town. It were useless to attempt to detail all the events which marked the career of this famous sportsman. He was the terror of the *foxes* and *rabbits* for ten miles around. Many instances I might relate to illustrate the degree of skill to which he attained, but let one suffice. It is said that on one occasion, while returning home from hunting, he met *three foxes* advancing towards him "all in a row." As his gun was not loaded, he seized a stone and directed it as well as he was able, in a straight line towards their heads. Wonderful to tell, he brought them all *down!* He gazed a moment in astonishment. He found he had struck the first in the nose, the second in the hip, and the third in the forehead—all with the same stone! The first was not quite dead, the second was badly lamed, but the third showed no signs of life whatever. While chasing the second, the first recovered and scampered away. Had he sprung upon them the moment he saw them fall, he might have secured the three.

Killingly is the *greatest cotton manufacturing town* in the state. Of the cotton factories we give the following recent statement.

On the White-Stone Brook.		Spindles.	On the Five Mile.		Spindles.
Hon. Ebenezer Young's,	-	2,500	Killingly Factory,	-	1,628
Richard Bartlett's,	-	400	Ballou's,	-	1,500
Leffingwell's,	-	3,000	Amesbury's,	-	1,500
Valley Mills,	-	1,200	Ruggles's,	-	2,000
A.F. Alexander's,	-	1,200	Dayville,	-	1,500
Thomas Pray & Co.,	-	1,200	Danielson,	-	2,800
Hutchins,	-	1,500	Williams's, on Quinnebaug,	-	2,500
<hr/>			<hr/>		
Total,	-	11,000	Total,	-	13,428

Total for the whole town,—24,428 spindles, with looms in proportion. The trade is carried on mostly with Providence, R. I. Besides these cotton factories, there are 3 woolen mills, 1 furnace, and 1 axe factory. There are but few other manufactories of much consequence.

"Pleasant Valley" contains the first six cotton factories enumerated in the list. The villages are all in sight of each other, and make a beautiful view from the top of Chesnut hill.

Dayville is a thriving little village. It is attractive for its neat appearance, and for a bridge composed of two finely constructed stone arches, each 25 feet broad and twelve feet high.

Danielsonville is an important village at the junction of the Quinnebaug and Five Mile rivers, 3 miles east of Brooklyn, 25 miles north of Norwich city, 43 miles east of Hartford, and 37 miles south of Worcester.

The following view shows the appearance of Danielsonville as it is entered from the west, upon the Brooklyn road. The four story building with a steeple, is the Danielsonville cotton factory, containing 1,800 spindles; between this building and the observer, the bridge over the Quinnebaug is seen.

As regards natural resources, Killingly abounds in them. Breack-neck hill, a considerable eminence between the White Stone brook and Five Mile river, bears on its elevated surface numerous quarries of free stone. These quarries rise above the general surface, presenting ab-

Western view of Danielsonville, Killingly.

rupt, and in some cases lofty precipices to the east, and gentle slopes to the west. The stone is of a high order. It is obtained in slabs of almost every dimension, and is nearly *perfectly even in structure*, presenting, if any, at least very slight inequalities. It is very hard, and therefore little liable to break in removing it from the quarry. It has a uniform color, approaching to white. As the slabs of this rock lie in an inclined position, they can be detached with the most perfect facility. There are other kinds of slate rock in Killingly, which have the appearance of granite, but are quite soft, and consequently more easily wrought for the purpose of building. The latter kind lies most abundant about Killingly pond. There is still another kind of slate rock situated at the south parish. Its composition is granular quartz, and it possesses a color nearly or entirely white. It is a very valuable stone for walks, inasmuch as it is quite soft and yielding. It is obtained in slabs, but is mostly below the general surface of the ground, and is not so regular in its structure as the other kinds mentioned. When the Norwich and Worcester rail road shall have been completed, these stones will become a source of gain to the owners, who could easily transport them to New York. Under present circumstances, however, being at the distance of 22 miles from Providence, which is the nearest seaport, the profit of traffic in this article is inconsiderable, and consequently but few stones have been taken away.

Mashentuck hill next deserves mention. It is a considerable eminence, comprising a circuit of two or three miles, terminating in an abrupt steep at the southern extremity of "Pleasant Valley," and "bearing on its back" a rich bed of porcelain clay, which has been pronounced by competent judges to equal the best French or Chinese clay. The feldspar, too, accompanies it in a solid form, and is abundant. It was discovered while digging a well. For a few feet below the surface of the ground, the clay was mixed somewhat with vegetable matter;

but at the depth of 10 feet it became perfectly white and pure. In fine, it became, in the graphic language of those who dug the well, "like lard!" The well was dug *twenty feet* farther, when the project of perforating the whole bed was abandoned. The clay was then carefully examined, and found perfectly free from grit. The sides of the well presented to the eye alternate layers of clay and feldspar. The latter substance had a brilliant appearance like ice.

PLAINFIELD.

"IN JUNE, 1659, Gov. Winthrop obtained liberty of the Assembly, to purchase a large tract at Quinnebaug. Soon after, he made a purchase of Allups, alias Hyemps, and Mashaushawit, the native proprietors of the lands comprised in the townships of Plainfield and Canterbury, lying on both sides of Quinnebaug river. There was a small number of families on the lands at the time of the purchase, but the planters were few until the year 1689, when a number of people, chiefly from Massachusetts, made a purchase of the heirs of Gov. Winthrop, and began settlements in the northern part of the tract. At their session in May, 1699, the General Assembly vested the inhabitants with town privileges. The next year it was named Plainfield."*

Plainfield is bounded n. by Killingly, e. by Sterling, w. by Canterbury, and s. by Griswold and Voluntown. It is about 8 miles long from north to south, and about 5 wide. The eastern section of the town is rough and broken, being hilly and stony. The hills are considerably elevated and continuous, forming ridges, extending in a northerly and southerly direction. The western section is an extensive *plain*, the surface being level, and the soil a light sandy loam, which is cultivated with facility, being fertile and well adapted to a grain culture. When this town was first settled by the whites, these plains were free from timber, and admitted of immediate cultivation. From the great quantities of corn raised here, this place was called the *Egypt* of the surrounding settlements. There is at present considerable manufacturing business carried on in this town, principally cotton and woolen factories, the most of which are in the little manufacturing villages called Unionville and Centerville, situated on Moosup river, a fine mill stream which discharges its waters into the Quinnebaug. There are four houses of worship in the town, 2 for Baptists, 1 for Congregationalists, and 1 for Friends or Quakers.

The Indians were numerous at the time the town was first settled, amounting to 400 or 500. They continued for many years with the English, living in the most friendly manner. "The Gospel (says Dr. Trumbull) hath had by far the most happy effect upon the Quinnebaug or Plainfield Indians, of any in Connecticut. They ever lived peaceably with the English, and about the year 1745, in the time of the great

* Dr. Trumbull.

awakening and reformation in New England, they became greatly affected with the truths of the Gospel, professed Christianity, and gave the strongest evidence of a real conversion to God. They were filled with the knowledge of salvation, and expressed it to admiration. They were entirely reformed as to the manner of their living. They became temperate, and abstained from drinking to excess, which it had before been found utterly impossible to effect by any other means. They held religious meetings, and numbers of them formed into church state, and had the sacraments administered to them."

Western view of Plainfield.

The above is a representation of the Congregational church, Plainfield Academy, and some of the adjacent buildings, as seen from the burying ground, about half a mile westward from the church. Plainfield Academy (seen eastward from the church in the engraving) is one of the most respectable institutions of the kind in the state. It was incorporated in 1783. The higher branches of education are taught, and there are generally 3 or 4 instructors attached to the institution. The Academy stands on a commanding eminence, from which there is a fine and extensive prospect in almost every direction. This place is 41 miles east from Hartford, 30 west from Providence, 15 from Norwich, and 8 from Brooklyn. It is said that the first settlers located themselves on the banks of a small stream, about 80 rods west of the Congregational church, and also on Black Hill,* situated between two and three miles to the northwest, near the Quinnebaug.

A remarkable instance of healing took place in this town in 1743, in the case of Mrs. *Mercy Wheeler*. The account was drawn up by the Rev. Benjamin Lord, A. M., evidently with a great deal of care and

* So called (it is said) from its black appearance at the first settlement of the town: the Indians were accustomed to burn it over every year, in order to make good pasturage for deer.

accuracy. The pamphlet contains the deposition of the physician (Dr. James Girauld) and a number of respectable people, given under oath, certifying to the fact of her immediate healing. At the time, it was considered as an evident interposition of divine providence. Mrs. Wheeler was favored with good health till her twentieth year, in 1726, when she was seized with a nervous fever, and was reduced to almost unexampled weakness of body, so that for about five years she could not turn her head on her pillow; her speech failed, and her sight was very much impaired. After this she recovered in some little degree, though for sixteen years she was not able to lift up a foot to take a step. The account states, "that her ankle bones were exceedingly loose and separate, by reason of the long and great relaxation of the nerves and tendons, that she could in no wise lift them up and use them, as persons are wont to do, that yet have no strength to walk without help: yea, so loose and separate were they, that a string must sometimes be used about her feet and ankles, to keep her feet in any proper position, as she lay in the bed. And also, her knee bones were so weak and loose, that after she was able to turn herself in bed, she sometimes put them out in doing this." Mrs. Wheeler being of a pious disposition of mind, a sermon, at her request, was occasionally preached at her father's house. It was on one of these occasions, (May 25th, 1743,) that she experienced her great deliverance. Mr. Lord was the minister who preached the sermon at the time she was healed. The account states:—

"And no sooner was he [Mr. Lord] gone from her, but it turned in her mind—*The Lecture is ended, and the service all over, and I am not healed; what is become of my faith now? Won't it be with me as it used to be?* Whereupon a cloud of great darkness came over her, for a minute or two: in which time she was led again into herself, to see what a poor unworthy creature she was, and had some such thoughts of the wisdom and goodness of God's will, that she felt a disposition to be as God would have her be. Then those words were repeated to her—*If thou wilt believe, thou shalt see the glory of God.* By which her darkness was carried off, and under the influence of this word *now*, she seemed (as she expressed it) to be wholly taken out of herself, into the hands of God, and enabled to believe that he could and would heal her. Immediately upon which, she felt a strange irresistible motion and shaking, which began first with her hands, and quickly spreading over her whole frame; in which time she felt a kind of weight upon her; a sort of racking of her frame; every joint, as it were working; and as if she was with hands squeezed together in her weak places. As this trembling went off, her pains went with it, and she felt strong, especially in the seat of life, where she had been most remarkably weak; and from thence strength diffused itself all over her animal frame, into her hips, knees, ankles, &c. She felt strong and well, as if she had no disease upon her, and was under no difficulty. And as she had this sensation of new strength and freedom, she felt as if she was a raising up, and must rise; and immediately *rose up* and *walked* away among the people, with evident sprightliness and vigor, to the astonishment of herself and those about her. She went this time near 16 feet, crying out, '*Bless the Lord Jesus, who has healed me!*' But was soon damped with this thought, that she was only in a phrenzy, and not healed; and the more so when Mr. Lord (surprised at seeing her walk thus, whom he had just before left impotent and overcome too, so that she could hardly talk) did observe to her that she was in a phrenzy, and accordingly took hold of her and led her to the bed, and bid her sit down; yea, even thrust her down. But she could not be confined there; feeling yet strong and at liberty, she quickly rose up again, with those words in her mind, *I have loved thee with everlasting love,* and with the high praises of God in her mouth. Her soul being filled with such admiration and love, as she declared was inexpressible. Now she walked several times across the room with strength and steadiness; which even constrained the people to think and say, verily, this is the power of God! And they wondered, and praised the same. And it was about six o'clock in the afternoon, when the thing was done, at which they all marvelled, and having united in a prayer,

and in praise, on this remarkable occasion, they were dismissed to their several homes, still wondering and rejoicing at what their eyes had beheld, and their ears had heard that day."

The following inscriptions are from monuments in the grave yard west of the Congregational church.

In memory of the Rev. Mr. Joseph Coit, V. D. M. first pastor of ye chh. of Christ in Plainfield, who continued in his office 44 years. Obit. July ye 1, 1750, Æ. 77 years.

The good man needs no eulogy, his memorial is in heaven. The Rev. *Joel Benedict*, D. D., born at Salem, state of New York, Jan. 1745, died at Plainfield, Feb. 13th, 1816. Religion that cheers the death scene, endears the sepulcher. Filial affection reared this monument, to indicate the spot where the dust of a Father reposes.

In memory of Capt. John Cady, of Plainfield. He was of an engaging aspect and deportment: his genius, naturally elevated, was cultivated by reading and intercourse with mankind. He had a happy facility in the dispatch of business; was exemplary in the discharge of every social duty, civil or domestic. A professor of the christian faith, a blessing to mankind. He rests not here; he was drowned returning from New York, Nov. 28th, 1783, in the 40th year of his age.

The glory of man is as the flower of the Field.

To the memory of John Earnest Miller. This stone is erected by the family of the late Anthony Bradford, Esq. He was a native of Germany, and belonged to the troops under Gen. Burgoyne, but chose their home for the rest of his days, and after a long course of kind and faithful services, died Feb. 14th, 1716, aged 80 years.

POMFRET.

POMFRET was first settled in 1686, and incorporated as a town in 1713. "In October, 1687, a grant of lands, commonly called the *Mashamoquet* purchase, was made by the General Assembly, to Major James Fitch, Lieutenant William Ruggles, Mr. John Gore, Mr. John Pierpont, Mr. John Chandler, Mr. Benjamin Sabin, Mr. Samuel Craft, Mr. John Grosvenor, Mr. Joseph Griffin, Mr. Samuel and John Ruggles, and Mr. Nathan Wilson. The most of these planters were from Roxbury in Massachusetts. Some of them moved on to the lands before the grant was made. At the session in May, 1713, the inhabitants were incorporated with town privileges. The name was changed from Mashamoquet to Pomfret.

Pomfret is bounded n. by Woodstock and Thompson, e. by the Quinnebaug, separating it from Killingly, s. by Brooklyn and Hampton, and w. by Ashford. Its length from east to west is about seven miles, and its breadth about five. It is divided into two societies or parishes, Pomfret and Abington. The surface of the township is uneven, and diversified by hills and vales. The lands, though somewhat stony, are rich and productive. The soil is deep, strong and fertile, and admirably adapted to grazing. Butter, cheese and pork are the staple productions of the town. There is an extensive cotton factory at Pomfretville, a little village on the Quinnebaug, at the northeastern corner of the town.

South view of the Friends' Meeting House, Pomfret.

The above is a south view of the Friends' meeting house, situated upwards of a mile south of the central part of the town, a little off the main, and on a cross road. It is encircled by forest trees, within the edge of which it is situated, and has an air of seclusion from the world; both the situation and form of the building are novel in their appearance. The two doors, in a kind of porch seen in front of the building, are the entrances into the meeting house, the men taking one, and the women the other. The house inside is partly divided by a partition, the men occupying one part of the house, and the women the other. There are four other houses of worship in the town, 2 Congregational, 1 Baptist, and 1 Episcopal. The most populous part of the township is in the vicinity of the Baptist church, which is 7 miles from Brooklyn, 40 from Hartford, 30 from Providence, 27 from Norwich, and 60 from Boston. There are 3 post offices in this town, one in the central part of the town, one in Abington, and one about 3 miles s. e. of the Congregational church in Pomfret, in a place called *Pomfret Landing*. This last place is said to have derived its name from the circumstance, that in ancient times a tavern used to be kept here, at which young men from Woodstock, Providence, and other places, used to stop, or *land*, and in some instances remain two or three days, carousing, &c.

The following is a representation of the entrance of the celebrated "Wolf Den," rendered so famous for the exploit of Gen. Putnam. It is in the society of Abington, about two miles southwest from the Congregational church. The following is from Gen. Humphreys' *Life of Putnam*.

"In the year 1739, he [Gen. Putnam,] removed from Salem to Pomfret, an inland fertile town in Connecticut, forty miles east of Hartford: having here purchased a considerable tract of land, he applied himself successfully to agriculture.

"The first years on a new farm, are not however exempt from disasters and disappointments, which can only be remedied by stubborn and patient industry. Our farm-

Putnam's Wolf Den, Pomfret.

er, sufficiently occupied in building an house and barn, felling woods, making fences, sowing grain, planting orchards and taking care of his stock, had to encounter, in turn, the calamities occasioned by a drought in summer, blast in harvest, loss of cattle in winter, and the desolation of his sheep-fold by wolves. In one night he had seventy fine sheep and goats killed, besides many lambs and kids wounded. This havoc was committed by a she wolf, which with her annual whelps, had for several years infested the vicinity. The young were commonly destroyed by the vigilance of the hunters, but the old one was too sagacious to come within reach of gun shot: upon being closely pursued she would generally fly to the western woods, and return the next winter with another litter of whelps.

"This wolf at length became such an intolerable nuisance, that Mr. Putnam entered into a combination with five of his neighbors to hunt alternately until they could destroy her. Two by rotation, were to be constantly in pursuit. It was known, that having lost the toes from one foot, by a steel trap, she made one track shorter than the other. By this vestige, the pursuers recognized in a light snow, the route of this pernicious animal. Having followed her to Connecticut river and found she had turned back in a direct course towards Pomfret, they immediately returned, and by ten o'clock the next morning, the blood-hounds had driven her into a den, about three miles distant from the house of Mr. Putnam. The people soon collected with dogs, guns, straw, fire and sulphur, to attack the common enemy. With this apparatus several unsuccessful efforts were made to force her from the den. The hounds came back badly wounded and refused to return. The smoke of blazing straw had no effect. Nor did the fumes of burnt brimstone, with which the cavern was filled, compel her to quit the retirement. Wearied with such fruitless attempts, (which had brought the time to ten o'clock at night,) Mr. Putnam tried once more to make his dog enter, but in vain; he proposed to his negro man to go down into the cavern and shoot the wolf: the negro declined the hazardous service. Then it was that the master, angry at the disappointment, and declaring that he was ashamed to have a coward in his family, resolved himself to destroy the ferocious beast, lest she should escape through some unknown fissure of the rock. His neighbors strongly remonstrated against the perilous enterprise: but he, knowing that wild animals were intimidated by fire, and having provided several strips of birch bark, the only combustible material which he could obtain, that would afford light in this deep and darksome cave, prepared for his descent. Having accordingly divested himself of his coat and waistcoat, and having a long rope fastened around his legs, by which he might be pulled back, at a concerted signal, he entered head foremost with the blazing torch in his hand.

"The aperture of the den, on the east side of a very high ledge of rocks, is about two feet square; from thence it proceeds obliquely fifteen feet, then running horizontally about ten more, it ascends gradually sixteen feet towards its termination. The sides of this subterraneous cavity are composed of smooth and solid rocks, which seem to have been divided from each other by some former earthquake. The top and bot-

tom are also of stone, and the entrance in winter, being covered with ice, is exceedingly slippery. It is in no place high enough for a man to raise himself upright, nor in any part more than three feet in width.

"Having groped his passage to the horizontal part of the den, the most terrifying darkness appeared in front of the dim circle of light afforded by his torch. It was silent as the house of death. None but monsters of the desert had ever before explored this solitary mansion of horror. He cautiously proceeding onward came to the ascent; which he slowly mounted on his hands and knees until he discovered the glaring eyeballs of the wolf, who was sitting at the extremity of the cavern. Started at the sight of fire, she gnashed her teeth, and gave a sudden growl. As soon as he had made the necessary discovery, he kicked the rope as a signal for pulling him out. The people at the mouth of the den, who had listened with painful anxiety, hearing the growl of the wolf, and supposing their friend to be in the most imminent danger, drew him forth with such celerity that his shirt was stripped over his head and his skin severely lacerated. After he had adjusted his clothes, and loaded his gun with nine buck-shot, holding a torch in one hand and the musket in the other, he descended the second time. When he drew nearer than before, the wolf assuming a still more fierce and terrible appearance, howling, rolling her eyes, snapping her teeth, and dropping her head between her legs, was evidently in the attitude and on the point of springing at him. At this critical instant he leveled and fired at her head. Stunned by the shock, and suffocated with the smoke, he immediately found himself drawn out of the cave. But having refreshed himself, and permitted the smoke to dissipate, he went down the third time. Once more he came within sight of the wolf, who appearing very passive, he applied the torch to her nose, and perceiving her dead, he took hold of her ears, and then kicking the rope, (still tied round his legs,) the people above, with no small exultation, dragged them both out together."

STERLING.

STERLING, formerly a part of Voluntown, was incorporated as a town in 1794. The town is of an oblong shape, 8 miles in length from north to south, and has an average breadth of three. It is bounded n. by Killingly, e. by the Rhode Island line, s. by Voluntown, and w. by Plainfield. The face of the township is generally uneven, but there are some sections of pine plains. The soil is a light gravelly and sandy loam. The land is best adapted to a grain culture. The town is watered by two branches of the Moosup river, on which are four cotton factories. There is one house of worship in Sterling, which is for the Baptist denomination, and is situated in the eastern part of the town. This house is upwards of 3 miles east of Plainfield, and about 10 s. e. from Brooklyn.

"Near the center of this town, there is a cavern, called the Devil's Den, possessing very singular and curious features. It is situated within a ledge of rocks, and has a circular area of about 100 feet in diameter. The rock is cleft in two places, forming at each a chasm or fissure about fifty feet in depth, through one of which there runs a small stream of water; the other communicates with a room about 12 feet square, at the interior part of which there is a fire place, and a chimney extending through the rock above, forming an aperture of about 3 feet square. In another part of the rock there is a natural stair-case, winding around it from the bottom to the top. In the cold season of the year, a large mass of ice is formed in the room above described, by the dashing of water down the chimney, which continues there through nearly the whole of the warm months; the sun being almost excluded from this subterranean recess."*

* Pease and Niles' Gazetteer.

THOMPSON.

THOMPSON was formerly a part of Killingly, and was settled about 1715. It was incorporated as a distinct town in 1785. It is said to have derived its name from the circumstance of a considerable part of the township being owned by a Mr. *Thompson*, of England. A part of the land was held in his name till about the year 1800. "It is difficult to ascertain who were the first settlers of the town. It was mostly covered by royal patents to Thompson, Saltonstall, Wolcotts, Humphry Davy, and others. The first old parchment deed is now in the museum* in Thompson, dated April 10th, 1716, and is from Josiah Wolcott, and Mary his wife, of Salem, Mass. to John Sabin, and is for 400 or 500 acres in the center of the town, and bounded on the above old royal grants." The eastern part of the town was formerly called *Quaduc* or *Quanduck*. Thompson forms the northeastern corner of the county and state: it is bounded n. by Massachusetts, e. by Rhode Island, s. by Killingly, and w. by Woodstock and Pomfret. The township is nearly eight miles square, and comprises an area of 59 square miles. The Quinnebaug passes through the eastern part of the town; in its course it receives the French river. Thompson is a rich agricultural and manufacturing town, and the inhabitants are distinguished for their spirit of enterprise. The surface of the township exhibits an interesting variety of hills and valleys; many of the hills are quite elevated, but no portion of it can be called mountainous. The prevailing soil is a gravelly loam, strong and dry, well adapted to the culture of Indian corn, wheat and clover, and generally excellent for grazing. There is a great supply of valuable stone for walls and buildings. There are 4 houses of worship in the town, 2 for Baptists, 1 Congregational, and 1 Methodist.

The following is a southern view of the Congregational church and other buildings in the vicinity, in the central part of the town. The village, which is situated on a commanding eminence, consists of about 30 well built dwelling houses, 4 mercantile stores, 1 bank, (the Thompson bank,) and a printing office. At the time the following drawing was taken, a new Baptist church was erecting. It is situated a few rods north of the Congregational church. This place is 14 miles from Brooklyn, 34 from Norwich, 47 from Hartford, 27 from Providence and 53 from Boston. There are in the town 6 or 7 cotton factories, which do an extensive business. There are also two or three woolen factories.

Masonville, on French river, is perhaps the largest manufacturing village in the town, and is about a mile and a half from the center. The factory at this place was formerly called the "Swamp Factory," from its being situated in a marshy spot. *Fishersville* is about a mile north, on the same stream. The village of *New Boston* is situated in the northwest corner of the town, about six miles from the center; the village is built on both sides of the Quinnebaug.

* The museum of Mr. Davis, contains the largest and best collection in Geology of any in the county.

South view of Thompson, (central part.)

Thompson was a favorite residence of the Nipmuck Indians. *Quinnatisset*, one of their chiefs, had a splendid wigwam near where the present Congregational church now stands; their strong hold, however, was on Fort hill, about three fourths of a mile easterly; the foundations of their fortress can now be traced. The adjoining forests, now covered with ancient trees, still display their corn fields, in rows and hills, as regular as the best farmer would now have them. The neighboring streams and ponds afforded them great supplies of fish. The *Chargogagoggmanchogaggogg* Pond, situated partly in this town, and partly in Webster, Mass. is said to be sixty miles in circumference, if followed in all its indentations. It is studded with beautiful islands, and was considered the paradise of the Nipmucks and their women. There fish and game were in abundance, and there, they believed, were the enchanted islands and Elysian Fields, the abode of departed souls, and the residence of the Great Spirit.

Thompson was made a society, for ecclesiastical purposes, by the General Assembly, in their session in May, 1728. It was called Thompson parish, being then a part of the town of Killingly. The first sermon ever preached in the place was by a Mr. Wales, on the first Sunday in August of that year. On Feb. 25th, 1730, a church consisting of 27 members was organized, and on the same day the Rev. Marston Cabot, from Salem, Mass. was ordained their first minister. The attending clergy on this occasion were Mr. Coit from Plainfield, Mr. Throope of Woodstock, Mr. Fisk of Killingly, Mr. Hale of Ashford, and Mr. Williams of Pomfret. "Mr. Cabot was a man of great piety, and of most amiable and engaging manners, and a descendant of the famous Sebastian Cabot. He died in the midst of his labors, in his pulpit, from a fit, in 1755."

The next minister was the Rev. Noadiah Russell, from Middletown, who was ordained Nov. 19th, 1757. The clergymen present were

Mr. Putnam of Pomfret, Mr. Russell's father from Middletown, his brother from Windsor, and Mr. Gleason from Dudley. Mr. Russell also died in a fit of apoplexy, at Mendon, on a journey for his health, in October, 1795. The Rev. Daniel Dow, the present minister, succeeded Mr. Russell, and was ordained in April, 1796; making but three ministers in 107 years.

VOLUNTOWN.

VOLUNTOWN was incorporated in 1719. The greater part of the tract now comprising the town, was granted in 1696 to the *volunteers* in the Narragansett war, from which circumstance the town derives its name. "From the first settlement of the colony," says Dr. Trumbull, "it had been customary to make grants of lands to officers, soldiers and others, who had been especially serviceable to the colony. Grants had been made to Major Mason, to his officers and soldiers in the Pequot war. This encouraged the volunteers, who had performed such signal feats in the Narragansett war, to make application to the Assembly for the grant of a new township, as an acknowledgment of their services."

Voluntown is bounded n. by Sterling and Plainfield, e. by Rhode Island, s. by North Stonington, and w. by Griswold. It is about 9 miles in length, and averages more than 4 in breadth. The surface is generally diversified by hills and valleys, but there are some sections of pine plains which are level. The prevailing character of the soil is that of a light, sandy and gravelly loam. There are 2 houses of worship in the town, 1 Congregational and 1 Baptist. A Congregational church stands on the dividing line between this town and Sterling, and is called the "*Line Meeting House.*" In the western part of the town, there are 1 woolen and 2 cotton factories. The central part of the town is about 14 miles from Norwich.

WINDHAM.

In February, 1675, Joshua, son of Uncas, the Mohegan sachem, by his last will, gave unto Capt. John Mason, James Fitch, and fourteen others, commonly called Joshua's legatees, the tract containing the town of Windham, which originally included the present towns of Mansfield and Canterbury. In May, 1686, the main street in Windham was laid out, and fourteen lots for the legatees were surveyed. Other roads were made, lots surveyed, and purchases made for settlement in the two following years. "Lieut. *John Cates*,* a pious puri-

* His monument is still remaining in the burying ground south of the village: the following is a copy of the inscription, viz. "In memory of Mr. John Cates. He was a gentleman born in England, and the first settler in the Town of Windham. By his last Will and Testament, he gave a generous Legacy to ye first church of Christ

tan, who served in the wars in England, holding his commission under Cromwell, when Charles II. came to the throne, fled to this country for safety. He landed first in Virginia, where he procured a negro servant to attend him. But when advertisements and pursuers were spread through this country, to apprehend the adherents of the Protector, he left Virginia, came to New York, and from thence to Norwich. Still feeling that he should be securer in a more retired place, he came to the new plantation, dug the first cellar, and with his servant, raised in Windham the first English habitation, in the spring of 1689. The settlers, rapidly increasing, petitioned the General Court, and obtained a grant of town privileges in May, 1692."† It was made a county town in May, 1726; the grand list in 1768 was about £30,000, and the number of inhabitants 3,500.

Eastern view of Windham.

The present town of Windham is bounded north by the towns of Hampton, Chaplin and Mansfield, east by Canterbury, south by Franklin and Lisbon, and west by Lebanon and Columbia. The township has a mean length from east to west of about eight miles, with a medium breadth of nearly six miles. The surface of the town is generally hilly, particularly the eastern part, comprising the parish of Scotland. The soil in the western part, bordering on the Shetucket, is rather light and dry; there is, however, a considerable tract of fertile land in this section of the town.

The above is a view of the central part of the ancient village of Windham. The houses are more clustered together than in most New England villages which were built at the same period, and it has been

in Windham, in plate, and a generous Legacy in Land for ye support of ye Poor, and another Legacy for ye support of ye School in said Town for ever. He died in Windham, July ye 16th, A. D. 1697." JOSIAH MANNING.

† Mr. Waterman's Century Sermon.

remarked by travelers, that Windham, in its general appearance, very much resembles an English village. The Congregational church is seen nearly in the center of the engraving. Dr. Dwight, in the third volume of his travels, in noticing this building, pleasantly remarks, "that the spot where it is posited, bears not a little resemblance to a pound; and it appears as if those who pitched upon it, intended to shut the church out of the town, and the inhabitants out of the church." Windham village is 30 miles east of Hartford, 14 from Norwich city, and 44 west of Providence. Since the removal of the seat of justice for the county to Brooklyn, and the establishment of the flourishing village of Willimantic, on the western border of the town, the ancient village of Windham has somewhat declined. It is said that there were more buildings in Windham village previous to the Revolution, than there has been at any time since. There are now in the place six mercantile stores, and about 60 dwelling houses. There are two houses of worship, one Congregational and one Episcopal. There is one bank in the town.

It is said there was originally a handsome square laid out in the center of the village. While some of the principal men were absent, and at a time when party spirit was prevailing, a vote of the town was obtained for selling off the principal part of the square for building lots, and it was accordingly used for that purpose. This is stated to be the cause of the singular situation of the church, and the clustered appearance of the village.

The Rev. Samuel Whiting was the first minister in Windham; he was born in 1670, and was the son of the Rev. John Whiting, minister of Hartford. He received his early education from his father, and afterwards finished his education for the ministry under the direction of the Rev. James Fitch of Norwich, there being no college in Connecticut at that time. At the first town meeting in Windham, June 11th, 1692, it was voted to apply to Mr. Whiting to carry on the work of the ministry. Previous to this, those whose circumstances would admit, used to attend meeting at Norwich, the distance of twelve miles, in a rough and unsubdued road. "Tradition says, and from the records it appears it may say correctly, that the first sermon Mr. Whiting preached at Windham, was on the first day of the week, and the first day of the year, from the first chapter of the Bible, and from the first verse." In May, 1693, as an inducement to tarry with them four years, they offered him £50 a year, an allotment through all the division lots, and to build him a house two stories high and 18 feet square. The land was laid out to him, and for the first year, instead of a house, they added £10 to his salary. In 1696, they built him a house; in 1697, they gave him a call to ordination. In 1699, it was repeated, and 80 loads of wood added to his salary. In December, 1700, he was ordained, and the first church was gathered. His salary was afterwards raised to £100, and his wood. In 1725, being on a visit to his friends, he was suddenly seized with the pleurisy, and died at the house of the Rev. Mr. Collins, of Enfield. He was the father of 13 children, 8 sons and 5 daughters.

The Rev. Thomas Clap, afterwards president of Yale College, was the second minister in Windham. He was ordained in 1726, and preached in the place till 1740. Mr. Clap received £300 settlement, £100 annual salary, and £10 yearly for his wood. The Rev. Stephen White was their next pastor, and was ordained in 1740. He continued in the ministry 53 years, till his death, January 9th, 1693. Mr. White, in his half century sermon, preached January 1st, 1790, says,—“When I came to this town, there were some of the first settlers living. They are now dead, and almost all the next generation. In those days there were scarce any that were not professors of religion, and but few infants not baptized. *No families that were prayerless.* Profane swearing was little known; and open violations of the Sabbath not practiced as is common now, and there were no Deists among us. The people, as a body, were fearers of the Lord, and observers of the Sabbath and its duties. But the present day is peculiar for men’s throwing off the fear of the Lord. Declensions in religion have been increasing for about 30 years past. Such as profaneness, disregard of the Sabbath, neglect of family religion, unrighteousness and intemperance, the imbibing of modern errors and heresies, and the crying prevalence of infidelity against the clearest light.

Southwest view of Willimantic, Windham.

The borough of Willimantic is a flourishing village, 26 miles east from Hartford, 3 west from Windham, 44 from Providence, 16 from Norwich city, and 16 from Brooklyn. It contains at this time nearly 2,000 inhabitants. The village is built principally on one street, on the northern side of the Willimantic, and extends from west to east nearly a mile, and contains three houses of worship, 1 Congregational, 1 Methodist, and 1 Baptist.

The engraving shows the appearance of the western part of the village, as it is entered upon the Hartford road. The buildings seen on the left are those of the Windham Co. cotton factory.

There are 6 cotton factories, in all of which upwards of 13,000 spindles are run. There is also a satinet factory and a paper mill.

This village has been built in the course of 12 years past. There was a kind of "State Armory" erected during the Revolutionary war, at the southern extremity of the village, for the purpose of manufacturing fire arms for the state.

Southwestern view of Frog Pond, Windham.

Much pleasantry has been indulged at the expense of the inhabitants of Windham, on account of a singular occurrence which happened in the year 1758, by which the inhabitants were very much frightened. The following is from a sheet recently printed in the county, entitled "Lawyers and Bull-frogs," and will show the cause of the fright. There is probably considerable exaggeration in the *introduction*, as well as in the song, though the foundation of the story is believed to be a matter of fact. It is inserted as an amusing relic of the times.

"On a dark cloudy dismal night in the month of July, A. D. 1758, the inhabitants of Windham, a small town in the eastern part of Connecticut, had retired to rest, and for several hours, all were wrapped in profound repose—when suddenly, soon after midnight, the slumbers of the peaceful inhabitants were disturbed by a most terrific noise in the sky right over their heads, which to many, seemed the yells and screeches of infuriated Indians, and others had no other way of accounting for the awful sounds, which still kept increasing, but by supposing the day of judgment had certainly come, and to their terrified imaginations, the awful uproar in the air seemed the immediate precursor of the clangor of the last trumpet. At intervals, many supposed they could distinguish the calling out of the particular names, as of Cols. DYER and ELDERKIN, two eminent lawyers, and this increased the general terror.....But soon there was a rush from every house, the tumult in the air still increasing—old and young, male and female, poured forth into the streets, "*in puris naturalibus*," entirely forgetful, in their hurry and consternation, of their nether habiliments, and with eyes upturned tried to pierce the almost palpable darkness. My venerable informant, who well recollects the event, says that some daring "*spirits*," concluding there was nothing supernatural in the hubbub and uproar over head, but rather, that they heard the yells of Indians commencing a midnight attack, loaded their guns and sallied forth to meet the invading foes. These valiant heroes, on ascending the hill that bounds the village on the east, perceived that the sounds came from that quarter, and not from the skies, as first believed, but their courage would not permit them to proceed to

the daring extremity of advancing eastward, until they had discovered the real cause of alarm and distress, which pervaded the whole village. Towards morning the sounds in the air seemed to die away.....In the morning, the whole cause of alarm, which produced such distressing apprehensions among the good people of the town, was apparent to all who took the trouble to go to a certain mill pond, situated about three fourths of a mile eastward of the village. This pond, hereafter, in the *annals of Fame*, forever to be called the *Frog Pond*, in consequence of a severe drought, which had prevailed many weeks, had become nearly dry, and the Bull Frogs (with which it was densely *populated*) at the mill fought a pitched battle on the sides of the ditch which ran through it, for the possession and enjoyment of the fluid which remained. Long and obstinately was the contest maintained; and many thousands of the combatants were found defunct, on both sides of the ditch, the next morning. It had been uncommonly still, for several hours before the battle commenced, but suddenly, as if by a preconcerted agreement, every frog on one side of the ditch, raised the war cry, *Col. Dyer, Col. Dyer*, and at the same instant, from the opposite side, resounded the adverse shout of *Elderkin too, Elderkin too*. Owing to some peculiar state of the atmosphere, the awful noises and cries appeared to the distressed Windhamites to be directly over their heads.....

Good people all, both great and small,
Of every occupation,
I pray draw near, and lend an ear
To this our true relation.

'Twas of a fright, happen'd one night,
Caused by the bull-frog nation,
As strange an one as ever was known,
In all our generation.

The frogs we hear, in bull-frog shire,
Their chorister had buried,
The saddest loss, and greatest cross,
That ever they endured.

Thus being deprived, they soon contrived
Their friends to send to, greeting,
Even to all, both great and small,
To hold a general meeting.

Subject and lord, with one accord,
Now came with bowels yearning,
For to supply and qualify,
And fit a frog for learning.

For to supply, immediately,
The place of their deceased,
There did they find one to their mind,
Which soon their sorrows eased.

This being done, the glorious sun
Being down and night advancing,
With great delight, they spent the night,
In music and in dancing.

And when they sung, the air it rung,
And when they broke in laughter,
It did surprise both learned and wise,
As you shall find hereafter.

A negro man, we understand,
Awoke and heard the shouting,
He ne'er went abroad, but awak'd his lord,
Which fill'd their hearts with doubting.

With one accord, they went abroad,
And stood awhile to wonder;
The bull-frog shout appeared no doubt,
To them like claps of thunder.

Which made them say, the judgment day,
Without a doubt was coming,
For in the air, they did declare,
Was very awful drumming.

Those lawyer's fees would give no ease,
Tho' well they're worth inditing;
To pray they kneel—alas, they feel
The worm of conscience biting.

Being thus dismayed, one of them said,
He would make restitution,
He would restore one half or more,
This was his resolution.

Another's heart was touch'd in part,
But not prick'd to the center;
Rather than pay one half away,
His soul he said he'd venture.

Then they agreed to go with speed,
And see what was the matter,
And as they say, they by the way
Repenting tears did scatter.

They traveled still, unto the hill,
With those men they did rally,
And soon they found the doleful sound
To come out of the valley.

Then down they went, with one consent,
And found those frogs a singing,
Raising their voice, for to rejoice,
This was the doleful ringing.

Home those great men, returned then,
Filled with wrath and malice,
And mustered all, both great and small,
From prison and from palace.

And armed with fury, both Judge and Jury,
To the Frog Pond moved,
And as they say, a fatal day,
To the frogs it proved.

This terrible night, the Parson did fright
His people almost in despair,
For poor Windham souls, among the bean poles,
He made a most wonderful prayer.

Lawyer Lucifer called up his crew,
Dyer and Elderkin, you must come too;
Old Col. Dyer, you know well enough,
He had an old negro, his name was Cuff.

Now massa, says Cuff; I'm now glad enough,
For what little comfort I have;
I make it no doubt, my time is just out,
No longer shall I be a slave.

As for Larabie, so quietly was he,
He durst not stir out of his house,
The poor guilty soul crept into his hole,
And there lay as still as a mouse.

As for Jemmy Flint, he began to repent,
For a Bible he ne'er had known,
His life was so bad, he'd give half he had,
To old father Stoughton for one.

Those armed men, they killed then,
And scalp'd about two hundred,
Taking I say their lives away,
And then their camp they plundered.

Those lusty frogs, they fought like dogs,
For which I do commend them,
But lost the day, for want, I say,
Of weapons to defend them.

I had this story set before me,
Just as I have writ it,
It being so new, so strange and true,
I could not well omit it.

Lawyers, I say, now from this day,
Be honest in your dealing,
And never more increase your store,
While you the poor are killing.

For if you do ill, I'll have you know,
Conscience again will smite you,
The bull frog shout will ne'er give out,
But rise again and fight you.

Now Lawyers, Parson, Bull Frogs all,
I bid you all farewell,
And unto you I loudly call,
A better tale to tell.

WOODSTOCK.

IN 1686, many of the inhabitants of Roxbury, in Massachusetts, received from the government of that colony, a grant of a tract of land in the southern part of the colony, for a settlement, which was named Woodstock.* This town was bounded by Woodward and Saffery's line, and was afterwards found to be within the limits of Connecticut. It was first called New Roxbury.

In 1713, the line between Connecticut and Massachusetts was surveyed, and upon certain conditions, it was agreed by Connecticut, that the towns settled by Massachusetts should remain under its jurisdiction. This compromise produced general uneasiness and dissatisfaction with the inhabitants at the time, which instead of subsiding, as was expected, continued to increase, so that in May, 1747, they presented a memorial to the General Assembly of Connecticut, praying to be annexed to, or taken under the jurisdiction thereof, whereby they might be restored to the chartered privileges granted to them, in common with the other citizens of this state. The General Assembly, after having appointed commissioners to attempt to settle this dispute, with others that might be appointed by Massachusetts, without effect, adopted a resolution, that as the agreement of 1713 had never received the royal confirmation, it was not binding; and that all the inhabitants who lived south of Massachusetts, as defined by the charter, were entitled to the privileges and ought to be subject to the jurisdiction of the government of this state.

In 1752, an act was passed, securing to the several religious societies of the aforesaid towns, all the rights and privileges of religious societies according to the laws of this colony. These proceedings on the part of Connecticut, produced a remonstrance to his majesty. This was opposed by the agent of Connecticut, then in England, and the claims of the latter supported, which were finally recognized, and the boundary established accordingly in 1755.

Woodstock is bounded n. by the Massachusetts line, e. by Thompson, w. by Union and Ashford, and s. by Pomfret and Ashford. It is 8 miles long, and upwards of 7 in breadth. The surface of the town is characteristically hilly, but not mountainous or broken, and comprises very little waste land, most or all of the eminences being capable of cul-

* Holmes' Annals, Vol. 1. Dr. Holmes states: "In Judge Sewall's MS. Diary I find this entry.—'1690, March 18, I gave New Roxbury the name of Woodstock, because of its nearness to Oxford, for the sake of Queen Elizabeth, and the notable meetings that have been held at the place bearing the name in England.'"

tivation. The prevailing soil is a deep gravelly loam, which is strong and fertile. It is best adapted to grazing, but generally admits of tillage; and considerable quantities of grain are annually raised, consisting principally of rye and corn, and it may be considered one of the richest agricultural towns in this part of the state. There are 4 woolen and 4 cotton factories in the limits of the town. There are also about 900 persons engaged in the shoe making business, principally in the western part of the town. The town is divided into three parts, viz. the old society of Woodstock, West Woodstock or New Roxbury, and Muddy Brook society or North Woodstock. There are six houses of worship in the town, 4 Congregational, 1 Baptist, and 1 Methodist.

South view of the Congregational Church, Woodstock.

The above is a south view of the Congregational church in the old society of Woodstock; the Academy is seen in the distance, in the central part of the engraving. This spot is elevated ground, rising considerably above the valley of the Quinnebaug. The villages of Thompson, North Killingly, and Dudley in Massachusetts, on corresponding elevations, are in fair view; this place is 41 miles from Hartford, 32 from Norwich, 32 from Providence, 12 from Brooklyn, and 6 from Thompson. The village of Muddy Brook, or North Woodstock, is about three miles distant, situated in a beautiful valley, through which Muddy Brook, a fine mill stream, passes. The village is in two parts, in each of which is a Congregational church, upwards of one mile distant from each other. The houses in this village are more clustered than in any other part of the town, and viewed from the surrounding hills present an uncommonly beautiful appearance. The west part is called "Village corner."

"Gen. William Eaton was a native of this town, and was born February 23d, 1764. At a very early period he disclosed strong indications of intellectual vigor, and of mental eccentricity. At the age of

about 16 years, without the knowledge or consent of his parents, he went from home, and enlisted into the army. This was in 1780, near the close of the Revolutionary war; and young Eaton continued in the army until the close of the war, a considerable part of the time in the humble station of a private soldier; but he attained the rank of a sergeant. After the peace, in 1784, he commenced the study of the Latin language, and the year after, was admitted a member of Dartmouth College, where he graduated in 1790, the period of his collegiate life having been protracted, from the circumstance of his having devoted a portion of his time to school keeping, which his want of pecuniary resources rendered necessary.

“In October, 1791, he was chosen clerk of the House of Delegates of Vermont, residing at that time in the town of Windsor, where he had been engaged in school keeping. In March, 1792, he was appointed a captain in the army of the United States; and whilst in this situation, he performed various services upon the western and southern frontiers. He continued in the army until 1797, when he was appointed consul to Tunis. He continued in this difficult (and it may be added, perilous) situation until 1803, during which period, he discharged the consular functions with great firmness and ability. In 1804, Gen. Eaton returned to America and visited Washington, where he disclosed the famous enterprise which he had planned to restore the ex-bashaw of Tripoli, and having obtained the sanction of government, he embarked in July of the same year, in the *Argus* sloop of war, with the intention of engaging in this bold and hazardous undertaking, and arrived at Alexandria in Egypt, on the 25th of November following. From Alexandria he proceeded to Cairo, where he found the ex-bashaw, who approved of the enterprise, and after having made suitable arrangements, and recruited about 500 men, (100 of which only were Christians,) it was determined by Eaton and the ex-bashaw to cross the desert and seize the province and city of Derne. After a difficult and fatiguing journey, through a dreary desert, presenting innumerable obstacles, they arrived within the province of Derne, and soon attacked and captured the city, having the assistance of the *Hornet* sloop of war. The boldness and desperate bravery of Gen. Eaton and his little party, alarmed the reigning bashaw and his barbarian subjects, who almost thought they were something more than human beings; but the progress of Gen. Eaton was arrested by a peace which the American consul concluded with the bashaw. After this, Gen. Eaton returned to his native country, and was every where received with the most distinguished applause, the grateful tribute of patriotic and heroic achievements. After some time he fixed his residence in Brimfield, Massachusetts, where he continued until his death in 1811. Whilst here he was elected a representative of the town, in the legislature of the state.

“Gen. Eaton was a very extraordinary character; he possessed much original genius, was bold in his conceptions, ardent in his passions, determined in his resolutions, and indefatigably persevering in his conduct. He possessed considerable literary acquirements, and the style of his writings was characteristic of his mind; bold, energetic and decisive. His courage was equalled only by his resolution, and the boldness of his enterprises, by his ability and perseverance to execute them.”*

The following inscription is from a monument in the yard on the north side of the church represented in the engraving.

Memento Mori.

Here lies the body of the Reverend Mr. AMOS THROOPE, late pastor of the church in Woodstock, who died Septemr. the 7th, Anno 1735, in the 34th year of his age and the 9th of his pastorate.

O cruel Death to snatch from us below,
 One fit to live within the spheres on high,
 But since the great Creator orders so,
 Hear at his feet he doth submissive lie.

* Pease and Niles's Gazetteer.

LITCHFIELD COUNTY.

LITCHFIELD COUNTY was incorporated as such in 1751, and a considerable part of it was more recently settled than any other part of the state. It is bounded n. by Berkshire county in Massachusetts, e. by Hartford and New Haven counties, s. by the counties of New Haven and Fairfield, and w. by the state of New York. It has an average length from north to south of about 33 miles, and a breadth of about 27 miles, comprising about 885 square miles, being the largest county in the state. The principal part of the county is elevated and mountainous. The prevailing soil is a gravelly loam, generally deep, and in many sections strong and fertile, and admirably adapted to grazing. The agricultural interests of the county are very respectable. The staple productions consist of cheese, butter, pork and beef. Considerable attention is also paid to the raising of neat cattle and sheep. The manufacture of iron is carried on more extensively in this county than in any other section of the state.

The following is a list of the towns in the county, with their population in 1830.

Litchfield, - - 4,456	Kent, - - 2,001	Sharon, - - 2,615
Barkhamsted, - 1,715	New Hartford, 1,766	Torrington, - 1,651
Bethlem, - - 906	New Milford, - 3,979	Warren, - - 986
Canaan, - - 2,301	Norfolk, - - 1,485	Washington, - 1,621
Colebrook - - 1,332	Plymouth, - 2,064	Watertown, - 1,500
Cornwall, - - 1,714	Roxbury, - 1,122	Winchester - 1,766
Goshen, - - 1,734	Salisbury, - 2,580	Woodbury, - 2,045
Harwinton, - 1,516		

Population of the county in 1820, 41,267; in 1830, 42,855.

LITCHFIELD.

THE tract of land now comprised in the township of Litchfield, was called by the native Indians *Bantam*. In 1718, it was purchased of the colony of Connecticut by a company, who divided their purchase, (which was intended to cover ten miles square,) into sixty shares, under the name of "proprietors' rights," which were valued at £5 per right. The proprietors who made the purchase and first settlement, were principally from Hartford, Windsor and Lebanon. In 1720 and 1721, several families began to settle on the tract. "Nothing appears on record to show that the proprietors purchased any of the lands in this town of the Indians: the title having been previously extinguished by the colony. The lands in this town afforded better hunting ground for the Indians, than extensive intervals. Many of the hills were nearly cleared

of trees by fires, kindled for the purpose of hunting. To this remark, however, many valuable tracts, containing excellent pine and other forest trees, were an important exception."

In 1724, Bantam was incorporated as a town by the name of Litchfield. "By the act of incorporation, the grant was made to John Marsh of Hartford, to John Buel of Lebanon, and their associates; amounting to fifty seven. The first founders built log houses. The settlement proceeded as fast as could be reasonably expected, considering the circumstances of the times. During the wars between England and France, the Canadians and Indians often harassed our borders; and Litchfield, being a frontier town, was exposed to their ravages. Between the year 1720 and 1730, five houses were surrounded with palisadoes. One of these stood on the ground near the present court house; another about half a mile south; one east, and one west of the center; and one in South Farms. Soldiers were then stationed here to guard the inhabitants, both while they were at work in the field, and while they were attending public worship on the Sabbath.

"In May, 1722, Capt. Jacob Griswold, being at work alone in the field, about one mile west of the present court house, two Indians suddenly rushed upon him from the woods, took him and pinioned his arms, and carried him off. They traveled in a northerly direction, and the same day arrived in some part of the township called Canaan, then a wilderness. The Indians kindled a fire, and after binding their prisoner hand and foot, lay down to sleep. Griswold fortunately disengaging his hands and feet, while his arms were yet pinioned, seized their guns, and made his escape into the woods. After traveling a small distance, he sat down and waited till the dawn of day; and, although his arms were still pinioned, he carried both the guns. The savages awoke in the morning, and finding their prisoner gone, they immediately pursued him; they soon overtook him, and kept in sight of him the greater part of the day, while he was making his way homeward. When they came near, he turned and pointed one of his pieces at them; they then fell back. In this manner he traveled till near sunset, when he reached an eminence in an open field, about one mile northwest of the present court house. He then discharged one of his guns, which immediately summoned the people to his assistance. The Indians fled, and Griswold safely returned to his family."

"The capture of Griswold made the inhabitants more cautious for a while, but their fears soon subsided. In the month of August following, Mr. Joseph Harris, a respectable inhabitant, was at work in the woods alone, not far from the place where Griswold was taken; and being attacked by a party of Indians, attempted to make his escape. The Indians pursued him, and finding they could not overtake him, they shot him dead and scalped him. As Harris did not return, the inhabitants were alarmed, and some search was made for him; but the darkness of the night checked their exertions. The next morning they found his body, and gave it a decent burial. Harris was killed near the north end of the plain, where the road turns towards Milton, a lit-

the east of the school house now standing ; and for a long time after, this plain was called Harris' plain."*

The first white male person born in this town, was Gershom Gibbs, in the month of July, 1721. The first minister in the place was the Rev. Timothy Collins, a native of Guilford, who graduated at Yale College in 1718. Mr. Collins accepted the call of the inhabitants to be their minister, in December, 1721, and was ordained in June, 1723 ; the following salary was voted, viz. £57 for the first four years ; for the fifth year £60 ; for the next year, £70 ; and for the seventh year, and so long as he should continue with them in the work of the ministry, £80. His fire wood was voted him in addition to his salary. Mr. Collins continued in the ministry till 1752, when he was dismissed at his own request. In the following year he was appointed a justice of the peace. He also practiced physic. He died in Litchfield, in 1776.

In April, 1723, the inhabitants voted to build their first church, which was finished within three years. Its dimensions were 45 feet in length, and 35 in breadth ; it was built in a plain manner, without a steeple. It stood within a few feet of the present Congregational church. At the raising of this building all the adult males in the town were present, and sat on the sills at once. The second house of worship was finished in 1762 ; this also has been taken down, and a new building has been recently erected. The first Episcopal society was formed in this town about the year 1746, but they had only occasional preaching till the year 1754. At this time Mr. Solomon Palmer, who had just been dismissed from the church in Cornwall, took the charge of the Episcopal congregation in this town, and that of New Milford at the same time, and preached to them alternately. Mr. Palmer continued here until 1763, when he removed to the Episcopal congregation in New Haven. In 1766, he resumed his charge in Litchfield, and continued it till his death, in 1770.†

Litchfield, the seat of justice for the county, is situated in north latitude 41° 50', being 30 miles west from Hartford, 36 northwest from New Haven, and 100 from New York ; bounded north by Goshen and Torrington, west by Washington and Warren, east by Naugatuc river, separating it from Harwinton, and south by Watertown, Bethlem and Plymouth. It is about 9 miles in length from east to west, and its breadth is nearly 8 miles. It is an elevated township, and its surface presents a diversity of hills and valleys. The hills are generally of considerable elevation, and their prevailing course is from north to south. In the western part of the town there are some mountainous tracts, which comprise several considerable eminences, of which Mount Tom is the most elevated. Great Pond, situated to the south-

* The following inscription is on his monument in the west burying ground.—“ In memory of Joseph Harris, who was murdered by the Indians in the year 1721. While ploughing in his field, about three fourths of a mile northwest of the grave yard, he was shot by the Indians concealed in ambush. He was found dead, sitting on the ground, his head and body reclining against the trunk of a tree. To record the first death among the original settlers, and to perpetuate the memory of a worthy but unfortunate citizen, this monument is erected, 1830, by the voluntary benefaction of individual subscribers.”

† Morris' Statistical Account of Litchfield.

west of Litchfield village, is a beautiful sheet of water, comprising an area of about 900 acres, and is the largest pond or lake in the state. Litchfield abounds in good springs of water, and from its elevated situation, the air is generally pure and salubrious, and the town has the reputation of being remarkably healthy. The soil is generally strong and fertile, and, for an elevated tract, is warm and favorable for vegetation.* Litchfield is divided into four societies, *Litchfield* proper, *South Farms*, *Northfield*, and *Milton*. *Litchfield village* was incorporated in 1818. It is delightfully situated, upon an elevated plain in the center of the first society, affording the most extensive prospects, surrounded by interesting scenery, and from its situation enjoying a salubrious atmosphere. The corporate limits of the village are about one mile and a half in length, and about one mile in breadth. The principal street, running from N. W. to S. E. is well built, comprising numerous handsome dwelling houses, some of which are elegant edifices. This street is intersected by another, forming a pleasant square in the center. There are in the village upwards of 80 dwelling houses, 2 printing offices, a bank, being a branch of the Phœnix Bank, Hartford; court house, jail, professional offices, mercantile and mechanic shops. In 1784, a law school was established here by the Hon. Tapping Reeve. In 1798, the Hon. James Gould was associated as a joint instructor with Judge Reeve. This school was considered as the most respectable and systematic law school in the United States. It was discontinued a few years since. There is a high school for young ladies, which is of considerable celebrity. There is an infirmary in this town, under the direction of Dr. Alanson Abbe, established for the purpose of curing and relieving diseases of the spine.

South Farms was incorporated into an ecclesiastical society, in 1767. In the year 1753, when Mr. Champion was settled in Litchfield, there were but 30 families in the parish; when it was incorporated, it contained seventy. In 1764, the inhabitants agreed to build their first church. It was only one story high, 34 feet by 32: the second house of worship was erected in 1785. An academy was begun in South Farms, in 1790, by James Morris, Esq. in which the higher branches of education were taught. This school is still kept up, and is a respectable institution.

Northfield parish was incorporated in 1794. It is situated in the southeast corner of Litchfield, and includes within its limits part of the township of Plymouth. The surface of this parish is uneven, and many parts are stony, rough, and hard for tillage. The soil is generally good, and produces good grass and grain. There are two houses for worship in this place, 1 Congregational and 1 Episcopal. The first Congregational minister, the Rev. Joseph E. Camp, was settled here in 1795.

* There is an apple tree now standing on the farm of Mr. Solomon Marsh, in Litchfield, supposed to be about 116 years old, and is now in a vigorous state. Its trunk, two feet from the ground, measures eleven feet five inches in circumference. The circumference of its branches is nearly eleven rods in extent. It bore in 1835, one hundred bushels of apples of a fine quality.

Milton is situated in the northwest corner of Litchfield. It was incorporated in 1795, and the first minister was Mr. Benjamin Judd, who was installed in 1802. The parish embraces within its limits a part of Goshen, Cornwall, and Warren. The surface of the parish is uneven and stony, with many large primitive rocks, and though good grazing land, is hard for tillage.

There is a mineral spring in the west part of Litchfield, near a place called Bradleysville, "which is saturated with iron and sulphur. The water issues from the east side of the mountain in considerable quantities. The mud from the bottom of the spring burns with a blue flame, and the principal part of it consumes." An Indian relic was found in this town, about a half a mile east of the court house, near Bantam river. It is a rude sculpture of brown stone, nearly the size of life, representing a female with head and shoulders, extending down to the waist: it is now deposited at Yale College, New Haven.

Ethan Allen, a brigadier general in the American service, distinguished for his daring and intrepid spirit, was a native of this town. There has been a considerable diversity of statements respecting the place of his birth. Cornwall, Salisbury and Roxbury, have been named as places where he was born. By an examination of the Litchfield town records the present year, (1836,) it is recorded that he was the son of Joseph and Mary Allen, and was born Jan. 10th, 1737. The fact of the differing statements, mentioned above, seems to have originated from the circumstance of his residing for a while in those towns. The following sketch of his life is from Allen's Biographical Dictionary.

"While he was young, his parents emigrated to Vermont. At the commencement of the disturbances in this territory, about the year 1770, he took a most active part in favor of the Green Mountain boys, as the settlers were then called, in opposition to the government of New York. An act of outlawry against him was passed by this state, and 500 guineas were offered for his apprehension: but his party was too numerous and faithful to permit him to be disturbed by any apprehensions for his safety: in all the struggles of the day he was successful; and he not only proved a valuable friend to those whose cause he had espoused, but he was humane and generous towards those with whom he had to contend. When called to take the field, he showed himself an able leader and an intrepid soldier.

"The news of the battle of Lexington determined Col. Allen to engage on the side of his country, and inspired him with the desire of demonstrating his attachment to liberty by some bold exploit. While his mind was in this state, a plan for taking Ticonderoga and Crown Point by surprise, which was formed by several gentlemen in Connecticut, was communicated to him, and he readily engaged in the project. Receiving directions from the General Assembly of Connecticut to raise the Green Mountain boys, and conduct the enterprise, he collected 230 of the hardy settlers and proceeded to Castleton. Here he was unexpectedly joined by Col. Arnold, who had been commissioned by the Massachusetts committee to raise 400 men, and effect the same object, which was now about to be accomplished. As he had not raised the men, he was admitted to act as an assistant to Col. Allen. They reached the lake opposite Ticonderoga on the evening of the 9th of May, 1775. With the utmost difficulty boats were procured, and 83 men were landed near the garrison. The approach of day rendering it dangerous to wait for the rear, it was determined immediately to proceed. The commander in chief now addressed his men, representing that they had been for a number of years a scourge to arbitrary power, and famed for their valor, and concluded with saying, 'I now propose to advance before you, and in person conduct you through the wicket gate; and you, that will go with me voluntarily in this desperate attempt, poise your firelocks.' At the head of the center file he marched instantly to the gate, where a sentry snapped his gun at him, and retreated through the covered way: he pressed forward into the fort, and formed his men on the parade in such a manner as to face two opposite barracks. Three huzzas awaked the garrison. A

S. EAST VIEW OF LITCHFIELD, FROM CHESTNUT HILL.

sentry, who asked quarter, pointed out the apartments of the commanding officer; and Allen with a drawn sword over the head of Capt. De la Place, who was undressed, demanded the surrender of the fort. 'By what authority do you demand it?' inquired the astonished commander. 'I demand it (said Allen) in the name of the great Jehovah and of the continental Congress.' The summons could not be disobeyed, and the fort, with its very valuable stores and 49 prisoners, was immediately surrendered. Crown Point was taken the same day, and the capture of a sloop of war, soon afterwards, made Allen and his brave party complete masters of Lake Champlain.

"In the fall of 1775 he was sent twice into Canada to observe the dispositions of the people, and attach them, if possible, to the American cause. During this last tour Col. Brown met him, and proposed an attack upon Montreal in concert. The proposal was eagerly embraced, and Col. Allen, with 110 men, near 80 of whom were Canadians, crossed the river in the night of Sept. 24. In the morning he waited with impatience for the signal from Col. Brown, who agreed to cooperate with him, but he waited in vain. He made a resolute defense against an attack of 500 men, and it was not till his own party was reduced by desertions to the number of 31, and he had retreated near a mile, that he surrendered. A moment afterwards a furious savage rushed towards him, and presented his firelock, with the intent of killing him. It was only by making use of the body of the officer, to whom he had given his sword, as a shield, that he escaped destruction.

"He was now kept for some time in irons, and treated with great cruelty. He was sent to England as a prisoner, being assured that the halter would be the reward of his rebellion, when he arrived there. After his arrival, about the middle of December, he was lodged for a short time in Pendennis Castle, near Falmouth. On the 8th of January, 1776, he was put on board a frigate, and by a circuitous route carried to Halifax. Here he remained confined in the gaol from June to October, when he was removed to New York. During the passage to this place, Capt. Burke, a daring prisoner, proposed to kill the British captain and seize the frigate; but Col. Allen refused to engage in the plot, and was probably the means of preserving the life of Capt. Smith, who had treated him very politely. He was kept at New York about a year and a half, sometimes imprisoned, and sometimes permitted to be on parole. * * * * *

"Col. Allen was exchanged for Col. Campbell, May 6, 1778, and after having repaired to head quarters, and offered his services to Gen. Washington, in case his health should be restored, he returned to Vermont. His arrival, on the evening of the last of May, gave his friends great joy, and it was announced by the discharge of cannon. As an expression of confidence in his patriotism and military talents, he was soon appointed to the command of the state militia. It does not appear, however, that his intrepidity was ever again brought to the test, though his patriotism was tried by an unsuccessful attempt of the British to bribe him to attempt a union of Vermont with Canada. He died suddenly at his estate in Colchester, Feb. 13, 1789.

"Gen. Allen possessed strong powers of mind, but they never felt the influence of education. Though he was brave, humane and generous, yet his conduct does not seem to have been much influenced by considerations respecting that holy and merciful Being, whose character and whose commands are disclosed to us in the scriptures. His notions with regard to religion were such, as to prove, that those, who rather confide in their own wisdom than seek instruction from heaven, may embrace absurdities, which would disgrace the understanding of a child. He believed, with Pythagoras, that man after death would transmigrate into beasts, birds, fishes, reptiles, &c., and often informed his friends, that he himself expected to live again in the form of a large white horse. Besides a number of pamphlets in the controversy with New York, he published in 1779 a narrative of his observations during his captivity, which has been lately reprinted; a vindication of the opposition of the inhabitants of Vermont to the government of New York, and their right to form an independent state, 1779; and Allen's theology, or the oracles of reason, 1786. This last work was intended to ridicule the doctrine of Moses and the prophets. It would be unjust to bring against it the charge of having effected great mischief in the world, for few have had the patience to read it."

Oliver Wolcott, signer of the Declaration of Independence, was for many years a resident of this town: he was a native of East Windsor, born Dec. 1st, 1726, and was the son of the Hon. Roger Wolcott, governor of the colony of Connecticut. He was graduated at Yale College in 1747.

"He commanded a company of soldiers in 1748, in the war against the French, in Canada. After one campaign, he retired from military service, studied the profession of physic, and commenced the practice in Goshen. In the year 1751, he was appoint-

ed high sheriff of Litchfield county, removed to this town, and continued in the office of sheriff till the year 1772. He represented this town in the General Assembly, in the year 1770. In the year 1772, he was chosen a member of the council. In 1772 he was appointed judge of probate for the district of Litchfield. In the year 1774 he was appointed judge of the court of common pleas. In the year 1775, he was chosen a representative in Congress, and was present at the declaration of independence. He continued a member of the council till the year 1786, and was then chosen lieutenant governor of this state. In this office he continued till the year 1796, and was then chosen governor; and in this office he died, Dec. 1st, 1797. The duties of all these stations he discharged with unshaken integrity and firmness; courted favors from no man; and neither sought nor obtained any end by intrigue, or from interested motives. He was singularly modest, and even diffident, in his intercourse with men, in the common walks of life. Those who best knew this gentleman, well knew that the highest trust was never improperly placed in him. Two questions only were asked by him, while discharging the duties of the several offices of high responsibility, which he held, viz. What is right? and, What is my duty? He possessed a benevolent heart, and was warm in his friendships; a firm friend to order; a promoter of peace; a lover of religion; and a tried, unshaken friend to the institutions of the gospel. He was an indefatigable student; and neither wasted his time nor his words. His mind was clear and penetrating; his views of political subjects, just and comprehensive; his discernment of the wisest means to promote the best ends, ready and exact; and his acquaintance with science, particularly with theology, extensive. He had a remarkable talent at investigation; and 'nothing satisfied him but proof.' He has left a name, which is a sweet savor to his surviving friends; and a lively hope, that he is enjoying the rewards of the faithful in immortal bliss."—*Morris' Hist. of Litchfield.*

Oliver Wolcott, son of the preceding, was born in 1760. When a lad of 17, he lent his aid to the cause of his country: he was present in the engagement with the British at the time of their invasion of Danbury. On the formation of the U. S. government in 1789, he was appointed first auditor of the treasury; and in 1794 he succeeded Gen. Hamilton as secretary of the treasury. In 1817 he was elected governor of Connecticut, which office he held till 1827. He was the last survivor of the administration of Washington. He died in New York, June 2d, 1833.

Benjamin Tallmadge, a major, and afterwards a colonel in the Revolutionary army, was a resident of this town. He was born at Brookhaven, (L. I.) Feb. 25th, 1754. His father was the clergyman of that place. He was graduated at Yale College in 1773. In 1776 he entered the Revolutionary army, and soon received a major's commission from Washington, who honored him with his confidence, and entrusted him with several hazardous and important services. He was present in most of the general battles which took place with the main army in the northern states, at Long Island, White Plains, Brandywine, Germantown, Monmouth, &c., besides many smaller engagements, with the command of his own detachment. He removed to Litchfield in 1784. In 1800 he was chosen a representative to Congress. He was an ardent patriot and sincere Christian. He died at Litchfield, March 7th, 1835.

EXTRACTS FROM NEWSPAPERS.

Litchfield, Oct. 6, 1761.

Notice is hereby given, that there is now in Litchfield gaol, a mulatto fellow, who calls himself *Cæsar Sambo*, about 5 feet 10 inches high, speaks good English, well made and sprightly, and is about 25 years old: he says he is free, and that he formerly belonged to Capt. Benjamin Green of Greenwich, (Rhode Island.) He was lately taken up in Norfolk, for traveling without a pass, and by order of authority committed. It is suspected the fellow has been in company with a gang of negroes who have lately infested this part of the country. His master, if he has any, may have him upon pay-

ing charges, and if no owner appear, he will soon be disposed of in service, to answer the cost according to law.

JOHN NEWBREE, Gaoler.

Litchfield, May 12th, 1784.

Every species of deception and villainy seems at present to be practiced: some by dress and titles impose upon the unwary; others, under the plain mask of itinerants, accomplish their detestable schemes. One of the last description, on the night of the 7th of May, came into Capt. Vaille's tavern of this place, called for entertainment, and soon went to his lodging: but after the family were retired to rest, he thought it time, after rifling the house of a calico gown, a camlet shirt, and three pair of shirts, with six dollars from a fellow traveler, to take up his bed with all its furniture, and depart, and has since eluded the diligent search of those who have endeavored to detect him. It is to be hoped for the honor of human nature, that people will be vigilant in exposing this crime, as well as detecting future villainies; and that tavern keepers, in this western part of the state especially, would not put too implicit confidence in strangers, for "they know not at what hour of the night their effects and beds may, by the thief be taken away."

Connecticut Journal, No. 942. Litchfield, Nov. 15, 1785.

Last Wednesday Thomas Goss, late of Barkhamsted, was executed at this place, pursuant to the sentence of the Superior Court, for the murder of his wife. His defense, upon trial, was insanity; and for the space of several days after his trial and condemnation, he appeared regular, and requested his attorney to make application to the General Assembly of the State, for a reprieve; likewise desired the clergyman of this town to preach a sermon at his execution, (if he were not reprieved.) But very soon he resumed his former notions, that wizards and witches haunted him; which ideas it seems he had adopted, some time in October, 1784; and under pretence that his wife was a witch, he at first justified his conduct in depriving her of life. Under such infatuation, he ordered his attorney, in most peremptory language, not to apply for a reprieve to any human tribunal; alleging, that his heavenly Father had forbidden all such proceedings. He called himself the second Lamb of God; said he was brother of Jesus Christ; and sometimes said he was the child, born of the woman, mentioned in the Revelation of St. John, before whom the dragon stood, ready to devour the child, &c. To such extravagant ideas, he added, that the sheriff could not hang him; that his heavenly Father would interpose if the attempt was made, and he be liberated; and that thirty thousand males above fifteen years would be instantly killed by the shock, in North America. He pertinaciously adhered to such wild opinions to the last moment of his life. The night preceding his execution he slept well. In the forenoon of the same day, slept calmly a considerable length of time:—at dinner, ate heartily. On his way to the gallows, and while there, he appeared calm and unmoved; not the least emotion could be discovered in his countenance; nor the least perturbation in his speech. On being told that he had but twenty minutes to live, he kneeled down and made a short prayer, and consented that a clergyman present should pray with him, (although he had refused his attention to either preaching or praying, and would not even hear the sermon preached on the day of his execution, pretending that God forbade him.) When on the gallows, he said a few words to the spectators, inculcating the general principles of morality; such as that they had ought to bring up their families well, and obey the precepts of his heavenly Father, or they must be miserable. He declared he never murdered any person in his life excepting his wife; and the last word he said was, that he believed the sheriff could not hang him.

Litchfield, Dec. 12th, 1786.

In the storm on Saturday evening last, the wife of Mr. Elisha Birge unfortunately perished. The fury of the tempest seemed to threaten an immediate dismemberment of the long erected and decayed mansion of their residence: a naturally timid disposition induced Mrs. Birge fatally to determine on leaving it and seek an asylum in a neighboring house; from which resolution she could not be persuaded to recede, however hazardous the attempt. She had not proceeded far, when Mr. Birge followed, and immediately overtook her: having wandered about the dreary waste some time, in fruitless search of the friendly cottage, her helpless survivor suggested that they had mistook the road, and urged their return; but alas! too late—she was falling asleep: the chilling winds and hoary frost had deprived her of speech and sense, and beside the bending chest of an aged tree she expired in his arms. Those who knew her worth, cannot restrain the sympathetic tear. She was hospitable and good; indulgent to her children; a comfort to the partner of her bed; a blessing to her neighbors; and an irreparable loss to the stranger and distressed. Mr. Birge was exposed to the storm about five hours before he found a shelter. His hands and ears are much frozen, but it is hoped he will recover.

BARKHAMSTED.

BARKHAMSTED was granted to Capt. Thomas Moore and Lieut. Jonathan Ellsworth, and other persons of Windsor, in 1732. The first person who made a permanent settlement in the town, was Pelatiah Allyn from Windsor. He removed here about the year 1746, and remained the only inhabitant of the town for 10 or 12 years. In the summer he employed his time in clearing and cultivating his lands, and in the winter in hunting. His plantation was toward the south part of the town, near the dividing line between this town and New Hartford. As there were frequent alarms on account of the Indians, he used, when danger was apprehended, to repair to a fortified post in the northern part of New Hartford. He took special care to guard himself against a surprise at his own house. The next man who made a settlement in the town, was Israel Jones, from Enfield, about the year 1759. Besides these, the first principal settlers were, William Austin, Jonathan King, and a Mr. Norton, from Suffield; Amos Case from Simsbury, John Ives from Hamden, Joseph Shepherd from Hartford, and Joseph Wilder from East Haddam. Mr. Wilder was the first magistrate, and for several years the only one. The progress of the settlement was slow. In 1771 there were but 20 families in the limits of the town, and the inhabitants were so few that they were not called upon to do military duty until 1774. The town was incorporated in 1779. The Rev. Ozias Eels, the first minister of the town, was ordained January, 1787. He died in 1813.

Barkhamsted is bounded north by Hartland, west by Winchester, east by Canton and Granby, and south by New Hartford. It is $6\frac{1}{2}$ miles in length from east to west, and 5 miles in breadth. The central part is situated 23 miles northwest from Hartford. The township is rough, stony and mountainous, and is intersected by two high granite ridges of mountains, running north and south. Upon the declivities of these ridges, and upon their summits, there is much broken land, some of which is inaccessible. In some places these ridges exhibit very lofty and sublime features. Iron ore has been discovered in small quantities in different parts of the town, likewise some strata of limestone. The soil is hard and dry, and not generally good for tillage, except along the streams. The mountains and hills were formerly covered with excellent timber, consisting of oak, chestnut, sugar maple, beech, pine and hemlock; a considerable portion of which has been destroyed by wind and fire, and by the axe, under a system of improvidence, at a time when timber was considered of no value.

The following is a representation of the principal part of the village of Hitchcocksville, in Barkhamsted; it is situated on the west branch of the Farmington river, near the corner of four towns, Hartland, Colebrook, Winchester and Barkhamsted. The village contains upwards of 20 dwelling houses, 1 chair factory, 2 mercantile stores, and an Episcopal church, which was founded July 4th, 1829, and called the Union church. Part of the chair factory is seen on the left, and the church

West view of Hitchcocksville, Barkhamsted.

on the right of the engraving. The village was commenced about fifteen years since : it is 20 miles from Litchfield, and 26 from Hartford. There are superior water privileges for extensive manufactories in the immediate vicinity. A little more than a mile south of this place, a few of the last remnants of the Narragansett Indians have a location ; they came here about the year 1779, and purchased about 200 or more acres of land. Their houses, or rather cabins, are along side of the road : there are about 20 souls that make their constant residence here, though at times they number as many as 30 persons.

BETHLEM.

BETHLEM was formerly a part of Woodbury. It was incorporated as a distinct town in 1787. It is bounded n. by Litchfield, e. by Wattertown, w. by Washington, and s. by Woodbury. Its average length is $4\frac{1}{2}$, and its breadth 4 miles. The township is considerably hilly, and the soil generally a gravelly loam, and is best adapted to grazing ; there are, however, considerable quantities of rye raised in the limits of the town. The number of inhabitants in 1810 was 1,118 ; in 1830 the number was reduced to 906.

The following is a representation of the central part of Bethlem. The church seen on the left is the Episcopal ; the Congregational church is seen a little to the right of the center of the engraving. The first building seen to the left of the Congregational church, is the residence of Joseph H. Bellamy, Esq. grandson of Joseph Bellamy, D. D. the celebrated divine. The next house seen westward of the church was formerly the residence of the Rev. Azel Backus, who was the successor of Dr. Bellamy, and afterwards the first president of Hamilton College,

South view of Bethlem, (central part.)

in the state of New York. This place is 32 miles from New Haven, 38 from Hartford, $7\frac{1}{2}$ south from Litchfield, and 6 from Watertown.

Bethlem, Dec. 20, 1760.

We learn from Bethlem, that such a distressing sickness has prevailed there of late, that in the month of November 31 persons died in that small town, but the distemper is somewhat mitigated. They are taken first with a cold, and then a malignant pleurisy sets in, and carries them off. Among others that died was Doct. Hull, his wife and two children, and a young man, all out of one house; the doctor and his wife were buried in one grave. Soon after their deaths, and while others were sick in the house, one Deacon Strong coming by, raised a flock of eleven quails, which flew over the before-mentioned house, and dropped in the garden; immediately after three rose and flew into the bushes, but the other eight were picked up dead, and in an hour after stunk and were buried. The air in the parish is said by doctors and others of judgment, to be apparently different from the air in towns and parishes round about it. Some doctors there, have been ready to call this distemper the plague, or something much like it.

A robbery, which at the time caused considerable excitement in this place, took place in the east part of the parish of Bethlem, called Gurnsey Town, in the spring of the year 1778 or 1779, at the house of Ebenezer Gurnsey, a wealthy farmer. Mr. Gurnsey had sold his farm some time before, to Isaac Baldwin of Woodbridge, who had moved in with Mr. Gurnsey, and had paid him a large sum of money. Mr. Gurnsey had a number of men in his employ in building a house on an adjoining farm. All in the house had retired to rest, it being late at night, except Mr. Baldwin and wife, and two young men who were in another room. Two of the robbers came in, their faces being blacked, one being armed with a gun, the other with a pistol, and ordered Mr. and Mrs. Baldwin into the room where the young men were, to be bound, threatening them with immediate death if they made any resistance. One of the young men made his escape—they bound the other, and while attempting to bind Mr. Baldwin, who was a very active man, he wrenched the pistol from one of the robbers, at which the other attempted to shoot him, but he managed to keep behind the other robber till another from without came in and knocked Mr. Baldwin down with the breech of a gun, and wounded him badly. Mr. Gurnsey, although somewhat deaf, was awakened by the uncommon noise, and coming into the room was knocked down and had his skull fractured—the rest of the family made their escape or hid themselves. The robbers rifled the house of many valuable things, but in retiring, dropped Mr. Gurnsey's pocket book, which contained a large amount of continental money. One of the young men who escaped ran three miles to Bethlem meeting house, without stopping to give any alarm.

Joseph Bellamy, D. D. a celebrated divine, was born in Cheshire. He graduated at Yale College in 1735, being then sixteen years old. When he was eighteen years old, he became a preacher. He was ordained in Bethlem in 1740. He died in 1790, in the 72d year of his age, and 50th of his ministry. "He possessed a vigorous mind, and was well versed in theology. His style was plain and his manner impressive. He held a high rank among his contemporaries as a preacher. During the great religious revival with which the churches were visited in 1742, he devoted much of his time to itinerant labor, and was the instrument of much good in many congregations. He was also distinguished as a theological instructor, both by a happy method of teaching, and by the great number of young men who studied for the ministry under his care. The most important of his publications is his 'True Religion Delineated.' His works have been republished in three octavo volumes."

CANAAN.

Southwest view of the Housatonic Falls, Canaan.

CANAAN was sold at auction in New London, in January, 1738. The settlement began in June of the same year. The first inhabitants were Daniel and Isaac Lawrence, John Franklin, and others who joined the settlement about the same time. The town was incorporated in 1739. The first clergyman in the town was the Rev. Elisha Webster, who was ordained in October, 1740.

Canaan is 41 miles northwest from Hartford, bounded north by the Massachusetts line, east by Norfolk, west by the Housatonic, dividing it from Salisbury, and south by Cornwall. It is about 9 miles in length from north to south, and its average breadth about six.

The falls represented in the above engraving, are formed by a ledge of limestone rocks, crossing the Housatonic river obliquely from

northwest to southeast: the length of the ledge is about 30 rods, its perpendicular height perhaps 60 feet, and its front irregular and broken. Here, in a formidable mass on the western side, and on the eastern, the water rushes from the rapid torrent above, and descending in every variety of form, with the mass of foam at the bottom rising in a misty cloud, and the surrounding scenery presents a scene of remarkably picturesque beauty. There are falls and rapids both above and below the main cataract, but of much smaller scale. "The whole descent," says Dr. Dwight, "is about 130 feet, nobly arranged and distributed, and comprehending a remarkable variety of beauty and grandeur."

The buildings connected with the "Salisbury Iron Manufacturing Co." are situated a short distance above the main fall, on the Salisbury side of the Housatonic; there are also iron works below the falls, a forge and anchor shop are on the Canaan side. This place is 18 miles from Litchfield, 45 from Hartford, and 4 from Salisbury center.

The face of the township is broken and mountainous. Considerable quantities of limestone have been quarried.

COLEBROOK.

COLEBROOK is an elevated township, the central part of which is 31 miles northwest from Hartford, and 18 miles northeast from Litchfield, bounded north by the Massachusetts line, east by Hartland, west by Norfolk, and south by Winchester. Its length from east to west is six miles, and its average breadth five. The township is hilly and mountainous, and the soil a hard gravelly loam, and generally stony. It is in general rather cold and wet, but affords tolerable good grazing. The main branch of the Farmington river intersects the eastern part of the town, and affords excellent mill seats. The population of the town in 1810 was 1,243; in 1830, it was 1,332.

It is said that in the year 1796, some laborers in this town, digging to the depth of nine or ten feet, found three large tusks, and two thigh bones, the latter of which measured each about four feet and four inches in length, and twelve inches and a half in circumference. It is added that when first discovered they were entire; but that as soon as they were exposed to the air, they mouldered into dust.*

The following is a representation of the Congregational church, situated in the central part of the town, and some of the buildings in the vicinity. The hill seen back of the church is sometimes denominated Mount Pisgah. The first settler in the town, Benjamin Horton, located himself about three fourths of a mile south from this place, on the Norfolk road, in December, 1765; Joseph Rockwell came in January, 1766; Joseph Seymour and Nathan Bass, in the following April and May, and Samuel Rockwell in 1767. The common method of clearing land was to girdle the timber; on the third year after girdling, it was sown with rye and seeded down to grass: the average crop was

* American Gazetteer.

Southwestern view of Colebrook, (central part.)

from 20 to 25 bushels to the acre. The land thus partially cleared, produced good pasturage for 7 or 8 years, when the remaining timber on the land having principally fallen, it became necessary to clear it; being fallowed down, it produced good wheat and rye. When the land was new, it produced good oats and turnips. Apple trees, at the first settlement of the town, did not flourish. The town was organized into an ecclesiastical society in 1786, and the first meeting house was built about the same time. Rev. Dr. Jonathan Edwards, of New Haven, son of the celebrated divine of the same name, was installed the first pastor, in 1795. He however continued here but 3 or 4 years, being appointed President of Union College, in Schenectady. The Rev. Chauncey Lee, D. D. was the next minister. There are at present five houses of worship in the limits of the town, 1 Congregational, 2 Baptist, 1 Methodist, and 1 for various denominations.

CORNWALL.

THIS township was laid out in fifty three allotments, and sold by the colony at Fairfield in 1738, at fifty pounds per right. The first permanent settlement was made about 1740, there being this year 13 families in the town. The first inhabitants were from various parts of the colony, the greatest number being from Plainfield. These were persons by the name of Jewett, Spaulding, Barret, Squires, and others. Those by the name of Allen and Griffin, were from Litchfield; the Fullers and Robertses from Colchester. There were other persons from Tolland, Norwalk, and some from Massachusetts. Such a number of persons planted themselves in the town at once, that they were able to support a minister from the commencement of the settlement,

In August, 1741, the Rev. Solomon Palmer was ordained their pastor. "He continued with them in peace until March, 1754, when on the Sabbath, to the great surprise of the people, he declared himself an Episcopalian in sentiment. He soon after went to England, and obtained orders. He was originally of Branford, and had his education at Yale College."*

Northeastern view of South Cornwall.

Cornwall is situated 38 miles west from Hartford, and 48 northwest from New Haven; bounded north by Canaan, west by the Housatonic, separating it from Sharon, east by Goshen, and south by Warren and Kent. Its average length from north to south is more than nine miles, and its breadth about five. The face of the township is hilly and mountainous, but the soil is fertile and productive, being well adapted both to grain and grazing. Several minerals have been discovered in this town; in the western section, in what is called Mine Mountain, near the Housatonic, veins of black lead have been discovered in various places; about two miles south of the principal settlement, a bed of porcelain clay has been discovered; there are also various indications of iron ore.

The above shows the appearance of the village of South Cornwall, as seen from the road which passes from Goshen to Sharon. The drawing was taken from the house of George Wheaton, Esq. on the elevated ground about one mile N. E. from the Congregational church. There are two mercantile stores, and about twenty dwelling houses, within half a mile of the church. The appearance of this village and the surrounding objects, as seen from the road above mentioned, constitutes one of the most interesting and striking scenes to be met with in the state. The cheerful appearance of the church and the little

* Dr. Trumbull.

cluster of white painted buildings surrounding it, at the bottom of a deep valley, is uncommonly pleasing. The mountains and lofty hills which rise immediately on almost every side, shutting out in a sense the rest of the world from this apparently retired spot, present a bold and most striking feature in the landscape. The mountain seen south of the village is *Colt's Foot* Mountain, so called it is said from the circumstance of a colt's foot being found on its summit, which was probably carried there by some wild animal, as the mountain is almost inaccessible. This village is the place where the Foreign Mission School was established in 1818. The building in which the school was kept is the westernmost in the cluster seen around the church. This school had its rise from the attempt to qualify Obookiah, a pious Owyheean youth, and others, for missionaries to their native lands. Obookiah was brought to this country in 1808, and came to New Haven. While here, Samuel J. Mills, a student in Yale College, and other pious persons, commiserating his condition, instructed him in the Christian religion. Obookiah soon became hopefully pious, and strongly advocated a mission to his countrymen. Other natives of his island were found, and a school was established for their benefit at Cornwall. In 1820, the number of pupils in this school was 29, of whom 19 were American Indians, and 6 from the islands of the Pacific Ocean. Obookiah sickened and died in Cornwall in 1818. The following is the inscription on his monument in the village grave yard.

In memory of *Henry Obookiah*, a native of Owyhee. His arrival in this country gave rise to the Foreign Mission School, of which he was a worthy member. He was once an Idolater, and was designed for a Pagan Priest; but by the grace of God, and by the prayers and instructions of pious friends, he became a Christian. He was eminent for piety and missionary zeal. When almost prepared to return to his native isle to preach the Gospel, God took him to himself. In his last sickness, he wept and prayed for *Owyhee*, but was submissive. He died without fear, with a heavenly smile on his countenance and glory in his soul, Feb. 17th, 1818, aged 26.

GOSHEN.

THE township of Goshen was sold at New Haven, in December, 1737, and its settlement commenced in one or two years afterwards. The first inhabitants were principally from New Haven, Wallingford, and Farmington. It is stated that the houses of Gideon Thompson and John Beach, who were among the first settlers, were palisadoed in, for a defense against the Indians. Mr. Beach's house was situated on East street, about $2\frac{1}{2}$ miles from the present South Congregational church; the house of Mr. Thompson, stood on West street, near a mile to the southwest. Goshen was incorporated as a town in 1749. It is bounded n. by Norfolk, e. by Torrington and Winchester, w. by Cornwall, and s. by Litchfield; it is 9 miles in length and $4\frac{1}{2}$ in breadth. The central part is 6 miles from Litchfield, 32 west from Hartford and 42 from New Haven. It is the most elevated township in the state, but not generally mountainous; the surface being undulating, affording an interesting diversity of hills and vales. The soil is a gravelly loam, deep,

strong and fertile, admirably adapted for grazing. This is one of the best towns for the dairy business in the state. Large quantities of cheese are annually made, the fame of which is widely and justly celebrated, and the inhabitants are generally in prosperous circumstances. In neatness, in and about their dwellings, and in the appearance of general comfort and prosperity, they are not exceeded, if equalled, by any town in the state.

South view of Goshen, (central part.)

The above is a representation of the Congregational church and some other buildings in the central part of the town. The building seen on the right, with a small spire, is the Academy, where the higher branches of education are taught. The common district school-house is of brick, the first building seen in the engraving south of the church. The other Congregational church in the town, is four miles northeast from this. There was formerly an Episcopal church, situated about 2 miles to the northeast. About the time of the American Revolution, the Episcopal society, becoming very much reduced in numbers, sold their house to the north Congregational society; but while they were endeavoring to draw it towards their section of the town, it was blown down by the wind. The first meeting house in the town was built of logs; it stood about 80 rods below the church seen in the engraving. The elevated ground seen beyond the houses in the engraving, is called Ivy mountain. This is considered the most elevated point of land in the state. It affords a most extensive and interesting prospect, in almost every direction; to the west is a view of the Catskill mountains for a considerable extent, their rugged features, and high and disorderly hills; and to the east is a view of the elevated country east of Connecticut river. There is this rare and peculiar circumstance, with respect to what is called the East street, in Goshen; that the rain which falls on the front of the houses, descends into the Housatonic river, and that which falls on the back

side into the Waterbury river. About one mile and a half west from the central part, is a collection of several mills, and some manufacturing establishments, around which is collected a cluster of houses; this place is called Canada village.* The Methodist church is built in this place. The stream which passes this village is fed from a large pond in the vicinity, and is admirably calculated for water works, having an adequate supply of water, characterized by great uniformity, being neither affected by droughts nor heavy rains.

The first minister in the town, was the Rev. Stephen Heaton. He was buried about a mile south of the Congregational church. His monument, with a few others, stands at present in an open field, near the Litchfield road; the following is the inscription.

In memory of the Rev. STEPHEN HEATON, V. D. M. primus de Goshen, who was born at New Haven, 30th of Novr. 1710, ordained Nov. 1740, departed this life the 29th of Decr. 1788, *Æ.* 79. In his charater appeared Friendship, Patriotism, Sociability, Kindness and Charity, Benevolence, Virtue and Religion.

Pallida Mors æquo pulsat Pede pauperum Tabernas Regumque Turres.†

This is a copy of another in the same place.

In memory of MOSES LYMAN, Esq. who died 6th of Jany. 1768, in his 55th year.

LYMAN so fam'd, so meek, so just, and wise;

He sleeps! in hope, Then cease from tears, when Christ appears, his dust shall rise.

HARWINTON.

HARWINTON originally consisted of two half townships, one part belonging to Hartford, and the other to the Windsor proprietors. The first settlers were also from Hartford and Windsor. The town is said to have derived its name from the names of the towns Hartford, Windsor, and Farmington, *Har-win-ton*. "The six first settlers were Messenger, Brace, Hopkins, Webster, Phelps and Wilson. These were on the lands before the division and sale of them in 1732. The settlement of the town is considered as having been made in 1731. It was incorporated in October, 1737. The first minister was the Rev. Andrew Bartholomew, ordained about the year 1736."

Harwinton is bounded n. by New Hartford and Torrington, w. by the Naugatuc river, separating it from Litchfield, e. by Burlington, and s. by Plymouth. It is 6 miles in length, and upwards of 5 in width. The township is elevated and hilly, with granite rocks. The lands are best adapted for grazing, and the making of butter and cheese is a leading agricultural interest. There is one house for public worship in the town, which is for Congregationalists. The central part of the town is 8 miles from Litchfield, 23 from Hartford, and 40 from New Haven. The number of inhabitants in 1810 was 1,718; in 1830, the number was reduced to 1,516.

* This village is said to have derived its name in the following manner: A man by the name of Frisbie, who was the first miller in this place, was frequently saying from year to year, that he intended the next year to move to *Canada*, and still continued to stay where he was. The people finally agreed to bring *Canada* to him, by calling the place where he lived by that name.

† Pale death invades with the same step, the hovels of beggars and the palaces of kings.

KENT.

THE tract now comprising the towns of Kent and Warren was sold at auction at the court house in Windham, in March, 1738. The settlement commenced the same year. The town was laid out in fifty three shares. The principal settlers were from Colchester, Fairfield and Norwalk. Payne, Washburn, Wright, Ransom and Platt, were from Colchester; the Comstocks were from Fairfield; and the Slausons, Canfields and Bassetts, were from Norwalk. The town was incorporated, and vested with town privileges at the session of the Legislature in October, 1739. The first minister was the Rev. Cyrus Marsh, ordained in May, 1741. The settlement of the town was rapid. In May, when Mr. Marsh was ordained, the church consisted of ten males only; but before the end of the year, there was an addition of fifty three persons, male and female, principally by recommendations from other churches.

Northeast view of the Episcopal Church, Kent.

Kent is characteristically mountainous; it is bounded n. by Sharon, e. by Warren, s. by New Milford, and w. by the state of New York. It is nearly 8 miles in length, and 6 in breadth from east to west. The manufacture of iron was formerly carried on to a considerable extent in this town; there are at present three furnaces in operation. There are 3 houses of worship in the town; 1 Episcopal, 1 Congregational, and 1 Methodist.

The above is a representation of the Episcopal church in Kent, 50 miles from Hartford, and the same distance from New Haven. The Housatonic river passes at the foot of the mountain seen in the back ground. About a mile and a half below this building, on the opposite side of the river, the Moravian church or mission house was standing 30 or 40 years since, near the house of Mr. Raymond, which is just discernible in the distance on the extreme left. The Moravians left this

Northern view of New Hartford, (North village.)

situated in a deep valley, the hills and mountains rising immediately on every side, excepting the valley through which the river and turnpike passes. The Congregational church is seen on the extreme right of the engraving. The mountain is sometimes called *Bare Spot* Mountain, from the circumstance of a bare spot, destitute of trees and shrubbery, being found on its summit. This village is about $2\frac{1}{2}$ miles north of the old Congregational church and town house, 20 miles from Hartford, 16 from Litchfield, 45 from New Haven, and 75 from Albany. About three fourths of a mile to the southeast is another village, about the size of the one described, which has been built up in the course of five or six years past, called Kellogg, or lower village; it has a woolen factory, and an establishment for manufacturing machinery for making woolen cloth. Besides the two Congregational churches, there is one for the Baptist denomination, situated in the southwest part of the town.

In the eastern part of this town there is a rough and mountainous district, formerly designated *Satan's Kingdom*, and the few inhabitants who lived here were in a measure shut out from the rest of mankind. An inhabitant of the town invited one of his neighbors, who lived within the limits of this district, to go and hear Mr. Marsh, the first minister who was settled in the town. He was prevailed upon to go to church in the forenoon. In the course of his prayer, Mr. Marsh, among other things, prayed that *Satan's kingdom might be destroyed*. It appears that the inhabitant of this district, took the expression in a literal and tangible sense, having probably never heard the expression used but in reference to the district wherein he resided. Being asked to go to meeting in the afternoon, he refused, stating that Mr. Marsh had insulted him; "for blast him," said he, "when he prayed for the destruction of Satan's kingdom, he very well knew all my interests lay there."

The following are extracts from the town records.

At a town meeting, Dec. 19th 1738.—Committee appointed to make application to Mr. Baulden to come and settle in the ministry, and if he refuse, then to Mr. Robords, and if he refuse to accept of the caul, then to Mr. Marsh, snn to Rev. Mr. Marsh of Windsor, and if he refuse, then to Mr. Timo. Woodbridge. Adjourned to May 22, 1739, when it was voted and unanimously agreed, that it is needful to proceed, and that we will proceed to build a meeting house, &c. Mr. Stephen Kelsey appointed

The following are extracts from the town records.

At a town meeting, Dec. 19th 1738.—Committee appointed to make application to Mr. Baulden to come and settle in the ministry, and if he refuse, then to Mr. Robords, and if he refuse to accept of the caul, then to Mr. Marsh, son to Rev. Mr. Marsh of Windsor, and if he refuse, then to Mr. Timo. Woodbridge. Adjourned to May 22, 1739, when it was voted and unanimously agreed, that it is needful to proceed, and that we will proceed to build a meeting house, &c. Mr. Stephen Kelsey appointed

agent to solicit a committee from the Gen. Assembly, to determine upon the site for the meeting house. Matthew Gillet and Saml. Benham, quoristors, to tune or set the psalms.

June 26, 1739.—Voted to give Mr. Marsh a salary of £100 yearly for 4 years, and after that to add five pounds a year till it amount to £140. Voted to give Mr. Marsh £2 5s. for each Sabbath he shall preach till he is settled, he to board himself.

July 21, 1739.—Voted to give Mr. Marsh £100 a year for three years, and after that to add £10 a year till it amount to £150. Voted, that we will proceed to build a meeting house, &c. and the length shall be 50 fouts, and the bredth 40 fouts.

Sept. 11, 1739.—Voted to add 5 fouts to the length of the meeting house. Voted, that the ordination of Mr. Marsh be on the 2d Wednesday of October next. Voted, that the time to begin to raise the meeting house be the 20th May, 1740. Committee may hire assistance to raise the house, if it cannot be done otherwise. Voted, that the committee make a sutabel preparation of liquer for the raising of the meeting house.

9th March, 1741, a committee appointed to consult with some of the neighboring ministers, and with their advice appoint a day of fasting and prayer, and notify the inhabitants thereof.

Sept. 21, 1749.—Voted, that the Rev. Mr. Marsh have his choice of any pew in the meeting house, for to accommodate his family to sit in on the Lord's day, and at other times.

NEW MILFORD.

NEW MILFORD, the largest town in territorial extent in Connecticut, is in the southwestern extremity of the county. It is bounded n. by Kent, e. by Washington, Roxbury and Southbury, s. by Newtown and Brookfield, and w. by New Fairfield and Sherman. It has an average length of 13 miles, and an average breadth of $6\frac{1}{2}$ miles, comprising an area of 84 square miles. The township is hilly and broken, several mountainous ridges extending through it. "The soil is much diversified, and where susceptible of cultivation, it is generally good; but on the whole more distinguished for grain than grass. There are, however, large quantities of excellent meadow ground, but the pasturage is, on the whole, not abundant. It is essentially a farming town. Large quantities of grain are annually raised. The township is centrally intersected by the Housatonic: two branches of the Ashpetuck, Rocky and Still rivers, with other streams, enter the Housatonic in this town, affording numerous excellent mill seats. On Second hill, in the eastern part of the town, from two to three miles from the central village, are inexhaustible quantities of granite of a superior quality. There are also a number of extensive marble quarries in the town. The hatting business is carried on to some extent in Bridgewater society. There are 9 houses of worship in the town, 2 Congregational, 2 Episcopal, 2 Baptist, 2 Methodist, and 1 for Friends or Quakers.

The following ancient history of the town of New Milford, is extracted from Rev. Stanley Griswold's sermon, delivered at New Milford, January 7th, 1801, which was by a vote of the town entered on their records. For these extracts, with some additional notes and other valuable information, the author is indebted to the Hon. David S. Boardman, of New Milford.

"The town of New Milford was purchased of the colony of Connecticut, by a company of individuals, chiefly belonging to Milford, in this state: hence the name it received, New Milford. This purchase

was made in the year 1703, about 98 years ago.* Afterwards an additional purchase was made, which forms the northern extremity of the town, and was called the north purchase. This was made in the year 1722. This town is now, I believe, the largest in territorial limits of any town in the state, and formerly was somewhat longer than it is at present. A part of it was set off on the south end, west of the river, to help form the town of Brookfield. Another part was set off on the northeast corner, to help form the town of Washington. Still, as it now remains, the longest right line through it from northeast to southwest is not far from 20 miles.†

“The first settlement that was made in this town by civilized people, was in the year 1707; so that New Milford has now been settled about 93 years. At that time a considerable number of the natives inhabited here, of whom there were reckoned about 200 warriors. They dwelt chiefly along the intervale by the river, a part of which intervale is to this day called Indian Field;‡ and several of their burial grounds are yet to be seen in various parts of the town. Their graves are of a circular form, and the persons were buried sitting up, as in a natural position, on the ground. For some time after the white people came here, an Indian chief or sachem, named *Werauhamaug*,|| had a palace standing near the Great falls, where he resided. On the inner walls of this palace, (which were of bark with the smooth side inwards,) were pictured every known species of beast, bird, fish and insect, from the largest down to the smallest. This was said to have been done by artists whom a friendly prince at a great distance sent to him for that purpose, as Hiram to Solomon. In this palace, the fore-mentioned chief was visited by the Rev. Mr. Boardman, first minister of this town, during his last sickness, and at his death. Mr. Boardman has left in manuscript, a minute and circumstantial account of his labors with the sachem to enlighten him in right Christian doctrines, as also the singular, rude, and abusive behavior of the other natives on the oc-

* This tract was called *Weantinogue*. The original purchasers and proprietors were 109 in number, 99 of whom were purchasers of whole rights, and 10 of half rights: 24 shillings was the purchase of a whole, and 12 shillings of a half right. No individual had originally more than one right. The first division of land was granted in December, 1706, and was a home lot of 7 and a half acres and 10 acres for pasture. The 2d division was in May, 1712, of two lots of 40 acres each upon a right; ten other divisions were granted before 1760. New Milford first sent representatives to the General Assembly in 1725. It was the second town settled in the county. Woodbury was the first.

† About 18 miles.

‡ On the west bank of the river, opposite the village.

|| He was so considerable a personage as to have reserved, as his hunting ground, a considerable part of the present society of New Preston, which always, until the incorporation of the town of Washington, of which it is a part, was called *Raumaug*, after the original proprietor, dropping for convenience sake, the prefix *we*. I have often seen the grave of this chief in the Indian burying ground, at no great distance from his place of residence; distinguished, however, only by its more ample dimensions, from the surrounding graves, out of many of which large trees are now growing. There is a similar burying ground on the west side of the river, opposite to and in sight of our village, (New Milford,) on the bluff, bounding the Indian field, so called, and contiguous to Fort Hill, the site of the last Indian fortress known to have existed in this town.

casion ; from whence it appears that few or none of those people, (the sachem excepted,) were disposed at that time to embrace Christianity : and so far as those people in this town and its neighborhood were ever converted to the Christian religion, it was a considerable time afterwards, by the Moravian missionaries. *Count Zinzendorf* himself came to this town and preached here. After the conversion of the natives by the Moravians, they quitted their settlements here on religious accounts, and removed to Bethlem, in Pennsylvania, where the brethren of that communion chiefly resided. But finding it very unhealthy for them there, and a large number dying, the remnant removed back again, where they have lived and gradually dwindled ever since.* The natives had sundry fortresses, or military stations, in and about this town, to guard against attacks from distant tribes. Some spots in the town bear an allusion to them to this day, as *Fort Hill*, *Guarding Mountain*,† &c.

"It has been said that all the tribes along by this river, from its source to the sea, were in strict alliance and friendship ; and that by means of certain sounds made on their guarding heights, an alarm might be spread in the space of three hours, through the whole line of tribes, a distance of near 200 miles. The natives were generally very friendly, and serviceable to the first settlers of this town, by defending them from hostile attacks, and by supplying them with such provisions as they could furnish. They had several reserves of land made for their accommodation in and about the town, as for a considerable time the *Indian field*, so called, the place once called *Raumang*, (from the name of the sachem before mentioned,) now in the parish of New Preston ; the *Great Falls*, which they reserved for the fishing of lampreys ; and lastly, the place where they now reside, called *Scatacook*. The two former they sold many years since, the two latter they still own. But their number has ever been diminishing since the neighborhood of the white people, and at this time they are reduced to a mere handful. So much for the natives.

"The first white settler who came to this town was *John Noble*, from *Westfield*, state of *Massachusetts*, who came here in the year 1707. He brought with him at first one of his daughters, then about eight years old. He first built him a hut under what is called *Fort hill*, but afterwards removed and pitched here, in the present center of the town. His house here was for some time the last house on this side of *Albany*, and *Gen. Nicholson* once lodged in it, in the wars under the reign of *Queen Anne*. It deserves to be mentioned, to the credit of the natives, that *Mr. Noble* once left his little daughter here, 8 years old, alone with them, for the space of three or four weeks, while he was necessarily absent from the town, and on his return he found she had been well treated, and taken exceedingly good care of.

* When the Indians returned from *Pennsylvania*, as mentioned by *Mr. Griswold*, few of them took up their permanent residence in this town. They joined the *Scatacook* tribe, but used for a long time in the season of fishing, annually to revisit their fishing ground at the *Great Falls*, two and a half miles below the village, for the purpose of taking lampreys, their favorite fish, which are not found above these falls. This stand they never would part with, and, though occupied by the whites also for the same purpose, the Indians' rights were always recognized, and even to this day, when a straggler comes there, the whites allow them their turn. The *Scatacook* tribe are not quite extinct, and the few who remain, are under the care of an overseer appointed by the state, and who annually reports the state of their affairs to the county court of this county. *Scatacook* is situated in the town of *Kent*, and the account of it belongs to that town, and not to *New Milford* ; and I only add this note to guard against a possible misconception of *Mr. G.'s* meaning in the place noted.

† On the bluff adjoining the mountain back of the *Indian field*.

"It is impossible at this distance of time to ascertain the exact order in which the subsequent settlers came to this town, or the identical years in which they came. It is presumed, however, that we have obtained by diligent search and enquiry of the aged, somewhere near the order of their coming, as also the places from whence they came. We shall first mention the names of those who came more than 60 years ago, (whom we may consider the first settlers,) together with the places whence they emigrated, setting them down in the order in which it is supposed they came, viz. John Noble, Westfield; John Bostwick, Stratford; Zechariah Ferriss, Stratford; Samuel Hitchcock, Springfield, Mass.; Samuel Brownson, Farmington; Roger Brownson, Farmington; John Weller, Springfield; Jeremiah Canfield, Milford; Daniel Boardman, Wethersfield; Samuel Camp, Milford; Theophilus Baldwin, Milford; Ebenezer Baldwin, Milford; William Gaylord, Windsor; James Hine, Milford; Daniel Hine, Milford; Joseph Warner, Hadley, Mass.; John Warner, Hadley, Mass.; James Prime, Milford; John Welch, Milford; Paul Welch, Milford; Thomas Pickett, Danbury; Jonathan Buck, Wethersfield; Enoch Buck, Wethersfield; Ezekiel Buck, Wethersfield; Henry Garlick, England; Eleazer Beecher, Milford; Joseph Ruggles, New Haven; Nathan Collins, Milford; Joseph Collins, Milford; Amos Collins, Milford; Ezekiel Paine, Rhode Island; Samuel Peet, Stratford; John Peet, Stratford; Thaddeus Peet, Stratford; Thomas Oviatt, Milford; Gamaliel Terrill, Milford; Nathan Terrill, Milford; Job Terrill, Milford; James Terrill, Milford; Caleb Terrill, Milford; Joseph Murray, Westchester, N. Y.; Josiah Smith, Danbury. [A long list follows, but it will be quite useless to pursue it.]

"The first white male child born in this town was the late Lieut. Daniel Bostwick;* and the first female was Mrs. Sarah Noble, formerly Ferris, now living. And it is worthy of remark, that three persons have lived in this town to be more than 100 years of age, two of whom are now living.

"The early part of the settlement here was somewhat retarded by a tedious lawsuit, regarding the title to a considerable tract in the center of the town. Col. John Read claimed it, under a title from the natives, and removed here to gain a residence and defend his title. This discouraged settlers under the company's title from coming on, and but a small number came the few first years. These few, like all other first settlers, saw troublous times; and their names are worthy the affectionate remembrance and praise of their posterity. It was common for them to carry their fire arms into the field to labor, and they were obliged to provide a fortified house to resort to in time of danger; and they were sometimes reduced to distress, through the failure of provisions and the difficulty of supplying themselves.

"The town plot or center was first laid out on the hill next east of the present center, whence that hill is to this day called *Town Hill*. Afterwards it was concluded to remove the center to the top of the hill next north of the present center, for which the first minister built and lived on that hill. But ultimately it was thought more convenient to place the center where it now is.

"New Milford for a considerable time belonged to the County of New Haven; but after Litchfield County was erected, it was set off to the latter. It is ascertained from the papers of the first minister, that in the year 1712, there were but 12 families in this town. Col. John Read, who is mentioned before as having been once a candidate for the ministry, preached the first sermon that ever was preached here. After he left the place, his house, which stood near where the present town house stands, was used as a place of worship for some years. The first meeting house was built in the year 1720. It stood near the foot of the hill, a few rods to the northeast of the present town house. There the first minister, Mr. Boardman, officiated during his life; and the second minister, Mr. Taylor during some of the first years of his ministry. It is

* This Daniel Bostwick was the youngest son of John Bostwick, the second settler who came here.

said by the aged that when they first began to meet in that house, though it was small, yet every person in the town could sit around upon the outer sills, side by side.

"The house in which we are now assembled, being the second meeting house, was built in the year 1754, about 47 years ago. The first Episcopal church was built in the year 1746; the second, which is the one now standing, began to be built 1765, was raised in 1766, about 35 years ago. It was finished and consecrated 1793. The *Strict Congregationalists*, usually called *Separates*, erected their house of worship in the year 1761, 40 years ago, which is now standing. The *Friends*, commonly called Quakers, built their meeting house not far from the year 1742, now standing, though in another place than where it was first set. Another communion of *Friends*, followers of Jemima Wilkinson, built a house of worship in the north end of the town about 15 or 20 years ago, but it is now owned and occupied by the Episcopalians of New Preston. The Baptists erected a house of worship in the south end of the town, called the Neck, (now Bridgewater society,) about 11 or 12 years ago; but it is sold and now used for another purpose.

"This naturally leads us to consider more particularly the several Christian persuasions, denominations or societies, contained in this town. The eldest here is the Presbyterian, or more properly the Congregationalists. Most or all of the earliest settlers were of that denomination. This society may therefore be considered as old as the town; but the professing members were not gathered into a church until the year 1716. It then consisted of 8 men and 5 women. There have been three ministers ordained in this society. The first was the Rev. Daniel Boardman from Wethersfield. He came into this town first to preach as a candidate, in the year 1712. He was ordained on the 21st Nov. 1716. He died Aug. 25th, 1744, in the 58th year of his age, having served here 27 years and 9 months. It appears from his records, that he baptized 521 persons, and married 67 couple.—The second minister was the Rev. Nathaniel Taylor from Danbury. He came first to preach as a candidate in January, 1748: was ordained the 29th day of June following. He died Dec. 9th, 1800, aged 78 years and 3 months, having been ordained 52 years and 5 months. According to his record, he baptized 927 persons, and married 349 couple.—Myself, who am the third minister, came first to preach as a candidate June 14th, 1789: was ordained colleague pastor with the Rev. Mr. Taylor on the 20th day of January, 1790. I have baptized 232 persons, and married 103 couple. Many have been married by the civil authority, whose number I have not ascertained.

"The next religious society in the order of time is the *Friends*, usually called Quakers. Their origin in this town was about the year 1731. Then 19 church members left the Presbyterian communion, and set up that society. About 10 years afterwards, they built their house of worship, which was set on a piece of ground which was given for that purpose, and also for the purpose of a burying place, by Zechariah Ferris, opposite the dwelling house of Mr. David Ferris. Since that time it has been removed to the place where it now stands, for the greater accommodation of the members; where they now hold their regular meetings, though the number is but small.

"The next religious society in the order of time is the Episcopalian. Some individuals of that profession came into this town at an earlier period, but no stated worship was held here till somewhere between the years 1740 and 1745. Worship was then carried on here by the Rev. Mr. Beach of Newtown. One Mr. Barzillai Dean read service here for several years, then went to England for orders, with a view to settle here on his return, but died on his passage.—The first Episcopal minister who came and resided in this town, was the Rev. Solomon Palmer from Cornwall. He came in the year 1754, and removed to Litchfield about the year 1760; was minister here about six years.—The second was the Rev. Thomas Davis from Washington. He came here about the year 1761, and died in this town May 12th, 1766, in the 30th year of his age, and the sixth of his ministry.

"The third Episcopal minister was the Rev. Richard Clark from Milford. He was settled here in June, 1767, and left the town in 1787. The society was then vacant for a few years. The fourth Episcopal minister was the Rev. Truman Marsh from Litchfield. He was settled here in November, 1790, and left the town 9th of Nov. 1799, and removed to Litchfield. He was minister here just 9 years. Since then the society has been vacant.—The next religious society in the order of time, is the *Strict Congregationalist*, commonly called *Separates*. This sprung out of the other societies in consequence of what is called the *great revival of religion*, or by others the *New Light* time, between the years 1740 and 1750. Their first elder who preached stably here, though he never was ordained over them, was Mr. Elihu Marsh. Their second was Mr. Robert Campbell, who was the first that was ordained over them. He was ordained here 29 years ago, continued about 12 years, and was then dismissed and left the town. Their third elder was Mr. Barnabus Lathrop, who came here about 10 years ago, and preached to them about two years. He afterwards joined the Presbyterian society, and died in this town April 10th, 1796, aged 57 years. Their fourth

and now officiating elder, is Mr. Daniel Hine. He has been ordained over them 4 years. [This society continued to maintain a separate worship till about the year 1812, when having become very small, the members, on the recommendation (as it is understood) of elder Hine, dissolved the society, and the principal part of them joined either the Presbyterian society or the Baptists.]—The next religious denomination that may be mentioned are the Baptists. It is but quite lately that communion assumed the appearance of a regular society here. A small church was formed, and a house of worship built in the lower end of the town, called the Neck, [now Bridge-water society,] about 11 or 12 years ago; but they never had an elder settled over them, and within a few years past they sold their house and chiefly removed out of the town. A few scattered individuals remain, but no stated worship is performed.

South view of New Milford, (central part.)

“The last denomination we shall mention is one which is now extinct from the town, but not many years since existed in some numbers. They are the *Friends*, called *Jemimaites*, gathered here by one Jemima Wilkinson. Between 15 and 20 years ago, a number of families in the northeastern part of the town, joined in that communion, and built a house of worship; but shortly afterwards they sold their house and private estates, and moved away in a body with their leader, into the western part of the state of New York, called the Genesee, in Ontario County. Their settlement was on or near the western shore of the Geneva Lake, about 20 miles south of the town of Geneva, where, though occasionally abandoned by some of her followers, Jemima continued for many years to maintain her ascendancy over her remaining followers, and even it is said until her death, since which nothing has here been heard of them, and it is supposed that the society as such has become extinct.—A few individuals of other persuasions have been or still are in the town, such as Seventh Day Baptists, Scotch Presbyterians, Glassites and Methodists, but no society of these has been formed.

“Thus have I endeavored to sketch something of the ecclesiastical history of the town.”

[Here follows what the preacher styles the civil and military history of the town, but containing nothing *peculiar*, and consisting principally of the names of the civil and military officers of the town, in chronological order, this part of the extract is omitted in this copy.]

“The first bridge that was ever built over the Housatonic river from the sea to its source, was built in this town, and was finished in July, 1737. The first school that was set up in this town, was in the year 1721: it was to be kept four months in the year, and the town to pay one half of the expense. At this time there are 22 school districts in this town, exclusive of those in the parish of New Preston; and it is computed that about 700 children attend in them through the winter season.”

The village of New Milford consists of about 60 dwelling houses and 5 mercantile stores. The engraving shows the appearance of the central street, as it is seen from the south end. It is wide, and about 60 rods in length. The building which is seen on the right is the ancient Episcopal church, which was taken down the present year, and a new church is now erecting. The Congregational church, erected in 1833, is seen to the north: the old church stood in the street, about 30 rods southerly from the one seen in the engraving. This place is 18 miles s. w. of Litchfield, 36 n. w. from New Haven, and 48 from Hartford.

From the Connecticut Journal, March 18th, 1768.

We hear from New Milford, that a manufactory has lately been opened there, wherein were wrought, or rather imitated, New York 40s. bills of currency, and Spanish milled dollars, to a great degree of imperfection; but that, notwithstanding the present prevailing scarcity of money, and loud call for industry, it is thought that branch of business may prove prejudicial to the public, and therefore the artificers already labor under great discouragements from every quarter, and near one dozen of them embarrassed with a close confinement in a distant cage, where a bill is prepared upon some obvious specimens of their ingenuity, to assert their title to the Royal Bounty. Strange! how variously mankind distinguish themselves! no less by their actions than features.

New Milford, Aug. 8th, 1775.

The Riflemen on their way from the southern colonies through the country, administer the new fashioned discipline of tar and feathers to the obstinate and refractory Tories that they meet on their road, which has had a very good effect here. Those whose crimes are of a more atrocious nature, they punish by sending them to General Gage. They took a man in this town, a most incorrigible Tory, who called them d—d rebels, &c., and made him walk before them to Litchfield, which is 20 miles, and carry one of his own geese all the way in his hand: when they arrived there, they tarred him, and made him pluck his goose, and then bestowed the feathers on him, drummed him out of the company, and obliged him to kneel down and thank them for their lenity.

The following inscriptions are from monuments in the grave yard in the central village.

In memory of the Rev. Thomas Davies, a faithful servant of Jesus Christ, an active worthy missionary from the venerable society in England, who departed this life May 12th, 1766, in the 30th year of his age. He met death with the greatest Christian fortitude, being supported by the rational hope of a blessed immortality.

The sweet remembrance of the just
Does flourish now he sleeps in dust.

Vita bene actæ jucundissima est recordatio.

Mrs. Ann Bostwick, the consort of Samuel Bostwick, Esq., died Sept. 21st, 1783, in the 59th year of her age.

Death's strong assault enervates the failing frame,
The vault receives the pittance of an hour,
The rising soul to God extends her claim,
Brightens in bliss, and triumphs in his power.

Samuel Bostwick, Esq. died Sept. 23d, 1789, aged 66 years. He was the 5th son of Major John Bostwick, who was the son of John Bostwick, who was the son of Arthur Bostwick, who migrated from ye town of Cheshire in England.—In death the rational mind ceases to communicate to the living; a marble genealogy succeeds, and the grave becomes a monitor.

In memory of Paul Welch, Esq., one of the first principal settlers of this town, and an original proprietor of the same, departed this life Aug. 26th, 1778, in the 82d year of his age.—In his day he served the town in most offices of trust and honor, gave good satisfaction, and died possessed of a large estate.

In memory of Samuel Platt, the first of this town, and one of its original proprietors, departed this life 22d July, 1783, in the 61st year of his age.—An honest man, that feared God and hated wickedness.

Sacred to the memory of Partridge Thacher, Esq., who departed this life Jan. 9th, 1786, in the 72d year of his age.—Composed by the deceased P. Thacher, Esq.: Rest here, my body, till the Archangel's voice, more sonorous far than nine fold thunder, wakes the sleeping dead; then rise to thy just sphere, and be my house immortal.

NORFOLK.

NORFOLK is an elevated township, the central part of which is 35 miles northwest from Hartford; bounded north by the Massachusetts line, west by Canaan, east by Colebrook and Winchester, and south by Goshen. It is nine miles in length from north to south, and four and a half in breadth.

“The settlement of Norfolk began in 1744. This township, and several of the adjacent ones, were owned by the then colony of Connecticut; and they were severally sold at public vendue at Middletown, in 1742. Timothy Horsford of Windsor took a deed of one right of 400 acres, which he retained. All the other proprietors relinquished their rights, and forfeited their first payment, which was 40 shillings on a right. The town was originally laid out in 53 rights, of which one was reserved for a parsonage, one for the benefit of schools, and one for the first minister. Timothy Horsford sold his right to Titus Brown, who afterwards removed to this town and died here.” The names of the first settlers were Titus and Cornelius Brown, from Windsor; John Turner and Jedediah Richards, from Hartford. They lived on Brown's right. They were pious and exemplary families, and attended public worship in Canaan.

In 1754, Norfolk was sold at public vendue at Middletown, the second time, excepting Brown's right. Soon after, a number of families moved into the town, and the settlement made considerable progress. The town was incorporated in 1758; at this time there were 27 families. In 1761, the Rev. Ammi R. Robbins was ordained as the first minister. At the time of his settlement the number of families in the place had increased to sixty. From this time there was a gradual increase of inhabitants, till about the year 1800, when the number of families had increased to about two hundred and ninety, comprising a population of 1,649. Since this period the spirit of emigration to the west has retarded and reduced the population. In 1810, the population was 1,441; in 1830, the population was 1,485, being an increase of 44 in twenty years.

This town is elevated and mountainous. The soil is a primitive gravelly loam, generally cold and stony, but has considerable depth, and affords good grazing. Formerly large quantities of sugar were made from the maple: more than 20,000 lbs. have been manufactured in a single season; but since the land has been cleared by progressive settlements, and in consequence of the destruction of the maple trees by some tornadoes, the business has greatly declined. The dairy busi-

ness comprises the principal interests of the town. A stream, called Blackberry river, runs near the center of the place, and a little westward of the Congregational church falls over a ledge of rocks 30 feet in height. This is an excellent site for mills, of which there are several near this spot.

East view of Norfolk, (central part.)

The above is a representation of the Congregational church, and most of the buildings in the immediate vicinity. This little village has a small open square, or green, in front of the church, and is uncommonly neat and beautiful in its general appearance. About half a mile north is another village, in which are 2 woolen and 3 sythe factories. There are, perhaps, in both places, about 30 dwelling houses, and four or five mercantile stores. The central part is 35 miles from Hartford, 17 from Litchfield, 42 from Hudson, and 60 from Albany.

Litchfield, December 5, 1786. (No. 998.)

We learn from Norfolk, that on the 23d ult. four wolves appeared in that neighborhood, immediately after the good people had assembled to prefer their annual adorations, and as it was imagined those voracious animals intended an attack on the harmless tenants of the fold, information of their visit was sent to the place of worship, when about 80 men turned out to go in pursuit of, and destroy them. The whole of this formidable body, well armed, moved in a circular form, to an adjacent mountain, the supposed retreat of these carnivorous unwelcome guests, and having by this judicious movement had the good luck to surround them, the whole were made prisoners; three surrendered at discretion; the other, having broken through their ranks, was shot in making his escape. The whole party then retired to an inn, and spent the day in joy and festivity. The coldness of the weather at the northward, must certainly have compelled these creatures to take shelter in our woods.

The following inscription is from a monument in the burying ground, upwards of half a mile north of the Congregational church.

Rev. Ammi Ruham Robbins, a faithful minister of his blessed Lord. He was born in Branford, August 25, 1740, O. S., and graduated at Yale Coll. 1760. At the age of twenty one, he was ordained the first pastor of Norfolk. He lived to bury all that called him to the charge, and with the anxious feelings of a father, addressed his flock

as children. He was humble, yet zealous; peaceable, yet bold, in his master's cause. In the duties of his office, he was sincere, tender, and affectionate. His doctrine, and his life reflected credit on each other. And in his death, he strikingly exemplified that resignation to the divine will, which he steadily preached to others. When called for, he said, "let me go and receive mercy." He died on the 31st day of October, 1813, aged 73.

PLYMOUTH.

PLYMOUTH became an independent society in the town of Waterbury, in 1739, by the name of Northbury. At this time Westbury belonged to this society, but was afterwards incorporated as a distinct society, retaining its name. Afterwards both of these societies were incorporated as towns. Northbury was incorporated as a town, by the name of Plymouth, in 1795.

East view of the central part of Plymouth.

It is bounded n. by Harwinton and Litchfield, e. by Bristol, w. by Watertown, and s. by Waterbury and Wolcott. Its average length from north to south is $5\frac{1}{2}$ miles; its breadth nearly 5. The township is quite uneven and hilly; the soil is a gravelly loam, abounding with primitive or granite rocks. The town is watered by the Naugatuc, which passes through its western section from north to south, and is a fine mill stream. The manufacture of clocks is an important branch of business in this town, there being seven clock factories, two of which are very extensive.

The above is a representation of the Congregational and Episcopal churches, in the central part of Plymouth. The village immediately around the churches consists of about 30 dwelling houses, 3 mercantile stores, and a number of mechanic shops, and is on an elevated situation, commanding an extensive prospect to the westward; it is 22 miles from Hartford, and about 31 miles from New Haven. The Episcopal church is seen on the right; above this building in the distance is seen the Congregational church in Northfield, standing on the summit of a high hill,

4½ miles distant. The road seen in the engraving is the Hartford turnpike; it passes the Congregational church, and descends for nearly a mile into a deep valley, extending from north to south about one mile and a half: this place is called *Plymouth Hollow*. Here is a flourishing little village, containing 1 cotton and 3 clock factories. The clock factories belonging to Mr. Terry and Mr. Thomas are extensive. The manufacture of small wooden clocks, it is believed, first originated with Mr. Terry, about twenty years ago; since this period, the manufacture of this kind of clocks has been widely extended, and forms a very important branch of manufactures in this part of the state.

In the south part of this town, near the Naugatuc river, lived Mr. John Sutliff, a respectable miller, who died perhaps 10 or 12 years since. Mr. Sutliff, when a young man, became possessed with the idea, that by digging into the mountain near his house he should be able to find silver, gold, and other precious metals. He expected to find the silver and gold in a state of fusion, so that he could dip it up with a ladle. He commenced digging by the Waterbury road, near the Watertown turnpike. In digging into the mountain, in order to avoid the rocks, stones and other obstructions, his course became very circuitous, and while digging as he supposed into the mountain, he in fact got round under the turnpike road. This was found to be the case in the following manner. Some person traveling on the road, hearing a noise under ground, beneath his feet, conjectured that it must be Sutliff digging. Having obtained assistance, he accordingly dug down and found Mr. Sutliff, who was quite angry in being interrupted in this manner. Although perfectly sane on all other subjects, he continued digging a little almost every day for the greater part of his life, for a period of perhaps 30 or 40 years, till the infirmities of old age compelled him to desist.

Dr. *Sylvanus Fansher*, a native of this town, and now a resident of Southbury, has devoted nearly forty years of his life to the extension of the *vaccine* or *kine pock* inoculation, as a remedy against that scourge of the human race, the small pox. For his discoveries in expediting the kine pock, he has recently received a diploma from the "Royal Jennerian Society of London." About the year 1802, when the kine pock had become apparently extinct in this country, it was found that a number of persons in Danbury and Goshen had taken the infection or *virus*, from milking cows. Dr. Fansher states, that he took the virus from the pustule on the milk maid's hand, and inoculated an infant with it, and it proved to be the genuine kine pock. Dr. F. also states, that he has known several instances where the infection has been taken, without any apparent connection with the cow; and it is his belief, that the infection is taken from some shrub or plant, from which, when discovered, we shall know something of the origin of the small pox, and have a sovereign remedy against it, at hand. Besides Danbury and Goshen, the genuine kine pock, or cow-pox, has been found existing in Plymouth, Newtown, Southbury, Oxford, Woodbury, Meriden, Middletown and New Hartford.

ROXBURY.

ROXBURY was originally a part of Woodbury, and was incorporated in 1801. It is bounded n. by Washington, e. by Woodbury, s. by Southbury, and w. by New Milford. It is about six miles and a half in length from north to south, and nearly four in breadth. The town-

ship is diversified with hills and valleys. The soil is a gravelly loam, interspersed with some small tracts of sandy loam. The lands are well adapted to grazing, but afford considerable grain. The town is watered on its western border by the Shepaug, a considerable branch of the Housatonic. About two miles northwest of the center of the town, in Mine hill, a silver mine was wrought to some extent before the Revolutionary war, by some foreign miners. A shaft was sunk to a considerable depth. In digging for silver, a species of iron ore, called "steel ore," was discovered.

Northeastern view of Roxbury, (central part.)

The above is an eastern view of the central part of Roxbury, which is 32 miles northwest from New Haven, 46 from Hartford, and 15 from Litchfield. The Congregational church is seen on the right; the Episcopal church is seen farther westward, in the center of the engraving. It appears that some of the first settlers were three families by the name of Baker, who located themselves about half a mile above the Episcopal church. About $2\frac{1}{2}$ miles below the church, a family by the name of Castle were the first settlers. The first meeting house was built about one mile south of the present churches.

Col. *Seth Warner*, distinguished for his military services in the American army which captured Burgoyne, was a native of this town. Hon. *Nathan Smith*, a Senator of Congress from this state, Gen. *Ephraim Hinman*, distinguished for his humor and originality of character, and *Royal R. Hinman*, Esq. the present secretary of this state, were all residents of this town. Secretary Hinman is the author and compiler of a work, consisting of letters from the kings and queens of England, with answers thereto; with other ancient and curious documents; a valuable publication, compiled from the ancient files in the department of state; and it is hoped that this laudable example will be followed in other states.

The following is copied from a monument in a grave yard north of the Episcopal church:

In memory of Lieut. Thomas Weller, an officer in the United States army, who was murdered by Archibald W. Knapp, May 16th, 1814, aged 25 years and 9 mo. son of Thomas and Polly Weller.

The circumstances respecting the death of Lieut. Weller, appear to be these. In the last war with Great Britain, Knapp enlisted as a soldier. The time having arrived for him to march on to the lines, he refused to go; Weller, with three or four soldiers, went to Knapp's residence in the lower part of New Milford, in order to take him by force. Knapp meeting him at the door, told him he had no ill will against him, but if he advanced any farther towards him he was a dead man. Weller disregarding his threats, advanced to take him. Knapp then shot him in the groin, which caused his death in about fifteen minutes. Knapp made his escape into the state of New York, where it is believed he now resides. It is stated that Knapp was arrested a few years since on account of the above, but was rescued out of the hands of the officer by some soldiers of an independent militia company, of which he was a member, who were out on a military review.

SALISBURY.

THE principal part of the township of Salisbury was sold by the governor and company of the colony of Connecticut, in 1737, at Hartford. It had been surveyed and divided into 25 rights in 1732, being at that time known by the government only as wild, unlocated land. Three of the rights were appropriated to public purposes; one for the support of schools, one for the first settled minister, and one for the support of the ministry. The charter of the town was given in 1745. "After it was located, and before the charter was given, it was known to the government by town M. Before this, it was known by no other than the Indian names *Weatog* and *Ousatonic*. It took its name from a Mr. Salisbury, who lived not far from the center of the town."*

It appears that about the year 1720, three families came and settled in that part of the town called *Weatog*. These were, one family of Dutchers, one of Whites, and one of Van Dozens. White was an Englishman, but had lived with and become connected in marriage with the Dutch. The other two were wholly of Dutch origin. About the year 1740, there were eleven English and five Dutch families, which were settled in different parts of the town. There were four families of Whites in *Weatog*; *Bebees*, not far from the falls; *Lambs*, at the forge in the hollow; *Herveys*, in the hollow; *Newcombs*, on the side of the mountain, east of the road that now leads from the hollow to Town hill; *Woodworths*, at the ore bed; *Allens*, on the road from the hollow to the meeting house; and *Baylies*, at the meeting house. These were the English families. The Dutch were, two Dutchers, and one Van Dozen, at *Weatog*; *Knickerbackers*, at the stone house, on the Cornwall road; *Cornelius Knickerbacker*, at the furnace; and *Jacob Van Dozen*, between the ponds, in the north part of the town.

The face of the township, at the period of its first settlement, wore rather an unpleasant aspect. In every fall of the year, it was burnt over, to destroy the old grass and other vegetation, and that there might be a fresh and tender crop the ensuing

* Rev. J. W. Crossman's New Year's discourse, 1803. The facts respecting the first settlement of this town were derived from this source. "It is currently reported, and by good authority, (says Mr. Crossman,) that this Mr. Salisbury, after moving from here, had an unruly servant girl who had run away from him; that he went after her, bound her with a rope, and tied her to his horse, then rode so as to pull her down, and drew her in such a cruel manner that she died in consequence of the abuse. The matter was taken up in the state of New York, and he, then in old age, was sentenced by the court to be hung when he should be a hundred years old. About four years ago, he arrived to this age. A reprieve was granted him for a certain time; and if he has not died lately, he is living to this day."

year. Fires also were often made to ring deer. These fires were made in a circular form, and all the deer included were driven by the fire to one place, where the hunters could easily kill them. A ring, for this purpose, was made in the northeast part of the town, and the fire ran with such rapidity, that an Indian lad was shut within the ring, overtaken by the fire, and burnt to death. These burnings, with the ponds, mountains and clefts of rocks, made the face of nature appear forbidding to those who were not apprised of the excellence of the soil.

Salisbury is situated in the northwest corner of the state; bounded N. by the towns of Mount Washington and Sheffield in Massachusetts, E. by the Housatonic, separating it from Canaan, S. by Sharon, and W. by the state of New York. Its average length is 9 miles, and its breadth about $6\frac{1}{2}$, comprising an area of about 58 square miles. The face of the township is broken, consisting of elevated hills, and deep and extensive valleys. The valleys are generally limestone, and the hills granite. It is one of the best towns for grain in the state. It is also excellent land for grazing.

Salisbury, in addition to its being one of the best agricultural towns in the state, is also much celebrated for its very rich and productive iron mines. Of these, the one known as the "Old Ore Hill," located two miles west of the *Wanscopommuc* Lake, has been worked since the year 1732. At that time, and for years afterwards, the ore was found lying near the surface of the earth, and was carried off in considerable quantities by those who desired to make use of it. The site of the "Old Ore Hill" was owned by one Bissell, who obtained the grant several years before the town was incorporated. About the year 1732, one Thomas Lamb obtained a grant of fifty acres of land, and erected the first forge built in Salisbury. His grant was situated in the southeast part of the town, on Salmon River, now called Lime Rock. From that period until the present time, the demands upon the "Old Ore Hill" have been constant. Within the last ten or twelve years, from five to six thousand tons of ore have been dug annually. The ore is sold at the mine for \$3 a ton. One dollar and twenty five cents of this money is paid to the proprietors of the ore bed as a duty. The other dollar and seventy five cents belongs to the digger, from whose pit the ore is taken. The first furnace erected at Salisbury was built about the year 1762, upon the outlet of the *Wanscopommuc* Lake, two miles east of the "Old Ore Hill." It is one of the oldest establishments in the county, and was erected by Messrs. Samuel and Elisha Forbes, Ethan Allen,* and a Mr. Hazeltine. During the Revolutionary war, cannon were manufactured at this furnace, for government; also cannon balls and bomb shells.† Col. Joshua Porter was at that time agent for the state of Connecticut, and superintended the castings.

The large and inexhaustible quantities of iron ore found in Salisbury, and the abundant supply of wood for charcoal, and other materials necessary for smelting the ore, together with the superior quality of iron, introduced other manufactures; and

* The hero of Ticonderoga. The articles of agreement entered into by these gentlemen are still extant upon the records of the town.

† The guns on board the U. S. frigate *Constitution*, used by Com. Truxton, in the capture of the French frigate *L'Insurgente*, were manufactured at the old furnace in Salisbury. The Salisbury iron has been, and is still used extensively in the U. States' and private armories.

iron has continued from that time the staple commodity of the town. There are at present in Salisbury,

4 blast furnaces,	2 sythe manufactories,
5 forges, with 20 fires,	1 hoe manufactory,
2 puddling establishments,	2 trip hammers,
1 screw shop,	2 cupola or pocket furnaces, for small
1 anchor shop,	castings.

From 5 to 600,000 bushels of charcoal are annually consumed at the different establishments. The puddling furnaces require from 2 to 3,000 cords of wood annually. The number of workmen employed in the different processes of preparing the material and manufacturing the iron, amount in all to about 500 men. The furnaces produce annually from 2,000 to 2,500 tons of pig iron. The forges and puddling establishments annually produce from 1,200 to 1,500 tons of wrought iron, which is used for anchors, car axletrees, musket barrels, and various other kinds of drafts. The Salisbury iron ore is the brown hematite, and yields about 40 per cent of pig iron. It is well known to manufacturers, and stands as fair in the market as any other iron in the country.

Southwest view of the Churches in Salisbury Center.

The above is a representation of the churches and some other buildings, in that part of Salisbury called "Salisbury Center." The Congregational church is seen on the right; the next building eastward, with a small cupola, is the academy; and still farther to the east is seen the Episcopal church. The public house seen opposite was constructed upon the frame of the old meeting house. This place is 50 miles from Hartford, 53 from New Haven, 8 from Sharon, and 34 from Hudson. The principal part of the iron ore obtained in this town, is about $2\frac{1}{2}$ miles s. w. of this place. There are four churches, viz., 2 Methodist, 1 Congregational, and 1 Episcopal; and five post offices, Salisbury Center, Lime Rock, Furnace Village, Falls Village, and Chapinville.

The people first met for public worship in a house near where the furnace now is, (in Furnace Village,) consisting of one room, only 26 feet by 15. This contained all the worshipping congregation in the town. After this, they met in the house of Mr. Lee, the first settled minister in the town: here they continued to worship till a meeting house was erected, about the year 1748. The place on which it stood was given by Col. Robert Walker for a meeting house, burying ground and green, upon the con-

dition that the burying yard be inclosed with a decent fence. In the house where they worshiped, there were two watchtowers made, and sentries placed in them on the Sabbath, to guard from the Indians. So late in the settlement of the town as this, an alarm was made of an Indian invasion. On this alarm, this preparation of defense was made. On the same occasion, a fort was built on the west side of the Furnace Pond, and another in the southeast part of the town. There were two other forts in Weatog, built, however, before this: these two were built in the form of block-house. One was the dwelling house of Mr. Dutcher, one of the first settlers, built in 1726, and was the first framed house in the town. The first white person born in the town was Hartman Van Dozen. The first buried, by the Congregational meeting house, was Jehiel Moore. The first buried on Town Hill was a Mr. Cory, who was killed at the raising of a house, as nearly as can be known, at the same instant the town established that as a public burying ground.

At the time of the first settlement in the town, there was then an Indian settlement at Weatog, consisting of seventy wigwags, all in a cluster. They were friendly and hospitable, especially to the whites, and encouraged their settlement. It is unknown how long they had made a stand at that place. Doubtless, in their most savage state, they had encamped in different places on the river, where they could hunt and fish. Long before there was any settlement of white people in the town, a Col. Whiting, with his regiment, pursued a band of Indians as far as the northeast part of the town, and there, on the banks of the Housatonic, defeated them with a dreadful slaughter. They lay at their ease, sporting and fishing, on both sides of the river. He, becoming acquainted with their situation, came upon them unawares, killed some, and put the rest to flight. About seventy Indian graves are visible there to this day. In the battle, but one of the whites was killed. When Col. Whiting drew near the place of battle, he commanded every man to throw away the priming in his gun, and to prime anew. All, except one, obeyed. He boldly declared himself willing to venture his life with the priming he then had. When they came upon the Indians, he leveled at one, snapped, and his gun failed to go off. The Indian instantly clapped up his piece, and shot him dead.*

The following singular occurrences are said to have taken place in this town, near the boundary between Connecticut and Massachusetts. The relation of these circumstances was obtained from Mr. S. Sage and his family, who are still living on the spot, (June, 1836,) and could be corroborated by great numbers of people now living.

"These occurrences commenced Nov. 8th, 1802, at a clothier's shop: A man and two boys were in the shop; the boys had retired to rest, it being between 10 and 11 o'clock at night. A block of wood was thrown through the window; after that, pieces of hard mortar, till the man and boys became alarmed, and went to the house to call Mr. Sage, who arose from bed and went to the shop, and could hear the glass break often, but could not discover from whence it came, notwithstanding the night was very light. He exerted himself to discover the cause without success. It continued constantly till day light, and then ceased till the next evening at 8 o'clock, when it commenced again, and continued till midnight; then ceased till the next evening at dusk, and continued till some time in the evening, and then ceased. The next day it commenced about an hour before sun-down, and continued about an hour, and then it left the shop and began at the dwelling house of Mr. Ezekiel Landon, 100 rods north, in the town of Sheffield. It continued several hours, and ceased till the next morning: when the family were at breakfast it began again, and continued two or three hours, and ceased till evening, when it began again and continued several hours, and ceased till the next morning, when it began again and continued all the forenoon, and then ceased altogether. The articles thrown into the shop were pieces of wood, charcoal, stone, but principally pieces of hard mortar, such as could not be found in the neighborhood. Nothing but stones were thrown into the house of Mr. Landon, the first of which were thrown into the door. There were 38 panes of glass broke out of the shop, and 18 out of the dwelling houses: in two or three instances persons were hit by the things that were thrown. What was remarkable, nothing could be seen coming till the glass broke, and whatever passed through, fell directly down on the window sill, as if it had been put through with a person's fingers, and many pieces of mortar and coal were

* Dr. Trumbull thinks there must have been some mistake about the name of the commanding officer in this expedition. He thinks it must have been Major Talcott who pursued and defeated the Indians in this region in 1676. This however is uncertain. The account given by Mr. Crossman is the one which is followed above.

thrown through the same hole in the glass in succession. Many hundreds of people assembled to witness the scene, among whom were clergymen and other gentlemen, but none were able to detect the source of the mischief. The more credulous readily believed it to be witchcraft, but it was generally thought to be some slight of hand, effected by a combination of individuals, as the windows were broken on different sides of the buildings nearly at the same time."

The following inscriptions were copied from monuments in the yard in Salisbury center.

In memory of the Rev. JONATHAN LEE, this stone, the fruit of conjugal affection and filial gratitude, is erected. He was born July 4th, A. D. 1718; graduated at Yale College, 1742; was a settled minister in this town 45 years; and died Oct. 8th, 1788, in the 71st year of his age. To the faithful discharge of the pastoral office he united the private virtues of the husband, the parent and the friend, and expired in the blessed hope of that Gospel to which he had freely devoted his life.

My flesh shall slumber in the ground
Till the last Trumpet's joyful sound,
Then burst the chains in sweet surprise,
And in my Savior's image rise.

The man is gone!

Mr. SAMUEL MOORE, the eminent Mathematician, died Feb. 20th, 1810, Æ. 75. His LIFE and SERVICES!!! *these* the Monument, this marble but the Tablet. Say then, He liv'd to benefit Mankind. Sway'd not by Trifles, But by Science led, as Land-Surveyor. So like in all things, Like correct, This the best image of the man.

Our Fathers rest from their Toils.

SHARON.

THE township of Sharon was surveyed by a committee, appointed by the General Assembly, in 1732. The committee were Edmund Lewis, Esq. Capt. Stephen Noble, and Mr. William Gaylord. The sale of the township was ordered in October, 1737, and a committee, consisting of Samuel Eels, Esq. Joseph Whiting Esq. and Capt. Isaac Dickerman, was appointed to give deeds to the purchasers.

The opinion of the committee who laid out the town, of the feasibility and character of the lands in this town, is expressed in the following words. "In the second township, we find two pieces, which may contain 500 acres. There is laid out in it of county grants 400 acres, and a considerable quantity of rough land, yet we find such a quantity of feasible land in it, and not so scattering as in the first township, (Salisbury,) as will in our judgment accommodate a sufficient number of inhabitants for a town."

Settlements commenced in the year 1739. The first white man who lived in Sharon was one Daniel Jackson. He was originally from New Milford, and probably came to this town by the way of the *Oblong* settlements in the state of New York. He purchased of the state about 400 acres of land, which lay in the southwestern part of the town, at a place now called *Hitchcock's corner*, and for which he obtained a *patent*. He stayed in town but a short time, and in February, 1739, sold his patent to *Garritt Winegar*, a Dutchman, and himself removed to Great Barrington, Mass. Mr. Winegar built the first grist mill in Sharon. The road which the first settlers traveled when they came to Sharon,

crossed the Housatonic river at *Chiddester's ferry*, near the present site of Lewis' bridge.

The following is a list of the first settlers, and the places from whence they removed.

Names.	Where from.	Names.	Where from.
Samuel Hutchinson, Esq.	Lebanon.	Jonathan Pettit,	Stamford.
Nathaniel Skinner, Esq.	Colchester.	Joseph Park,	Middletown.
John Sprague,	Lebanon.	Joseph Halsey,	Stamford.
John Pardee,	Norwalk.	Joseph Monroe,	Norwalk.
Thomas Skinner,	Colchester.	James Talmadge,	New Haven.
Samuel Calkin,	Colchester.	Daniel Hunt,	Lebanon.
Samuel Gillett,	Colchester.	Thomas Spafford,	Lebanon.
John Gould,	Hebron.	Samuel Comstock,	Lyme.
Niles Coleman,	Colchester.	Jonathan Dunham,	Colchester.
Nathaniel Skinner, jr.	Colchester.	Daniel Hamilton,	Lebanon.
Stephen Calkin,	Hebron.	Bartholomew Heath,	Lebanon.
James Smith,	Boiton.	Samuel Hurlburt,	Lebanon.
Ebenezer Mudge,	Colchester.	Thomas Heath,	Lebanon.
Jabez Crippen,	Colchester.	George Way,	Lyme.
William Goodrich,	Colchester.	John Gay,	Litchfield.

N. B. Mr. Gay was the man who was sent as an express from Litchfield to Hartford for assistance, when Harris was killed by Indians in 1721.

South view of Gov. Smith's house, Sharon.

The above is a south view of the residence of the Hon. John Cotton Smith, about one mile south of the Congregational church. The village of Sharon, which may consist of about 50 or 60 dwelling houses, in the vicinity of the churches, is situated principally on one street, on the eastern side of a beautiful valley, 16 miles from Litchfield, and 47 from Hartford. The central street runs about $1\frac{1}{2}$ miles from the boundary line of the state of New York. There is a pleasant and interesting village at "Hitchcock's corner," situated partly in New York and partly in Connecticut, in a beautiful and populous valley, and rich in the resources of agricultural wealth. Ellsworth society, in the south part of the town, was established in 1800.

Sharon is bounded N. by Salisbury, E. by the Housatonic river, separating it from Cornwall, S. by Kent, and W. by the state of New York. Its length is about 9 miles, and its breadth nearly six. The surface and soil of the township are strikingly diversified. The eastern part of the town abounds with elevated hills, and some mountainous ranges. This district affords good grazing; the soil is a gravelly loam, and considerably stony. The western part of the township, which borders on the state of New York, is part of an extensive valley, having a level or undulating surface, and a rich and fertile soil, and is considered one of the best tracts in the state for raising grain. Agriculture is the principal business of the inhabitants. Raising of sheep is followed to a considerable extent.

There were some Indian settlements in the northwestern part of the town, which had been visited by a Moravian missionary. The name of the missionary was David Bruce, who died and was buried on the Indian lands in Sharon, in the year 1724. His monument is still remaining. The Indians left the town soon after the settlers came on.*

The town was incorporated in October, 1739. The first town meeting was holden December 11, 1739. Capt. Dunham was *moderator*. Lieut. Jabez Crippen, Mr. John Sprague, Capt. Jonathan Dunham, *select men*. James Smith, *constable*. George Way, *grand juror*. Nathaniel Skinner, *town clerk*.

The first tavern was kept by Jonathan Dunham. The first minister was Peter Pratt, who was ordained on the last Wednesday of April, 1740: he was dismissed in 1745, for *intemperance*. The first meeting house was built of logs, in 1741. Another meeting house was commenced in 1742, which stood about 25 years.

The second minister was Rev. John Searle. He was from Simsbury, and was ordained on the first Wednesday of August, 1749. He was dismissed in 1754, on account of feeble health. He recovered his health, however, and was afterwards settled at *Stoneham*, Massa-

* "Considerable numbers of the Indians resided in the western and northwestern parts of the town, which are watered by two large ponds, and by the *Ten Mile river*, which touches the western borders of the town. Their principal village was on the east side of the *Indian pond*, so called, which is a body of water lying partly in the state of New York, and partly in Connecticut. On a romantic and beautiful plain, lying between this pond on the west, and the *Indian Mountain*, a spur of the *Taghannuck* range, on the east, was a numerous village, where the natives continued to reside for many years after the whites came into the town. This tribe was visited by the Moravian missionaries, and one of them died and was buried there. He died in 1749, and a plain stone was placed over his grave, with the following inscription:

'David Bruce of Edinburgh in Scotland, Minister of The Brethren's church among the Indians. Depart'd 1749.'

"N. B. The grave stone is broken into several fragments, and has long since been removed from the grave. By putting the several parts of the stone together, the foregoing inscription can be easily detected.

"The letters are Roman characters, and are become nearly illegible. Tradition says very little of the man, and he had probably been in the place but a short time when he died. It is hoped that a more suitable monument may soon be erected to the memory of this self-denying and elevated missionary. The deed from the Indians, by which they sold their lands to *Thomas Barnes*, was signed by *Nequitimaug* and *Bartholomew*, two of the principal men of the tribe."—For this and other communications respecting the history of Sharon, the author would here express his acknowledgments to Charles F. Sedgwick, Esq. of Sharon.

chusetts, and lived to a great age. It is said by the late Dr. Dwight, in his *Travels*, that Mr. Searle and the late Judge Noble of Williamstown, Mass., were the first persons who ever went to the top of *Saddle Mountain*, the highest mountain in Massachusetts. He is represented as a man of mild and unassuming deportment, much given to metaphysical investigation, and he left Sharon, carrying with him the affectionate regards of his people.

The third minister was Rev. Cotton Mather Smith, who was settled in August, 1755. He was from Suffield, and spent a long life in the ministry in Sharon. Probably no minister ever had in a greater degree the confidence and affection of his people, than Mr. Smith. He is never spoken of at this day, by those who knew him, but with the most unqualified respect and veneration, and the memory of his virtues and his excellence is now, at the distance of more than thirty years from his death, cherished with the most unfeigned satisfaction. He was the father of Hon. J. C. Smith, late governor of this state.

The Episcopal society was established in 1754. Mr. Ebenezer Dibble was the first minister of that order in the town. He was succeeded by a Mr. Davies, who died in early life. For a number of years the worship of this denomination was suspended, but within a few years they have erected a handsome church, and now maintain regular worship.

A new Congregational meeting house was erected in 1767; this was used by the society until 1824, when the present brick church was erected. In the latter part of July, 1770, Rev. Geo. Whitfield passed through this town on a preaching tour. There was considerable opposition to his being admitted into the meeting house, and arrangements had been made to hold the service in an orchard, still standing near the meeting house, in case he should be refused. Mr. Smith however invited him into the pulpit, though strongly opposed by a considerable number of influential men. An immense congregation from this and the neighboring towns filled the meeting house to overflowing. His text was, "Marvel not that I said unto you," &c. Having announced his text, he proceeded to discourse on the doctrine of the new birth with astonishing power and eloquence, and the congregation were much moved by the power of the truth and spirit of God. The concluding words of his discourse were a quotation, with a little variation, from the last verse of the 4th chapter of Solomon's Song: "Awake, O north wind, and come, thou south; blow upon *this* garden, that the spices thereof may flow out. Let my beloved come, into *this* garden, and eat his pleasant fruits." Many of the inhabitants of Sharon followed him for several successive days, to hear the word of life from this devoted minister of the cross.

The first preaching in this town by clergymen in the Methodist connection, was in 1787. In the following year a society was formed. Camp meetings were holden in this town in 1805 and 1806. Their first meeting house was erected in 1807. In consequence of the increase of the congregation, a large and beautiful house is now being erected by the society.

Among the early settlers of the town was *John Williams, Esq.*, who spent his life here, and who was a man of much respectability and influence in this town and county. He was from Lebanon, and came into the town in 1744. He was educated at Yale College, and studied medicine, but it was not known that he ever engaged in professional business. He was soon appointed town clerk, which office he held for more than 30 years. He was the first judge of probate for the district of Sharon, and one of the judges of the first county court for Litchfield county, of which court he was for a number of years the chief judge. So great was the estimation in which he was held by his fellow citizens, that he was elected a representative from the town of Sharon 27 times. He also commanded a regiment of colonial militia. There are those now living, who have a distinct recollection of his personal appearance, and of the very influential character which he sustained in the affairs of the town. He is represented as a man of tall and slender frame, but of great gravity, and of very dignified deportment. His word was law, and it was in his presence that evil doers felt terror. He died March 14, 1774, in the 60th year of his age.

This town took an active part in favor of the country in the Revolutionary struggle. Mr. Smith, the minister, was an ardent patriot, and in his public ministrations there was mingled much of the stirring patriotism of the times.* A large number of men from this town were constantly on duty; four of whom, to wit, Adonijah Maxim, Daniel Goss, Wm. Gray, and Samuel Lewis, were taken prisoners with Ethan Allen, in his rash attack on Montreal in 1775, and with him were carried to England in the fall of that year. They were brought back to New York in the following spring, from which place the prisoners above named made their escape. Of this number Mr. Maxim is still living. In the campaign of 1776, Parson Smith went with the army to the north as chaplain.

One soldier, Alexander Spencer, went with Colonel Arnold in the expedition to Quebec, through the wilderness of Kennebeck, but he died on the march. Charles Gillet was killed near the Cedars, in the campaign of 1776, in a skirmish at that place. Daniel Wood, Nathaniel Buel, Josiah Coleman, Jabez Jennings, Asahel Somers, John Randall, jr. and Thomas Ackley, were taken prisoners at Fort Washington, of whom Wood and Coleman died during their captivity. William Goodrich was killed at the battle of Brandywine. Samuel Elmar, jr. was killed at the skirmish of Compo bridge, and John Hollister was killed at the battle of Stillwater, Oct. 7, 1777.

In November, 1784, the town was visited with the small pox, and a large number of persons, as many as 30, died in the course of two months.

EXTRACTS FROM NEWSPAPERS.

From the Connecticut Journal. Sharon, Feb. 15, 1781.

This morning, the wife of William Hendrick Levo, was found dead in the street, a sucking child, about three months old, lying dead by her side: being under straitened circumstances, she went to town, about three miles, in order to procure something for

* The approach of a large British army from Canada, under Gen. Burgoyne, and the expedition up the North River, under General Vaughan, in 1777, filled the whole country with terror and despondency, and created strong fears and doubts as to the issue of the controversy: the firmness and confidence of Parson Smith, however, remained unbroken, and his efforts to revive the drooping spirits of his people were unremitted. In the month of October, he preached a sermon from these words: "Watchman, what of the night? The Watchman saith, the morning cometh." In this discourse he dealt much upon the indications, which the dealings of Providence afforded, that a bright and glorious morning was about to dawn upon a long night of defeat and disaster. He told the congregation, that he believed they would soon hear of a signal victory crowning the arms of America; and he exhorted them to trust with an unshaken and fearless confidence in that God, who, he believed, would yet crown with success the efforts of the friends of liberty in this country. Before the congregation was dismissed, a messenger arrived, with the intelligence of the surrender of Burgoyne's army. Parson Smith read the letter, conveying the intelligence, from the pulpit, and a flood of joy and gratitude burst from the congregation.

the comfort of the family, and carried the little infant in her arms. On her return, the evening before, she went into a house to warm: the weather being extreme cold, she was prevailed to tarry, though very much against her inclination; being greatly exercised for her children she had left at home, the eldest not being above ten years, her husband gone to mill, and she was doubtful of his return. In the night she arose, unknown to any in the family. She had traveled homewards about three quarters of a mile, and was found dead in the manner already described, within about ten rods of an house. Some were ready to conclude she had made too free use of strong drink, which occasioned her perishing in this manner; but upon a careful enquiry it appears to be without foundation, and that her death was occasioned by the extremity of the season.

Last Thursday evening arrived in this town, (Litchfield,) from Hartford, Colonel Samuel Canfield and Uriah Tracy, Esq. with orders from the General Assembly to repair to the town of Sharon, and put a stop to the insurrection that appeared to be raising in that town. The same evening they set off, accompanied by the sheriff and one of his deputies, and arrived at Sharon about day break, and soon arrested five persons, who were supposed to be the principal actors and abettors in the insurrection. * * * * * They were conducted to, and safely lodged in our gaol, on Saturday last, in order for examination. It is hoped the early and spirited exertion of our Assembly, will prevent any further disturbance in that town. Much praise is due the gentlemen employed on the occasion, for their prudence, humanity, and judicious proceedings. *May 21st, 1787.*

The following inscriptions are from monuments in the grave yard north of the Congregational church.

The Rev. COTTON MATHER SMITH, born in Suffield, Oct. 16th, 1731, ordained in Sharon, Aug. 28th, 1755, died Nov. 27th, 1806, in the 76th year of his age, and 52d of his ministry. Sound in the faith, in life and conversation as becometh the gospel; in doctrine incorrupt; in manner forcible and persuasive. A fond husband, a tender father, an unvarying friend; having for more than *fifty years* earnestly contended for the faith once delivered to the saints, he is gone to render his final account to the great Captain of his salvation. People of his charge! he still speaks to you in a voice awful as Death, solemn as the grave. Prepare to meet your God.

In memory of Mrs. BULA MOULTON, the amiable consort of Capt. Wm. Moulton, who having endeared herself to her friends and acquaintance by an exemplary and virtuous life, died a few days after the birth of her only child, July 5th, 1783.

Could modest worth elude ye grasp of death,
This virtuous fair had ne'er resign'd her breath.
Could beauty's grace, or virtue's sacred charm;
Could nuptial bliss the cruel foe disarm;
Could ye deep anguish of an husband's love,
Or infant cries, the fatal sting remove;
She ne'er had wing'd ye long, ye glorious flight
To seats of bliss, to realms of sparkling light.

TORRINGTON.

TORRINGTON was a township which was allotted to the Windsor proprietors by the Legislature. It was named Torrington at the session in May, 1732. "The number of proprietors was one hundred and thirty six. At their first meeting in Windsor, Sept. 10th, 1733, they voted to make a division of lots in Torrington, and that there should be one acre to the pound on the list of each proprietor. A survey of the town was completed in 1734. In 1737, the proprietors voted a second division of the lands, and to lay out one acre to the pound on the list of each proprietor. About five years after, another division was voted.

The first settler that moved into the township was Ebenezer Lyman, from Durham, with a young family, consisting of three persons only; this was in 1737. Several young men had, however, labored in the township the summer previous. Jonathan Coe was the second person who moved into the place; he also was from Durham. The principal settlers were from Windsor and Durham. The settlement of this town was slow. When the first minister, the Rev. Nathaniel Roberts, was ordained, in the summer of 1741, there were but fourteen families in the town. As this was considered a frontier settlement at this time, a fortification was erected not far from the center of the town. It was incorporated in 1741.

Northeast view of Wolcottville, Torrington.

Torrington is bounded north by Winchester, west by Goshen, east by New Hartford, and south by Litchfield and Harwinton. It is about six miles square, containing upwards of 23,000 acres. The surface of the town is uneven, with hills and valleys; the soil is mostly fertile, and well adapted for grazing. The township is well watered by the east and west branches of the Waterbury or Naugatuc river. There are within the limits of the town 3 Congregational churches, 1 Baptist, and 1 Methodist. There are three post offices, viz. one in the first society, called the Torrington office, one in Torrington, the eastern section of the town, and the other in the village of Wolcottville.

Wolcottville, the principal village in the town of Torrington, is situated in a valley near the southern boundary of the town, at the junction of the two branches of the Waterbury or Naugatuc river, 26 miles from Hartford, 40 from New Haven, and 17 from the New Haven and Northampton canal at Avon. The village consists of about 40 dwelling houses, a handsome Congregational church, a three story brick building, used as a house of worship by various denominations, (also used for an academy,) 4 mercantile stores, 2 taverns, post office, and an extensive woolen factory. The engraving shows the appearance of the

village from the Hartford turnpike, looking westward. The Congregational church stands at the northern extremity of the village, but owing to the limited extent of the engraving, it could not be introduced. The brick building used for a house of worship is on the left, over which is seen the Litchfield turnpike, passing over the heights westward. The woolen factory is the large building with a spire. This factory went into operation in 1813. One of the principal owners was the late Oliver Wolcott, Esq. formerly governor of the state: the village owes its rise principally to this establishment. A short distance westward of the factory, an establishment for the manufacture of brass is now erecting: it is believed to be the only one of the kind at present in the United States.

WARREN.

WARREN was formerly a part of Kent. It was incorporated as a town in 1786. It is bounded n. by Cornwall, e. by Litchfield, s. by Washington, and w. by Kent. Its average length from north to south is five miles, and its average breadth about four miles and a half. The township is hilly and mountainous, and its rocks and soil are of a granitic character. The agricultural productions are grass and some grain. Butter and cheese are made, and beef and pork raised by the inhabitants. The town is watered by the Shepaug, a branch of the Housatonic. Raumaug pond, a considerable body of water, is situated partly in this town, and partly in Washington.

The population of the town in 1810 was 1,096; in 1830 it was reduced to 986. The central part of the town is 8 miles west from Litchfield, 38 from Hartford, and 45 from New Haven.

WASHINGTON.

WASHINGTON was incorporated by the General Assembly in 1779. Judea, the first society in this town, was incorporated by the General Assembly in 1741; before this period it was included in the ecclesiastical society of Woodbury. The first settlement in the limits of Judea was made by Joseph Hurlburt, about the year 1734. "The first sermon preached in this society was by Mr. Isaac Baldwin, of Litchfield, who afterwards relinquished the ministry, and became the first clerk of the Court of Common Pleas in the county of Litchfield. All the inhabitants attended on this occasion, and were accommodated in a small room in Mr. Hurlburt's dwelling house.

The Rev. Reuben Judd, the first minister settled in this society, was ordained Sept. 1st, 1742. The ordination was attended in a grove, and the first church was formed, consisting of 12 male members, on the same day. The same year, the first church was built, by eight proprietors. The second church was raised in 1751. In July, 1800, this church was set on fire by an insane man, named *David Titus*; but by

a seasonable discovery and the exertions of the people, the flames were extinguished within an hour. In April, 1801, the same building was again set on fire by the same man, it being unknown till this time that he did the mischief before. The fire was put in the steeple about midnight, and had made such progress before it was discovered, that no exertions were made to extinguish it. The people were scarcely able to preserve the neighboring buildings from destruction. As no alarm could be given by the bell, many of the inhabitants, and some within half a mile, were ignorant of the disaster till the next morning.

Washington is about 10 miles from Litchfield, and is 40 miles s. w. from Hartford, bounded n. by Warren, w. by New Milford and Kent, e. by Litchfield and Bethlem, and s. by Woodbury and Roxbury. Its average length from north to south is about 7 miles, and its breadth more than 5. A large part of this town is elevated and mountainous. Limestone abounds in many of the valleys. Several quarries of marble have been worked, from which considerable quantities have been raised. Iron ore has been found in various places. Ochre, fuller's earth, and white clay, have also been found. The town is watered by the Shepaug river, a branch of the Housatonic, which passes through the whole length of the town, dividing it into two nearly equal parts. The town is divided into two societies, Judea and New Preston. There is in Judea, or Washington, as it is called, about two miles southeast of the center, a place called "Steep Rock." From the top of this eminence, which is easy of access, the beholder has one of the most interesting and beautiful prospects in the state. The scene presents an area, in the form of an amphitheater, the sides of which are covered with a dense forest. The Shepaug river is seen flowing in a beautiful circle at the base of the bluff. Within the circle of the river, there are several cultivated fields, affording a beautiful landscape to the beholder.

This town has been the theater of one of the most atrocious murders ever committed in New England. The murderer was a man, or rather fiend, by the name of Barnett Davenport. From his own confession, it appears that his parentage and early education were exactly fitted to produce his wicked life and his tragical end. Untutored and unrestrained by parental government, he was left to grow up at random. In the morning of life, no morality was inculcated upon him, and no sense of religion, either by precept or example. On the contrary, he was, from early years unprincipled, profane, and impious. Before he was nine years old, he was expert in cursing and swearing, and an adept in mischief. At 11 years he began to pilfer. At 13 he stole money. At 15 he entertained thoughts of murder, and rapidly waxed harder and bolder in wickedness. At 19, he actually murdered a family in cold blood. As a friendless wandering stranger, he was taken into the house of Mr. Caleb Mallory, and treated with the utmost kindness, in December, 1779. Scarcely two months had elapsed, before the murder was determined on. The night of Feb. 3d, 1780, was fixed on to execute the horrid purpose. With a heart hard as adamant, he lighted a candle, went into the lodging room of his benefactors, and beat them to death with a club. A little grandchild being with its grand parents shared the same fate, and two others were left in a sound sleep to perish in the flames. Having kindled a fire in three of the rooms, he fled, after robbing the house of its most valuable articles. But from an accusing conscience, and from the hand of justice, which followed hard upon his steps, he was unable to flee. He was taken and executed at Litchfield in the May ensuing.

WATERTOWN.

WATERTOWN was formerly a parish in Waterbury, by the name of Westbury. It was incorporated as a town in 1780. It is bounded n. by Litchfield, e. by the Naugatuc river, separating it from Plymouth, w. by Bethlem and Woodbury, and s. by Middlebury and Waterbury. It is about $6\frac{1}{2}$ miles in length, and 4 in breadth. The township is generally uneven, or rather hilly; but some sections are level. The prevailing soil is a dry gravelly fertile loam, and best adapted to grazing, but the different grains common to this part of the country are cultivated. Steel's Brook, a sprightly stream, passes through the central part of the town, and for a mile below and some distance above the center of the town, a chain of rich meadows, though small in extent, border the sides of this stream.

Northeastern view of Watertown, (central part.)

The above is a northeastern view of the Congregational and Episcopal churches in Watertown. There is a little cluster of houses a few rods south of the churches, which are not seen in the engraving. It is stated that there was a very large quantity of heavy timber used in the construction of the Congregational church seen in the engraving. The builders were obliged to get assistance from *five* towns, in order to raise it. This place is 10 miles s. e. from Litchfield, 30 from Hartford and 26 from New Haven. The town was first settled about three miles north of the churches, and about half a mile west of the Litchfield road. The first family or families, were of the name of Guernsey or Garnsey, from Milford. It was considered such an undertaking, at that period, that prayers were put up for their safe arrival, &c. This town has been noted for the size of its forest trees. It is said that one of the first settlers, having no shelter for the night, peeled off the bark of one of the trees he had felled, and laid down upon the inside. In the

morning when he awoke, he found the bark rolled up so closely that it was with some difficulty he could extricate himself. It is also related, that one of the first settlers, by the name of Brown, was so straitened in his circumstances, that he sold one of his children (a son) to one of his neighbors, for a barrel of pork, in order to obtain something for the rest of his children to subsist on. Some of the most respectable inhabitants of the town are the descendants of this child. Mr. Trumbull, the first minister of the town, was ordained at the house of Deacon Hickox, about two miles eastward of the churches. The widow Judd, now [1837] living, at the age of almost 100 years, was baptized by Mr. Trumbull, a few days after his ordination, being the first child baptized in the place.

North view of the Trumbull House, Watertown.

The above is a representation of the house where John Trumbull, Esq. the celebrated author of *M'Fingal*, was born. This house is now owned by Mr. Pitcher, and is about half a mile below the Congregational church, on the east side of the Waterbury road. A large elm is seen in the distance. The business part of the town was formerly near this spot. The churches were first erected near the burying ground.

John Trumbull, the author, was the son of a clergyman of the same name, and born April 24th, 1750. He was an only son, and of a delicate and sickly constitution. He received the strictest care from his mother, who was a woman of superior education for those of her day; young Trumbull gave early manifestations of his poetical turn. He was educated at Yale College. In 1771, he with his friend Dr. afterwards President Dwight, were chosen tutors. In 1773, he was admitted to the bar in Connecticut, but soon removed his residence to Boston, where he continued his studies in the office of John Adams, afterwards President. The Revolutionary struggle was then commencing, and Trumbull entered with warmth into the controversy. He returned to Connecticut, and began practice at the bar in New Haven, in 1774. In 1775, he wrote the first part of his *M'Fingal*, which was immediately published at Philadelphia, where Congress was then sitting. He removed to Hartford in 1781, where he fixed his residence. The poem *M'Fingal* was completed and published in Hartford, in 1782. In 1801, he was appointed judge of the superior court of Connecticut, which office he held till 1819. In 1825, he removed to Detroit, to reside with his daughter, where he died in 1831.

"*M'Fingal* is a burlesque poem, directed against the enemies of American liberty, and holding up to particular scorn and contempt, the Tories and the British officers, naval, military, and civil, in America. It is a merciless satire throughout: whatever

it touches, it transforms; kings, ministers, lords, bishops, generals, judges, admirals, all take their turn, and become in the light or associations in which they are exhibited, alternately the objects of our merriment, hatred, or scorn. So wedded is the author to his vein of satire, that even M'Fingal, the friend of England, and the champion of the tories, is made the undisguised scoffer of both them and their cause. The story of M'Fingal is this: the hero, a Scotchman and justice of the peace in a town near Boston, and who had two gifts by virtue of his birth, "rebellion and the second sight," goes to a town meeting, where he and one Honorius make speeches at each other through two whole cantos. At the end of the second canto, the town meeting breaks up tumultuously; and the people gather round a liberty pole, erected by the mob. Here M'Fingal makes a virulent speech of near two hundred lines, at the end of which he is pursued, and brought back to the liberty pole, where the constable is swung aloft, and M'Fingal tarred and feathered. M'Fingal is set at liberty; he goes home, and at night makes a speech to some of his tory friends in his cellar, extending through the rest of the poem, leaving only room to tell that the mob broke off his address in the middle by assaulting the house, and M'Fingal escaped to Boston. These are all the incidents, and this the whole story of a poem of four cantos, and consisting of some thousands of lines.*

The following inscription is copied from a monument in the yard a little distance north of the Trumbull house.

Sacred to the memory of the Rev. John Trumbull, A. M. Senior Pastor of the church of Christ in Westbury; and one of the Fellows of the corporation of Yale College, who died Decr. 13th, 1787, in the seventy third year of his age, and the forty eighth of his ministry. If distinguished learning, industry and abilities; the most unaffected piety of heart; the firmest attachment to the doctrines of the gospel; the most unblemished moral character; a studious attention and friendship to the people of his charge; the most cheerful hospitality to his friends; and ardent charity to the poor; which rendered him respectable in life, and in a firm reliance on the merits of the Redeemer, raised his mind above the fear of Death; can render the memory of the deceased dear to the survivors, and afford a worthy example to posterity; Go reader and imitate his virtues! Behold the upright man! His end is Peace.

WINCHESTER.

THIS township was laid out into distinct lots in 1758. It belonged to patentees in Hartford, was incorporated as a town in 1771, and the year after the Rev. Joshua Knapp was ordained the first minister. Winchester is bounded n. by Colebrook, w. by Norfolk and Goshen, e. by Barkhamsted, and s. by Torrington. It is 6 miles in length, and more than 5 in breadth. "The township is situated in the evergreen district of the state," and is hilly and mountainous. Its geological character is primitive, the rocks and stones consisting of granite, mica slate, and other primitive formations; the soil is a hard, coarse, gravelly loam. The lands afford very good grazing, and the making of butter and cheese constitutes the principal agricultural interest in the town. There are 4 houses of worship, 2 Congregational, 1 Methodist, and 1 Universalist.

The borough of Clifton, (formerly Winsted, West village,) in the town of Winchester, was incorporated in 1832. It is a flourishing village, consisting of about 60 or 70 dwelling houses, and 4 mercantile stores. The village is principally built in a narrow valley, on the banks of a mill stream, called Mad river, which is a tributary of Farmington river. The valley at this place is but barely of sufficient width to admit of a street, with buildings on each side, the ground rising immedi-

* Kettell's Specimens of American Poetry, vol. I.

North view of Clifton, Winchester.

ately on every direction. Westward of the main street in the village, a road passes up a steep hill for nearly a quarter of a mile, where, upon an elevated plain, is an interesting lake or pond, which is one of the largest bodies of water in the state, being $3\frac{1}{2}$ miles in length and three fourths of a mile in breadth. The outlet of this lake presents a novel scene; it consists of a small stream, compressed within a narrow channel, and literally tossed from rock to rock till it unites with Mad river. Most of the manufacturing establishments in the village are situated on this outlet, upon which there are some of the best natural sites for hydraulic works in the state. In this village are four large sythe factories, 1 machine shop, and 5 forges. The ore to supply these forges is brought from Canaan, Kent, and Salisbury. There are two churches in the village; 1 for Methodists and 1 for Universalists. The Methodist church is the building seen in the central part of the engraving, with a spire. The Congregational church, in the central part of the town, is situated about 4 miles southwest of the village.

The following shows the appearance of Winsted, (or the East village,) as seen from a sandy bluff, directly south of the village. In this place is an extensive clock factory, 1 axe factory, owned by an incorporated company, and one large woolen factory, and an iron foundry. The Congregational church is seen in the central part of the engraving, distant from the Methodist church in Clifton about three fourths of a mile. The clock and axe factories are situated north of the church, in that part of the village called *Whitingville*; the clock factory is just seen in the distance, near the church; the post office is in this village. Winsted is 26 miles from Hartford, 49 from New Haven, 17 from Litchfield, 9 from Wolcottville, and 6 from Hitchcocksville.

Winchester (as has been stated) lies within the "evergreen district," so named from the forests of hemlock and other evergreen trees with

South view of Winsted, Winchester.

which it abounds. These "Green Woods" present one of the most impressive scenes which can be found in an American forest. The branches of the trees are thickly covered with a deep green foliage, closely interwoven over head, nearly excluding the light of the sun. The scene forcibly reminds the contemplative traveler of the words of Thomson, in his celebrated hymn :

"Oh, talk of Him in solitary glooms!
Where, o'er the rock the scarcely waving pine
Fills the brown shade with a religious awe."

WOODBURY.

"THE Legislature, in 1672, granted liberty to Mr. Sherman, Mr. Wm. Curtiss, and their associates, to make a plantation at Pomperaug. Such a number of settlements had been made there in about two years, that the Assembly in May, 1674, enacted that it should be a town by the name of Woodbury."

The tradition is, that the first settlers were sent here by Governor Winthrop; they were directed to follow the Pomperaug river up eight miles from its junction with the Housatonic, in order to find the place designed for their settlement. When they came to the Pomperaug, the stream appearing so small, they concluded they were mistaken in the river, and accordingly they proceeded on to the Shepaug, which they followed up the distance of eight miles to Roxbury valley. This place not answering the description given of Pomperaug, they crossed over the wilderness eastward to Woodbury valley, which they found was the object of their pursuit. The first house in the town is said to have been built about 20 rods west of the South Congregational church. The settlers by the name of Judson set themselves down in what is

now called Judson Lane; the Shermans settled about one mile southeast of the Episcopal church, now called Middle quarter; the Martins located themselves about three fourths of a mile northerly; the Miners placed themselves on the west side of the Pomperaug. The Rev. Zachariah Walker* was the first minister in the place. He was also the first minister at Jamaica, in Long Island. He probably came from England before he was ordained, and it is supposed he preached at Jamaica as a licentiate. It is believed that he removed to Stratford in 1668, and from thence to Woodbury.†

Woodbury is bounded n. by Bethlem, e. by Watertown and Middlebury, w. by Roxbury, and s. by Southbury. It is about 7 miles long from north to south, and averages nearly six miles in breadth. The soil is generally warm and fertile. The central part of the town consists of a village of 75 or 80 houses, and is pleasantly situated in a level valley, near the confluence of a number of small streams, which form the Pomperaug. It is surrounded by high hills on every side, forming a kind of amphitheater. The hill lying immediately east from the main street is of considerable elevation, and on its southern descent, fronting the west, the rocks descend perpendicularly, presenting a front similar to those of the East and West Rocks, near New Haven, though upon a much smaller scale. This is true to some extent on the eastern side of this range of rocks. They form a very striking feature in the landscape, as you enter the village. There are 4 houses of worship in the village, 2 Congregational, 1 Episcopal, and 1 Methodist. Woodbury is 25 miles from New Haven, 36 from Hartford, 15 south from Litchfield, and 21 from Danbury. There are in the town at present, 1 tin ware, 2 nail, and 3 satinet factories.

The following is a representation of what is called Bethel Rock, being it is said a place resorted to for religious meditation and prayer. It seems to have been brought into notice by the "Legend of Bethel Rock," published in the 1st vol. of the "Legendary," printed in Boston in 1828. This place is on the eastern side of the ledge of rocks parallel with the main road, as you enter the village from the south. It is situated about half a mile eastward from the Episcopal church. This rock (or rocks) is perhaps 30 or 40 feet in height, projecting over eastward three or four feet, and affording a kind of shelter. About 80 rods southeast of this place, a few rods eastward of a road, a monument stands alone, a representation of which is given on the opposite page.

* Wood's History of Long Island.

† The following tradition is preserved respecting the occasion of Mr. Walker's coming to Woodbury. At the period of the first settlement of Woodbury, there were two licentiates preaching in Stratford, Mr. Walker and Mr. Reed. As there was some controversy who should leave and go with the Woodbury settlers, the two licentiates were requested to deliver a discourse on the day when it was to be decided, Mr. Walker in the forenoon, and Mr. Reed in the afternoon. Mr. Walker took for his text, "What went ye out into the wilderness for to see a *reed* shaken with the wind?" He enlarged upon the circumstance and propriety of a reed being found in the wilderness, &c. Mr. Reed in the afternoon took for his text, "Your adversary the devil *walketh* about," &c. In the course of his observations, he stated that the great adversary of men was a great *walker*, and instead of remaining with the brethren, ought to be kept *walking* at a distance from them.

Southeast view of Bethel Rock, Woodbury.

Grave of Fisher Hartshorn, Woodbury.

The following is the inscription—"This monument is erected by the Society of Hatters, to the memory of their brother, *Fisher Hartshorn*, a native of Charlestown, Mass. who fell a victim to the small pox, and was buried in this place, Feb. 1825, aged 21 years.

In this retired and lonely grave,
The stranger is at rest;
His spirit gone to him who gave,
To dwell among the blest."

This young man came from New York. He had been in Woodbury but two or three days, when he broke out with the small pox. He was removed to an old house, formerly standing near the monument, where he died. The civil authority of the town, fearing that the contagion might spread, refused to have the body buried in the common burying ground, although his brethren, the hatters, offered to do it at midnight. With a spirit honorable to themselves, and to the body of which they were members, the hatters buried the body of their brother, and raised a monument to his memory.

MIDDLESEX COUNTY.

MIDDLESEX COUNTY is bounded n. by Hartford county, e. by Hartford and New London counties, s. by Long Island sound, and w. by New Haven county. Its mean length from north to south is about 25 miles, and its breadth nearly 14 miles. The general surface of the county is uneven. The soil, adjacent to the Connecticut river, and much of the upland, is generally good. The county, being intersected by Connecticut river, possesses important commercial and other advantages. Much ship building is carried on, and formerly the foreign trade was quite extensive; the coasting trade is still very great. Manufactures are flourishing, particularly in and near Middletown. Great quantities of free stone are quarried at Chatham; also considerable quantities of granite at Haddam. This business employs a considerable number of vessels to transport the stone to various places in the Union. The shad fishery in Connecticut river, is an important branch of business. Considerable quantities of wood have been exported from this county to the New York market.

This county was incorporated in 1785, previous to which it belonged to the counties of Hartford, New London and New Haven; principally to Hartford.

The following is a list of the several towns in the county, with their population in 1830.

Middletown, . . . 6,892	Chester, . . . —	Killingworth, . . . 2,484
Haddam, . . . 3,025	Durham, . . . 1,116	Saybrook, . . . 5,018
Chatham, . . . 3,646	East Haddam, 2,664	

Population of the county in 1820, 22,405; in 1830, 24,845.

MIDDLETOWN.

IN March, 1650, a committee was appointed to explore the lands in Mattabesett, the Indian name for Middletown. This committee reported that subsistence might be obtained in them for *fifteen* families. In the course of the year a settlement commenced near the Connecticut, north and south of the Little river. A larger number of families than the committee contemplated was soon in the town, who were invested with town privileges in September of the succeeding year. In November, 1653, the place was called Middletown. In 1654, there were probably about thirty families; in 1670, the number of families was fifty two. The principal planters were from England, Hartford, and Wethersfield. The greatest number was from Hartford. There was a considerable accession from Rowley, Chelmsford, and Woburn, in Massachusetts.

The township embraces four divisions, viz. Middletown, North society or Upper Middletown, Middlefield and Westfield parishes, the last three of which appear to have derived their names from their relation

to the first. The settlement in the parish of Middlefield began about the year 1710: the earliest settlers there were Samuel Allen, Benjamin Miller, and Samuel Wetmore, who removed from the first society. The first white inhabitant of Westfield was Edward Higby, a native of Long Island, who settled about 1712, at the foot of that bluff, which from him is called Higby mountain.

"A portion of the lands in Middletown were given by Sowheag, the great sachem of Mattabesett, to John Haynes, for some time governor of Connecticut, probably before any settlement was made in the town. On the 24th of January, 1662, Sepunnemo and other chiefs, knowing the gift of Sowheag to Mr. Haynes, sold to Samuel Wyllis and others, doubtless as agents of the colony or town, all the remaining lands in Middletown, including Chatham, extending six miles east of the river, and as far west as the Court had granted the bounds of the town; excepting 300 acres, which they reserved for the heirs of Sowheag and Mattabesett Indians, to be laid out east of the river; and a tract on the west side, previously laid out for Sawsean, to remain for his heirs for ever." A reservation also appears to have been in the neighborhood, now called Newfield, where the Indians held lands as late as 1713.

Sowheag was a powerful sachem. His fort or castle was on the high ground in the west part of the city of Middletown, still called, from this circumstance, Indian hill, about three fourths of a mile northwest of the court house, where he was able, by means of his whistle, to call around him many warriors, it is said to the number of 500, whose wigwams were thick on both sides of the Connecticut eastward. His dominion extended not only over these and other Indians in Middletown and Chatham, but over the Piquag or Wethersfield Indians, whose sagamore, Sequin, was subject to him; and as a part of the original township of New Haven was purchased of Montowese, Sowheag's son, it is probable that his dominion embraced some of the Indians in that town.

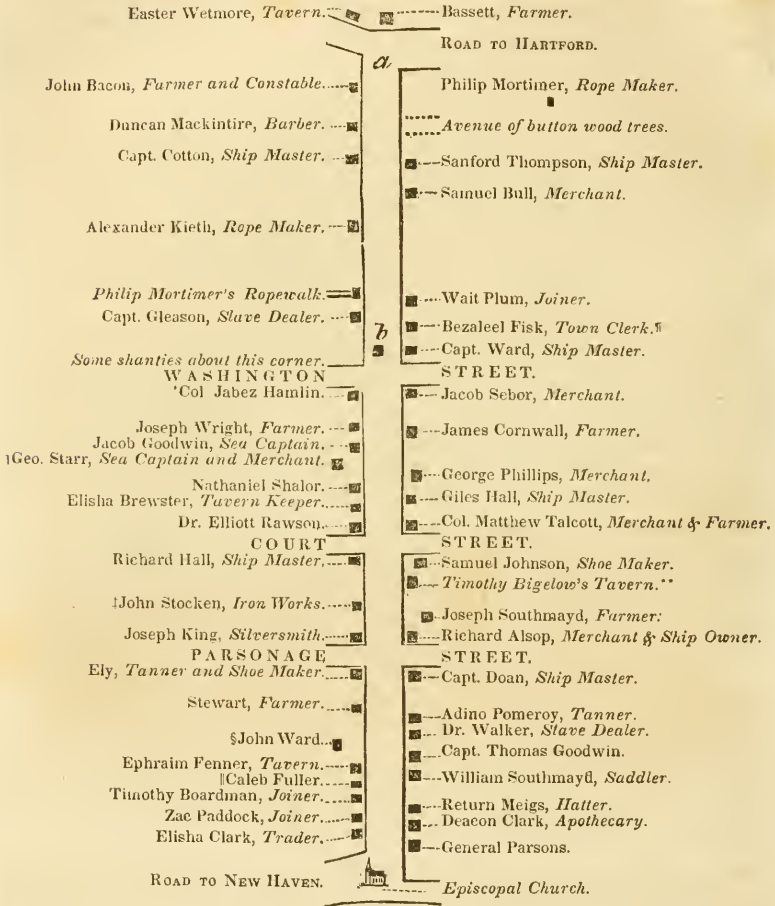

Although Sowheag gave lands to Gov. Haynes, he may be considered as a base and treacherous man. In April, 1637, some of his Indians aided the Pequots in their incursion into that town, when they surprised and killed six men. Sowheag entertained the murderers, and treated the people of Wethersfield in a haughty and insulting manner. It seems, however, that the people of Wethersfield had previously offered him some provocation. On hearing of their differences, the General Court were disposed to forgive him, and appointed a committee to compromise all differences with him. But he totally refused to give up the murderers, and continued his outrages against the English. The Court of Connecticut, therefore, in August, 1639, determined to send one hundred men to Mattabesett, and take the delinquents by force. They notified their friends at New Haven of their determination, both that they might receive their approbation in an enterprise of such general concern, and that they might make the necessary arrangements for defending their own plantations. Gov. Eaton and his council viewed it important that the murderers should be brought to justice, but in existing circumstances, deemed the measure proposed for doing it inexpedient, and dissuaded the Connecticut colony from hostile measures.

The following list is from the ancient records of the town of Middletown. It is entitled, "The names of the proprietors of Middletown, with their estates, taken March 22d, 1670." The amount of their estates is omitted.

Mr. Nathaniel Collins,	William Harris,	Samuel Egleston,
Andrew Warner,	Thomas Miller,	Samuel Collins,
Thomas Allen,	Thomas Stow,	Joseph Hubbard,
George Hubbard,	James Tappin,	John Stow,
Thomas Wetmore,	William Ward,	John Hall, jun.
John Hall, sen.	William Cheney,	Ensign White,
William Cornwell, sen.	Richard Hall,	Samuel Stocking,
John Cornell,	Henry Coall,	Thomas Ranny,
Samuel Cornell,	Mr. Samuel Stow,	John Warner,
Isaac Lane,	Obadiah Allen,	John Wilcox,
William Lucus,	Jasper Clements,	John Hurlbut,
John Ward,	Robert Warner,	Samuel Hall,
Mr. Hamlin,	Nathaniel Bacon,	John Savage,
Daniell Harris,	Anthony Martin,	Thomas Hubbard,
Edward Turner,	David Sage,	John Kirby,
William Cornel, jun.	William Bigs,	George Durant,
Alexander Bow,	Isaac Johnson,	Edward Foster.

PLAN OF MAIN STREET, MIDDLETOWN, SHOWING THE BUILDINGS AND OCCUPANTS, FROM ABOUT 1770 TO 1775.

(By JOSEPH BARRATT, M. D., Middletown, Sept. 1836.)

The township of Middletown is bounded north by Wethersfield, west by Berlin and Meriden, east by Connecticut river, separating it from Chatham, and south by Haddam and Durham. Its length from north to south is about nine miles, and it varies in breadth from four to ten miles. The surface of the town is strikingly diversified, having the Wallingford range of the greenstone mountains on the west, and the Strait hills in the southeastern section of the town. The base and

* First mayor of the city, 1784. † Built by H. Brown, a hatter. ‡ Built by Giles Hall.
 § Built in 1678; afterwards occupied by Wensley Hobby, the first post master in the town: the post office was kept where he resided.
 ¶ Mr. Fuller was a schoolmaster, minister, constable, storekeeper, and kept tavern about 6 months.
 ** The office of town clerk of Middletown has been in this family 114 years.
 *** Gen. Washington put up at this tavern.
 The letter a, at the head of Main street, shows the spot, or very near it, where the first meeting house was erected. b; town house.

loose stones of the Strait hills are granite, which is the prevalent stone found southward through the county. In the Upper Houses, north of the city, is Prospect hill, so named from the fine view of the surrounding country, particularly of the windings of Connecticut river, of the city of Middletown, Chatham, &c. Just below the city, the Connecticut turns to the eastward. Two miles and a half below Middletown city, the river being compressed to 35 rods, passes with considerable force between the high and cragged fronts of the Strait hills. Besides the Connecticut, the township is watered by two small streams, called West and Little rivers. The former passes through Durham, and unites with the latter about two miles from the Connecticut, into which the waters of these united streams are discharged, between the city and the Upper Houses. The soil in this township is favorable both for grain and grazing, is well adapted for fruit, and is generally rich and fertile.

Public Buildings in the central part of Middletown.

Middletown City was incorporated in 1784. It is a port of entry, and the chief town of Middlesex County. It is pleasantly situated, in Lat. $41^{\circ} 35' N.$ and Lon. $4^{\circ} 15' E.$ of Washington, on the west bank of Connecticut river, 31 miles above its mouth, 15 miles south of Hartford, and 24 miles N. E. of New Haven. The population of the city in 1830 was 2,965; including the town, 6,892. The site of the city is principally a gentle declivity, having a gradual ascent back from the river. It is built mostly upon eight streets; Main street, which is the principal one, runs north and south, and is about a mile in extent; it is broad and level, and contains most of the public buildings, stores, &c.

The above is a southeastern view of five of the public buildings in Middletown. The first building seen on the left is the court house, erected in 1832. The next building is the Middletown bank, incorporated in 1785, with a capital of \$100,000, which was increased in 1812 to \$500,000. The building with a steeple is the first Congregational

church; the next building is the custom house, erected in 1835; the next building north is the Central Hotel and stage house. There are in the city 6 houses for public worship, 2 Congregational, 1 Episcopal, 1 Methodist, 1 Baptist, and 1 African; 2 banks, the Middletown bank, the Middlesex County bank, and the Wesleyan University. The streets and walks are shaded with elms and Linden or lime trees. Much taste is displayed by the citizens about their residences, in the collection of choice shrubs and plants. Main street is elevated from 45 to 50 feet above the level of the river. The rise and fall of tide water is from 18 to 24 inches. Indian or Sowheag hill, one mile from the river, is 227 feet above its level. The base of the Wesleyan University Lyceum is 160 feet above the river, being distant five eighths of a mile.

Southeastern view of the Wesleyan University, Middletown.

The Wesleyan University was founded in 1831, and is an institution of great promise, under the patronage of the Methodist Episcopal church. The college buildings are finely situated, on an eminence, about half a mile from the river, commanding a view of the town, some of the neighboring villages, and a fine prospect of a most fruitful surrounding country. The college buildings were originally built for, and occupied by, the American Literary, Scientific and Military Academy, under the care of Captain Partridge. The Academy having failed in its operations, the buildings were vacated, and left on the hands of the proprietors. At this time, several annual conferences of the Methodist Episcopal church were preparing to establish a college under the patronage of said church, and were holding their privilege of location in the market, for the purpose of securing a liberal local subscription. To secure this privilege, the proprietors of the Academy offered their buildings as a gratuity, for the use of a college or university for ever, on condition that there should be an additional endowment raised, of \$40,000. The citizens of Middletown and its vicinity, with

a commendable zeal, by a public grant, and by private subscriptions, pledged about \$18,000 of the endowment. These offers, together with the other local advantages, fixed the university in its present location.

The manufactories of the city and town are numerous. Among them are three for arms for the United States' service, 1 of broadcloth, 1 of cotton, 1 of webbing, combs, &c. &c. One manufactory makes 1,500 rifles annually, milling all the parts; another, 2,000 milled muskets; another, 1,200 guns, which are cast. "One company makes 45,000 lbs. of cotton yarn; and another, 30,000 yards of broadcloth." The value of articles manufactured in this place yearly is estimated at about \$700,000. The coasting trade of Middletown is extensive; its foreign trade considerable. In 1816, more shipping was owned at this place, than any town in Connecticut. Vessels for Hartford, and other towns on the river, are registered here. The Connecticut is navigable to Middletown, for vessels drawing 10 feet of water. Its width opposite the city, varies from 97 to 80 rods. There is a horse-boat ferry between this place and Chatham. Two miles above the city is the village of Upper Middletown or Upper Houses, which contains a post office and 2 houses for public worship, 1 Baptist and 1 Congregational. Ship building has been carried on in this village for more than a century.

Hugh White, Esq., the first settler of Whitestown, in the state of New York, was a citizen of Middletown. He removed from this place with his family in 1784, and penetrating beyond the Mohawk Flats, which then formed a barrier to the western settlement, located himself at Sedaghquate, now Whitesboro' village, which, till then, had been the gloomy abode of wild beasts and savage men. For the first four years after the commencement of this settlement, its progress was rather slow and discouraging; yet, in 1788, it contained nearly 200 inhabitants; and the same year, the town of German Flats, comprising this settlement, was divided, and a new town established, which, in honor of this enterprising man, was called "*Whitestown*." This township, with less than 200 inhabitants, comprised then almost all the western section of that state, which in 1810, contained 280,319 inhabitants; being about 20,000 more than the whole population of Connecticut; so that Judge White, who survived this period two years, lived to see the dreary wilderness, into which he was the first man to penetrate, and which once bore his name, contain a greater population than his native state.

As was observed in his obituary notice, "Judge White may justly be considered as the *patriarch*, who first led the children of New England into the wilderness; and it may be truly said, that he lived to see and enjoy the promised land." He died in 1812, aged 80 years.*

Richard Alsop, a poet of some talent, was a native of this town, and resided here during most of his life. He was born in 1759, and was bred to the mercantile profession, but devoted himself occasionally to letters. His works embrace a variety of subjects. He published various translations from the French and Italian: he left a large number of

* Pease and Niles's Gazetteer.

unpublished works behind him, one of them a poem of considerable length, called the Charms of Fancy. He died at Flatbush, on Long Island, Aug. 20, 1815.

EXTRACTS FROM NEWSPAPERS.

Middletown, Nov. 2d, 1765.

Yesterday being the day prefixed to enslave America, by an unrighteous and oppressive —, some of the principal gentlemen of this place, to shew the sense they had of their native liberty and freedom, which concluded with that fatal day, met together, and agreed that the bell should toll all day with the tongue muffled; that minute guns should be discharged, and a pendant hoisted half-staff high, before the town-house, which was accordingly done. All the vessels in the harbor had their pendants struck half-mast high. The gentlemen being met about noon, drank several loyal healths; and among the rest this was toasted—Liberty, property and no stamps—Confusion to all enemies of liberty, &c. In the evening, the young people dressed three images: two of them were dressed very grand; one in an arm chair, representing a late ignoble lord; the other, waiting on him, in a private conference, holding up a piece of parchment to him, with these words wrote in large characters, "*Let's enslave America with stamps.*" Behind them on the stage, was a most forlorn image, with a fierce countenance, representing the D—l, with a speared fork in his right hand, and a lantern in his left—(however cloven his feet were, his *d—l*-ship had gloves on his hands.) On the forepart of the stage was a large lantern, five or six feet high, and proportionally large, filled with lighted candles, (the night being dark and cloudy, made a grand appearance,) on the front of which was wrote, in large characters, Liberty, Property, and no Stamps; confusion to Lord B—g, the D—l and Company; God bless King George, Pitt, Conway, Barre, and all Patriots to Liberty. AMEN. Which was read off loud at every door in the town, streets and lanes, upon which the company gave three loud and hearty cheers. * * * The whole scene was over about ten o'clock; when the said images were taken off the stage, and treated with the ignominy their o—l deserved, then burnt, and their ashes were stamped into the earth. Not less than eight hundred joined in this affair; and, notwithstanding the number of all ranks, the whole was conducted and concluded with the utmost decency and good order. It would be amiss to omit, that our young children, that can hardly speak, have already learnt this lesson well—Liberty, Property and no Stamps—which they sing along the streets.

Middletown, Nov. 12th, 1777.

On my way from the army some time since, I fell in with four well dressed men, two of which were in uniform, all with swords and cockades. I supposed they were officers of the continental army, going on business like myself. We traveled to the next inn, where we stopped for refreshment, and met half a dozen more of these meek soldiers, for, on attending to their discourse, I soon found they were all itinerant traders. I fell into conversation with one of them, who informed me he had made five thousand pounds since the last year, by trade. I supposed he must have been a large importer of merchandize from abroad, but, on inquiry, found he had never risked a shilling afloat, but had been buying and selling from state to state, and from town to town; he began with a hogshhead of rum, (which he purchased with his tools, and credit, having been formerly an exceeding good house carpenter:) he sold this out by the small quantity to the troops at King's bridge last campaign, and by his industry this way had acquired the above sum. This information led me to make inquiry into the other characters, all of which I found of the same clan. Some had more, some less than my informant. I arrived soon after at my own farm, and found my hired man had commenced trader, and quitted my farm. I went after him, and found him, threatened him with the loss of his wages, if he did not return to his duty and fulfil his engagement, which was for six months: he told me he did not value his wages; he had made money enough to buy my farm, and asked the price: He had been trading in partnership with a baker, who had turned merchant, and could not read, and gave him half the profits for keeping the accounts. I asked him why he wore a cockade: he said it answered for a pass, and he should have a uniform coat as soon as he could find a tailor, which were scarce, as they had all turned traders. I pulled out my cockade, and got me a plain coat, and now on my way to join my regiment, having completed the business I came on.—Mr. Printer, I think it would not be amiss to take up all these new created gentry, form them into a regiment, send them to camp, and let them work at their old trades: they would be useful then; they are a curse now. If you approve of this plan, please to communicate it to the public, through the channel of your useful paper.

A SUBALTERN IN THE CONTINENTAL ARMY.

Golden Ball Tavern, Middletown, Sept. 22d, 1777.

Courant, May 23d, 1790.

“On the morning after the earthquake was observed at Middletown, Conn. a substance like honey or butter, covering the grass and earth for a considerable extent.”—*Webster on Pestilence, vol. 1. p. 292.*

The ancient burying ground in Middletown was laid out in 1650: it is situated in the north part of the city, on the banks of Connecticut river. A majestic elm is still standing in the yard, on the spot where it stood at the first settlement of Middletown. It measured in 1832, at two feet from the ground, 26 feet in circumference: at the height of ten feet, it measures 17 feet. It spreads from north to south 110 feet, from east to west 95 feet.—The following inscriptions are copied from monuments in this yard.

HERE'S A CEDAR TALL, GENTLY WAFTED O'ER
FROM GREAT BRITAN'S ISLE TO THIS WESTERN SHORE,
NEAR FIFTY YEARS CROSSING THE OCEAN WIDE,
YET'S ANCHORED IN THE GRAVE FROM STORM OR TIDE,
YET REMEMBER THE BODY ONELY HERE,
HIS BLESSED SOVL FIXT IN A HIGHER SPHERE.

Here lies the body of Giles Hamlin, 'squire, Adged 67 years, who departed this life the first day of September, Anno Dom. 1689.

Here lies interred the body of Mary, the virtuous consort of Jabez Hamlin, Esq. and daughter of ye Hon'ble Christopher Christophers, Esq. of New London, who fell asleep April ye 3d, A. D. 1736, in ye 22d year of her age.

EPITAPH.

So fair, so young, so innocent, so sweet,
So ripe a judgment, and so rare a wit,
Require at least an Age in one to meet:
In her they met, but long they could not stay,
'Twas gold too fine to mix without allay.

In memory of Mrs. Desire, late wife of Mr. Abner Ely, died Sept. 1st, 1764, aged 48 years.

A loving wife, and tender mother,
Left this base world to enjoy the other.

Sacred to the memory of Com. *Thomas Macdonough*, of the U. S. Navy. He was born in the State of Delaware, Dec. 1783, and died at sea, of pulmonary consumption, while on his return from the command of the American squadron in the Mediterranean, on the 10th of Nov. 1825. He was distinguished in the world as the Hero of Lake Champlain; in the Church of Christ, as a faithful, zealous and consistent Christian character; in the community in which he resided when absent from professional duty, an amiable, upright and valuable citizen.

Sacred to the memory of Mrs. Lucy Ann, wife of Com. Thomas Macdonough, and daughter of Nathaniel and Lucy Ann Shaler. The richest gifts of Nature and Grace adorned her mind and heart; and at her death, Genius, Friendship and Piety, mourned their common loss. She preceded her husband to the realms of glory only a few short months, having departed this life Ang. 9th 1825, Æ. 35.

They were lovely and pleasant in their lives, and in their death they were not divided.

To commemorate the piety and virtues of Mrs. Louisa, wife of Lieut Horace Sawyer, U. S. Navy, daughter of Nathaniel and Lucy Ann Shaler; who departed this life on Monday, 15th Dec. 1828, aged 24. This stone is erected by her husband.

Thou art gone to the grave, but we will not deplore thee,
Since God was thy refuge, thy ransom, thy guide;
He gave thee, he took thee, and he will restore thee,
And Death has no sting since the Savior has died.

Here is interred the mortal remains of Doctor John Osborn.—Ask nothing further, traveler ; nothing better can be said, nor nothing shorter. Ob. 31st May, 1753, Æ. 40.—Life how short, Eternity how long.

The monument on which this is engraved had formerly a very pompous inscription, furnished by the executors. When his son, of the same name, came of age, he had the whole effaced, and inserted the above. It is to be regretted that this record is lost, as the father, Dr. Osborn, besides being a very distinguished physician, was one of the first scholars and poets of the day : the following Whaling Song of his has obtained some celebrity.

A WHALING SONG.

When spring returns with western gales,
And gentle breezes sweep
The ruffling seas, we spread our sails
To plough the wat'ry deep.

For killing northern whales prepared,
Our nimble boats on board,
With craft and rum, (our chief regard,)
And good provisions stored.

Cape Cod, our dearest, native land,
We leave astern, and lose
Its sinking cliffs and lessening sands,
While Zephyr gently blows.

Bold, hardy men, with blooming age,
Our sandy shores produce ;
With monstrous fish they dare engage,
And dangerous callings choose.

Now towards the early dawning east
We speed our course away,
With eager minds, and joyful hearts,
To meet the rising day.

Then as we turn our wondering eyes,
We view one constant show ;
Above, around, the circling skies,
The rolling seas below.

When eastward, clear of Newfoundland,
We stem the frozen pole,
We see the icy islands stand,
The northern billows roll.

As to the north we make our way,
Surprising scenes we find ;
We lengthen out the tedious day,
And leave the night behind.

Now see the northern regions, where
Eternal winter reigns ;
One day and night fills up the year,
And endless cold maintains.

We view the monsters of the deep,
Great whales in numerous swarms ;
And creatures there, that play and leap,
Of strange, unusual forms.

When in our station we are placed,
And whales around us play,
We launch our boats into the main,
And swiftly chase our prey.

In haste we ply our nimble oars,
For an assault design'd ;
The sea beneath us foams and roars,
And leaves a wake behind.

A mighty whale we rush upon,
And in our irons throw :
She sinks her monstrous body down
Among the waves below.

And when she rises out again,
We soon renew the fight ;
Thrust our sharp lances in amain,
And all her rage excite.

Enraged she makes a mighty bound ;
Thick foams the whitened sea ;
The waves in circles rise around,
And widening roll away.

She thrashes with her tail around,
And blows her redd'ning breath ;
She breaks the air, a deaf'ning sound,
While ocean groans beneath.

From numerous wounds, with crimson flood
She stains the frothy seas,
And gasps, and blows her latest blood,
While quivering life decays.

With joyful hearts we see her die,
And on the surface lay ;
While all with eager haste apply,
To save our deathful prey.

H A D D A M .

THE lands in this town, with those in East Haddam, were long denominated the lands at Thirty Mile Island, from the island in Connecticut river, which was calculated to be thirty miles from its mouth. The Indian title to the lands was purchased in 1662, for thirty coats, which may have been worth one hundred dollars. The deed obtained from the Indians, comprehended all the lands from the Straits, six miles east and west from the river, down to the lower side of Chester Meadow ; excepting Thirty Mile Island, and 40 acres at *Pattaquonk*, (Chester,) Twenty Mile Island, and on the adjacent shore eastward, running

up to Salmon River cove. The lands thus purchased were taken up by twenty eight young men, mostly from Hartford, Wethersfield and Windsor, who in the summer of 1662, or soon after, settled upon them. Their names were Ackley, Arnold, Bailey, Brainard, Brooks, Clarke, Cone, Gates, Shayler, two Spencers, two Smiths, Ventres, Wells, Bates, Butler, Corbe, Dibble, Ganes, Hannison, Jones, Luxford, Parents, Piper, Stannard, Webb, and Wiat. These proprietors settled at first within the limits of Haddam society. They settled generally on the rising ground, back from the town meadow, beginning at the eastern point of Walkley hill, and so extending down to the grave yard, where some of their cellars are still visible. Bates, Dibble, Ganes, Hannison, Jones, Parents, and Ventres, settled on the plain below Mill creek, and were called the Lower Plantation. The Indians remained on their reservations for many years. They had a place of resort, in a deep hollow on Haddam Neck, to the northeast, which is still known by the name of *Indian hollow*, as the brook running through it is by the name of *Indian brook*. They had no name for the township of Haddam at large, but called the northern part of Haddam society *Higganompos*, which the English have changed to Higganum, and now apply it to a stream of water, and to the neighborhood about its mouth. The western part of this society they called *Cockaponset*, which the English have changed to Punset.

Haddam was incorporated as a town in 1668. At this time it belonged to the county of Hartford, and so continued till the formation of Middlesex County, in 1785. On account of its central situation, it was constituted the semi-seat of justice for this county, and has so continued ever since. The town lies on both sides of Connecticut river. Haddam society is on the west side of the river, and is by far the largest division of the town: it is about 7 miles long, and from 4 to 6 broad; bounded n. by Middletown, w. by Durham, and s. by Killingworth and Chester. The part of the town lying on the east side of the river is called Haddam Neck, which is a point of land, 4 miles in length, 4 miles across on the north, and coming to a point at the mouth of Salmon river. This river bounds Haddam Neck on the east. This township is the commencement of the granitic district, extending to the mouth of Connecticut river. It is considerably rough and broken, being hilly and stony.

There is but little alluvial soil upon Connecticut river, but the lands upon its borders are more smooth, and better adapted for cultivation. The prevailing soil is a gravelly loam, hard and dry. The forests are considerably extensive, and considerable quantities of wood are annually sent to market. There are 4 houses of worship in the town, 1 Congregational, 1 Baptist, 1 Methodist on the west side, and 1 Methodist church on Haddam Neck.

The following view was taken at a point on a hill upwards of half a mile northwest from the court house, a few rods east from the main road. Connecticut river is seen on the left; also the mouth of Salmon river, and the southern extremity of Haddam Neck, on the east side of Connecticut river. East Haddam Landing is faintly seen in the dis-

Northwest view of Haddam.

tance, near the mouth of Salmon river, just rising above the lower extremity of a hill on the west side of the river. The court house appears nearly in the center of the engraving. It is constructed of granite, and was erected in 1829: it has a small spire attached to it, and fronts the south. The large building seen on the right is the Congregational church; it is about half a mile, in a western direction, from the court house. On the hill which rises in the distance, between and beyond the church and court house, is seen the situation of part of the granite quarries, about 100 rods from the river.

In the limits of this town are several valuable granite quarries, on both sides of the river. The first opening was made at Quarry hill, on Haddam Neck, about 1762. Since that time several other openings have been made in this hill. These are from 50 to 70 rods from the river. This stone is usually a little below the surface, and is exhibited in nearly perpendicular strata; it is valuable for building, paving, &c. On a hill below Haddam street, several quarries are now improved, the first of which was opened about 1794: besides these, there are others which are worked in the western part of the town. This stone is sold from 10 to 20 cents by the foot, and is carried as far south as Savannah and New Orleans. At this time about 150 men are employed at the quarries in this town, and from 60 to 70,000 dollars worth of stone are annually exported. Ship building is also carried on to some extent in this town. A sloop was launched at Higganum Landing in 1754; and for most of the time since, ship building has been a regular business at this place.

The following is a representation of the spot, looking towards the north, where that devoted missionary, David Brainerd, first drew his breath. The house in which he was born, was probably built 160 or 170 years since. It was a one story building, 40 by 30 feet, with a portico by the south door. After this house was taken down, another was built on its foundations. This second house was taken down about

Birth-place of David Brainerd, Haddam.

fifteen years since. The place remained in possession of the Brainerds till about the year 1802. The cellar walls still remain. The place is seen in the engraving on the right, near by which two persons are standing. The house stood a short distance from the river, at an elevation of perhaps 100 feet from the water, and about 8 or 10 rods from the turnpike road, commanding a fine prospect of the river, both to the north and south. A spring issues in the orchard near the road, and was formerly conducted to the back door of the house. This place is half a mile from Higganum Landing, one mile and a half northeast from the court house in Haddam, and about 8 miles from Middletown.

"If the greatness of a character is to be estimated by the object it pursues, the danger it braves, the difficulties it encounters, and the purity and energy of its motives, David Brainerd is one of the greatest characters that ever appeared in the world. Compared with this standard of greatness, what little things are the Alexanders, the Cæsars, the conquerors of the whole earth. A nobler object no human or angelic mind, could ever propose to itself, than to promote the glory of the great Governor of the Universe, in studying and laboring to diffuse purity and happiness among his unholy and miserable creatures."

His life and diary among the Indians, says a celebrated English divine, "exhibits a perfect pattern of the qualities which should distinguish the instructor of rude and barbarous tribes; the most invincible patience and self denial, the profoundest humility, exquisite prudence, indefatigable industry, and such a devotedness to God, or rather such an absorption of the whole soul in zeal for the divine glory, and the salvation of men, as is scarcely paralleled since the age of the Apostles.....His constitutional melancholy, though it must be regarded as a physical imperfection, imparts an additional interest and pathos to the narrative, since we more easily sympathize with the emotion of sorrow than of joy. There is a monotony in his feelings, it must be acknowledged, and consequently a frequent repetition of the same ideas, which will disgust a fastidious or superficial reader, but it is the *monotony of sublimity*."

The ancestor of the Brainerds came to this country when a lad, and lived in the Wyllis family of Hartford. He afterwards removed to Haddam, and was one of the first settlers of the town. David, the missionary, was the third son of Hezekiah Brainerd, a man of piety and respectability, who for many years represented his native town in the General Assembly. The Rev. David Brainerd commenced his labors among the Indians in 1743, at a place called Kaunaumeeck, southeast from Albany,

near Kinderhook; from this place he went to the Forks of the Delaware, near the line between New York and Pennsylvania. His greatest success was among the Indians at Crosweeksung, near Freehold in New Jersey. Overcome by wearisome journeyings and arduous labors, in the work of the ministry, he traveled into New England for the benefit of his health. He died at the house of the Rev. Jonathan Edwards, at Northampton, Mass. Oct. 10th, 1747, in the thirtieth year of his age.

CHATHAM.

CHATHAM belonged to Middletown until October, 1767, at which time it was made into a distinct town, and called Chatham, from the importance of its ship building, in allusion to Chatham in England. The lands in this town, opposite the city of Middletown, were early improved. "In 1675, 40 rights were laid out between Glastenbury and Haddam lines, in lots $2\frac{1}{2}$ miles long, running from what then was the eastern boundary of Middletown, towards the river; the remaining 12 rights owned in the town being laid out in Moromos. But notwithstanding these improvements and divisions of land, only two white families are known to have lived in Chatham, until after the commencement of the last century. James Stancliff had a house on the bank of the river, nigh the end of Chatham street, as early as 1690, and John Gill had another not far from that time. The next settler after these was William Cornwell, who settled back from Chatham meadow, about 1703. In 1710 there were only nine or ten families within the limits of Chatham parish." A family by the name of Goffe settled south of Knowles' Landing, about 1710, who were the first inhabitants within the limits of Middle Haddam."

"The lands in this township were obtained from the Indians in connection with the lands in Middletown. But a reservation, laid out partly at Indian hill, and partly a little east of Chatham meeting house, was held by them till about 1767; when having dwindled to a small number, they sold their right and united with the Farmington Indians. These Indians have been sometimes called Wongonks or Wongoms, but the reservation was for the heirs of Sowheag and Mattabessett Indians, and they were doubtless of the same tribe with the Indians on the west side of the river. A little clan inhabited, or frequented, the region about Pocotopogue pond, and had a place of rendezvous on the principal island which that incloses. These were also, probably, a part of the Mattabessett Indians. At Indian hill was a famous grave yard, where monuments with inscriptions were set up over some of the graves, after the English settled upon the river. Indian bones have been found also, on the left bank of Taylor's creek, as it enters the Connecticut."

The town of Chatham embraces Chatham parish, (formerly East Middletown,) the greater part of Middle Haddam parish, the parish of East Hampton, and part of the parish of West Chester. The township is bounded n. by Glastenbury, w. by Connecticut river, e. by Marlborough and Colchester, and s. by East Haddam and Haddam Neck, belonging to Haddam. There are 6 churches, 3 Congregational, 2 Episcopal, and 1 Methodist. The township is about nine miles in length from north to south, and more than 6 in breadth. The interior part of the town is rough and broken, consisting of granite hills, interspersed with inconsiderable valleys. Upon the Connecticut, there is a considerable tract of alluvial. There are very extensive and valuable quarries of freestone on the bank of Connecticut river, nearly

opposite the city of Middletown, which are worked and shaped with great facility. About 200 workmen are employed, and large quantities of this stone are sent to New York, Boston, Philadelphia, Charleston, and other places.

Southern view of the Episcopal Church, Chatham.

The above is a southern view of the Episcopal church in Chatham. It is constructed of stone from the quarries in the immediate vicinity westward. The Episcopal society in Chatham parish was formed April 17th, 1789. The Rev. Smith Miles may be considered as the first clergyman regularly settled over this society. His monument is in the new grave yard, and is of the same form as that of Mr. Ashmun, seen on page 183 of this work: the following is the inscription.

“Sacred to the memory of Rev. Smith Miles; born in Derby, March 19th, 1766; graduated at Yale College, 1791, and ordained 1795; officiated as Rector of the Episcopal church in Chatham 33 years. Died Jan. 31, 1830: aged 64 years—They that be wise shall shine as the brightness of the firmament, and they that turn many to righteousness as stars for ever and ever.”

The two principal streams in the township are Salmon river and Pine brook. Salmon river crosses the southeastern corner of the town. Pine Brook, a considerable mill stream, rises in Pocotopogue pond, in the parish of East Hampton, and after a course of six or seven miles, unites with Salmon river, three miles from its mouth. Pocotopogue pond, or rather ponds, is about nine miles in circumference; it is in the form of two ponds, nearly circular, united by a strait of no considerable width or length. Its waters are about ten feet in depth, and surround several islands, one of two acres, formerly the favorite resort of the Indians. It is fed by low springs, as rains do not alter its height. “Another pond within the bounds of Chatham parish, called Job’s pond, is about two miles in circumference. This has no outlet. It rises and falls as much as fifteen feet, from causes which cannot be easily explained; for it is often the highest in the driest season of the year, and lowest in the wettest season. When it begins to rise, it rises regularly for six or twelve months, and then falls for about the same periods. This, in many places, is from 40 to 60 feet deep.

“On the banks of Connecticut river, half a mile northeast from Middletown harbor, are noted and very valuable quarries of freestone. The rocks at the northern and principal opening, according to tradition, originally hung shelving over the river. They were used for building stone very soon after Middletown was settled. At a meeting held in that town in 1665, it was resolved that no one should dig or raise stones at the rocks on the east side of the river, but an inhabitant of Middletown, and that

twelve pence should be paid to the town for every ton of stones taken. As early as this, they were transported in vessels to other places. By several subsequent resolves, they appear to have been regarded as valuable, and to have been considerably sought. Some time after 1726, the town sold this quarry, and it has since passed into several hands. For forty years past it has been extensively improved, and the stones to the depth of thirty feet from the surface, are now removed over an area of an acre and a half, back from the river. The stone in this quarry is covered in some places with four or five feet of earth, and in others with four or five feet more of shelly rock. It is not perfectly solid, but lies in blocks, eight or ten feet thick, and fifty and sixty feet long. The seams and joints facilitate the process of removing these from their beds; and when removed, they are reduced by the wedge and chisel to any size or form which is wished. In this quarry thirty hands have been employed for several years, eight months in the year, and from four to six teams. The quantity of stone prepared for market, and sold to the inhabitants of this and the neighboring towns, and exported to distant parts of the country, has been very great; and has yielded a handsome profit. Fifty rods south of this quarry, an opening was made about 1783, now spreading over half an acre. Here the stone is covered with about ten feet of earth. In this opening as many as twelve hands have been sometimes employed. Vessels come to this and the above quarry, and load from the bank. The bed of stone in which these and the smaller openings in the neighborhood have been made is immense, and lies at different depths from the surface in different places. It has been discovered in sinking wells, for half a mile in northern and southern directions, and has been opened at a greater distance eastward. Wherever found, the stone possesses the same general properties, but varies, like the freestone in Middletown, in the fineness of its texture.*

"About 1762, a cobalt mine was opened at the foot of Great hill, under the direction of Dr. Stephanes, a German, and improved for a little time. About 1770, he renewed the improvement of it, in connection with two gentlemen by the name of Erkelin and Khool, and continued it for two or three years. Many casks of ore were obtained and shipped for Europe. But as all the persons concerned in the mine, laborers as well as principals, were foreigners, and as the ore was exported, little was known of its character or value. After they left it, it was entirely neglected, till last autumn. Since then, several men have been employed in searching for cobalt, in and near the former openings, and have been so successful, as to encourage the hope that the mine will be permanently improved. The scarcity of this mineral, and its uses in porcelain and linen manufactories, render it highly desirable that the contents of this mine should be thoroughly explored.—Coal was discovered at Indian hill about thirty years ago. But whether it exists there or in any other part of the town in any considerable quantities, must be determined by future researches."

EXTRACTS FROM NEWSPAPERS.

Middletown, June 7th, 1799.

THE LAUNCH.—*More of the Wooden Walls of Columbia.*—Yesterday at 35 minutes and 4 seconds past five P. M. the United States Ship Connecticut was safely deposited on the bosom of the majestic stream whence she derives her name. No words can convey an adequate idea of the beauty and brilliancy of the scene. Nature, as inclined to do honor to the occasion, had furnished one of the most delightful days that the vernal season ever witnessed. While old father Connecticut eager to receive his beautiful offspring, had swollen his waters by the liquefaction of snows, reserved for the occasion, near his source, in order to facilitate her passage to his wave; and extending his liquid arms, welcomed her to his embrace. Flora decked in her richest attire, smiled gleefully around, and a brilliant concourse of spectators from this and the neighboring towns, whose countenance expressed the liveliest sensibility at thus witnessing the progress of our nautical armament, destined to protect our commerce and hurl the thunders of Columbia on her shrinking foes; formed a most magnificent moving picture, in addition to the brilliancy of nature which shone around. The preparation for the launch was exquisite, and evincive of the consummate skill of the architect who superintended the operations of the day, and whose orders were given with dignity and obeyed with punctilious nicety. When the moment arrived at which the elegant fabric was to leave her earthly bed never more to return, the anxiety of the crowd was witnessed by a solemn silence, awful and profound. The stroke was struck, the blocks were removed, when lo! with the grace and majesty of the divine Cleopatra, or the wonder-struck Cydnus, she glided into the arms of her parent river, and as if reposing herself to sleep upon a bed of roses, sunk upon his breast. In a moment the

* Field's Statistical Account of Middlesex County.

peal of Federalism burst forth, the pæans of the gazing thousands met the heavens, and echo faintly expired on the distant hills.

While shad and salmon feel the patriot glow,
And throng in numerous shoals the watery way,
And sturdy sturgeon from the depths below,
Leap up her matchless beauty to survey.

[** The above Bostonian paragraph, translated in the vernacular tongue, reads thus: The United States ship Connecticut, which is to be commanded by Capt. Moses Tryon, was yesterday, in the afternoon, safely launched from the ship yard at Chatham, into Connecticut river.]

The following are from monuments in the yard on the margin of the ground, above one of the quarries.

Here lyes the body of Saml. Hall, who died February the 22d 17 $\frac{1}{2}$ ³ in the 16th year of his age. The first person laid in this yard.

This monument sacred to the memory of the Rev. Moses Bartlit, for more than 34 years the faithful Pastor of the Ch^h. of Christ in this place, who dec^d. Dec^r. 27th, 1766, Æt. 58, is gratefully reared by the people of his charge. He was a sound and faithful divine, a Physician of Soul and Body, a sincere Friend, a faithful husband, and an affectionate Father. The memory of the just is blessed.

CHESTER.

CHESTER, formerly a parish of that name in Saybrook, was incorporated as a town in 1836. Jonah Dibble, from Haddam, appears to have been the first settler in this town: he was a resident here in 1692: Andrew Warner, from Hadley, came about 1696. "The ancestors of the Parkers, Shipmans, Waterhouses and Webbs, from Saybrook parish, were early settlers in this place. George Willard and Andrew Southworth, from the same parish, Joel Canfield and Gideon Leet, from Durham, settled in it about 1745. The inhabitants were vested with parish privileges in 1740. Their first pastor was the Rev. Jared Harrison, who was ordained at the formation of the church in 1742.

Chester is about 5 miles in length from east to west, and upwards of 3 in breadth, bounded N. by Haddam, E. by Connecticut river, S. by Saybrook, and W. by Killingworth. The western part of the town is rough and hilly. It is estimated that there are in the town about 1,200 inhabitants, most of whom are in the eastern part. There are 2 churches in the town, 1 Congregational and 1 Baptist.

The following shows the appearance of the Chester Hotel, and some other buildings at the head of the cove, about one mile from the river, in the central part of Chester, about 17 miles from Middletown, 5 from Haddam court house, and 30 from New Haven. The Congregational church is about 80 rods north, and the Baptist about half a mile westward of this place. Several streams run into the cove, affording fine sites for manufacturing purposes. L'Hommedieu's auger and hammer factory is finely located, and more than 20 hands are employed in this business. The Chester Manufacturing Co. manufacture coach springs: there is one cast iron foundery; also, one factory for the manufacture of hard ware, recently erected. Messrs. Southworth and Stephens have

Northern view of Chester, (central part.)

a very extensive saw mill and lumber yard, which furnishes lumber and ship plank in large quantities, being it is believed one of the most extensive establishments of the kind in the state. The manufacture of gimblets, axe helms, (for which there are 2 factories,) inkstands, and some other articles, is carried on extensively. The quarrying of stone is also an important branch of business in this town, and the inhabitants are generally distinguished for their industry and enterprise.

D U R H A M .

THE tract of land comprising Durham was formerly supposed to be included in the limits of the neighboring towns, until they were surveyed, when a tract was found to be left. This was considered small for a distinct plantation or town, and does not appear to have been contemplated with that view for a long period. The Legislature however granted many lots or farms in it to persons who had performed important services to the colony. In this way more than 5,000 acres became the property of individuals widely dispersed in the state, before any settlement was made.

“In 1698, however, David Seward, from Guilford, moved into the town, and some of his neighbors contemplated following him. The next spring, therefore, a petition was presented to the Legislature, signed by thirty one inhabitants of that town, that there might be a plantation at Coginchaug, the Indian name of Durham. This was urged on the ground that Coginchaug was so far from other settlements that the people could not go to them for public worship. The petition was granted, and soon after a site was selected for a meeting house, on a hill in the southern part of the town, which from that circumstance is called Meeting-house hill to this day. But very few of the petitioners left Guilford, and no plantation was immediately formed.”

In May, 1704, the proprietors of farms at Cuginchaug petitioned the Assembly for some act, which would encourage a settlement at that place. The Assembly proposed that the proprietors should give up one fourth part of their farms, and that the part thus given up, with the common lands, should be laid out into lots, for such persons as should offer themselves as inhabitants. Their proposal was accepted, and settlers came in from various places, who, in May, 1708, were invested with town privileges. The number of adult male inhabitants, at that time, was thirty four, most of whom were heads of families. As early as 1723, John and Nathaniel Sutliff, and probably some others from Durham, settled on Haddam quarter. These had the consent of the people of Haddam, that they might attend public worship in Durham, and in 1773 the quarter was annexed to Durham.

South view of the Churches in Durham.

“There is no evidence that the Indians ever dwelt in Durham in any considerable numbers, or for long periods; but they resorted to it occasionally for the purposes of hunting. They were, however, regarded as the rightful owners of the soil, and their title was purchased by Samuel Wylls and others, on the 24th of January, 1672, at the same time that a purchase was made of the lands in Middletown.”

Durham is bounded n. by Middletown, w. by Wallingford, e. by Haddam, and s. by Guilford, Madison and Killingworth. It is about six miles in length from east to west, and nearly four in width. The central part of the town is 20 miles south from Hartford, and 18 north-east from New Haven. The prevailing surface of the town is a diversity of moderate hills and gentle declivities and dales. The eastern and western parts are somewhat broken and mountainous. The soil is generally fertile and productive, and the inhabitants are mostly employed in the cultivation of the earth.

The above is a view in the central part of Durham. The church seen on the left is the new Congregational church, erected in 1835. The

church seen standing in the street is the old Congregational church. The above drawing was taken September, 1835, a few days before the old church was taken down. These churches are a fair specimen of the ancient and modern method of building houses of worship. A new Methodist church is now erecting (1836) on the east side of the street, about opposite the old church seen in the engraving.

The principal settlement is on the road running north and south, on ground moderately elevated, bounded on the east by a considerable range of hills, on the west with a large tract of low land, and then a tract of higher land, extending to the Wallingford mountains. The tract of low land lying westward of the village was called *Coginchaug*, or the *long swamp*, and from this the name was applied to the township. This is generally cleared, and yields a large quantity of coarse grass. "This town has been distinguished many years for a very fine breed of cattle. Two oxen, presented by some of the inhabitants to General Washington, furnished a dinner for all the officers of the American army at Valley Forge, and all their servants. These oxen were driven almost five hundred miles, through a country nearly exhausted of its forage, yet one of them, a steer five years old, weighed two thousand two hundred and seventy pounds."

The following inscriptions are from monuments in the yard north of the Congregational church.

In memory of Capt. Israel Camp, a man of unaffected piety; benevolent in his temper, and kind and just in his behavior; in private and public offices, useful through life; a great lover and promoter of *Divine Psalmody*. The praises of God and the Lamb sweetly employed his breath, till, through painful sickness, his voice expired in death, the 6th day of May, 1778, in the 55th year of his age.

Sacred to the memory of Mr. Elias Camp, who died March 26th, 1796, in the 78th year of his age. He was a tender husband, and obliging neighbor, and a good citizen; and tho' denied the enjoyment of parental felicity, was blessed with so much of this world, not only to perform many deeds of charity, but to make a present of an excellent bell to the town of Durham, which has greatly promoted its convenience and regularity, and ought to be recognized with gratitude on every sound thereof.

EAST HADDAM.

EAST HADDAM was originally a part of Haddam. It belonged to Haddam society till 1700. It was then constituted a distinct society. In 1734 it was formed into a distinct town, containing two whole parishes, viz. East Haddam and Millington, and two thirds of the parish of Hadlyme. It does not distinctly appear at what time the first settlement was made. It has been commonly supposed it began at the place Creek Row, about 1685, by the removal of a number of families from Haddam, by the names of Gates, Bates, Brainerd and Cone. The tradition is that this was the first spot settled, and that these were the first settlers. "But from a document found in the colony records, it is certain that Robert Chapman had a dwelling house in East Haddam, north of the Creek Row, in 1674. If the settlement at the Creek Row was first, it must have begun about 1670. The first settler in Millington was Jonathan Beebe, from New London, who settled by the Long Pond about 1704."

East Haddam is bounded north by Chatham and Colchester, east by Salem, west principally by Connecticut river, and partly by Salmon river, dividing it from Haddam Neck, belonging to the town of Haddam, and south by Lyme. Its average length from east to west is nearly eight miles, and its breadth upwards of six. The face of the township is rocky and uneven, but the soil is generally strong and fertile, and well adapted to grazing. There is considerable timber in the town, which is of an excellent quality. There are 6 cotton factories, 2 of which manufacture cotton twine. This town took an active part in the Revolutionary war. About 100 men in the regular line of the continental army, and quite a number in the naval service, perished in the struggle. The first supplies for the starving army at Valley Forge were sent from this town and its vicinity. Muskets were manufactured for the Revolutionary army, at the Landing, by Mr. Green.

West view of East Haddam Landing.

East Haddam Landing, a village of about 30 dwelling houses and three or four mercantile stores, is situated a little below the mouth of Salmon river, on the banks of the Connecticut, about 16 miles north from Saybrook Point. A house was built at this place, and a market opened for produce, in 1743, since which most of the trade in the town has centered at this spot. Ship building was begun at the Landing before the Revolutionary war, and as early as that war at Chapman's ferry, a little village about three fourths of a mile south of the Landing.

Immediately back of the houses at the Landing, the hills rise abruptly, and in some places precipitously to the east and north. The annexed view was taken from the opposite bank of the river, and shows most of the buildings in the place. The building with four chimnies, seen in the lower central part of the engraving, before which a ship yard is seen, is the residence of Timothy Green, Esq. the basement story of which is the East Haddam bank, incorporated in 1831, with

a capital of 75,000 dollars. The building on the extreme left was the residence of the late Gen. Epaphroditus Champion, and now of his son, E. Champion, Esq. It is distinguished for its bold and lofty terraces, and is a striking object to travelers passing on the river. The post office at this time is kept in a building on the opposite side of the street. The steamboat hotel is seen on the extreme right, before which is a wharf, at which the steamboats land and receive passengers. The spire of the Episcopal church, standing on elevated ground, is seen a little distance southeast from the village. The Congregational church is situated one mile and a half eastward of the Landing.

Lord's Mills, or as it is now called Leesville, upwards of four miles northward of the Landing, is a village containing 18 or 20 dwelling houses, and is situated at the head of boat navigation on Salmon river. There are in the village 3 mercantile stores, a post office, a saw mill, and a cotton factory, containing 1,800 spindles and 40 looms. The tide at this place rises about two feet. Sloops of about 60 tons have been launched here in time of freshet. There was formerly an oil mill in this place, which was erected more than sixty years since, the first it is said erected in the state. The scenery about this village is striking and beautiful, especially the long vista which is seen on looking down Salmon river.

Mechanicsville is a thriving village, upwards of 3 miles N. E. of the Landing. It contains 2 cotton factories, one for manufacturing cotton twine, the first of the kind it is said established in the United States; it has been in operation about ten years. The village is situated on Moodus river, a branch of Salmon river. It consists of about 30 or 40 dwelling houses. A Methodist church has been recently erected in this place.

"From time immemorial, East Haddam has been the seat of uncommon subterranean noises, called Moodus noises. The Indian name of the town was *Mackimoodus*, which in English is the *place of noises*; a name given with the utmost propriety to the place. The accounts given of the noises and quakings there are very remarkable. Were it not that the people are accustomed to them, they would occasion great alarm. The Rev. Mr. Hosmer, in a letter to Mr. Prince, of Boston, written August 13th, 1729, gives this account of them:—'As to the earthquakes, I have something considerable and awful to tell you. Earthquakes have been here, (and no where but in this precinct, as can be discerned; that is, they seem to have their center, rise and origin among us,) as has been observed for more than thirty years. I have been informed, that in this place, before the English settlements, there were great numbers of Indian inhabitants, and that it was a place of extraordinary *Indian Pawaws*, or in short, that it was a place where the Indians drove a prodigious trade at worshipping the devil. Also I was informed, that, many years past, an old Indian was asked, What was the reason of the noises in this place? To which he replied, that the Indian's God was very angry because Englishman's God was come here.

"Now whether there be any thing diabolical in these things, I know not; but this I know, that God Almighty is to be seen and trembled at, in what has been often heard among us. Whether it be fire or air distressed in the subterraneous caverns of the earth, cannot be known; for there is no eruption, no explosion perceptible, but by sounds and tremors, which sometimes are very fearful and dreadful. I have myself heard eight or ten sounds successively, and imitating small arms, in the space of five minutes. I have, I suppose, heard several hundreds of them within twenty years; some more, some less terrible. Sometimes we have heard them almost every day, and great numbers of them in the space of a year. Oftentimes I have observed them to be coming down from the north, imitating slow thunder, until the sound came near or right under, and then there seemed to be a breaking, like the noise of a cannon shot, or severe thunder, which shakes the houses and all that is in them. They have

South view of Mount Tom and the mouth of Salmon River.

in a manner ceased since the great earthquake. As I remember, there have been but two heard since that time, and those but moderate."

A worthy gentleman, about six years since, gave the following account of them. "The awful noises, of which Mr. Hosmer gave an account, in his historical minutes, and concerning which you desire further information, continue to the present time. The effects they produce, are various as the intermediate degrees between the roar of a cannon and the noise of a pistol. The concussions of the earth, made at the same time, are as much diversified as the sounds in the air. The shock they give to a dwelling house, is the same as the falling of logs on the floor. The smaller shocks produced no emotions of terror or fear in the minds of the inhabitants. They are spoken of as usual occurrences, and are called Moodus noises. But when they are so violent as to be felt in the adjacent towns, they are called earthquakes. During my residence here, which has been almost thirty six years, I have invariably observed, after some of the most violent of these shocks, that an account has been published in the newspapers, of a small shock of an earthquake, at New London and Hartford. Nor do I believe, in all that period, there has been any account published of an earthquake in Connecticut, which was not far more violent here than in any other place. By recurring to the newspapers, you will find, that an earthquake was noticed on the 18th May, 1791, about 10 o'clock, P. M. It was perceived as far distant as Boston and New York. A few minutes after there was another shock, which was perceptible at the distance of seventy miles. Here, at that time, the concussion of the earth, and the roaring of the atmosphere were most tremendous. Consternation and dread filled every house. Many chimnies were untopped and walls thrown down. It was a night much to be remembered; for besides the two shocks which were noticed at a distance, during the night there was here a succession of shocks, to the number of twenty, perhaps thirty; the effects of which, like all others, decreased in every direction, in proportion to the distances. The next day, stones of several tons weight, were found removed from their places; and apertures in the earth, and fissures in immovable rocks, ascertained the places where the explosions were made. Since that time, the noises and shocks have been less frequent than before; though not a year passeth over us, but some of them are perceptible."—*Trumbull's Hist. Con.*

Mount Tom is situated at the junction of Moodus with Salmon river. The above view was taken from the western side of Connecticut river. Mount Tom is the most elevated height seen in the distance, in the center of the engraving, at the base of which is seen a flat bottomed boat, ascending Salmon river. This mountain seems to be situated about the center from which the Moodus noises proceed. The sever-

est shocks are felt as far northeast as Boston, and as far southwest as New York, and are there noticed as earthquakes. In 1816 and 1817, in the night, these noises were more than usually violent. A person was on Mount Tom about 15 years since, at the time these noises were heard. It appeared to this person as though a stone or large body fell, underneath the ground, directly under his feet, and grated down to a considerable distance in the depths below. The cause of these noises is explained by some to be mineral or chemical combinations, exploding at a depth of many thousand feet beneath the surface of the earth. The jar is similar to that of exploded gunpowder.

Upwards of a mile north of the Landing is the ancient burying ground, which is situated about 40 rods southeasterly from Salmon river. It is now abandoned, and a forest has grown up among the monuments, giving the place a very unusual and gloomy aspect. The following is copied from a moss-covered tabular monument :

Under this tomb stone lyeth interr'd the body of the Rev. Stephen Hosmer, the first pastor of the First Church of Christ in East Haddam, who departed this life the 18th day of June, A. D. 1749, and in the 70th year of his age. And at his right hand lyeth Mrs. Sarah Hosmer, his beloved consort, who departed this life Sept. ye 30th, A. D. 1749, and in the 67th year of her age.

Sweet souls, we leave you to your rest;
Enjoy your Jesus and your God,
Till we from bands of clay releas'd,
Spring out and climb the shining road.

The following is from the 7th vol. of the Medical Repository, published in New York, extracted from a letter written in East Haddam.

"For 10 or 12 years prior to 1797," says the writer, "a disease prevailed among the cattle in East Haddam, and in the neighboring places to a great extent, vulgarly called a mortification. It was most destructive to cattle under three years; sometimes attacking cows over that period, but never oxen. Calves were most generally destroyed by it in autumn, and yearlings in May and June. Its commencement was indicated by a sudden listlessness, numbness, and disposition to rest, attended with small soft swellings on the legs, shoulders, flank, side, but more usually in the back near the kidneys, and it produced death with feeble expressions of pain, within 6, 12 and 24 hours. Immediately upon death, the carcass became intolerably offensive, so that the hide was often left to rot with it; where it was taken off, the swellings were found to consist of jelly and black blood. After tanning, the hide was often rotted over the swellings, and holes were made of their size and dimensions." The cause of this disease was never satisfactorily ascertained and the remedies which were applied, rarely, if ever succeeded.*

From the Connecticut Gazette, (New London,) Aug. 20, 1790. No. 1397.

East Haddam, Aug. 5, 1790.

The town of East Haddam was formerly much noted for earthquakes—from which it obtained its ancient Indian name, Moodus; which in their language, it is said, signifies a great noise. They were supposed to take their rise near Salmon river, which runs between this town and Chatham. Several years ago, they were said to be very loud and frequent, and that they shook the earth for several miles around; and it has been reported, that the ground has been opened in several places, and trees torn up by the roots, and carried to some distance, near the above mentioned river:—and that some persons were under fearful apprehensions that the town would sooner or later be sunk. Various have been the conjectures concerning the cause of these earthquakes or Moodus noises, as they are called. The following account has gained credit with many persons.—It is reported, that between 20 and 30 years ago, a transient person came to this town, who called himself Doct. Steel, from Great Britain, who having

* Field's Statist. Hist. of the County of Middlesex.

had information respecting those noises, made critical observation at different times and in different places, till at length he dug up two pearls of great value, which he called Carbuncles, near Salmon river:—and that he told people the noises would be discontinued for many years, as he had taken away their cause; but as he had discovered others in miniature, they would be again heard in process of time. The best evidence of the authenticity of this story is that it has happened agreeably to his prophecy. The noises did cease for many years, and have again been heard for two or three years past, and they increase—three shocks have been felt in a short space, one of which according to a late paper, was felt at New London, though it was by the account much more considerable in this and the adjacent towns.

KILLINGWORTH.

IN October, 1663, the legislature of Connecticut resolved that there should be a town at Hammonnasset, (the Indian name applied to the tract now constituting Killingworth,) and the same month twelve planters removed into it. These were joined by sixteen others in the course of two or three years; and the town was divided into 30 rights, one right being reserved for the first minister that should be settled there, and another for the support of the ministry forever. “The plantation in this town was called the plantation of Hammonnasset, and the plantation between Guilford and Saybrook, until May, 1667. At that time the place was named *Kenilworth*, after a town in the county of Warwick, in England, from which, according to tradition, some of the settlers at first emigrated. The name is thus spelt in the early records of the town and colony, but by corrupt spelling or pronunciation, the present name was finally adopted.”

The township of Killingworth is of an oblong shape, being about 13 miles in length from north to south, and has a mean breadth of more than three miles. It is bounded n. by Durham and Haddam, w. by Hammonnasset river, dividing it from Madison, e. by Saybrook and Chester, and s. by Long Island sound. It comprises two parishes, viz. Killingworth, and North Killingworth. The central part of Killingworth is 38 miles southeast from Hartford, 25 miles east from New Haven, and 27 west from New London. The southern, and particularly the southwestern section of Killingworth parish, is level, having a soil formed of loam, sand, and occasionally of gravel, which, by good husbandry, is rendered very productive. Upon the border of the Sound, there are large tracts of alluvial or salt marsh, comprising, as has been estimated, 1,000 acres. North Killingworth is rough and stony, and the soil better adapted for grazing, than for grain and corn.

There is one harbor in the town, about a mile below Killingworth street, which is safe from winds, and has good anchorage; but a bar lies at its entrance, on which there is only $7\frac{1}{2}$ or 8 feet of water at common tides. Ship building was begun in this town about the beginning of the last century, by Robert Carter; and for many years this has been a leading branch of business. Three yards are improved, all of which are on Indian river, a small stream which enters the harbor. There are, perhaps, five vessels built yearly, upon an average. One of upwards 400 tons was built in this place. The village of Killingworth

is quite pleasant. The principal street is a mile and a half in length and six rods wide, and is crossed about midway by Indian river. There are, perhaps, about 150 dwelling houses within a mile from the Congregational church, which is situated in the central part of the place: there is also in the village a Methodist and Baptist church. Killingworth has a healthful, interesting, and prospective situation, and has during the summer months, a salubrious sea air.

“The Indians were very numerous in the southern part of this town, on the banks of Hammonnasset and Indian rivers, and about the harbor. Immense masses of mouldering shells still point out the places where they dwelt. Most of their lands were sold to Col. Fenwick, while he lived at Saybrook. On the 20th of November, 1669, Uncas, Saehem of Mohegan, with Joshua his son, sold to the inhabitants of Killingworth all the lands in the township, which he had not sold before to George Fenwick, Esq. excepting six acres on the big hammock, (which lay on the eastern shore of the harbor,) reserving, however, free liberty to hunt in the woods, and fish in the rivers, and to use any trees for canoes, and rushes and flags for mats.” “The Indians lived in this town in great numbers until 1730 or 40.”

West view of Killingworth, (central part.)

The above is a view (looking eastward) of the central part of the principal street in Killingworth, showing the place where the road crosses Indian river, with part of the ship yards upon its banks. The Congregational church, seen in the center of the print, stands upon a small elevation, called Meeting-house hill: the academy is seen at the east end of the church: from this place the observer has a pleasant view of the harbor and Sound. The prospect from the steeple is more extensive and beautiful. On the right is seen, between the trees and opposite the church, a house upwards of an hundred years old. This house was the residence of the Rev. Jared Elliot, D. D. who was highly distinguished as a divine, physician, and scholar. He was the grandson of the celebrated John Elliot of Roxbury, Massachusetts, the “Apostle to the Indians.” As a divine, Mr. Elliot possessed enlarged views of the system of religion contained in the Bible. “In his preaching he was plain and familiar, happy in allusions to Scripture,

and abounding in original and laconic expressions. As a physician, his reputation was such, that he was sometimes called out of the colony. In history, natural philosophy, botany and mineralogy, he excelled. By several small treatises, he labored to improve the agriculture of his country. Some considerations had led him to believe that the black sand, which appears originally on the beach of the Sound, might be wrought into iron. He made an experiment upon it in the year 1761, and succeeded. For this discovery he was honored with a medal, by the society instituted in London for the encouragement of arts, manufactures and commerce. He died in 1763, aged seventy eight years."

A short distance northward of the church seen in the engraving is the burying ground. The following inscription is copied from one of the monuments.

"In memory of Doct. Benjamin Gale, who, after a life of usefulness in his profession, and a laborious study of the Prophesies, fell asleep May 6th, A. D. 1790, *Æt.* 75, fully expecting to rise again under the Messiah, and to reign with him on earth..... I know that my redeemer liveth, and that he shall stand at the latter day upon the earth, and mine eyes shall behold him."

It appears by this inscription, that Dr. Gale was a believer in the ancient doctrine of *Millenarians*, a name given to those who believe that the second coming of Christ will *precede* the Millennium, and that there will be a literal resurrection of the saints, who will reign with Christ on earth a thousand years. This appears to have been the belief of pious persons at the time of the first settlement of New England: even as late as the great earthquake, many Christians were looking for, and expecting the second coming of Christ.

Abel Buell, an uncommonly ingenious mechanic, was a native of this town: he was apprenticed to Ebenezer Chitenden, a gold and silver smith in this place, previous to the Revolution. Buell was married at the age of nineteen years, and at the age of twenty, altered a five shilling colony note to five pounds. His neighbors had suspected that something was going on in his house which was wrong, as a light had been seen in his chamber, at unusual hours of the night. He was discovered by some person, who, mounting a ladder, looked in at the window, and saw him in the act of altering the bills. So ingeniously was it done, that it could only be discovered by comparing the stumps of the letters with those left in the book from which all the colony bills were issued.* *Matthew Griswold*, the king's attorney, afterwards governor, conducted the prosecution against Buell. As it was his first offense, and he otherwise sustained a good character, Mr. Griswold granted him every indulgence which he could consistently with his duty as a public officer. Buell's punishment appears to have consisted of imprisonment, *cropping* and *branding*. The tip only of Buell's ear was cropped off: it was held on his tongue to keep it warm till it was put on the ear again, where it grew on. He was branded on the forehead as high up as possible. This was usually done by a hot iron, in the form of a letter designating the crime, which was held on the forehead of the criminal till he could say the words

"God save the king."

Mr. Buell was at the first imprisoned on Norwich; afterwards, through the influence of his family and friends, he was removed back to Killingworth. About this time he constructed a lapidary machine, the first, it is believed, that was used in this country. With this he was enabled to make a very curious ring; a large, beautiful stone being set in the center, surrounded by those of a smaller size, all of which were wrought in a curious and workmanlike manner. This ring he presented to Mr. Griswold, the king's attorney, and through his influence a pardon was obtained. Afterwards, about

* It appears from this that all the bills which were issued by the colony were originally bound together in the form of a book, and were cut out as they were wanted, leaving some part of the printed matter in the book.

the year 1770, Mr. Buell removed to New Haven. About this period, Bernard Romans was constructing a map of North America. As the coast of Pensacola was but little known, Buell was employed by him to make a survey of the coast. While at Pensacola, a person, knowing him to be an ingenious man, enquired if he could break the governor's seal, and open a letter and seal it up again, so that it could not be discovered that the letter had been opened. Mr. Buell was able to show his employer that it could be done in a perfect manner. He was, however, arrested for making the attempt, although it is believed that the governor employed the person who came to Buell. He was confined to the island, but he soon found means to escape, by a boat of his construction: he was accompanied by a boy who wished to leave the place; they put out into the open sea, and were three days out of sight of land. They however were able to get into some of our southern ports, and from thence Buell returned home.

The map mentioned above was published during the Revolutionary war, and it is believed to be the first map engraved and published in this country. In engraving it, Mr. Buell was assisted by Mr. Amos Doolittle, of New Haven. During the Revolution it was extremely difficult to procure types for printing, except French types. Mr. Buell, turning his attention to this subject, soon constructed a *type foundry*, and employed 15 or 20 boys in making types. The building used for the foundry was the Sandemanian meeting house, situated in Gregson street. The legislature of the state, impressed with a sense of the service he rendered the public, restored to him his civil rights. Upon the conclusion of the Revolutionary war, Mr. Buell and some others were employed by the state in coining coppers. Mr. Buell constructed all the apparatus for this purpose, and to such perfection did he bring it, that he was able to coin 120 in a minute. Soon after, he went to England, for the ostensible purpose of procuring copper for coining, but in reality to gain some knowledge of the machinery used for the manufacturing of cloths of various kinds.

While in England, he was passing through a town where they were constructing an iron bridge: through some error or defect in the construction, the builders could not make their bridge answer any useful purpose. Such was Mr. Buell's knowledge and ingenuity on subjects of this nature, that he was able in a short time to direct them how to construct their bridge in a proper manner. So highly were his services considered, that he was presented with a hundred guineas. Mr. Buell returned to this country, and brought a Scotchman by the name of M'Intosh. They erected a cotton factory in Westville, in New Haven, one of the first erected in this country. He afterwards removed to Hartford, and from thence to Stockbridge, Mass. where he made a profession of religion after he was seventy years of age. About the year 1825, he returned to New Haven, where he died in the alms house soon after his return.

SAYBROOK.

SAYBROOK is one of the most ancient towns in the state. Lord Say and Seal, Lord Brook, and other gentlemen of distinction, dissatisfied with the civil and religious state of things in England, in the time of Charles I, contemplated a removal to America: accordingly, in 1632, they procured of Robert, Earl of Warwick, a patent of all that territory "which lies west from Narragansett river, a hundred and twenty miles on the sea coast; and from thence in latitude and breadth aforesaid, to the South Sea." In July, 1635, they appointed John Winthrop, son of the governor of Massachusetts, then in England, their agent, to build a fort at Connecticut river, and constituted him governor of the the place and places adjoining, for the space of one year from his arrival there. On his arrival at Boston in October, he found that a company had just gone from Massachusetts and settled upon Connecticut river, within the patent held by their lordships. Winthrop however dispatched carpenters and workmen to the mouth of the Connecticut, who arrived there at or near the close of November, 1635. Mr. Winthrop soon followed them, and superintended their labors during the continuance of his commission.

In the summer of 1639, Col. George Fenwick, one of the patentees, arrived from England, and in honor of Lord Say and Seal, and Lord Brook, gave the tract about the mouth of the river, the name of Saybrook. From this time, to December, 1644, he superintended and governed the inhabitants, and then sold the jurisdiction of Saybrook to Connecticut colony; as his associates had given up their contemplated removal to America. The first tax levied by authority of the colony, was at the October session, the year after. Soon after this period, the settlement began to flourish; a number of families removing here from Hartford and Windsor. The original limits of the town extended upon the east side of the river for several miles, and included a part of the town of Lyme. The township now comprises three parishes, viz. Saybrook, Westbrook, *Pautapoug* or Essex. Saybrook parish is the south-east section of the town. The Indian name for this place was Pattaquasset. West of this is Westbrook parish, which was called by its Indian name *Pochaug*, until October, 1810. North of these two parishes is *Pautapoug* or Essex.

Saybrook is bounded n. by Chester, w. by Killingworth, e. by Connecticut river, and s. by Long Island sound. It is upwards of 7 miles in length from north to south, and averages more than 6 in breadth. The greater part of the township is uneven and stony. There are, however, some extensive levels, and tracts of rich soil, particularly in the vicinity of Saybrook village, in the southern part of the town. Some of the hills, near Connecticut river, have good granite quarries. There are several small harbors on the Sound, and on Connecticut river, at Saybrook point and *Pautapoug*. The bar at the mouth of the Connecticut is an impediment to navigation; vessels of a moderate draught are often obliged to pass it with but part of their cargoes. The depth of water at the bar, at spring tides, is about twelve feet. An important and lucrative trade was formerly carried on from this river, to the West Indies, and New London often served in some degree as the port. Saybrook harbor is at the mouth of a handsome cove, making up from Connecticut river, and extending west almost to Saybrook village. It is often resorted to by coasting vessels in bad weather. To this place the river is open through the winter, and it is here that vessels are frequently laid up, and goods deposited, while the river is frozen over above. Large quantities of fish are taken in this town. The shad fisheries are numerous, and a source of considerable wealth. Connecticut river shad are considered superior to any other in this country. White fish are taken upon the shores of the Sound, and are very valuable for the purposes of manure. They are afforded at a cheap rate; the lightest soils, enriched by them, have produced forty bushels of rye to the acre, and they have an equally advantageous effect upon the growth of corn, potatoes, and other productions.

The borough of Essex, in the town of Saybrook, is situated about 7 miles from the mouth of Connecticut river. It is a place of considerable navigation and commercial business, containing about 1,000 inhabitants. Ship building is also carried on to a considerable extent. In this place there are three houses of worship, an academy, 8 or 10 mer-

Northeast view of the Borough of Essex, Saybrook.

cantile stores, 6 sail makers, and one of the most extensive rope walks in the state. Ship building was begun in this place about 1720, by Mr. John Tucker. In 1775, the ship *Oliver Cromwell*, of 24 guns, was built at this place, by Mr. Uriah Hayden. The accompanying view was taken from the long causeway eastward of the place, and shows the appearance of the public buildings, the rope walk, and part of the houses on the point. The building on the extreme right is Hill's Academy, where are taught the higher branches of education; that standing opposite is the Baptist church. The building near the center with a spire is the Episcopal, and the one near by is the Methodist church. From these buildings there is an abrupt descent to the strip of land between two coves, (called the North and South coves:) this point, formerly called *Pettipaug Point*, extends 100 rods in a southerly direction. Most of the buildings in the borough are on this point. During the last war with Great Britain, this place was visited by an armanent from the British squadron blockading New London, in April, 1814. Vessels from the squadron had often gone out and cruised in the Sound.

"On the evening following the 7th of April, two or three of these anchored off Saybrook bar. They immediately dispatched for Pautapoug, two launches, each carrying 9 or 12 pound carronades and fifty or sixty men each, and four barges, supposed to have 25 men each, under the command of Lieut. Coote, completely prepared with torches, combustibles, &c. for the enterprise which they accomplished. Before 11 o'clock they were discovered entering the mouth of the river, by the keeper of the light house, and before 12, many of the men landed at Saybrook point, and went into the old fort, where no force was then stationed to resist them. The distance from this place to Pautapoug point is between five and six miles; but being retarded by a strong northerly wind and a freshet, they did not arrive there till about four o'clock, Friday morning, the 8th of April. The people knew nothing of their being in the river more than 30 minutes before they arrived, and took possession of the point; and some had no knowledge of it, before the work of conflagration was begun. Picket guards searched houses and stores for arms and ammunition, while the men generally were employed in setting fire to the vessels, lying in the river, at the point, and on the stocks along the North and South coves. About 10 o'clock, they called in their guards and proceeded down the river, with a brig, schooner, and two sloops. But the wind shifting from the northeast to the southeast, they set fire to all these, excepting the

schooner, which they anchored about a mile and a quarter below the point, where they remained till evening. Twenty two vessels of various descriptions were destroyed, and a loss occasioned, computed at 160,000 dollars, 60,000 of which fell on the inhabitants of Pautapoug.

"When the enemy first landed, the people living on the point and in the vicinity were in no situation to oppose them. In the course of the day, some forces collected from Pautapoug and other places west of the river; while on the east side, some collected from Lyme and New London; but the work of destruction was finished and the British were more than a mile down the river. The plan adopted was to oppose them on their way out, for which stations were taken on both sides. But the enemy were detained as has been stated. About sunset a field piece was planted on a point near their resting place, which, by several well directed shots, compelled them to leave the schooner. One of these shots killed two men and wounded a third. When night came on, it was excessively dark, and no object could be seen, and they proceeded silently down the river, and arrived at their vessels about 10 o'clock in the evening. Many shots were directed against them on the supposition of their being on their way, some of which struck their boats, and probably did some execution."*

The village of *Westbrook* is about four miles west from Saybrook village. The settlement of this place commenced as early as 1664. It was incorporated as a society in 1724. The Rev. William Worthington was their first pastor; he deceased in 1756, and was succeeded by the Rev. John Devotion. Ship building was commenced in 1740, on the Pochaug river, and is still a leading branch of business in the place. There are at present about 15 vessels owned here, principally coasters. It is estimated that there are about 1,200 inhabitants in the limits of the society, and two churches, 1 Congregational and 1 Methodist. Mr. *David Bushnell*, the inventor of the "American Turtle," a machine for destroying British shipping, during the Revolutionary war, was a native of this place.

There were formerly in the town four Indian settlements; one at the mouth of Oyster river; one on Obed's hammock, near the mouth of Pochaug river; a third was at Ayres's point, and so northward to Pautapoug point; the fourth was on or near the Indian reservation in Chester. The Indians in this town and vicinity were subject, some years before the English settled on Connecticut river, to the Pequots. In 1634, some of their confederates murdered Capt. Stone and Capt. Norton, and their whole crew, consisting of eight men, half a mile above Saybrook point, plundered the vessel, then burned her down to the water's edge, and sunk her.† In 1635, they received and protected individuals who had been concerned in the murder of Mr. Oldham, at Block Island.

"But notwithstanding these recent and abominable transactions, they consented to hold a treaty with Mr. Winthrop and his men, and gave to the English their right to Connecticut river and the adjacent country. Thus they excited a hope of peace and safety. But a few months, according to the testimony of Dr. Trumbull and various other writers, disclosed their treachery and wickedness. For in the beginning of October, 1636, as five men from Saybrook fort went to get hay at Calves' island, four miles north, near Lyme shore, some Pequots who had concealed themselves in the high grass surprised them, caught one, a godly young man, by the name of Butterfield, and tortured him to death: from which circumstance the place was named Butterfield's meadow. The other four escaped to their boat, but one of them was wounded with 5 arrows.—A few days after this, Joseph Tilly, master of a bark, came to anchor

* Field's Statistical Account.

† As late as 1785, some of the timber and plank of this vessel were found, together with a quantity of bar iron, and a few other articles.—*Field's Stat. Acct. Saybrook.*

nearly opposite Calves' island, and taking one man with him, went on shore for the purpose of fowling. As soon as he had discharged his piece, a large number of Pequots rising from their concealment, took him and killed his companion; and then gratified their malice by putting him to torture. They first cut off his hands and then his feet; after which he lived three days. But as nothing which they inflicted upon him excited a groan, they pronounced him a stout man. The place where he was taken and tortured has since been called Tilly's Point.—Within a fortnight of these transactions, the following calamity was experienced. A house had been erected about two miles from the fort, (at Cornfield point, as it is supposed,) and six men detached from the garrison to keep it. As three of them were fowling near the house, (a practice which the lieutenant had strictly forbid,) they were suddenly attacked by nearly one hundred Pequots: two were taken, and one fought his way through them sword in hand, wounded with two arrows, but not mortally.—The following winter the fort was little better than in a state of constant siege. None could go from it without hazard; and the cattle, stacks of hay, and almost every thing belonging to it at any distance, were destroyed. When the spring arrived, the enemy were still more troublesome. As Lieut. Gardiner was going out in the month of March, with ten or twelve men, to burn the marshes, the enemy rose upon them, just as they had turned south from the palisades, killed three of the men and wounded a fourth, so that he died in the fort the next day. The Lieutenant was slightly wounded, but was able with most of his men to retreat. Encouraged by this success, the Indians followed them, surrounded the fort, and challenged them to fight; mocking them in the groans and pious invocations of their friends whom they had tortured; till a dexterous use of the guns, loaded with grape shot, compelled them to retire. After this, Indians in several canoes beset a shallop, having three men on board, as it was sailing down the river. They shot one of them through the head with an arrow, who fell overboard. The other two they took and ripped them from the bottom of their bellies to their throats, cleft them down their backs, and then suspended them on trees by the side of the river that the English might behold these objects of their vengeance. One of the Indians concerned in these barbarities was Nepaupuck, a famous Pequot captain, who for this and other murders was beheaded at New Haven, in 1639, and whose head was set upon a pole in the market place.*

South view of Lady Fenwick's Monument on Saybrook Point.

The above is a representation of the monument of the wife of Col. Fenwick, and the remains of Saybrook fort, with Connecticut river in the distance to the north of the fort, and a few buildings at the eastern extremity of the landing. Col. Fenwick's wife was Lady Anne Botcler or Butler, who, being the daughter of an English nobleman, retained her maiden name: she died in 1648, and her husband returned

* Field's Statistical Account.

to England and was appointed one of the judges for the trial of Charles I. Her monument is about 30 or 40 rods southwest from the remains of the fort, and perhaps five or six rods from the river, on a piece of elevated ground, called "tomb hill," probably so named from the circumstance of this monument being placed upon its summit. It is said that Col. Fenwick made provision to have it kept in perpetual repair, it being one of the considerations for which he gave a deed to a large tract of land on the opposite side of the river. If this be a fact, the condition of the deed has been but illy complied with, and it is to be regretted that no more care has been taken to preserve the memorial of this respectable lady; it being, it is believed, the oldest monument for a female in the state. It is of coarse sandstone, and no inscription has been seen upon it within the recollection of the oldest inhabitants of the place. There is, however, something of the resemblance of A. B. on the end of one of the upright stones on the western side, but whether formed by the hand of man, or by the wear of time, it is difficult to ascertain. The monument of this lady stands on a bleak and exposed situation:

"The dark brown years" have passed over it; she sleeps alone far from the land of her fathers, "at the noise of the sounding surge! Her tomb is seen by the mariner as he passes by on the dark rolling wave."

Saybrook fort, however it may be regarded at the present time, was formerly a post of great importance. A garrison was constantly kept here for a very long period, and the fort was usually well manned in seasons of war and danger, as it commanded the entrance of Connecticut river. It was first built of wood, in front or on the point of Tomb hill. But as this in some unaccountable manner took fire in the winter of 1647, and was consumed, with some adjoining buildings, the fort was rebuilt soon after of more substantial materials, and placed a few rods further north, on what was called New-fort hill, the place on which the remains are now standing. A few days after the first fort was begun, in 1635, a Dutch vessel arrived from New Netherlands, with a view of taking possession of the mouth of the river and of laying the foundation of a settlement. The English having mounted two pieces of cannon, prevented their landing, and defeated the enterprise. This fort, also, about the time of the Pequot war, saved the inhabitants of Saybrook from being cut off by the Indians.

"In the year 1675, it was discovered that Major Andross was about to make a hostile invasion of the colony, and to demand a surrender of its most important posts to the government of the Duke of York. Detachments from the militia were therefore sent, with the utmost expedition, to New London and Saybrook. Captain Thomas Bull, of Hartford, commanded the party sent to Saybrook.

"About the 8th or 9th of July, the people of that town were surprised by the appearance of Major Andross, with an armed force, in the Sound, making directly for the fort. They had received no intelligence of the affair, nor instructions from the governor and council how to conduct themselves upon such an emergency. They were, at first, undetermined whether to make any resistance or not; but they did not hesitate long. As the danger approached and their surprise abated, the martial spirit began to enkindle; the fort was manned, and the militia of the town drawn out for its defense. At this critical juncture, Captain Bull with his company arrived, and the most vigorous exertions were made for the defense of the fort and town. On the 11th, Major Andross with several armed sloops drew up before the fort, hoisted the king's flag on board, and demanded a surrender of the fortress and town. Captain Bull

raised his majesty's colors in the fort, and arranged his men in the best manner. They appeared with a good countenance, determined and eager for action. The Major did not like to fire on the king's colors, and perceiving that should he attempt to reduce the town by force, it would be a bloody affair, judged it expedient not to fire upon the troops. He nevertheless lay all that day, and part of the next, off against the fort. The critical state of the colony had occasioned the meeting of the Assembly, at Hartford, on the 9th of July. They immediately proceeded to draw up a declaration, or protest. * * * * * Which was sent by an express to Saybrook, with instructions to Captain Bull, to propose to Major Andross the reference of the affair in dispute to commissioners, to meet in any place in this colony which he should choose. Early in the morning of the 12th of July, the Major desired that he might have admittance on shore, and an interview with the ministers and chief officers. He probably imagined, that if he could read the duke's patent and his own commission, it would make an impression upon the people, and that he should gain that by art, which he could not by force of arms. He was allowed to come on shore with his suit. Meanwhile, the express arrived with the protest and instructions from the Assembly. Captain Bull and his officers, with the officers and gentlemen of the town, met the Major, at his landing, and acquainted him that they had, at that instant, received instructions to tender him a treaty, and to refer the whole matter in the controversy to commissioners, capable of determining it according to law and justice. The Major rejected the proposal, and forthwith commanded, in his majesty's name, that the duke's patent, and the commission which he had received from his royal highness, should be read. Captain Bull commanded him, in his majesty's name, to forbear reading. When his clerk attempted to persist in reading, the Captain repeated his command with such energy of voice, and meaning in his countenance, as convinced the Major it was not safe to proceed. The Captain then acquainted him, that he had an address from the Assembly to him, and read the protest. Gov. Andross, pleased with his bold and soldier-like appearance, said, "What's your name?" He replied, "My name is Bull, sir." "Bull," said the governor, "it is a pity that your horns are not tipped with silver." Finding that he could make no impression upon the officers or people, and that the legislature of the colony were determined to defend themselves, in the possession of their chartered rights, he gave up his design of seizing the fort. He represented the protest as a slender affair, and an ill requital of his kindness. He said, however, he should do no more. The militia of the town guarded him to his boat, and going on board he soon sailed for Long Island.*

Saybrook point is a peninsula, circular in its form, and connected with the main land by a narrow neck, over which the tide sometimes flows. From this place to the fort, on the eastern extremity of the peninsula, the distance is about one mile. On the neck, a palisado was anciently formed from the river to the cove, to secure Saybrook point from any sudden incursion of the Indians. The soil on the peninsula is light and sandy, and the elevation of the highest part is about twenty feet. Being nearly destitute of trees and shrubbery, it presents to the beholder a bleak and naked aspect.

The land on the Point was laid out with care, as it was expected to become the residence of great men, and the center of great business and wealth. It is said that Oliver Cromwell, with other men then equally distinguished, actually embarked in the Thames, to occupy this ground. Westward of the fort a square was laid out, on which it was intended houses should be erected for Cromwell, Pymm, Hasselrig, and Hampden, the most illustrious Commoners in the English annals, who were expected from Europe; while a square still further west was reserved for public uses.

About half way between the palisado was erected the first building designed for the collegiate school, since named Yale College. This building was one story in height, and about eighty feet in length. Some

* Trumbull's History of Connecticut.

remains of the cellar, "over which the ploughshare has passed," are still visible. Fifteen commencements were held at Saybrook. More than sixty young men were graduated, most of whom entered the ministry, and some of them became characters of distinguished usefulness and excellence. To educate young men of piety and talents for the ministry, was the leading design of this institution. It was desired by the founders and others, that the churches should have a public standard or confession of faith, agreeable to which the instruction of the college should be conducted. This led to the adoption of the *Saybrook Platform*, after the commencement in 1708.

The removal of the college from this place to New Haven, produced great excitement in the colony of Connecticut. The feelings raised in the towns most interested, may be gathered from the circumstances attending the removal of the library. "An unsuccessful application having been made for this by some of the trustees, the Governor and council convened in Saybrook at their request, in December, 1718; and issued a warrant to the sheriff to go and take the books. When he got to the house where they were kept, he found men collected to resist him; but calling assistance, he forcibly entered the house, took them, and had them secured by a guard through the night. In the morning it appeared that the carts provided for carrying them to New Haven were broken, and the horses turned away. New provision being made, they were conducted out of the town by the major of the county; but some of the bridges on the road were broken up, and when they arrived in New Haven, it was discovered, on counting the books, that about 260 were wanting. These were disposed of by persons unknown, together with some valuable papers, in the confusion which arose at the taking of the library, and no discovery was made of them afterwards."

Names of the freemen in Saybrook, 1669. (From the Wyllis MSS.)

The following inscriptions are copied from monuments in the ancient burying ground on Saybrook point, near where the college building formerly stood.

Sacred to the memory of Maj'r General William Hart, eldest son of Rev. William Hart of Saybrook, who was born June 24th, 1746, and died August 29th, 1817, in the 72 year of his age. In youth, active and enterprising, he early entered on mercantile pursuits, and sustained a character of unquestionable integrity and extensive respectability. By his talents, he rose to some of the first civil and military honors of this state; and commanded unusual influence at home and abroad. He loved order—was an able counsellor—a professor of religion—a benefactor to the church—a pillar to society: and has left a memory respected by his friends, instructive to his family, and honorable to the place in which he lived.

"One eye on death, and one full fix'd on heav'n,
Become a mortal and immortal man."

Mary Ann Hart.—The silver cord is loosed,—The Golden Bowl is broken,—The dust returns to the earth as it was, and the Spirit to God who gave it.—But the trumpet shall sound and the dead shall be raised.

TOLLAND COUNTY.

TOLLAND COUNTY was incorporated as such in 1786. It was formed from Hartford and Windham Counties. It is bounded n. by Massachusetts, e. by Windham County; s. by New London County, and w. by Hartford County. It is irregular in its form. Its greatest length from north to south is about 30 miles. At the north part it is nearly 20 miles in breadth; at its southern extremity it is but five miles in breadth. Tolland County, as it respects its surface, soil, &c. may be divided into two distinct sections, the eastern and western. The western section, lying within the great valley of the Connecticut, is a handsome level or undulating country. This tract is generally free from stone, and the soil, though somewhat light, is warm, fertile and productive, and well adapted to the growth of grain. The eastern section, which embraces the largest portion of the county, is within the granitic range which extends through the state. A considerable proportion of forest lands still remain in this part of the county. The improved lands afford tolerable good grazing, but are not very well adapted for a grain culture. The manufacturing interests of the county are respectable and flourishing.

The following is a list of the towns, with their population in 1830.

Tolland, . . . 1,698	Ellington, . . . 1,455	Stafford, . . . 2,515
Bolton, . . . 744	Hebron, . . . 1,937	Union, . . . 711
Columbia, . . . 962	Mansfield, . . . 2,661	Vernon, . . . 1,164
Coventry, . . . 2,119	Somers, . . . 1,429	Willington, . . . 1,305

Population of the county in 1820, 14,330; in 1830, 18,700.

TOLLAND.

TOLLAND was originally purchased of the native Indians by a number of gentlemen in Windsor. In 1715 it was incorporated by the Assembly, and the settlement of the town was commenced by two families. The progress of the settlement was slow; the number of families in 1720 was but twenty eight. About one half of the township, comprising the south part, was claimed by a number of persons who were legatees of Joshua Uncas, sachem of the Mohegans. This proved a source of considerable difficulty, as the legatees commenced suits at law against the settlers. The proprietors holding under the Windsor claimants were obliged, at a dear rate, to purchase quit claims of the legatees of Joshua. The Rev. Stephen Steel was the first minister of this town. He commenced his labors in 1720, and continued his ministry for about thirty seven years, greatly beloved and revered by his people. Mr. Steel was from Hadley, Mass. The first settlers were of the names of Chapman, Stearns, Grant, West, Carpenter, Aborns, Abbot, Lathrop, Nye and Dimock. The Chapmans were from Windsor; they located themselves about $2\frac{1}{2}$ miles westerly from the court house,

near the Hartford road, in the vicinity of Snipsic pond or lake. John Stearns settled about 2 miles eastward of the court house; Zebulon West about 3 miles south; the Govers, Carpenters and Samuel Aborns, located about $2\frac{1}{2}$ miles north. Ebenezer Grant, from East Windsor, settled on Grant's hill, about $2\frac{1}{2}$ miles south from the court house; Nye and Dimock settled near Willimantic river, about 4 miles east.

South view of the central part of Tolland.

Tolland is bounded *n.* by a narrow section of land in Ellington, extending eastward, called "the Equivalent," *w.* by Vernon and Ellington, *e.* by the Willimantic river, dividing it from Willington, and *s.* by Coventry. It is upwards of six miles in length from north to south, and five and a half in breadth. The township is rough and uneven, being mountainous and stony, but some of the valleys and borders of streams consist of loam, which is warm and fertile. On the western boundary of the town is a large body of water, called Snipsic pond, being two miles in length and 100 rods in width. Some of the most valuable land in the township is in the vicinity of this pond. There is also a pond called Skungamug, in the central part of the town, upon which beavers were formerly taken by the Indians. Great quantities of cranberries are now gathered upon its borders.

The village in the central part of this town consists of about forty well appearing houses, pleasantly situated on an elevated plain of about half a mile in extent from north to south, narrow, but of sufficient width for a wide street. This place is 18 miles east from Hartford, and 52 from New Haven. A range of mountains rises immediately to the west of the village, dividing this part of the state from the great valley of the Connecticut. The view shows the central part of the village, embracing most of the public buildings. The first building on the left is the Tolland County bank. The next building by its side, with a steeple, is the court house for the county; the next is Col. Elijah Smith's tavern. Col. Smith was the first post master, and has kept a public house

on this spot ever since the year 1800. On the opposite side of the street is seen another tavern, to which the county jail is attached. The Baptist church, with a square tower, is seen in the distance: the post office is kept at this time in the basement story of this building. The Methodist church is situated at the northern extremity of the village, on the west side of the street. The Congregational church, the largest building in the place, stands at the south end of the village, and being in the street, is a very prominent object in that direction. The view being taken in the central part of the street, looking north, of course this church could not be represented in the engraving.

The following inscriptions are copied from monuments in the grave yard, south of the village.

Here lies the body of the Rev. Mr. Stephen Steel, the worthy pastor of the Church of Christ in Tolland, who departed this life the 4th of December, A. D. 1759, in the 63d year of his age, and the 37th of his ministry. For me to live is Christ, and to die is gain.

Here lies interred the body of ye Hon'ble Zebulon West, Esq'r. sometime Justice of ye quorum, Judge of probates, Speaker of ye Lower House of Assembly, and member of ye Hon'ble Council, who lived much respected and died greatly lamented, on ye 4th day of December, A. D. 1770. *Ætatis Anno 65th.*

Heaven waits not the last moment.....owns her friends
On this side death, and points them out to men :
A lecture silent, but of sovereign power—
To vice confusion, and to virtue peace.

In memory of Samuel Cobb, Esq. a gentleman of public education and distinguished abilities, who long served his generation as a physician and minister of justice, to great acceptance, and in his life and death was an example of sobriety and virtue, and evidenced the influences and consolations of Religion; lived much esteemed, and died universally lamented, on ye 6th day of April, A. D. 1781, Anno *Ætatis 65th.*

The great, the good, the wise, the just,
Must all in time be turn'd to dust:
Then learn to quit terrestrial ties;
That you may soar above the skies;
And then enjoy the blissful favor,
Of Jesus Christ our Lord and Savior.

Capt. Amos Fellows was captivated by ye British troops on ye Island of New York, Sept. 15, 1776, and was closely confined for several months, and there suffered repeated hardships, probably insupportable, and died in captivity, Feb. 16, 1777, in ye 48th year of his age. His remains are there still, and that his memory may be perpetuated, this monument is here erected by his son. A tribute of a tear is due to him who in his country's cause has lost his life.

BOLTON.

THE settlement of this town commenced about the year 1716, by a number of settlers, principally from the towns of Hartford, Windsor and Wethersfield. The first town meeting was held in 1720, the year it was incorporated. In 1725, the inhabitants obtained liberty of the General Assembly, to form a church. The first minister of the town was the Rev. Thomas White, who was ordained in 1725.

The town is bounded n. by Vernon, w. by Manchester and Glastenbury, e. by Coventry, and s. by Hebron. It is upwards of 5 miles in

length and 3 in breadth. The soil is a coarse, hard, gravelly loam, rather cold and sterile. It affords, however, tolerable grazing lands. The township has an elevated situation, hilly and stony, being within the granitic region of the eastern section of the state.

Bolton Stone Quarry.

The above is a representation of the Bolton Quarry, so called; being the principal place, at the time this drawing was taken, where this stone was quarried. The engraving shows the position in which the stone is found. Recently, (1836,) a new quarry has been opened, a few rods north of the one represented. This range is near the boundary line between Bolton and Vernon, and about 13 miles from Hartford. This stone is a species of slate, of a brilliant light gray color, composed of mica and quartz, and is excellent for flagging and other purposes. It is extensively used in the principal cities of the United States. For strength it exceeds any other known in this country, and the demand for it is rapidly increasing. These quarries have been worked about twenty years, though not in an extensive manner till quite recently. Messrs. Apollos Sweetland, and Waterman Roberts, of Hartford, and Ahab Smith, and Isaac Keney, Jr. of Bolton, are the proprietors. Sweetland and Roberts, of Hartford, are agents for the concern.

COLUMBIA.

COLUMBIA was formerly a part of the town of Lebanon. It was incorporated as a town in 1800. It is bounded n. by Hop river, which separates it from Coventry, w. by Hebron, e. by Lebanon and Windham, and s. by Lebanon. It is about five miles long, and four wide. The central part of the town is twenty two miles east from Hartford. The township is uneven and hilly, and the soil is a coarse gravelly loam, being hard and dry, yet well adapted for grazing. The town constitutes one Congregational society.

It was in this place that Dr. Eleazar Wheelock, the first president of Dartmouth College, had his celebrated Indian school. His house and the school stood a few rods from the present Congregational church. Dr. Wheelock was born in Windham, in April, 1711, and graduated at Yale College in 1733. Soon after leaving college, he entered into the ministry, and soon received an unanimous invitation to become the pastor of the second society in Lebanon, (now Columbia,) with which he complied. While a minister in this place, he became desirous to employ himself in a more extended field of action. The unhappy and neglected tribes of Indians in the county, and on its borders, excited his compassion and engaged his attention. About this time, (1741,) Sampson Occum, a serious Indian youth, solicited instruction, as Mr. Wheelock had opened a school for a small number of young men who were preparing for college. He willingly received young Occum into his family and school, where he continued for about three years. He afterwards became a preacher of considerable celebrity. Dr. Wheelock conceived, that if he could educate Indian youth for missionaries, they would be more successful among their countrymen than the whites. With these views, he undertook himself the care and expense of educating two Indian lads from the Delaware nation, in 1754, but the design was so benevolent, that a number of gentlemen soon united with him. His pupils increased, and after receiving numerous benefactions, the largest of which was the benefaction of Mr. Joshua Moor, of Mansfield, he called his institution "Moor's Indian Charity School." In 1764, the school consisted of about thirty scholars, of whom about half were Indian youth. The Indian boys were accommodated in a part of the house given by Mr. Moor. The school house was nigh Mr. Wheelock's dwelling, in the hall of which the students and their instructors attended morning and evening prayers.

To enlarge the power of doing good, contributions were solicited not only in various parts of this country, but also in England and Scotland. The money collected in England was put into the hands of a board of trustees, of whom the earl of *Dartmouth* was at the head. From this circumstance, when Dr. Wheelock was invited by the government of New Hampshire to remove to Hanover and establish a college in that place, it was called Dartmouth College. This seminary was incorporated in 1769, and Dr. Wheelock was declared its founder and president, with the right of appointing his successor.

In 1770, Dr. Wheelock removed his family and school to Hanover, his pupils performing the tour on foot. The roads at that period were in a very rough and unfinished state, and it was in many places difficult to proceed. The site selected for the college and other buildings, was an extensive plain, shaded by lofty pines, with no accommodations, except two or three small log huts, and no house on that side of the river within two miles, through one continued dreary wood. The number of souls then with him was about seventy. Log houses were soon constructed, and a small framed house was begun, designed for the reception of Dr. Wheelock and his family. The frame of a college, eighty feet in length and two stories in height, was soon after raised, and partially covered: a hall, and two or three rooms in it, were considerably advanced when the autumnal storms commenced. . . . Upon a circular area of about six acres, the pines were soon felled, and in all directions covered the ground to the height of about five feet. Paths of communication were cut through them. . . . The snow lay four feet in depth between four and five months. "Sometimes standing in the open air, at the head of his numerous family, Dr. Wheelock presented to God their morning and evening prayers: the surrounding forests, for the first time, reverberated the solemn sounds of supplication and praise."* He died in 1779, in the 69th year of his age, and was succeeded by his son in the presidency of the college.

The following inscriptions are copied from monuments in the burying ground, near the Congregational church in Columbia.

Sacred to the memory of Mrs. Sarah, the wife of ye Rev'd Eleazer Wheelock, who died Nov. 13, A. D. 1746, and in the 44th yr. of her age; and of a character too great and good, to have any thing worthy of *it* inscribed here.

Sacred to the memory of Dea'n THOMAS LYMAN, who died Aug. 13, 1783, in the 80th year of his age. He was a man of great experience in ye Christian Religion. Few in our world have enjoyed a more constant communion with Heaven, or at intervals had greater discoveries of Divine things. His life was zealous and exemplary, his death was peaceful and triumphant. He did great honor to religion while he lived, but greater when he died. In his last moments were seen ye power of ye divine life, and ye most convincing proofs to ye truth of ye Christian Religion.

Behold my friends, what grace can do for men,
When by it, they like babes are born again.

* Memoirs of Wheelock, by Drs. M'Clure and Parish.

COVENTRY.

COVENTRY was first settled about the year 1700, by Nathaniel Rust and some others. The settlement of the town has, however, been dated from 1709. In the spring of this year, a number of respectable persons from Northampton and other places moved into the town, and the inhabitants were so increased in about two years, that they were incorporated with the privileges of other towns. The planters were from a great variety of places, but principally from Northampton and Hartford. The township was originally given by Joshua, sachem of the Mohegans, to a number of legatees in Hartford, who conveyed their right to William Pitkin, Joseph Talcott, William Whiting, and Richard Lord, to be a committee to lay out said township, and make settlements on the lands.

North view of the Hale House, Coventry.

Coventry, the central part of which is eighteen miles east from Hartford, is bounded *n.* by Tolland, *w.* by Bolton and Vernon, *e.* by the Willimantic river, separating it from Mansfield, and *s.* by Hebron and Columbia. Its average length and breadth is upwards of six miles. The surface of the town is uneven, and the soil is generally a gravelly loam. There is a lake, or pond, in this town, called *Wangombog*, two miles in length and one in breadth. A stream, called the *Skunganiug*, runs from north to south through the town; and, uniting its waters with another stream, forms Hop river, which passing eastward till it reaches the Willimantic, constitutes the greater part of the southern boundary of the town.

The above is a view of the birth-place of Capt. Nathan Hale, the martyr to American liberty. The house is on elevated ground, commanding an extensive prospect westward; twenty miles from Hartford, and seven from Tolland.

Capt. Hale graduated at Yale College in 1773. The ardent glow of patriotism induced him in an early period of the Revolution to enter the army, as a captain in the light infantry regiment, commanded by Col. Knowlton of Ashford. After the defeat of the Americans on the 27th of August, 1776, and their retreat from Long Island, Gen. Washington became extremely desirous to gain some knowledge respecting the enemy's future operations. Notwithstanding the extreme difficulty and peril of the undertaking, Capt. Hale volunteered his services to the commander in chief. Having disguised himself and crossed over to Long Island, he proceeded to the British encampment, obtained the necessary information, but at the moment of his leaving the island, he was recognized by a relative, who was a refugee, and betrayed. He was taken before Sir William Howe, who, without the formality of a trial, ordered him to be hung *the next morning*. This peremptory order was carried into effect in a cruel, barbarous, and revengeful manner. He met his fate with composure and firmness. His last words were, "that he lamented that he had but one life to lose for his country."

The Hon. *Samuel Huntington*, governor of Ohio, was the son of the Rev. Joseph Huntington of this town. In 1801, he removed to Ohio, then comparatively a wilderness. He was appointed to a succession of important offices. He died at Painsville, June 7th, 1817, aged 49 years.

Lorenzo Dow, a celebrated itinerant preacher, was born in this town, about two miles south of the Hale house, Oct. 16th, 1777. He was distinguished for his eccentricities and labors. He commenced preaching in the Methodist connexion. He traveled through the United States, from New England to the extremities of the Union, at least from fifteen to twenty times. Occasionally he went into Canada, and once to the West Indies. He also made three voyages to England and Ireland, where he drew crowds around him. "It is thought, and not without reason, that during the thirty eight years of his public life, he must have traveled nearly two hundred thousand miles." He wrote a number of books, besides his "Journal," or life: the titles are usually as eccentric as their author. He died at Georgetown, (D. C.) Feb. 2d, 1834.

From the American Mercury, May 2d, 1785.

By authentic information from Connecticut, we learn that a few weeks since, a person on his travels through the town of Coventry in that state, stopped on a Saturday at the house of the Rev. Joseph Huntington, D. D. and acquainted the Doctor that he had been preaching at Susquehannah for a considerable time, was so unfortunate as to be driven from his possessions there by the Indians—that his property was destroyed by them—that he was then bound to the state of Massachusetts, where he had some friends residing, and at the same time begged charity. The Doctor, who is by no means a stranger to acts of hospitality, was very liberal and charitable to the clergyman, invited him to stay and spend the Sabbath, as there would be an impropriety in his traveling the succeeding day: which invitation the stranger accepted. The Doctor then requested his brother clergyman to assist him in the duties of his function; but he objected, and said that his clothes were not sufficiently decent to appear in the pulpit. In order to obviate this difficulty, the Doctor offered him a suit of clothes which he had not long since received from the tailor, and desired him to try them on, which he did, and found they suited very well. The objection being removed, the clergyman accordingly agreed to assist the Doctor the succeeding day, and desired to be by himself that evening to study his discourse. A fire was then made in his bed chamber, where he repaired with his new garb, at the same time acquainting the Doctor that he must study until late at night, and hoped no noise which he might make would disturb the repose of the family. Sunday morning came, the adroit clergyman was sent for to breakfast, but to the great surprise of the family, he was not to be found; for during the night he had taken his exit, not forgetting the garment so well suited to his clerical dignity, and leaving behind him the following select and well adapted text, prefixed at the top of the paper intended for his sermon: "Ye shall seek me and shall not find me; and where I am, thither ye cannot come."—*John 7, 34.*

The following inscriptions are from monuments near the Congregational church, in the southeastern part of the town. Mr. Meacham is believed to have been the first settled minister in the town.

The Rev. Mr. JOSEPH MEACHAM was near 40 years ye learned, faithful, and painful pastor of ye church in Coventry. He was a man of God, fervent in prayer, zealous and plain in preaching, sincere in reproving, holy and prudent in conversation; a kind husband, tender father, sincere friend; a lover of souls. Fired with ye labors of ye Word, his ardent soul bent its flight to Jesus, and dropped ye body to rest here till Jesus come, Sept. 15th, 1752, in ye 67th year of his age.

Here lies what was mortal of Mrs. *Esther Meacham*, ye prudent, pious, and virtuous consort of Rev. Joseph Meacham. She was the daughter of ye venerable John Williams, and was carried captive to Canada with her father and his family; was wonderfully preserved and redeemed, and lived an eminent example of what was amiable in a wife, a mother, a friend, and a Christian. Slept in Jesus, March 12th, 1751, in ye 60th year of her age.

Rev. Joseph Huntington, D. D. ordained June 29, 1763; died Dec. 25th, 1794, in the 60th year of his age, and 32d of his ministry. He was an eminent divine, and laborious minister; an affectionate parent and friend. He was considered in the churches as a pattern of learning, an illustrious example of extensive charity, and was much improved as a councillor and peace maker. Blessed are the peace makers, for they shall be called the children of God.

Durable stone preserve the monumental record. Nathan Hale, Esq. a Capt. in the army of the United States, who was born June 6th, 1755, and received the first honors of Yale College, Sept. 1773; resigned his life a sacrifice to his country's liberty at New York, Sept. 22d, 1775, *Ætat.* 22. Mr. Richard Hale, jr. born Feb. 20, 1757, died of consumption, in the island of St. Eustatia, aged 37. They were both the sons of Deacon Richard, and Mrs. Elizabeth Hale, of Coventry.

ELLINGTON.

ELLINGTON was originally a part of the township of East Windsor, called the *Great Marsh*. It was incorporated as a town in 1786. It is bounded *n.* by Somers and Stafford, *w.* by East Windsor, *e.* by Tolland and Stafford, and *s.* by Vernon and Tolland. It is irregular in its form, its greatest length being nine miles, and its greatest breadth about six, comprising upwards of 21,760 acres. The township in the western part is generally level, a considerable portion of it being a plain, the soil of which is light and dry, but considerably fertile. The eastern part is broken, hilly and mountainous.

It was not until about seventy five years after the settlement began on the east side of Connecticut river, that any inhabitants located themselves in the part now called Ellington. Why this tract of land was thus neglected, cannot now be easily told. It might have been the opinion which early prevailed that the mountain land was better, the timber and water better, which influenced settlers to pass from Windsor to Tolland, Willington, and other mountainous tracts, rather than occupy these plains. The opinion was long prevalent, that the soil on the plain, near the present center of the town, and all the western section of it, was far inferior to the elevated tracts in the adjoining towns east. And even the fathers of some who are now living in the towns east, might have purchased more than double the number of acres on the plain near the center of the town, with the same amount of capital that they invested in their farms on the mountains. *Roger Wolcott* interested himself in the settling of Willington, some years before there was any survey of this region. Tolland had a minister settled while this town was an unbroken wilderness. Bolton and Stafford were earlier surveyed than any part of this town. Coventry had a minister fifteen or twenty years before any one was located here. The land formerly occupied by the Ellsworths in this town, where Capt. Samuel Chapman now resides, was surveyed in the year 1720, as this was the earliest date in which any person made a beginning in this place. The following is from the original record.

“Land surveyed to Daniel and John Ellsworth, sons of Lieutenant John Ellsworth, of Windsor, by Thomas Kimberly, surveyor of land in the county of Hartford, 16th of March, 1720, five hundred and forty acres of land between the mountains east of Windsor and Connecticut river, at a place called by the English ‘*The Great Marsh*,’ and by the Indians ‘*Waxkashuck*’—340 acres bought of Capt. Joseph Wadsworth, and 200 acres bought of the Bissells, by said Lieut. John Ellsworth, began at a pine tree marked and having two mere-stones by it, standing on the plain near the north-west corner of the said marsh—(then all the bounds are described.) Samuel Pinney and Daniel Grant, being under oath, assisted in carrying the chain.”

This was in March, 1720. On a stone a little distance northwest from said Samuel Chapman's is the following inscription. "*Lieut. John Ellsworth* was killed here by the fall of a tree, *Oct. 26th, 1720*, aged 49 years and 15 days." So far as can be learned from the records, it does not appear that there was any family within the limits of Ellington, previous to the aforesaid date. It is supposed that the Capt. Wadsworth of whom the Ellsworths purchased had a grant of land for services in the Pequot war. Whether the Bissels, of whom the 200 acres were bought, claimed under the Indian title, or in some other way, is not known. The Rev. John McKinstry was the first minister who was settled in Ellington. He purchased a small place of Andrew McKee, a little east of the place where Judge Hall's high school-house is now located, by deed dated April 27th, 1730. Three years afterwards he bought about thirty acres of land adjoining his first purchase, of Simon Parsons; his deed, witnessed by Daniel Ellsworth, John Fairfield and Samuel Thompson, as appears from Windsor records. The ancient town of Windsor extended east to the road as it now runs from the widow Moulton's, by Wyllys Russels's. South of Lucius Chapman's, it passed on the side hill east of the road as it now runs to Bolton line, now Vernon. The land east of this, within the limits of Ellington, and called the Equivalent, was granted to the town of Windsor, and the grant making the conveyance is on the records in the following words:

"A patent of the Equivalent lands on the east side of Windsor. Whereas the Governor and Company of the English colony of Connecticut, in General Court assembled at Hartford, May the 10th, 1716, did give and grant unto the inhabitants of Windsor, in the County of Hartford, an Equivalent in the Colony lands, in consideration of 7,250 acres of land on the north side of the said town, which by the last settlement of the line of said Colony with the Province of Massachusetts Bay, in New England, was taken off from said township.

G. SALTONSTALL, *Gov.*

"*Ilez. Wyllys, Secretary.*"

These lands were surveyed, and their limits ascertained, on the 16th, 17th and 18th days of April, 1723, by James Wadsworth and John Hall. Twenty years passed away before a division of the tract was made among the proprietors. Proprietorship had become an exceedingly complex concern, and for almost twenty years there were yearly meetings held in which the division of these and other common lands was one of the objects before the meeting, while the difference of opinion among the proprietors was such, that all their doings were embarrassed to a degree that prevented them from proceeding. In 1743, the report of a committee appointed many years before was accepted, and according to their survey and division allotments were made. They began east where Selden McKinney resides, at the north line of Bolton, now Vernon, and laid out lots in half mile ranges to Somers, and then back again. Beyond the second tier, the lots were laid north and south in two tiers, all the south range bounded south by Tolland, and all the north on the north by Stafford. Beyond this a number of lots were laid out the whole breadth from Tolland to Stafford, and thus till the last lot was bounded by the Willimantic. In all these surveys and allotments, the pond between Ellington and Tolland was uniformly written *Messhanips*—for the north pond bordering upon Stafford no other name is known than Square Pond. The Rev. John McKinstry was in middle life when he was settled here. He was educated in Scotland, but married his wife in Wenham, beyond Boston. She was the daughter of Deacon Fairfield, of that place. When he came to this place, he had five children, and two afterwards. Their names were John, Alexander, William, Paul, Mary, Betsey and Abigail. One of his sons was a physician, and lived at Taunton or that vicinity. Mary married Esq. Ellsworth, the son of Capt. Daniel Ellsworth. Betsey, while on a visit to her brothers at the East, was murdered by a slave who lived in the family. She was making preparation to attend an ordination in a neighboring town, arose early, and having occasion to use a flat iron, was heating it by the fire: as she was leaning over the table, the slave took the flat iron, and by a blow upon her head deprived her of life: he concealed her body under the stairs and fled: he was however arrested and executed, and his confession of the deed published with the sermon preached at his execution: he had been told that if he should kill some one and run away he should be free. Mr. McKinstry continued his connection with the people in this place but 16 years. He was succeeded in the ministry by the Rev. Nathaniel Huntington: he continued here but six years and six months, and died of a consumption. His successor was the Rev. Seth Norton: his ministry was of short continuance: he died in 1762, aged 31 years. His successor was the Rev. John Bliss: he died February 13th, 1790, aged 54. His successor was Mr. Leonard, who continued in the relation of a minister but a few years, and was succeeded by the Rev. *Diodate Brockway*.

"Ellington is situated partly on the plain and partly on the hills. A few years since no township in the county of Hartford, in which it was

then included, was in lower estimation; its soil was considered lean—its agriculture was wretched, and the circumstances of its inhabitants were generally very humble. The circumstances of the community have changed, the agriculture and the buildings have improved, and the inhabitants have risen not a little in their general character.” Few tracts of country possess advantages for further improvement equal to this, to render it a delightful garden, a most beautiful heritage, and a place of moral and intellectual worth. The scenery in this town embraces considerable variety and is uncommonly interesting and beautiful.

Western view of the central part of Ellington.

The above is a west view of the Congregational church, and some other buildings in the central part of Ellington. In the village, or near the center of the town, are about 40 dwelling houses, most of which are finished in a neat, plain and handsome style. There is a high school, lyceum and conference house, school for young misses, district school, and two hotels, all of which are finished in a handsome style. The “Ellington School,” designed principally for boys from the age of eight years to sixteen inclusive, is a respectable institution, and has acquired a deserved celebrity. The house of Judge Hall, the principal, and the high school, a spacious edifice, are elegant buildings, situated a little west of the Congregational church, on a gentle but beautiful eminence.

HEBRON.

THE first settlement of this town was commenced in 1704. The first people who made settlements in the town were William Shipman, Timothy Phelps, Samuel Filer, Caleb Jones, Stephen Post, Jacob Root, Samuel Curtiss, Edward Sawyer, Joseph Youngs, and Benoni Trumbull. They were from Windsor, Saybrook, Long Island and Northampton. Hebron was incorporated as a town in 1707. It is

bounded *n.* by Bolton and Coventry, *w.* by Glastenbury and Marlborough, *e.* by Columbia and Lebanon, and *s.* by Colchester. Its average length from north to south is $9\frac{1}{2}$ miles, and its average breadth more than four miles. The surface of the town is uneven, being somewhat hilly and diversified, and the soil is considerably fertile. There are in the town two located Congregational societies and churches, 1 Episcopal church and 1 Methodist. The principal village in the town is 20 miles from Hartford. Hop river, a branch of the Willimantic, forms the northeastern boundary of the town. North pond, in the south part of this town, is a considerable body of water; it is situated partly in this town and partly in Colchester. A large iron furnace for castings and pig iron is now erecting near the outlet of this pond, about three miles from Hebron village. The best bed for obtaining the ore is said to be about one mile northwest of the Congregational church in Colchester. There are also in the first society, 1 woolen and 2 cotton factories, and 1 paper mill.

South view of Hebron, (central part.)

The above is a representation of some of the most important buildings in the principal village in Hebron, 20 miles *s. e.* from Hartford. The Gothic building on the left is the Episcopal church, which is built of brick. The first dwelling house north, with four chimnies, is the residence of John S. Peters, Esq. formerly governor of the state. Gov. Peters was bred a physician, and is one of the largest landed proprietors in the town. On the right is seen in the distance the spire of the Congregational church, fronting the south, before which is a small open green. The first society contains about half the inhabitants of the town. The whole of the parish of Gilead, and about half of Andover, are within its limits, both of which have an excellent soil, cultivated by farmers. Hebron has furnished quite a number of distinguished men. Dr. Trumbull, the venerable historian of Connecticut, Gov. Peters, Gov. Palmer of Vermont, Gov. Root of New York, and three members of Congress, Sylvester Gilbert, Daniel Burrows, and the late Daniel Buck of Vermont, were all natives of this town.

The first minister ordained in this town was Rev. John Bliss; this was in October, 1717. He declared for Episcopacy in 1734, and having laid the foundation of a society, a house of worship was erected the next year for that denomination, and Mr. Bliss preached and read service for them a number of years afterwards. The Rev. Benjamin Pomeroy, D. D. in 1735, was ordained as pastor of the church and congregation from which Mr. Bliss was dismissed. He was an ardent and zealous preacher of the gospel, of the New Light order, and a warm admirer of Mr. Whitefield, who at that time experienced much opposition in many places. Mr. Pomeroy's zeal in endeavoring to arouse his slumbering brethren, and their stupid congregations, in his vicinity, was deemed *irregular*, and (says Dr. Trumbull,) "a certificate was lodged against him, and, for seven years, he was deprived of his stated salary."

The following, furnished by a correspondent, describes a scene of 'other years:' in point of fact it is believed to be substantially correct.

"The inhabitants of this town have been remarkable for their attachment to the different dynasties that have governed this country. In 1758, during the war between Great Britain and France, the then North American colonies made a noble effort, aided by an army of *regulars*, to close a war, (waged with savage ferocity, by the combined forces of French and Indians,) by taking Louisburg, a strong fortress, and key to the Gulf and River St. Lawrence, which was gloriously accomplished by the troops under the command of General Amherst. The glad tidings were wafted on eagles' wings to every hamlet in the suffering country, gratitude warmed every heart, and joy lighted up every countenance; cordial greetings cheered every bosom, and enormous pumpkin pies smoked on every board. It was deemed necessary that some further demonstrations should be made, to show clearly the love of king and country that entwined around every ligament of their hearts; caps were thrown high, and a full chorus from stentorian lungs grandly echoed from the surrounding hills. A decree went forth, that a cannon should be fired; no life-destroying instrument of that description had ever broken the silence of this part of the New World; Yankee ingenuity was placed on the rack; an entire new article was invented, and would have been patented forthwith, had fashion then led the way. A tremendous *oaken log* was brought from the forest, and without delay transformed into a cannon of the caliber of 120 pounds; to make all sure and establish the character of this new species of artillery, a son of Vulcan placed thereon massive hoops of iron;—"a threefold cord is not easily broken,"—and in accordance with this truth, a cordon of wood hoops were driven close over all, so that the infernal machine had the appearance of a mummy dressed for the tomb. The work was accomplished; the powder horns were brought together and emptied of their contents; the gun was literally crammed, and removed to the summit of a hill, that the thunder thereof might be heard to the ends of the earth; a train was set and the match lighted; the assembled multitude stood afar off in breathless anxiety; the awful moment was approaching; the torch was applied to the train; the minion of mischief crept slowly towards the chamber of sleeping dust, like the serpent to the ear of our mother Eve,—

"Lit by the brilliant spark, from grain to grain
Runs the quick fire, along the kindling train;
On the pain'd ear-drum bursts the sudden crash,
Starts the red flame, and death pursues the flash."

In an instant, hope and fear, together with the object of adoration, were wafted to terræ incognitæ in a fiery chariot.

The fame of the exploit spread over the whole world, and was written in the Chronicles of the kings of England; George the third, in the plenitude of his goodness, provided a substitute made of pure brass, that his faithful subjects might ever after sing peans to his victorious army. This mark of his majesty's favor, however, was lost in passing the Atlantic Ocean.

MANSFIELD.

MANSFIELD* was formerly comprised in the original limits of the town of Windham, of which it was the northern section. It was made a dis-

* This town was named, it is said, from Major *Moses Mansfield* of New Haven, who, in the Indian wars, routed a party of Indians somewhere in this region. In consequence of this exploit, he received a grant of a large tract of land, now comprised

inct town in 1703. Its Indian name was *Nawbesetuck*. Settlements were made here soon after they commenced at Windham. Some of the first settlers are said to have been of the names of Fenton, Royce and Hall. Patience Royce is said to have been the first white child born in the town. Settlers by the names of Storrs, Porter and Barrows, from Plymouth, were in this town at an early period. In October, 1710, the Rev. Eleazar Williams was ordained as the first minister in the town. The township is bounded north by Willington and Ashford, west by Willimantic river, dividing it from Coventry, east by Chaplin, and south by Windham. Its average length from east to west is 8 miles; its average breadth nearly six. The central part is 27 miles east from Hartford, 19 from Norwich, and 12 from Tolland.

Northeast view of the Presbyterian Church, Mansfield.

The above is a north view of the *Presbyterian* church in Mansfield, and some other buildings in the vicinity, in the central part of the town. This is believed to be the only *Presbyterian* church in Connecticut. The members are ruled, or governed, by 8 elders.

The face of the township is uneven, being diversified with hills and valleys: the eminences in general have considerable elevation. Besides the Willimantic, the town is watered by Nachaug river, and its tributary streams, the Mount Hope and Fenton.

A larger quantity of silk is manufactured here than in any other place in the United States. This branch of industry was introduced into the country by Dr. Aspinwall of this place, above seventy years since, who established the raising of silk worms in

in the limits of this town. The tradition is, that Major Mansfield received his name, Moses, from the following circumstance; his parents, who resided either in North or East Haven, in crossing the East river in a canoe, were upset, and their infant, whom they were taking across the river in order for baptism, floated away from them. Being well wrapped up in blankets, the infant floated down the stream and lodged among the rushes, where he was taken up, having received no injury. His parents intended to have named him Richard, but from the circumstance of his being taken from the water and from the rushes, he was called *Moses*. He was a major of the militia, which was the highest military office in the county; he was also a judge of the county court, and an assistant judge of probate.

New Haven, Long Island and Philadelphia. At this period half an ounce of mulberry seed was sent to every parish in Connecticut, and the legislature for a time offered a bounty on mulberry trees and raw silk; 265 lbs. were raised in 1793, and the quantity has been increasing ever since. In 1830, 3,200 lbs. were raised. Two small silk factories have been established in this town by an English manufacturer, with swifts for winding hard silk; 32 spindles for doubling; seven dozen of spindles for throwing; 32 spindles for soft silk winding; and 2 broad and one fringe silk looms. There is machinery enough to keep 30 broad silk looms and fifty hands in operation. There are in the town two cotton factories. Screw augers and steelyards are manufactured here.

The inhabitants of this town have been distinguished for their ingenuity, enterprise and industry. About sixty years since Mr. Daniel Hartshorn of this place, invented the *buzz saw*, now so useful in the mechanic's shop. At the first he used it by hand, for cutting the teeth for horn combs. About this time, Mr. Nathan Palmer, a house joiner, and Andrew Hartshorn, a blacksmith, invented the *screw auger*. Steelyards were manufactured by Mr. Hanks, spectacles and surgical instruments by Mr. Fenton, at an early date. The double wheelhead was invented by Mr. Horace Hanks, about the year 1800, for the purpose of spinning silk. It was first used in the family of Mr. Wright. The first silk reeled from the cocoons was the work of the wife of the Rev. Mr. Martin, who had been in France, and had seen the operation in that country. Most of the manufacturing business done in this town, has been performed, in the "republican style," each one for himself in his own family.

The following inscription is from a monument in the yard a little south from the Presbyterian church.

Here lies the body of ye Rev. Mr. Eleazer Williams, pastor of ye chh. in Mansfield. Descended from venerable ancestors, but more nobly born from above; and with faithfulness, prudence, zeal and courage, improved the gifts and graces his divine Lord had intrusted him with; in ye work of the ministry here, being found with his loynes girt and looking for the mercy of the Lord Jesus to eternal life, at his master's call, he quietly fell asleep in Jesus, Sept. 21st, 1742, in the 55th year of his age, and ye 32d year of his pastoral work.—Them that sleep in Jesus will God bring with him.

SOMERS.

SOMERS is bounded N. by the Massachusetts line, W. by Enfield, E. by Stafford, and S. by Ellington. It is about six miles in length from north to south, with a mean breadth of about five miles. The central part of the town is 22 miles N. E. from Hartford, and 12 S. E. from Springfield, in Massachusetts. There is 1 Congregational and 1 Methodist church in the town; there is also a considerable number of Baptists, who are associated with the Baptist churches in the neighboring towns. The western section of the town is generally smooth and level, and free from stone. The eastern section is hilly and mountainous, with some heights of considerable elevation, affording an extensive and interesting prospect of Hartford, and the beautiful valley of the Connecticut.

Somers was formerly the southeast part of the ancient town of Springfield, granted by the General Court of Massachusetts to Mr. Pyncheon and his company. It was afterwards incorporated with the town of Enfield, and was part of the same ecclesiastical society, and so continued to be until about the year 1726, when it was made a distinct ecclesiastical society, by the General Court of Massachusetts, by the name of East Enfield. The town of Enfield, when incorporated, extended from Connecticut river to Stafford, ten miles. The first person who moved on to Somers was Benjamin Jones, of Welch extraction. He was from Enfield; and in 1706 moved on to this tract where he resided in the summer,* but moved back in the winter, and at other

* This was near the foot of the mountain, on the principal road which passes through the town from Enfield to Stafford.

times when danger was apprehended. But no permanent settlement was made until 1713, when Edward Kibbe, James Pease, Timothy Root, and John M'Gregory, with their families, joined with Jones, and made a durable settlement. Soon after, several other families became residents in the town, by the names of Horton, Killam, Wood, Collins, Citron, Davis, Sexton, Parsons, Blood, Purchase, Rockwood, Felt and Fisk. Their first pastor was the Rev. Samuel Allis, who was ordained in March, 1727. In 1734, the General Court of Massachusetts incorporated the society as a town by the name of Somers. It is said to have been thus named at the request of Gov. Belcher, in honor of Lord Somers, for whom he had a peculiar respect and veneration.* The town first transacted its business under the government of Connecticut, in 1749.

West view of Somers, (central part.)

The above is a view of the central part of the town, where the two principal roads intersect each other at right angles. The principal village is situated on a street running east and west, and extending about a mile. The building on the extreme right is the Methodist church, recently erected: there are perhaps 30 or 40 dwelling houses within half a mile of this building: the Congregational church is about half a mile to the north. There are in the village 4 or 5 mercantile stores, and one establishment, owned by Ebenezer Clark, Esq. for the manufacture of ladies' straw bonnets, being, it is believed, the only one of the kind in the state. At present about 30 hands are employed, and about 100 hats manufactured daily. Part of the material, or straw, of which they are formed, is imported from abroad. Mr. Clark commenced the manufacture of these hats or bonnets about six years since.

"In the year 1775, a malignant fever prevailed in this town. It began about the first of August, and raged three months. This sickness had been immediately preceded by the scarlet fever and dysentery, which carried off a number. Thirty six persons died that year, most of whom died of the fever, about one in twenty nine of the whole number of inhabitants in the town. It seized its patients with great violence, and frequently brought life to a close by the eighth day, and sometimes as early as the sixth. It rarely failed of attacking every person in the house where it entered, in its early stages. The people in general were filled with great consternation. Nurses were procured with great difficulty, and, in some instances, the sick must have suffered, if recourse had not been had to legal coercion." "The scenes of distress which opened among the sick and dying, can be remembered by us who were eye witnesses, but cannot be described."

* Dr. Trumbull.

The following inscription is on Dr. Backus's monument, in the graveyard by the Congregational church.

Sacred to the memory of REV. CHARLES BACKUS, who died Dec. 30th, 1803, Ætat. 54. As a minister of Christ, he faithfully declared his counsel, and was wise to win souls to God. As an ecclesiastical counselor he was skillful; and as a theological preceptor, he was deservedly celebrated. As an Husband, Father and Friend, he has few equals, and perhaps no superiors. He expired, repeating the angelic song, Luke 2d, 14th, Glory to God in the highest, and on earth peace, good will towards men.

STAFFORD.

STAFFORD is divided into two societies, or parishes, Stafford and West Stafford. It is bounded n. by the Massachusetts line, w. by Somers, s. by Ellington and Willington, and e. by Union. It is about $8\frac{1}{2}$ miles in length from east to west, and upwards of six in breadth. The face of the country in Stafford is hilly, and in West Stafford mountainous, abounding with primitive rocks. The prevailing soil is a gravelly loam, hard and dry, generally favorable for grass.

Northwest view of Stafford Mineral Springs Hotel.

This town was surveyed in 1718, and its settlement was commenced in the spring of the following year. The principal settlers were twelve in number. Two of them, Robert White and Matthew Thompson, were from Europe. Samuel and John Warner were from Hadley; Daniel and Josiah Blodget, from Woburn; Cornelius Davis, from Haverhill; Daniel Colburn, from Dedham; John Pasco, from Enfield; Josiah Standish, from Preston; Joseph Orcut, from Weymouth; and Benjamin Rockwell, from Windsor. The first minister, Mr. Graham, was settled in 1723.

There are several minerals in the town, of which iron ore is the most important. Several mines of it have been opened. The ore which is principally used is the bog ore, and is of an excellent quality. In 1779, Mr. John Phelps and others built a blast furnace on a large scale. Hollow ware, cannon, cannon shot, and a great variety of patterns for manufacturers, and other descriptions of machinery, were cast. In 1796,

another furnace was erected by Mr. Nathaniel Hyde and company. This, also, is upon an extensive scale.

The mineral springs in Stafford have justly acquired considerable celebrity. They are situated upon a stage road, between Hartford and Boston, six miles from Tolland court house, and 24 miles from Hartford. The view shows the appearance of the hotel, and most of the other buildings connected with the establishment, as viewed from the stage road which passes by, a few rods to the north. The principal spring rises behind the building nearest the hotel, on the banks of a stream, one of the branches of the Willimantic river. There is another spring a few rods westward.

The Indians first made the settlers acquainted with the virtues of these springs, when, in the year 1719, this part of the country began to be settled. "It has been their practice, time immemorial, to resort to them in the warm season, and plant their wigwams round them. They recommended the water as an eye water; but gave, as their own particular reason for drinking it, that it enlivened their spirits." It is said, that in 1766, these springs were carefully examined by Dr. Warren, who then had thoughts of purchasing the land on which they rise, with a view of establishing himself upon it. Subsequent events transformed the physician into a soldier, and Dr. Warren fell in the first great struggle of the Revolution, with the rank of a major general, at the battle of Bunker's hill. Dr. Willard afterwards put Dr. Warren's plan into operation, by building a large hotel for the reception of patients and others. The establishment is at present owned by Mr. Jasper Hyde, and its former reputation is fully sustained, and it is a place of much resort for the purposes of health or pleasure during the summer season.—"There are two distinct springs, the medical qualities of which are considered as essentially different. One of them contains a solution of iron, sustained by carbonic acid gas, a portion of marine salt, some earthly substances, and what has been called natron, or a native alkali. This spring has been known and used for a length of time, and has been pronounced by chemists to be one of the most efficacious chalybeate springs in the United States. The other spring, the medicinal virtues of which were not known till about the year 1810, contains, according to the opinion of Professor Silliman, (who examined it in that year,) a large portion of hydrogen gas, of sulphur, and a small proportion of iron."—"These springs did not acquire much celebrity until about the year 1765, when a case occurred calculated to establish and extend their reputation. It was an effectual cure of a most obstinate cutaneous complaint which had completely baffled all medicinal skill, and resisted all other applications. The publicity which was given to this case soon raised the reputation of these springs; and a consequence of which they immediately became a place of resort of persons afflicted with various diseases."

UNION.

"THE settlement of this town begun in 1727. The first and principal settlers were William McNall, John Lawson, and James Sherrer, from Ireland. The progress of the settlement appears to have been slow, and the town was not incorporated till 1734. It is bounded n. by the Massachusetts line, w. by Stafford, e. by Woodstock, and s. by Ashford. Its length is between five and six miles from north to south, and its breadth averages about the same distance. The central part of the town is about 33 miles northeasterly from Hartford.

"The surface of this town is broken, being hilly and rocky, and the soil generally unproductive. Mashapaug pond in this town is a beautiful expanse of water, and covers an area of about 800 acres. The population of Union in 1830 was seven hundred and eleven. "This town," says Pease and Niles's Gazetteer, "furnishes a striking example

of the inequality and injustice of the principle of representation in this state, and of the prevalence of the 'borough system' of England. Union, with a population of 752, and with a list of 17,000 dollars, has an equal representation with New Haven, which has a population of more than 7,000, and a list of 133,000 dollars; having more than nine times the inhabitants of Union, and paying nearly eight times the amount of taxes; and upon a more just principle of taxation, the difference in this respect would be more conspicuous."

 VERNON.

Southwestern view of Vernon, (central part.)

THIS town was first settled by persons from East Windsor, in 1716. It was originally a parish formed from East Windsor and Bolton, called North Bolton. It was incorporated a town in 1808. It is bounded n. by Ellington, w. by East Windsor and Manchester, e. by Tolland and Coventry, and s. by Bolton. The town is about 5 miles in length and upwards of $3\frac{1}{2}$ in breadth. The greater part of the town is uneven, being agreeably diversified by hill and dale. The soil is generally a gravelly loam, somewhat stony, yet considerably fertile. The eastern part of the township is crossed by a range of mountains, which is the eastern boundary of the great valley of the Connecticut. The most considerable streams are the Hockanum and Tankerooson, which supply water to several mills and factories. A cotton manufactory, for a long time the only successful one established in Connecticut, was erected in the western part of this town by Mr. Warburton, an Englishman. The manufacturing business is carried on in this town to a considerable extent. There are 4 cotton mills or factories, and 6 or 8 satinet factories, now in operation, and 1 paper mill. *Rock village* is about 1 mile below Snipsic pond and 14 from Hartford; it contains 6 satinet factories and 1 paper mill. *Tankerooson*, the cotton manufacturing village, is about 10 miles east from Hartford.

The cut on the preceding page is a western view of the Congregational church in Vernon, and other buildings in the vicinity, 12 miles from Hartford. The first meeting house in the town was upwards of half a mile east, on the summit of a hill. The Rev. Ebenezer Kellog was the first minister in the place. The following is the inscription on his monument in the ancient burying ground.

Rev. Ebenezer Kellog, died Sept. 3d, 1817, in the 81st year of his age and 55th year of his ministry in this place.

In yonder sacred house he spent his breath,
Now silent, senseless, here he sleeps in death,
These lips again shall wake, and then declare
A loud Amen, to truths they published there.

WILLINGTON.

THE township of Willington was sold and granted by the Governor and company for five hundred and ten pounds, to the following gentlemen: Roger Wolcott, Esq. of Windsor, John Burr of Fairfield, John Riggs of Derby, Samuel Gunn and George Clark of Milford, John Stone and Peter Pratt of Hartford, and Ebenezer Fitch. This sale took place in 1720. A few families had settled on the lands in this town previous to this time. "The settlers were from various parts of New England, and they moved on to the land one after another in a very scattering manner. The first minister settled in the town was the Rev. Daniel Fuller, who was ordained in 1728.

Willington is bounded n. by Stafford, w. by the Willimantic river, which divides it from Tolland, e. by Ashford, and s. by Mansfield. It is upwards of seven miles in length from north to south, and four and a half miles in breadth. The surface of this town is hilly and broken, abounding with stone. The summits of the mountains and hills are generally covered with granite and other rocks. Iron ore to some extent has been found in this town. The central part of the town is about 24 miles easterly from Hartford.

Willington, June, 1784.

Whereas of late years, there has been advanced for a certainty, by a quack Doctor, a foreigner, that a certain cure may be had for consumption, where any of the same family had before time died with the same disease; directing to have the bodies of such as had died to be dug up, and further said that out of the breast or vitals might be found a sprout or vine fresh and growing, which together with the remains of the vitals, being consumed in fire, would be an effectual cure to the same family:—and such directions so far gained credit, that in one instance the experiment was thoroughly made in Willington. On the first day of June instant, two bodies were dug up which belonged to the family of Mr. Isaac Johnson of that place; they both died with the consumption. One had been buried one year and eleven months, the other one year, a third of the family then sick. On full examination of the then small remains by two doctors then present, viz. Doctors Grant and West, not the least discovery could be made; and to prevent misrepresentations of the facts, I being an eye witness, confess that under the coffin were sundry small sprouts, about an inch in length, then fresh, but most likely they were the produce of sorrel seeds which fell under the coffin when put in the earth; and that the bodies of the dead may rest quiet in their graves without interruption, I think the public ought to beware of being led away by such an impostor.

MOSES HOLMES.

APPENDIX.

[The following account, respecting a tribe of Indians who formerly resided in Glastenbury, was furnished by Gideon Welles, Esq. to whose politeness the author is also indebted for other facts relating to the history of his native town.]

Tradition tells of a brave tribe of aborigines which occupied a position a little south of the center of the town, known by the name of the Red Hill Indians. They were a branch of the Pequots, and between them and the Mohawks there were unsparing and relentless hostilities. The Red Hills had a fort on a very precipitous hill, which was strongly fortified on the east, but towards the river, on the west, the besieged relied principally on large logs and stones, which they rolled down upon their enemies, if they attempted to ascend the eminence.

Spies and friendly Indians informed the Red Hills of the advance of their enemies, who immediately gathered their women and children within the fort; and, on several occasions made a gallant defense,—repelling the Mohawks with great loss. At length the Mohawks, whose numbers far exceeded those of the Red Hills, and who had usually made their most desperate effort by trying to ascend the hill, resorted to stratagem.

Word came to the Red Hills that the "Mohawks were coming," and they hastily gathered their little tribe within the fort. But the Mohawks did not make their appearance, and after waiting for some time in vain, the Red Hills despatched a small number up the river, for the purpose of reconnoitering. Near the upper part of East Windsor or Enfield, the party struck upon a trail, which they followed in a southeasterly direction until they came to the head waters of Roaring Brook, near Minchaug mountain. Here all traces ceased,—no trail, nor track, nor scent, could be found.

Subsequent events showed that the Mohawks had at this place entered the stream, and, that they might not be traced, had waded down the entire distance to near the mouth, where were the fort and village of the Red Hills. The scheme was successful. The hapless Red Hills were surprised, and experienced more than savage vengeance. The Mohawks spared not one of the race. This horrid butchery is said to have taken place about the period when the first settlers emigrated to Connecticut. Although the whites had no part in this tragedy, the bloody legend was remembered and told, and the froward child was often subdued by the terrific exclamation, "the Mohawks are coming."

[For the following account of Chaplin the author is indebted to Walter Goodell, Esq. of Chaplin: it was not received in time to have it inserted in its regular place.]

CHAPLIN.

CHAPLIN, a small township in the westerly part of Windham County, was formed from the towns of Mansfield, Hampton, and a small section of the town of Windham. It is bounded n. by Ashford, e. by Hampton, s. by Windham, and w. by Mansfield. The principal part of the township, however, was included in the limits of Mansfield. It is five and a half miles in length from north to south, and averages about three and a half in width, containing about nineteen square miles.

Among the original settlers in the easterly section of said Mansfield, was Deacon Benjamin Chaplin, who removed from that part of the town of Hampton which formerly belonged to Pomfret, and located himself near where the meeting house now stands, in the present town of Chaplin. To his energetic efforts, in a great measure, was owing the formation of a society here, which was incorporated by the Legislature in 1809, and called Chaplin, after the name of its friend and benefactor. In 1822, this society obtained an act of incorporation, as a town, by its present name. A church was formed here, May 31st, 1810, with whom the Rev. David Avery labored as an evangelist some length of time; but it remained without any settled minister until the year 1820, when the Rev. Jared Andrus was ordained as pastor, December 27th.

His ministry continued ten years, when he was dismissed in consequence of some dissatisfaction among the people of his charge. His successor, the Rev. Lent S. Hough, was ordained August 17th, 1831, and continued as stated pastor till December 20th, 1836, when he was dismissed in compliance with his previous request. The ecclesiastical society here have a permanent fund, amounting to \$5,000, secured by bond and mortgage, the interest of which is annually appropriated "toward the support of the gospel ministry." Among the principal donors of this fund, was Deacon Benjamin Chaplin, who contributed the sum of 300*l.* and by other individual subscriptions it was increased to the sum before mentioned. In works of benevolence and charity, Deacon Chaplin was ever found among the foremost of his day. He was an economist of the "old school," and the strict attention with

which he managed his farm and all his domestic concerns, enabled him to accumulate wealth rapidly, and to add yearly to his possessions, until he became the owner at one time of 3,000 acres of land, including a very considerable part of the town which now bears his name.

There was likewise another large territory, mostly wood land, lying chiefly within the limits of this town, and which formerly belonged to the "Welles family," at present in the care of the Hon. John Welles, of Boston, Mass. Within a few years past, however, this land has nearly all been taken up, and is now under good cultivation.

The town of Chaplin is intersected by the Natchaug river, a never failing stream of water, which passes through it diagonally from the northeast to the southwest. On this stream are many valuable mill seats and eligible sites for factories or water works of any description. The surface of the town is generally uneven, with a soil considerably strong and fertile, particularly in the valley of the Natchaug, where may be found as good land as in any part of the state. The principal village is located near the center of the town, on the west side and within a short distance of the river, upon a small elevation of land, and consists of about 30 dwelling houses, a Congregational meeting house, school house, post office, 3 mercantile stores, 1 jeweller's shop, 1 tavern, 1 hat factory, and a number of shoemaker's shops, all situated on one street, of more than a mile in extent. The distance from Brooklyn, the county seat, is 11 miles, from Norwich 22 miles, and from Hartford 33 miles. Great attention is paid in this town, as well as in the adjoining town of Mansfield, to the culture of silk. About 1,200 lbs. of the raw material are annually produced here, which would bring, when wrought into sewings, \$9,500. The labor of rearing the worms, reeling and spinning the silk, and preparing it for market, is wholly performed by females, who make it quite a lucrative business. About 40 hands are also employed in the manufacture of calf skin boots and brogans, who turn out work annually to the amount of \$30,000. There are likewise in this town 2 grist mills, 5 saw mills, and 3 shingle mills, from which more than \$12,000 worth of oak and chestnut lumber is sold yearly. A carding machine and clothier's establishment are also doing a respectable business. During the year 1835, the Messrs. Lyons of Boston purchased a site on the Natchaug river, half a mile south of the village, and erected a paper mill, upon an extensive scale, with 4 run of engines, where they manufacture paper, principally for the New York market, to the amount of \$65,000 annually. Owing to the rapid descent of the water near these mills, some of the finest privileges are here to be found for manufacturing purposes of any in the state. A county road passes north and south through the town, adjacent to the river, on which a tri-weekly mail is carried, connecting with the Hartford and Providence stages at Ashford and Windham. In the summer season the wild scenery of nature, which meets the eye of the traveler in passing up and down on this route, winding his way along the banks of the Natchaug, is delightfully romantic. The present population of Chaplin is about 1,000.

The following is the inscription copied from the monument in memory of Deacon Chaplin.

DEACON BENJAMIN CHAPLIN, that Friend of Man, that supporter of the State, that ornament of the Church, who, having witnessed a good Confession for the doctrines of grace, for the purity and perpetuity of public worship, a faithful steward of his Lord's goods, provided liberally in his last will and testament towards a permanent fund for the maintenance of the Gospel ministry, and, after he had served his own generation, by the will of God, fell on sleep, March 25th, 1795, in the 76th year of his age.

'Tis but a moment bounds our latest breath,
 A span hath well describ'd the narrow space,
 O! be it thine, that read'st, to think of death,
 Be it thy prayer to know the Savior's grace:
 For soon the Archangel's trump will rend the air,
 The dead shall hear, and hearing, all shall rise,
 All that have died shall in that summons share,
 And stand before the dread tribunal of the skies.
 But, oh! how different their hopes and fears!
 Description cannot paint the awful day!
 For some will rise to pain of endless years,
 Darkness and woe, without one cheering ray.
 But rising saints will lift their joyful eyes,
 Will see the earth depart, and all terrestrial good,
 Will then be blest, and mount above the skies,
 To dwell within the mansions of their God.
